

iSeries Linux Education and Services

(Course Number S6226)

This class will teach basic and advanced concepts of designing and implementing an iSeries Linux implementation. By the end of this class, each student will have set up multiple Linux partitions in both hosted and non hosted environments.

Audience:

- IBM Business Partners responsible for sales, planning, and implementing Linux on iSeries
- Technical specialists, support and services individuals
- Customers implementing Linux on iSeries

Prerequisites:

- Strong knowledge of iSeries or Linux systems

Enrollment:

<http://www-3.ibm.com/services/learning/us/>
(Search on S6226)

What you are taught:

- LPAR and Linux overview and terminology
- The functional capabilities provided by Linux and iSeries
- Planning and configuring an iSeries system for LPAR and Linux
- Implementing and supporting Linux on an iSeries system - with multiple distributions
- Basic Linux Management on the iSeries
- There will be hands-on labs with each major topic in the class

This class will use comparisons between iSeries and Linux commands as much as possible to ensure that both iSeries and Linux professionals learn what is required about both products.

Linux Consulting Services

Linux Consulting Services are available on a contract basis through the iTC and are customized in content and length to meet the specific needs of the customer. Services are provided by iTC personnel with expertise in Linux on iSeries in a customer's environment. A typical consulting contract for Linux on iSeries would be:

- 2 days of planning
- 1 day installing Linux (depending on number of partitions, etc.)
- 1 day of education

The days included in the service need not be consecutive, and may be conducted on-site or via teleconference.

For further information on Linux on iSeries including education, visit the iSeries HA web site at <http://www-1.ibm.com/servers/eserver/iseries/linux>

Or send an email to the Rochester Linux team at rchlinux@us.ibm.com
