Free! WebSphere Migration Education Workshop

Upgrade to WebSphere Application Server V9 and help improve your IT business value

Why WebSphere Version 9?

A production ready, EE7 compliant app server for supporting hybrid cloud development, designed to deliver:

- **Intelligent Management:**
  - Less hardware and software, fewer outages
- **Lower TCO:**
  - WAS on Cloud Bluemix, potentially more than 30% savings vs on premise
- **Improved Performance:**
  - Up to 15% Liberty performance improvement vs V7
  - Up to 30% WAS traditional performance improvement vs V7
- **WebSphere eXtreme Scale Ease of use Enhancements**
- **WebSphere Connect: Java/Node.js Single Management Interface**
- **Increased Security Capabilities**
  - Open ID Connect
  - Secure Engineering Accreditation OTT-PS
- **WAS Migration Toolkit:**
  - Fast and accurate code analysis, highlighting key areas.
  - Quickly scan code against more than 100 migration rules
  - Provides code change suggestions and migration data reports
- **Docker Data Center**
