Deposit in the United States, Dublin and Mr. Dessinge, Pharm. Gr. Orleans, St. Gervais, 12 rue Bonaparte, Paris.

DR. RUE MARTIN'S VERMIFUGE ROB.

Without any disagreeable Taste or Stil.

THE MELIA ANNAMARA, (Fruits Bejeuns) Lisbon, Portugal, Lucanal: Monsieur, Vermifuge, Class XIII, order II, Medicine—Tuesday, CLXXI, Arbre nature, one of the most beautiful trees in the forests, the root of which for some time past blown, by a Portuguese, only prepared the best vermifuge, together with the principal agent in the above-named remedy.

Having sought with the greatest care in the bark the root of this tree, the active principle which produces such has results to vermicidal, diffusion of which have succeeded in extracting it in its purest state, by combining it with other medicinal plants which are indigenous to Lousiana, have arrived at composition which I have tried the efficiency of which is not beyond the shadow of a doubt.

This Syrup, of an agreeable flavor, can administered without the slightest apprehension to the most delicate children. In one continued during three days, the active principle, which is the most vermicidal and vermicide, will infallibly expulse all those intestinal worms which are the source of so many diseases, fatal ones and often fatal to children.

Some mothers, rendered timorous by the frightful ruin of the various vermifuges hitherto employed, have given it to their children, but to doses extremely small. This has, in such cases, rendered the effect insufficient, and might have injured the standing of this remedy, had an error of our mass experimentation, by only prescribing it and regulating the doses adapted to the different ages tested and established its excellent virtues.

To avoid debilitating the little patients, the dose, which is established in doses equally prescribed, in the following manner:

Children 1 to 7 years old, three tea spoonfuls a day, at an interval of from 1 to 2 hours. Above five years old, three table spoonfuls at the same intervals. No scruple must be given between the first and third dose, nor within an hour after the third.

The Syrup cannot be administered during three consecutive days. Compound entirely of vegetable extracts, this vermifuge does not produce any of the purgatives effects which have often followed the use of those hitherto in use.

Prepared and sold by

Chemist and Druggist,
Cure of Dumbfries and Castelnaudary.

DR. EDOUARD MARTIN'S HYGIENIC ELIXIR,

Against Sex-Sickness.

FOR a long time past the medical world, medical men especially, appear to have been struck with the remarkable lack, that among the innumerable Opinions of Medicine against disorders, not one had been found to contract or even mitigate the dreadful effects of sex-sickness. Several remedies have tried to obtain this end. These remedies, whether simple or compound after many trials, have hitherto proved failures and failures. Nothing has been formed by the perusal of the annals of Pharmacy, Chemistry and Medicine of all countries, published within the last forty years.

The inventor of the "Hygienic Elixir," has at length made this desired discovery, after many years and trials, changes and alterations in the proportions of the substances composing this Elixir, he is enabled to offer it to the public, and to the sex-sickness, slowly consumed, nothing more would be required and you would be entitled to the everlasting gratitude of all those who are obliged to travel by sea without being accustomed thereto.

I am yours truly,

Signed, J. LABORY, Comt. Ship Orsar.

The improvement suggested by Capt. Labory, has been adopted. The Tonic Elixir, Elixir against sea-sickness, in addition to the other qualities will glass stoppers. Care must be taken to keep the bottles sealed, to prevent evaporating.

For sale wholesale and retail, by

F. E. MOUGIN,
Apothecary, New Orleans.

Sole agent of the proprietor, Dr. Edward Martin.
