

Overview

IBM Cognos BI solutions offer customers a complete range of BI capabilities on a single, service oriented architecture (SOA) so you can author, share, and use reports that draw on data across your enterprise sources for better business decisions. The best way to fully derive these benefits is by engaging IBM Cognos experts to provide guidance and support to ensure your implementation meets your specific business needs and that you are employing valuable IBM Cognos proven practices throughout your project. The Cognos BI Application Design service can provide this expert guidance.

Cognos BI Application Design Service

Technical specifications

What you get with the Cognos BI Application Design service

The Cognos BI Application Design service was developed to provide you with proactive advice, guidance and assistance as you develop your application design. The service enables you to understand, implement and validate IBM Cognos proven practices within your environment. It also enables your team members to fully apply these proven practices throughout your implementation and operation of the solution.
