TO PLANTERS, FARMERS, &c. &c. By Her Majesty's Royal Letters Patent.—The valuable Hand Mill, by which one man can grind and dress one peck of wheat per hour by a single operation.

The Patent Mills are manufactured for grinding wheat, Indian corn, coffee, rice, and almost any dry substance, and will perform considerably more with less labour than any mill yet brought before the public in this country or Europe.

They are made with either metal grinders or stones, and to suit the extent of power; and they are particularly adapted for being attached to thrashing machines, steam-engines, water wheels, horse or ox power, renders them invaluable to agriculturists, and to millers, planters, public institutions, grocers, emigrants, &c.

The mode of applying this power is upon an entirely new principle, rendering more men to work in a given time with less fatigue than any plan now in operation.

Planters, farmers and others may be supplied with mills by which one man can nipple three bushels of beans, grind three pecks of barley, or crush one bushel of oats per hour. Also mills of another kind for shelling, grinding from 25 to 35 bushels of beans, grinding three bushels of barley, or crushing four bushels of flour. These mills may be easily attached to a thrashing machine.

The simplicity of their arrangement nearly prevents the possibility of their getting out of repair.

Apply to GOW. 29 Bienville st.

The above may be seen at Banks' Arcade. 62
