

# Advanced Case Management in Government: The Roadmap for Effectiveness and Efficiency

Campbell Robertson Program Director, Public Sector IBM Software Group/Industry Solutions/ECM <u>cir@ca.ibm.com</u> Twitter: IBM\_ECM\_GOV

Putting Content to Work ECM UserNet 2011

# Agenda – Share and Talk !

- Advanced Case Management in Public Sector
- Discuss a recent IBM ECM
  BVA
- ECM Maturity Models and Business Cases

# Common goals for most government agencies...

Increase Interoperability

- Multi-Modal Communication
- Comply with regulations
- Improve employee productivity
- Improve business processes
- Reduce administrative costs
- Stop Water Cooler Decision Making

# Can you prove and sustain....

- Equality
- Integrity
- Productivity
- Quality
- Compliance

# Can you measure success ?

© 2011 IBM Corporation

# Regardless of the form, management is key you need to align people, process and policy

![](_page_5_Picture_0.jpeg)

### Leveraging Master Content at NYC-HHS Creating a Single View of the Citizen – and the City

![](_page_5_Picture_2.jpeg)

# Problem

# Solution

# Benefits

Putting Content to Work ECM UserNet 2011 Information silos prohibit a holistic view of city services for citizens, and leave city agencies with incomplete citizen information

- Frustrated citizens provide the same information repeatedly and are left asking city employees "Don't you talk to each other?"
- Agency case workers cannot easily access citizen information stored in other agencies
- 8-10M records, 1B+ content objects, 75,000 case workers to integrate
- A Master Information solution leveraging MDM and Master Content to create a single, trusted master view of each citizen across agency data & content
- On-demand access to data, content & documents about each citizen through multiple channels
- Increased accessibility and trustworthiness of citizen information improving city services
- New self-service opportunities for citizens, increasing efficiency and accountability
- Greater citizen satisfaction with city services
- Lower costs by eliminating redundant information

![](_page_6_Picture_0.jpeg)

# Leveraging ACM for Crime Intelligence

![](_page_6_Figure_2.jpeg)

![](_page_7_Picture_0.jpeg)

# **IBM Case Manager**

![](_page_7_Picture_3.jpeg)

Putting Content to Work ECM UserNet 2011

IBM

# State of North Dakota used advanced case management to improve services and public safety

#### The need:

•Modernize its paper-based process of storing, cataloging and retrieving records

•Support the state's growing collection of citizen, business and internal records, impacting staff productivity and response times The solution:

 Implemented a centralized electronic archive, business process automation and electronic forms to replace paper-based processes

•Enabled agencies to efficiently retain, access, and share information

•Planned to add analytics to collect, analyze and report on information and notes in incident reports, benefits requests, and other documents

#### The benefits:

- Moving from paper-based to paperless processes reduced time to respond to citizen inquiries from days to seconds
- Improving process efficiency and information sharing drives significant economies of scale and cost savings
- Applying content analytics will help staff identify previously undetected patterns to improve officer safety and detect fraud

"Advanced case management will help keep our parole officers safer because they'll have information faster and more reliably."

-Chuck Picard, Enterprise EDMS Coordinator, State of North Dakota

![](_page_8_Picture_15.jpeg)

![](_page_9_Picture_1.jpeg)

### Junta de Castilla y León shortens service delivery

#### The need:

- •Reengineer its IT systems to comply with new regulations
- Provide better service to citizens

#### The solution:

•Implemented a centralized process-oriented management system for granting benefits, automating the agency's work and shortening services delivery

•Adapted quickly to the new regulatory framework

#### The benefits:

- Improves service
- Facilitates compliance
- Provides greater flexibility for implementing future policy changes

Putting Content to Work ECM UserNet 2011 "By combining the strengths of IBM Software and services, we are dramatically reducing the time to process benefits, allowing the staff to put more focus on handling exceptional cases. " - José María Molina, Project Director, Junta de Castilla y León

![](_page_9_Picture_16.jpeg)

![](_page_10_Picture_0.jpeg)

### **Discussion on Advanced Case Management**

- Do you agree with the direction of Advanced Case Management?
- Discussion of of Content Analytics; use cases need?
- What progression path would you see being needed?
- Advanced Case Management can be viewed as a strategic roadmap?
- Do you agree with the need to encapsulate "Water Cooler Decision Making"?
- What are the most important Key Performance Indicators for your organization and can ACM help you measure and meet those metrics?
- How do you measure success today?
- Do you need to change your business model moving forward?

![](_page_10_Picture_10.jpeg)

![](_page_10_Picture_11.jpeg)

![](_page_11_Picture_0.jpeg)

**Recent IBM ECM Business Value Assessment** 

![](_page_11_Picture_2.jpeg)

![](_page_11_Picture_3.jpeg)

![](_page_12_Picture_0.jpeg)

**Key Business Requirements** 

- Improve staff efficiency and productivity
- Provide an integrated environment for document search and retrieval
- Provide access to documents for offsite Auditors
- Provide the ability to capture and store printed management reports
- Provide a scalable solution to support Records Management for retention and destruction

![](_page_12_Picture_7.jpeg)

![](_page_12_Picture_8.jpeg)

![](_page_13_Picture_0.jpeg)

### **Solution Assessment Findings**

- Approximately 13% (62 minutes) of staff time is spent on paper management
- Approximately 50% of Supervisors' time is spent manually balancing workload, measuring employee productivity and supporting backlog
- Approximately 50% of paper files are copied and multiple copies stored as records

![](_page_13_Picture_5.jpeg)

![](_page_14_Picture_0.jpeg)

#### Return on Investment – Assumptions

- **Observation included 41 FTE**
- **Extrapolation for SAP FTE to total of 481**
- **Extrapolation for 319 General Forms users**
- Average salary assumption \$40,000CAD
- Annual Salary for 800 FTE \$41,600,000CAD

Existing Employee Details		Clear Data On Th	is Sheet

Building a Business Case or Roadmap

![](_page_17_Picture_2.jpeg)

Putting Content to Work 18 ECM UserNet 2011

![](_page_18_Picture_0.jpeg)

**Discussion Points – A starting area** 

- When it comes to unstructured or content (ECM) what key business performance metrics do you look to improve on?
- What are the challenges / barriers of adoption?
- Who are the likely key stakeholders for ACM or ECM in your organization?

![](_page_18_Picture_5.jpeg)

![](_page_18_Picture_6.jpeg)

![](_page_19_Picture_1.jpeg)

### Get the basics right and link to processes

#### **Enterprise Content Management**

- Establish good content governance:
  - Have accountability for bodies of content
  - Give operational support
- Have good answers to these questions:
  - Who will own what content?
  - How will content be categorized and tagged?
  - Who will establish and maintain the retention policy?
  - How will adherence to ECM policies be measured and enforced?
- Don't manage all content at the enterprise or business-unit level
- Use BPM to enforce a content management life cycle
- Leverage virtual team spaces for unmanaged, shared "working" content
- Assess policy and process alignment

#### **Information Lifecycle Management**

- Create a cross-functional oversight team including business, IT, legal and finance personnel as well as an executive sponsor
- Identify compliance requirements (program, regulatory, legal, fiscal)
- Draft the appropriate records management policies and processes
- Build a retention schedule and file plan
- Determine functional and technical requirements
- Select and deploy records management technology
- Communicate records management policies and processes
- Establish continuous audit and review processes
