

Exidy 80/1 Small Business System

Heretofore, computer systems for business applications have been affordable almost exclusively for the larger business firms, by virtue of cost and special training required to operate the system.

Exidy, the price/performance leader in microcomputer and disk based systems, introduces the cost effective 80/1 Small Business System with the following features:

- 63-key typewriter-style keyboard with 16-key numeric pad;
- Industrial grade 12" CRT with non-glare screen;
- 128 upper/lower case characters; 128 user-defined graphic symbols;
- 2 disk drives with 616,000 formatted bytes of data storage;
- CP/M Operating System and Extended Disk Basic;
- 80/132 character bidirectional dot matrix printer;
- 300 or 1200 baud data rate; full 96 ASCII character set
- Micro Biz software applications package that includes:
 - Ledger: Journal, Trial Balance; P & L Statement; Balance Sheet
 - Receivable: Customer payments; Aged trial balance; Cash projections
 - Payable: Payables by vendor and by date; cash requirements
 - Inventory: Issue or receive transactions; stock and ABC analysis EOQ; job costing
 - Personnel: Personnel and Payroll data entry; Compute Payroll; Print Paychecks

The Exidy 80/1 Small Business System is cost effective, easy to use with no extensive programmer or operator training required, and also has word processing capability, optional.
