CHANGE.

INSECT PENT.

A NEWLY invented powder for destroying an insect that is now all over the house at No. 60 St. Charles st. adjoining the Exchange. Hotel of such an elegant and novel form and construction, and with universal approbation.

As a simple protection against many more from all insects, it is certainly the most convenient, as it can be used in the most delicate and to persons most sensitively fearful of taking cold. The trial of a single box will prove the truth of its virtues. It is also well that it may be carried in the pocket, or left on any other room, to which the insects may be in the habit of visiting. It is also well that it may be quickly unfolded and put in the place. The time required to turn the heat or to fold it up, is but a few minutes. There never there no more than one in use. It will be an ornament to a room instead of an unsightly memento, and is so simple in its construction that it cannot get out of order. It is produced to be a very lasting, reading, writing, lining and sleeping under, and to be used in dwellings, counting houses and offices, and may be used by fashionable sportsmen or persons of pleasure in the country woods. People never know the comforts that may be had in sleeping in the water in the country until they try one of these. Gentlemen who are fond of fishing, shooting, &c. &c. will find it a very great improvement and any desired purchaser in Orleans Parish now in the country, at 8 dollars and 50 cents. Persons who have purchased, and have used it, will testify that it will make a light of 7 or 8 dollars, and persons from a distance can have it sent to them by mail, or any other conveyance, on receipt of the money. The cost of one is only half a dollar. Persons who have purchased, and have used it, will also testify that it is perfectly safe, and that it will not injure the most delicate and sensitive constitution of the ladies, or children, or any other person. The new insect powder is really one of the most useful and valuable discoveries of the day, and it must be in the hands of every family, office or the country.

The above description of the insect powder may appear extravagant and calculated to give a false estimate of its value, but the matter is so too often the case with valuable inventions and advertisements of new things, but the public may be assured that no such art will mislead, or deceive, in this article, or which people will be disappointed by calling at the above store.
