InfoSphere™ software

IBM InfoSphere Learning Services

Extended Learning: Practical Education in Your Environment

HIGHLIGHTS

- *Expand "hands-on" technical knowledge and skill sets without leaving the office*

- *Bridge the gap between classroom learning and real time usage*

- *Customized to each Customers needs based on Center of Excellence (COE)Standard Practices*

- *Focused on product use and implementation*

- *Save time, cost and increase productivity in a very short time frame*

- *Efficient delivery of base knowledge and perfect lead in for COE Workshops*

Extended Learning

Extended Learning from IBM InfoSphere provides learning with an expert or leader who can provide instruction, explanation and examples of application skills and knowledge.

Extended Learning facilitates real life application of classroom lessons in the student's own work environment which promotes exploration by the student with a learning leader, who guides the process, rather than a "guru" who simply passes down information. **Extended**

Learning topics are based upon the Center of Excellence (COE) Standard Practices, supporting product use and implementation. Topics are intended to provide a holistic view of the product suite, a standard approach and set of practices.

Extended Learning is designed specifically to bridge the gap between formal classroom training, long-term consulting, and implementation. Bounded by the COE Standard Practices, each **Extended Learning** program is delivered onsite and tailored to each Customer's unique requirements. **Extended Learning** is delivered in the Customer development "sandbox" so that real questions and issues can be explored.

Extended Learning topics are structured into categories specific to Administrators and Developers. Sample topics include: Installation, Configuration, File Structure, Connectivity, Parallel

Information Management software

Configuration Files, Performance Monitoring, Development architecture, Auditing, and Datasets.

Benefits of Extended Learning

➢ Designed to teach the participant skills that are specific to their environment

➢ Short in duration, generally 3-5 days

➢ Perfect lead in before Consulting begins

Inquire today to learn about these and other currently available **Extended Learning** courses.
