[From the Boston Patriot.]

We have lately seen it stated in the papers, that Gen. ANDREW JACKSON voted against a Resolution in Congress, offering to Gen. GEORGE WASHINGTON, a vote of thanks for the great public services he had rendered the country;—and I wish to inquire, (Gen. Jackson, or some of his friends can probably answer the question,) if this statement is true? For, if such a vote stands upon records, refusing to grant so small a tribute for so great a boon, to the man who justly was, and ever should be "first in the hearts of his countrymen," then, I say, no man who is an American at heart, should give his suffrage to the author of an act of such flagrant ingratitude towards the 'Father of his country.' And we feel assured, should such be the fact, that those who are proud to call themselves the countrymen of Washington, will never consent to elevate the man who has thus refused to "honor him whom all men should honor;" especially to the important station to which he now preposterously aspires. We profess our unwavering admiration for the character of Washington. Our country, it may be said, is indebted to him, and a few of his associates, for her independence; and he, therefore, ever severely censure any indignity which has been, or may be manifested towards him. These remarks are not made by an individual who favored the election of the present incumbent; but by one who voted for the Crawford ticket in 1824; and who now deems it but an act of common duty to declare, that he believes the present opposition to the government is without cause, and therefore without principle. REGULUS.

GHENT, Sept. 16.

Steam-boat on a new construction.—Yesterday arrived here, for the first time, the steam boat which is to ply regularly between this city and Antwerp, for the conveyance both of goods and passengers. The construction of this steam boat is quite new, and wholly differs from that of other steam boats, the wheels being placed, not on the sides, but behind. Mr. Roentgeres, builder to the Netherlands Steam Boat Company, at Rotterdam, has effected this judicious alteration, and thus solved a problem which the English, French, and Americans have considered impracticable. This new vessel gives great satisfaction, both by the rapidity of its progress and the facility with which it is managed. Mr. Roentgeres has obtained a patent for his invention.

BAYONNE, Sept. 11.

An insurrection has commenced in Navarre, and an action took place a day or two ago at Tudela. Though the authorities succeeded in restoring tranquillity for the moment, very great and well-founded alarm prevailed when my informant left the town. The rebels were headed by the Aides-de-Camp of Santos Eudron and Juanito, who, in 1823, were the Chiefs of the Army of the Faith. The insurrectionists are said to have extensive connection with the leaders in Catalonia, and they have agents in Guipuscoa, and Old Castle, so that the supposition prevails that ere long the whole of Spain will become the theatre of commotion and disorder. Tudela is about sixty miles from Pampeluna, and the present population is reckoned at seven thousand, which, for a town of such small extent, is considerable for Spain.

BALTIMORE, Nov. 21.

Steam dredging Machine.—We witnessed with great satisfaction yesterday, in the full tide of successful experiment, the operations of the new steam dredging machine, erected by order of the corporation, under the superintendence of the city commissioners. The spot chosen for the trial is directly west of the lower end of Bowly's Wharf, upon very hard gravelly bottom, which, we understand could not be effectually the scoops of the mud machine hitherto used. The experiment succeeded completely, as the revolving buckets, seven in number we think, came up rapidly in succession with full charges of mud and gravel. It is extremely satisfactory to have ascertained that the dredging machine answers fully the purpose for which it is intended, as great expences have been incurred in keeping our harbor free from the alluvial deposit carried thither by the streams that empty themselves into it. The rapidity and effectual manner with which the machine works, promises to make ample returns for the expences incurred in its construction.—*Chron.*

THE FRENCH COMIC OPERA.

The brilliant success of the French *Troupe* during their late visit to our city, and the concourse of beauty, fashion, and taste attracted by its performances of the Operas of Etienne, St. Just, &c. and of the music of Nicolo, Boieldieu and Daleyrac, may be regarded as the commencement among us of a new dramatic era. It is not our purpose at this time to enquire into the probability of an increasing fondness for, and more enlarged knowledge of French poetry and literature, consequent on this event. But we seize the present, as a favourable occasion, to give a sketch of the origin and history of the Comic Opera, to the merits of which many of our readers have borne signal testimony.

"The French," says Sismondi, "are the only people, who, in poetry, look to the object of the composition ; and they, perhaps, understand better than any other nation how to accomplish their purpose. They, therefore, always write with a definite aim in view ; whilst other nations conceive it to be the essence of poetry not to seek any certain object, but to abandon themselves to unpremeditated and spontaneous transports, courting poety from inspiration alone." These remarks are more especially applicable to the Drama of France. Her poets, guided by the unities, have given us some of the most perfect tragedies in modern times ; aided by wit and argument, her writers of comedy have exhibited, with unrivalled success, the foibles and inconsistencies of man in the artificial state of society. But it is in the satirical vein, in the display of the comic and ludicrous, in character and conduct, that the French have been more felicitous than any other European nation. Their Vaudeville and Comic Opera are the offspring of a people at once lively and inquisitive, gay and shrewd ; impatient of imagination, whenever it becomes too vague to aid invention, and of sentiments which cannot be sustained by argument. Endowed with the liveliest perception of the extravagance of unmeritted pretensions of all kinds, whether in politics, literature or morals, they delight not so much in punishing severely, as in pointedly exposing it by poignant satire and ready jest. These have always been the most powerful weapons in the hands of the French people, and ...the earliest ...almost served ...in the place of a ...and a representative chamber.

REMOVAL.

SULPHUROUS BATHS.

DOCTOR RENOU, has the honor of informing his colleagues and the inhabitants of New-Orleans and of Louisiana, that he has removed his establishment of *Sulphurous Baths* from St. Ann Street, No. 122 to Barraks Street No. 156, at the corner of Burgundy in the house lately occupied by Dr. Formento.

It is generally known, how much benefit is obtained by sulphurous bath in cutaneous diseases, rhumatic complaints, palseis and other serious complaints, it is needless to quote here the numerous instances of immediate cure and relief afforded by the application of that remedy.

Mr. Renou has availed himself of his removal, in constructing a new apparatus and making his establishment free from any kind of reproach that could have been made to the former one.

The room for the reception of white people is totally separate from the one fixed for negroes.

His new lodgings afford him the means of receiving certain number of sick persons wishing to board at his house.

He has provided a spacious hospital, and his house being situated in a retired part of the town less crowded with houses than others, makes the situation perfectly wholesome.

Prices for 12 Baths, . . . $ 16 ,,
" 6 ,, ... 9 ,,
" 1 ,, ... 1 50
For treatment of negroes per day, 1 ,,

Doctor Renou will however take with the persons who will apply to him all possible arrangements.

During the last year of his practice in Paris, Doctor Renou has been intimate with the celebrated Dr. Ducamp inventor of the most efficient method of curing ischurgs (retention of urine,) and he had especially addicted himself to the treatment of that disease ; he has now in his possession a complete collection of all the instruments necessary thereto. He may ensure to those persons affected with the above complaint, who will apply to him, a prompt and safe cure from his method of treatment. dec. 24

BY ISAAC L. M'COY.

SUGAR ESTATE.—On Wednesday the 16th ... ensuing, at 12 o'clock, at the Exchange Coffee House, will be sold the valuable Sugar Plantation called "Magnolia Grove," situated in Terre-aux-Bœufs, about 16 miles below New-Orleans, and about 4 miles from the Mississippi, containing 1520 superficial arpents of land, having two fronts, each 19 arpents upon the Bayou Terre aux Bœufs, by 40 arpents in depth ; together with the improvements thereon, consisting of a frame dwelling house of 6 apartments, kitchen, sugar house with one set of 6 kettles, mill house with an excellent english iron mill, purgerie capable of containing about 200 hhds sugar, farming utensils, consisting of carts, ploughs, &c. negro cabins, stable, gardens, together with a stock of horses, mules, oxen, cows, sheep and hogs, and thirty-four SLAVES. The land is well situated, well drained, easily to be cultivated, and celebrated for the production of fine sugar. A crop of 260 hhds of sugar was made last year, and with an adequate force it is supposed would produce 100 hhds more. The supply of wood is ample, and there is a small canal to facilitate its transportation. There is a small portion of the land (which forms a drain for the other parts of the estate) that might be profitably employed in the culture of rice ; for the next years crop, there are 80 arpents of ratoons and it is supposed a sufficiency of plants to plant 250 arpents. This estate possesses the great advantage of not being subject to inundation by overflows, and no expense is incurred by the erection of any kind of Levees.

Conditions—Billets at 1, 2, 3, 4, and 5 years with interest from the day of sale at the rate of ... per cent per annum, secured by mortgage on the property, together with such other additional security for one half the amount, by endorsement or otherwise, as may be deemed satisfactory by the vender. Also, at the same time and place, will be sold separately, on a credit of 12 months with approved security, 12 valuable Slaves, who have been employed on the aforesaid plantation for several years past.
