AV7300 82 Channel UHF/VHF Component Tuner

82 Channel Broadcast Reception • permits tuning of all 82 standard UHF and VHF television channels.

Works With Any Composite Color Monitor • provides broadcast reception on any color monitor which accepts composite color signals.

12 Station Pre-Set Selection • allows the user the capability of easily selecting — with one button convenience — any of twelve pre-tuned channels.

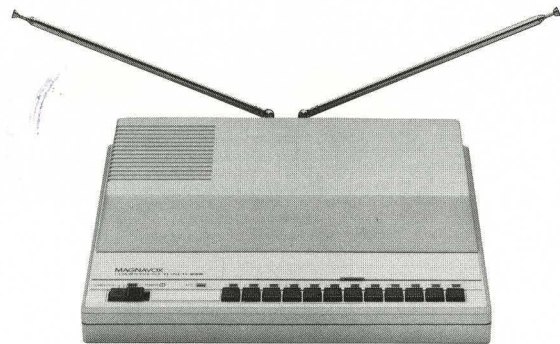

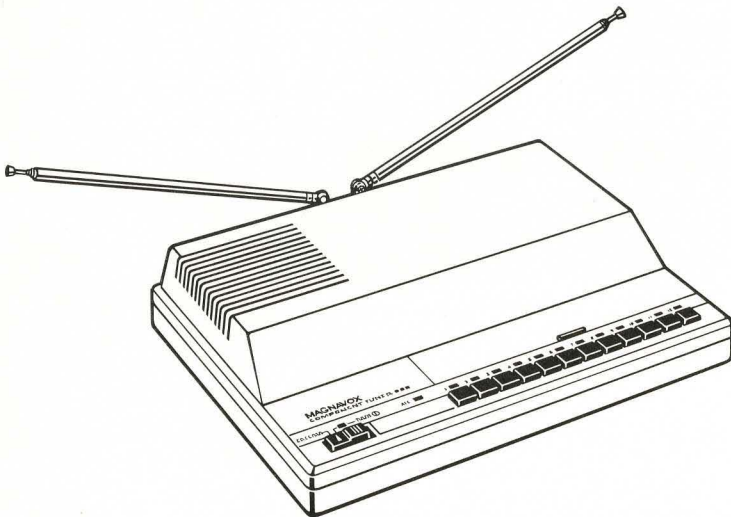

Automatic Computer/Broadcast Switching • automatic input/output switching allows the user to connect the tuner directly between computer and monitor. When the tuner is switched off, the monitor is automatically connected to the computer — when the tuner is switched on, TV picture information automatically replaces the computer's text image.

Automatic Fine Tuning • a special circuit which keeps the selected channel perfectly tuned, even under adverse signal conditions.

Composite Video/Audio Outputs • provide for easy connection to any composite color monitor.

Rod Antenna Included • providing for off-the-air reception anywhere the tuner is used. A female "F" connector is also included which provides connection capability to cable systems.

Interface Cables Included • all cables necessary to connect the tuner between computer and monitor are included with the tuner.
