NO. 194. STATE PAPER. SATURDAY MORNING, MAY 16, 1835. VOL. VIII

CELEBRATED CASTILLON POWDER.
THE widow Carthy of Philadelphia, proprietor of all the receipes of the late doctor Castillon of Cape Français has made our apothecary store a place of deposit for Doctor's Castillon's celebrated anti-scorbutick and restorative powders. This Gentleman was formerly King's Surgeon in St. Domingo. We appointed by the proprietor agents for the sale of his receipes in this city.
These specifics have constantly succeeded in all parts of the Island of St. Domingo; they will cure the scurvy of all diseases originated from Scorbutick virus, diarrhœa, dyssentery, tenesmus, lientery, slow, intermittent and continual fevers, obstructions of the liver and of the spleen—the diarrhœas most inveterate, dyssenteries and tenesmus, originating from the measles and the malignant small pox—and those diseases consequent to deliveries and pregnencies.—The powder mixed with milk produces a very pleasant and nutritive pap—destroys all the putrid humors in the stomach and intestines—restores digestion and all secretions by purifying the blood of all scorbutick causes.
The length of the time necessary to get cured varies from 20 to 30 or 40 days, according to the ancientness or malignity of the disease—these specific remedies are to be found constantly at our apothecary shop, where a summary of all the extraordinary cures that were effected by these remedies are published. The public will find it very advantageous to use them as they may cure themselves to the directions given with the remedies.

D. T. EVENS
DENTAL SURGEON,
No. 147 CHARTRES STREET,
TAKES this method of informing his friends and the citizens of New Orleans, that he still continues the practice of Dentistry, and is at all times prepared to perform the various operations on the teeth and diseases of the gums; also, the irregularities of children's teeth; natural and artificial teeth inserted from one to a full set, on plate or otherwise as may be required; diseased teeth extracted with the least possible pain, with Mr E's improved key instrument; a diagram of which is shewn above. The advantage of this instrument over any other now in use are these, viz.—1st, the application of the spring attached to the shaft of the instrument and resting on the top of the hook, thereby preventing the possibility of its ever slipping from the tooth when applied, but when the least rotary motion is given, the tooth is loosened and drawn perpendicularly out without the aid of the forceps. From the flattering manner in which such of the faculty as have seen it, have spoken of the same and the decided advantage it has over similar instruments, he deems it useless to degress any further on its merits.
The impossibility of shewing by a draft, the instrument to be understood by all who read, he respectfully invites all those desirous, to come and judge for themselves.
