READ THIS FIRST

This document guides you through the basic steps for setting up your Xerox software and documentation for the 8000 Network Services 10.0.

Follow the instructions below in the order given. If any of the items listed were ordered but not received, contact your Xerox Representative.

Unpack this box "Standard Services System Software . . . Services 10.0"

With the initial purchase of the Xerox Network Services 10.0 software, you receive:

- Network Services 10.0 software diskettes in a diskette container

- An empty diskette container for the additional Services 10.0 software

- Two binders titled "Network Basic Services" and "Network Shared Services" with their respective documentation

- Services 10.0 Release Document

Assemble the binders

1. Remove the binders titled "Network Basic Services" and "Network Shared Services" from their slipcases. Remove the documentation inside each binder, unwrap it, and place it in the respective binder rings.

2. Remove the Services 10.0 Release Document, unwrap it, and place it in the front of the binder titled "Network Basic Services."

Unpack the diskette container

Remove the Network Services 10.0 software from the diskette container. Remove the wrapping and return them to the original diskette container.

80, 300 MB Disks

If you ordered software for the 80, 300 MB disks, you have received the following five diskettes:

- Services System Software (80, 300 MB Disks) # 1

- Services System Software (80, 300 MB Disks) # 2

- Services System Software (80, 300 MB Disks) # 3

- Clearinghouse, External Communication and Server Monitor Services

- 8000 Series Rigid Disk Diagnostics (80 and 300 MB) 7.0

10, 29, 42 MB Disks

If you ordered software for the 10, 29, 42 MB disks, you have received the following six diskettes:

- Services System Software (10, 29, 42 MB Disks) # 1

- Services System Software (10, 29, 42 MB Disks) # 2

- Services System Software (10, 29, 42 MB Disks) # 3

- Clearinghouse, External Communication and Server Monitor Services

- 8000 Series Rigid Disk Diagnostics (10, 29, 42 MB) 7.0

- Multiport Option

Unpack second box containing specific Services 10.0 software

You will receive or have already received an additional box containing specific services software applications. Inside this box you will find multiple software packages, each boxed individually. Remove the software from each box, unwrap it, and place it in the empty diskette container provided, as discussed earlier in these instructions.

Prerequisites for software installation

Before you begin to install software on your Xerox 8000 Network System servers, you must be familiar with the contents of the booklets described below. These booklets are located in the *Network Basic Services* volume.

Note: Upgrade and installation of your software should be closely coordinated and planned with the Xerox Systems Analyst. You should follow all recommendations made by the Systems Analyst.

Services 10.0 Release Document

You should have placed the *Services 10.0 Release Document* in the front of the binder titled *Network Basic Services*. This document provides a summary of new features as well as complete procedures for upgrading your software from 8.0 or 9.0. This document also provides the current "Notes and cautions" for each application. You should read and be familiar with its contents.

Introduction to Network Services booklet

The *Introduction to Network Services* booklet provides a general overview of the 8000 Network System and describes the duties of the System Administrator. This booklet also introduces you to the library of materials that assist in the installation, initialization, configuration, maintenance, and troubleshooting of 8000 Network server and service software.

Server Operation and Maintenance booklet

The *Server Operation and Maintenance* booklet provides you with the understanding of basic server functions. You should be familiar with the contents of this booklet prior to performing the software installation procedures described in the *Server Software Installation* booklet.

Software upgrade/installation

If you are familiar with the contents of all the foregoing booklets, you are now ready to upgrade/install software on your Xerox 8000 Network System servers.

Upgrading software to 10.0

To upgrade your software to version 10.0, follow the procedures outlined in the "Upgrade procedures" section of the *Services 10.0 Release Document*. This document provides the step-by-step procedure recommended by Services Software for upgrading an 8.0 or 9.0 based server with Services 10.0 Software.

Note: You must read and understand the entire "Upgrade procedures" section prior to starting the upgrade. Be sure to follow these procedures exactly as they are written.

First time software installation

For first time installation of software, refer to the *Server Software Installation* booklet. This booklet describes the steps necessary to install your software properly.

It is essential that you read and follow the instructions in the *Server Software Installation* booklet exactly as they are written to avoid the consequences of incorrectly installed services.

Revised Upgrade Instructions

The Upgrade Instructions have been revised since the initial printing of the Services 10.0 Release Document. Before using the Upgrade Procedure in the Services 10.0 Release Document, please remove pages 13, 14, 15, 16, 35, and 36. Replace the pages with the revised pages 13, 14, 15A, 15B, 15C, 16, 35, and 36 supplied with these instructions.
