

IBM Middleware Available on Linux

The IBM Middleware Available on Linux matrix provides information regarding IBM Middleware availability on Linux. You can find information such as:

- Product name and version
- Links to product pages
- Linux distribution and kernel support
- Related sources of additional information

IBM Linux Portal - IBM Middleware Available on Linux

The Basics

Use this matrix to find IBM Middleware Available on Linux by IBM Hardware and then by IBM Brand.

Product Name	The product name is a link to the IBM Web Search to easily find the product's external IBM Web site.
Release or Version	Sometimes several <i>releases</i> are available for a product. The most recent <i>version</i> is listed first followed by later versions.
IBM Hardware	Important! Check the availability by IBM Hardware.
Distribution	The Distribution column is good starting place for operating system requirements; an IT specialist can help determine the software and hardware requirements for each IBM Middleware product.
Dates / Dependencies	If available, Announcement Date, electronic and physical GA and End of Services Dates are shown here. You can also find Software Dependencies and additional information in this column.

Where's my product?

If you do not find a particular product in the IBM Middleware Available on Linux matrix, contact your IBM Sales Representative to find out if there is roadmap information pertinent to that product.
