

IBM Cognos Performance

Better Intelligence. Better Business.

Maintain hierarchies at the “Speed of Business” with Business Viewpoint

Agenda

- Uncover dimension management problems
- Discover Business Viewpoint
- View a Business Viewpoint Demo
- Recap best practices to get started
- Q&A

Current Challenges

- **Key Drivers**
 - Embrace and respond to change
 - Add business know-how
 - Define future structures
- **Why Current Systems Fall Short**
 - IT pace lags business pace
 - Inflexibility to capture what is needed
- **How Problem is Solved Today**
 - Individuals define their own views and structures in spreadsheets
 - Business works disconnected from IT systems, governance and control
 - Manual effort is time consuming, error-prone and ungoverned

Needs in the Business

Do any of these sound familiar?

“I wish the sales hierarchy reflected the latest re-organization.”

Operations Manager

“I want to realign my cost centers so I have plan and actual views.”

Financial Analyst

“When will the data warehouse reflect my new customer loyalty index?”

Brand Manager

“I need my customer marketing hierarchy to be different from my shipping hierarchy.”

Marketing Manager

Needs Cross the Business

Factory/Manufacturing

- Production Optimization, Local solution rolling up to Global view

Data Warehouse

- Managing multiple versions of definitions of data from multiple sources, simplification of management, more business context

Customer & Channel

- Multiple sources, local and global relationships and customer hierarchies

Finance

- Management, Financial, Corporate Performance Management

HR

- Salary Costs, Turnover, Banding, Geography, Functional Analysis

Product Management

- Standardized ways of viewing product and materials

IBM Cognos 8 Business Viewpoint

■ Solution

- For business users to **easily maintain, govern and share the hierarchies for use ...** and reuse ... across Business Intelligence and Performance Management solutions

■ Result

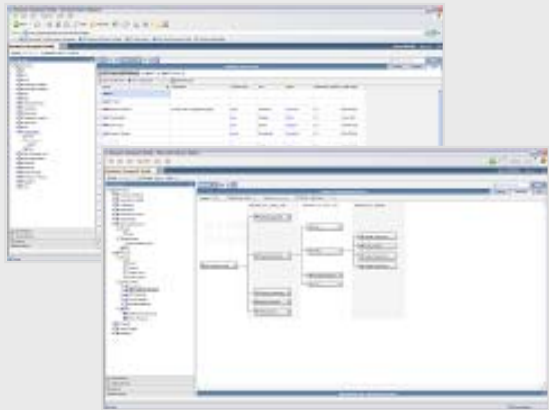

- **Capture the business viewpoint** on how to organize information to drive business performance
- **Save time** spent on reconciling reports, plans, forecasts

IBM Cognos 8 Business Viewpoint

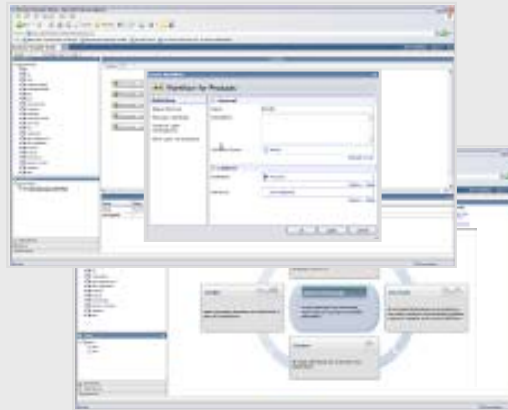

Create and Maintain

Enable the business to capture their own current and future viewpoints

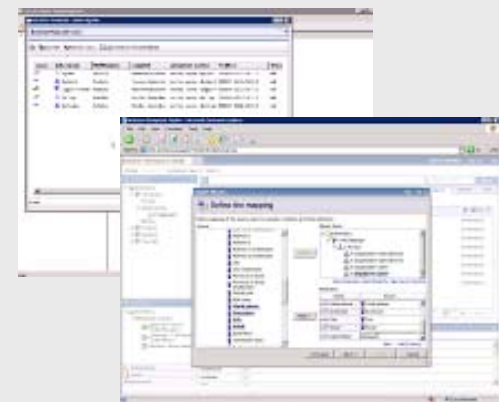

Govern and Collaborate

Replace manual, error-prone efforts with fully transparent, automated and auditable processes

Share and Synchronize

Share approved viewpoints across the decision-making process and systems

Shared Dimensions across Performance Management

Shared Dimensions for Specific Use

**Cognos 8
Planning**

- Integration with Analyst and Contributor
- Automatic run of business calculations
- Adheres to dimension permissions and access tables

**Cognos 8
Controller**

- Synchronize account and company structures, extended dimensions
- Respects business and compliance rules

**Cognos 8
Transformer**

- Share complex structures across PowerCube environments
- Full fidelity of time dimensions, e.g. relative time, rolling, last/next

Cognos TM1

- Populate attributes into TM1
- Respects dimension permissions in TM1
- Supports unique names, alias, bi-directional user-created attributes etc.

**Cognos 8
Framework
Manager**

- Publish package or generate model file for Cognos 8 platform
- Built-in support for slowly changing dimensions
- Selective update to manage change to BI community

The screenshot shows the IBM Cognos 8 Business Viewpoint Studio interface. At the top, a browser window displays the URL `http://cognosd2g:9410/mdmClient/main.jsp`. The application title bar reads "Business Viewpoint Studio" and the user is logged in as "admin (ADMIN)".

The main content area is titled "Dimension Dashboard" and is focused on the "MarketingRegions" dimension. A navigation pane on the left lists dimensions: Accounts, Currency, MarketingRegions (selected), Scenario, Time, and Year. The dashboard includes sections for "MarketingRegions" (with a link), "In progress workflows" (stating "There are no workflows on this dimension."), and "Publications". A "Statistics" section on the right shows a table of metrics:

Metric	Count
Lists:	0
Hierarchies:	1
Sets:	0
Levels:	0

At the bottom left, a sidebar contains links for Workflows, Publications, Users, and Attachments.

Demonstration

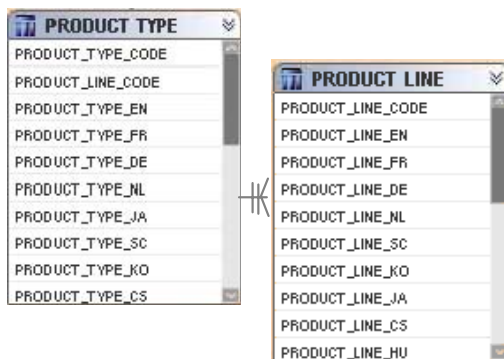

IBM Cognos 8 Business Viewpoint

Ensures Ownership is in the Right Hands

■ Business Viewpoint in Business Hands

- Ensures business own the definition and use of common dimensions for common use
- Provides a rich environment for business users to collaborate with each other
- Fuels decision-making with business approved dimensions, hierarchies or financial metadata structures

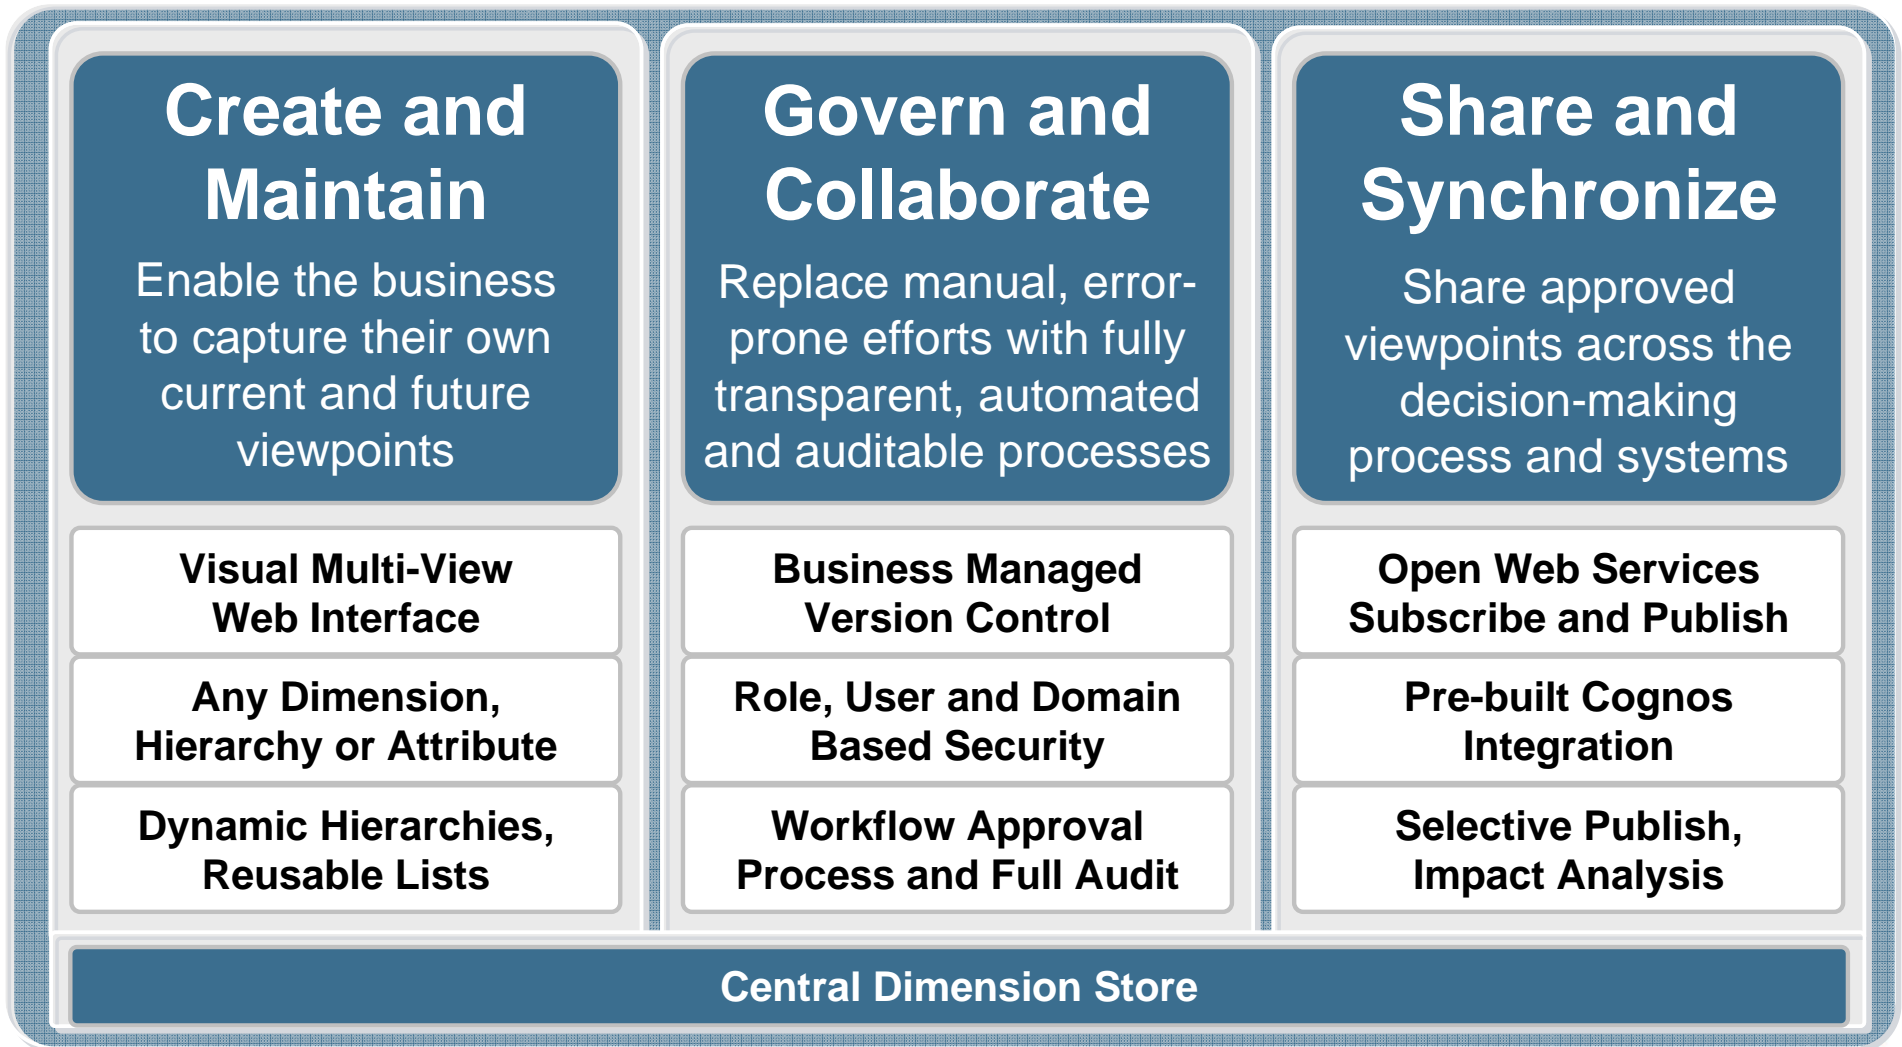

■ Framework Manager in IT Hands

- Ensures IT owns the platform to fuel a complete, consistent and accurate view of information
- Drives the platform's common metadata model and single query service
- Delivers data in terms business users understand and can use

Recap of Key Capabilities

Top 4 Best Practices

- 1. This is a collaborative process with the business driving**
 - IT plays a supporting role
- 2. Start small with your biggest dimension pain**
 - 80/20 rule
 - Each project after this increases in value
- 3. Don't try to do everything at once**
 - Customer Accounts for Financial Services
 - Subscribers for Telecommunications
 - Products for Manufacturing
 - Stores or Products for Retail
- 4. Build a strong user community**
 - Get the right stakeholders involved in the process
 - Establish a reconciliation process for disagreement

The result for your organization

- **Freedom to own** dimension structures, relationships and attributes in a shared view
- **Replacement of manual**, error-prone efforts with fully transparent, automated and auditable processes
- **Approved shared viewpoints** for use across BI and Performance Management, and provide those approved structures to IT for other systems
- **Embrace business ownership** of dimensions while maintaining oversight of their work
- **Retain control** of how approved versions are published and used with minimal disruption to downstream systems
- Ensure organization can **respond to business change** with minimal delay
