Sametime 8.5 System install - DKK 62.000.

The benefits:
The focus of Sametime 8.5 is to make unified communications seamless to the user by introducing a range of new capabilities and improvements:

- A new online meeting experience is fully integrated into the Sametime Connect client or the integrated client in Lotus Notes 8.5.1.
- A new Sametime Meetings panel provides a consolidated view of a user's meetings and calendar and makes starting or joining a meeting a single-click process. Users can easily invite others to meetings by dragging their names from the Contact list or mail. They can accept meeting invitations with a single click, just like joining a group chat. Users can move seamlessly from a text chat to a voice or video chat to a meeting. To upload meeting materials, they simply drag and drop the items they need.
- New, zero-download, browser-based chat and meeting clients extend the desktop experience to wherever the user is working.
- New audio and video codecs provide higher quality native voice and video services for a more compelling collaborative experience out of the box.
- For mobile users, there is a new browser-based Apple iPhone chat client, support for the Blackberry Storm, and an improved mobile client for Microsoft® Windows® Mobile devices.
- New social views make it easier for users to find the people they collaborate with the most.

What we do:

- Work with you to identify key interests and requirements for use of the technology.
- Installation and enablement of Lotus Sametime 8.5 for Instant Messaging and Web Conferencing for up to 10 users.
- Demonstrate basic administration tasks

Prerequisites:

The installation of Lotus Sametime 8.5 will be done together with a local system administrator to ensure knowledge transfer.

During the installation the following resources has to be in place:

- Two servers for the Sametime system installation.
  - Duo or quad core
  - 4Gb RAM
  - Windows 2003/2008 server
  - App. 100Gb free hard disk space
  - One of the servers should be installed with minimum Domino 8.02 or greater, working in the existing Domino domain
- No network limitations between the servers
- (Local) Administrator access to the servers.
- Domino Administrator access to the Domino server
- Username and password for accessing the LDAP server
- One of the following LDAP directories :
  - IBM Tivoli Directory Server 5.2, 6.0 or 6.1
  - IBM Lotus Domino 6.5.x, 7.0x, 8.0x or 8.5x
  - Microsoft Active Directory 2003, or 2008
  - Microsoft Windows 2003 Active Directory Application Mode (ADAM)
  - Sun Microsystems ONE Directory 5 (iPlanet 5.1 and 5.2)
  - Novell eDirectory 8.8
  - **Note:** Microsoft Active Directory 2008 Lightweight Directory Services (AD LDS) is not supported for Sametime 8.5

The users who should have access to the system should be accessible from the same location when installing the client software.

How we do it:

- Install Sametime system.
  - IBM Lotus Sametime Standard V8.5 Community Server
  - IBM Lotus Sametime Standard V8.5 Meeting Server
  - IBM Lotus Sametime Standard V8.5 Proxy Server
  - IBM Lotus Sametime Standard V8.5 Media Manager
  - IBM Lotus Sametime Standard V8.5 System Console
- Configure the Sametime environment for optimal performance
- Install and configure up to 10 users workstation for using the new environment
- Demonstrate basic administration tasks
