

**element61** is the thought-leading Performance Management and Business Intelligence consulting company in the Belgian marketplace. In just over 3 years, the company has grown to a team of more than 20 Business Intelligence & Performance Management professionals, with an average of over 10 years of experience in BI & Corporate Performance Management.

**element61** firmly believes in the convergence of Business Intelligence and Financial Analytical Applications (CPM) into a single concept and market place of Performance Management. **element61** acts as a Center of Excellence that has both the capacity and the quality large organizations require to successfully implement Performance Management. **element61** has skills, competence centers and relationships with **all leading vendors** of Performance Management software but puts the customer first in defining PM architectures that deliver business value across technology platforms.

**element61** is a partnership of professionals who excel in Business Intelligence and Corporate Performance Management. Our team makes the difference through the quality and **experience**, combined business and technical skills and broad range of industry and technology backgrounds of our consultants. Our focus is on developing long-term relationships and partnerships with both our customers and employees.

**element61** helps companies **define and execute** BI & CPM strategies and their individual milestones. Our projects deliver tangible business benefits and allow companies to better understand past and present performance, and manage future performance. Our focus is on delivering the best value for money to our customers. We believe **quality & experience** cannot be compensated by sheer quantity in man days. We are partners in your projects and are "in it together", whether this is from definition to execution, or in any step or phase where you can use some coaching or help.

**element61** has a particular focus on and experience in working with senior executives of the Top 500 companies of the Belgian economy and the European and international Headquarters based in Belgium.

#### The IBM Competence Center overview

Within element61, the IBM Competence Center plays a prominent role. It is a center of excellence for all technical and functional skills related to the complete IBM Performance Management and Data Warehousing offering (**Business Analytics** and **Information Management**). This means that we offer senior expertise in every IBM software component of a complete Performance Management architecture, from the basic RDBMS (database) layer, to the final information delivery layer, as well as all the layers in between. The IBM CC consists of 8 senior architects, with a joint Performance Management experience of **72 years**. Product skills include IBM **DB2**, InfoSphere suite (**Information Analyzer**, **QualityStage**, **DataStage**) and Business Analytics (**Cognos BI**, **Cognos Planning**, **TM1**, **SPSS**).
