Required solution

- IBM® Sterling B2B Integrator

IBM Sterling B2B Integrator Mobile process queue monitoring

Sterling B2B Integrator Mobile

For users of IBM® Sterling B2B Integrator, this mobile application provides more choice in how system administrators access and respond to process information and status generated by the Sterling B2B Integrator solution.

Ensure the health of your Sterling B2B Integrator solution from anywhere

Your business depends on Sterling B2B Integrator to tie together applications, processes, data, and people, both inside and outside your immediate organization to help meet your business goals and objectives. A disruption or exception in a process or data flow managed by Sterling B2B Integrator, such as orders and invoices are not flowing properly, could prevent you from meeting these goals and objectives. Ensuring the health of the solution and the processes and data flows is an essential need for your business.

Monitor and take action independent of time and place

IBM® Sterling B2B Integrator Mobile enables system administrators to monitor the health of their Sterling B2B Integrator system deployment anywhere at any time. Sterling B2B Integrator Mobile provides system administrators the ability to monitor and take actions on their Sterling B2B Integrator platform from their mobile digital device including viewing and taking action on various Sterling B2B Integrator status indicators. This includes providing monitoring with alerts for all Sterling B2B Integrator's resources including system status, database growth, and average business process wait time as well as the ability for an administrator to run or restart any failed or halted business process. The result is a solution that enables administrators to closely monitor the health of Sterling B2B Integrator and the processes and data flows it manages to ensure critical business objectives and goals are met.
