ANTEPHELIC MILK.

TEN THOUSAND PLASKS RECEIVED IN TOWN.

No More Wrinkles! No More Freckles!

Preservation and Regeneration of the Skin by the Complexion.

ANTEPHELIC MILK, so advantageously known in Europe for its marvelous effects in the preservation of the human complexion, which never fail to be invaluable, is now offered to the public for the first time in this country. Years of constantly increasing demand have proved that the Antephelic Milk has not yet encountered a rival, and that it is still the most approved and popular compound, which has not at least given way to its superiority, clearly only, and not the clearest and prettiest complexion.

Antephelic Milk is not only an infallible specific against the ravages of time, but, when mixed with water, and employed a quarter of an hour before the morning ablution, it purifies the skin, without injurious stimulating, it gives to the coloring matter, whether pale, sandy or yellow, a delicacy and purity of tint, which is the charm of the skin; prevents the retaining of freckles, pimples or prevents the formation of early wrinkles; and by its specific energy, it gives to the skin, the precise tint for the greatest beauty of the complexion.

A single bottle will suffice to give to the skin all the approaches of youthfulness, which may be induced by exposure to the elements, or by the ravages of time.
