

## The authoryear-comp style

This style is a compact version of the `authoryear` style which prints the author only once if subsequent references passed to a single citation command share the same author. If they share the same year as well, the year is also printed only once. This style will implicitly enable the `sortcites` package option at load time.

### Additional package options

#### The dashed option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option `dashed`. Setting `dashed=false` in the preamble will disable this feature. The default setting is `dashed=true`.

### Multiple citations

Aristotle 1877, 1929, 1968; Knuth 1986a,b,c
