Information Management	Lotus	Rational	Tivoli	WebSphere

Milestones that Matter:
IBM Software Group Acquisitions

CIMS Lab
Track usage of resources across virtualized technology environments

LAS
Multicultural name recognition software

AptSoft
Business-event processing software

Net Integration Technologies
Complete small-business server solutions

Cognos 2008
Business Intelligence and performance management platform

Bowstreet
Development tools for portals (and pre-built dashboards)

BuildForge
Software development teams document what was created, developed & deployed

Solid Information Technology
Real-time, all-the-time information access

WebDialogs
Online meeting and collaboration software-as-a-service

Collation Inc
Application-centric views of the cross-tier IT infrastructure

Unicorn
Enterprise metadata management technology

Princeton Softech
Database archiving and test data management software

DataMirror 2007
Real-time data integration and data protection software

iPhrase
Adaptive information delivery (and discovery) software

Rembo Technology
Automatically install or upgrade operating systems on multiple systems

Telelogic
Development software for complex embedded systems

DWL
Customer data integration and management

Watchfire
Security and compliance testing software

PureEdge
Secure xml e-forms (xforms)

Webify Solutions
Industry-specific Service Oriented Architecture software

Consul
Compliance and security audit software

Isogon
IT asset management

MRO Software 2006
Asset and service management software

Vallent
Network performance monitoring and service management –for wireless

Ascential 2005
Enterprise data integration

Micromuse 2006
Network management software

SRD
Identity resolution software

DataPower Technology
Secure application-level messaging and XML processing

FileNet 2006
Business process and content management software

DORANA (Ubiquity)
Software asset management (System Z and Unix)

Gluecode
Open source Java application infrastructure

ISS
Internet Security Systems – software and services

Systemcorp
Project portfolio management (PMOffice)

Access360
Identity management

TrelliSoft
Storage management

Venetica
Access and integrate unstructured information through SQL query

Candle
Systems management and monitoring

Aptrix
Web content management

Rational 2003
Team based end-2-end development tools

Metamerge
Directory integration

Cyanea
Web performance management and monitoring

Trigo
Product information management

Information Labs
Development tool technology (IP)

Tarian
Record management

Alphablox
Business intelligence analytics and alerts

Green Pasture
Compound document management

Think Dynamics
Automated server provisioning (orchestration)

Holosofx
Business process modeling and monitoring

CrossWorlds 2002
Business process integration

CrossAccess
Information access to mainframe databases

Informix 2001
Distributed Unix databases

OpenOrders
Order management (e-commerce)

Accessible Software
Mainframe systems management

Pathware
Web based e-learning (from Macromedia)

SANergy
Storage management (from Mercury)

Ubique
Instant messaging and chat

Dascom
Security - access control

Databeam
Realtime and distance learning

Onestone
Workflow

Object Technology
Object technology (IDEs - smalltalk, Java, Eclipse)

Wallop
Web site development tools

IW Manager
Query manager (from Tanning Technology)

DBMX
Distributed database management

KnowledgeX
Complex data mining technology (from Integrated Technology)

Unison
Job scheduling

Tivoli 1996
Centralized system management

Lotus 1995
Collaboration and productivity software

2005

2000

1995
