

## Short Titles of S&amp;EC Group Problems

100 Comprehensive System of Service Routines  
101 C. Optical Properties of Thin Metal Films  
106 C. MIT Seismic Project  
107 C. Autocorrelation and Fourier Transform  
108 C. An Interpretive Program  
120 D. The Aerothermopressor  
122 B. Conicmb Wave Functions  
123 C. Earth Resistivity Interpretation  
126 C. Data Reduction  
130 C. Six-component Distillation  
131. Special Problems (staff training, etc.)  
132 C. Numerically Controlled Milling Machine  
140. Summer Session System  
141. S&EC Subroutine Study  
150. Drum Comprehensive System  
151 B. NIM  
155 D. Synoptic Climatology  
156 A. Reflection in a Semi-Infinite Rect. W.G.  
159 D. Water Use in a Hydroelectric System  
162 C. Nuclear Scattering Phase-Shifts  
166 C. Delta-Wing Flutter Model Study  
167 D. Batch Distillations with Holdup  
168 C. Indicial Downwash Behind a 2D Wing  
172 B. Overlap Integrals  
173. Course 6.537, Spring 1954  
174 C. Tight Binding Calculations In Crystals  
177 D. Low Aspect Ratio Flutter

- 179 C. Transient Temperature of a Box-Type Beam
- 180 B. Crosscorrelation of Blast Furnace Data
- 183 D. Blast Response of Aircraft
- 184 D. Scattering of Electrons from Hydrogen
- 186 C. Human Op. Tracking Response Characteristics
- 188 C. Water Production in Oil Reservoirs
- 189 C. Gustiness in the Free Atmosphere
- 190 D. Zeeman and Stark Effect in Positronium
- 191 B. Earthquake Epicenter Location
- 193 C. E.V. Problem for Propagation of E.M.Waves
- 194 B. Augmented Plane Wave Method(Sodium)
- 195 B. Intestinal Motility
- 196. Single Address Computer
- 197. Three Address Computer
- 198. Student Problems for SAC and TAC
- 199 C. Compressible Flow in a Tube
- 200 C. A Study of Recurrent Events
- 201 C. Study of the Ammonia Molecule
- 203 C. Response of a Building Under Dynamic Loading
- 204 C. Exchange Integrals Between Real Slater Orbitals
- 205 C. Check for REAC
- 208 C. Interceptor Flight Control Problem
- 210 A. Residue-Indices and Primitive Roots
- 211 C. Servo Response to a Cosine Pulse
- 212 C. Dispersion Curves for Seismic Waves
- 213 D. Industrial Process Control Studies
- 214 A. Interval Distribution
- 215 B. Plant Surveys by Statistical Methods
- 216 C. Ultrasonic Delay Lines
- 217 A. Atomic Wave Function and Energies

- 218 C. Stage B for Diatomic Molecules
- 219. Linear Programming
- 220 A. Problem Arising from An Algebra
- 221. Course 6.25, 1954
- 222 B. Helicopter Rotor Stability
- 223 C. Investigation of Turbulent Flow
- 224 C. Vertical Velocity Fields
- 225 B. Neutron-Deuteron Scattering
- 226 D. Circulation of the Atmosphere
- 227 B. Determination of the Critical Buckling  $B^2$
- 228 A. Evaluation of Difference Diffusion Equation

A implies the problem is NOT for academic credit, is UNsponsored

B implies the problem is for academic credit, is UNsponsored

C implies the problem is NOT for academic credit, IS sponsored

D implies the problem is for academic credit, IS sponsored

NO LETTER means that the problem is an internal one
