

HP Pascal Workstation Developers Kit
B3466A

Product

Source code for selected (see below) Pascal Workstation drivers and libraries.

Restrictions

This product is for internal use only. This product may not be distributed, marketed, sublicensed, or transferred in any way.

Support

HP will not provide any installation, support, maintenance, or training of any kind for the Pascal Workstation Developers kit. Additionally, HP will not provide updates, revisions, enhancements, or fixes to the developers kit.

Media Contents

Each floppy contains a README file (README.TEXT), a stream file (MAKE_<floppyname>.TEXT) for building the source on that floppy, and the actual source files. Also, the SCSI: floppy contains the Modcal version of the Pascal Workstation COMPILER, and the RS232: floppy contains the Modcal version of COMP20. The Modcal versions of these compilers are required for building the source.

The volumes and modules that can be built from the sources on them are as follows:

SCSI: SCSIDISC, SCSILIB, SCSIDVR
CRTS: CRT, CRTB, CRTC, CRTD, CRTE, CRTF, CHOOK
LAN: LANDVR, IOMPX, DATA_COMM, SRM, LAN
IO: HPHIL, MOUSE, LIF_DAM, WS1.0_DAM, EDRIIVER, ETU.CODE, SEGMENTER, LIBRARY, IO
RS232: PRINTER, AMIGO, CS80, RS232, F9885, BUBBLE, EPROMS, VMELIBRARY
HPIB: DISCHPIB, HPIB, DMA, DISC_INTF, GPIO, PARALLEL
KEYS: A804XDVR, KEYS, NONUSKBD1, NONUSKBD2, BAT, CLOCK, DGL_ABS, DGL_REL, IODECLARATIONS, REALS, REVASM, DEBUGGER, ASC_AM, CONVERT, TEXT_AM
DGL: GRAPHICS, FGRAPHICS, FGRAPH20

Building

A Pascal 3.25 system is needed to build the sources. The stream file on each floppy should be adequate for building the sources on that floppy. Contact Roberta Gamza at Software Systems and Services within HP if you have any questions about this product.
