

# Chemicals and Petroleum Industry V5R11 Release Value Asset Lifecycle Management

**Elliot Robertson, Dassault Systemes**  
**Cheryl Scott Pugh, Kamlesh Patel,**  
**Stephan Clambaneva, IBM**

Version 5 Release 11  
April 2003  
i511\_industry\_value

# Summary

**Target : Application Engineers**

- Market Overview
- Sales & Industry Solution
- **Release Value**
- Technical Solution Readiness
- References
- Competition Analysis
- Sales Channel Package

1. V5R11 - Key Highlights for Chemicals and Petroleum  
(per critical Solution)
2. V5R11 Value for Chemicals and Petroleum  
(Opportunities brought by the Key Highlights)

# V5R11 - Chemicals and Petroleum Key Highlights

## ENGINEERING PROCESSES

- Design
  - Enhanced annotation and dimensioning
  - Improved Drafting capabilities
  - Sheetmetal F&A functionalities
  - New P1 product: Structure Plates and shapes - differentiator against Inventor in the IES-area
  - provides mechanical and equipment & systems solutions on one single platform
  
- Productivity
  - Interfaces to Nastran, Ansys and Abaqus through MSC software (september time frame)
  - Performance improvements for drawing generation on large assemblies
  
- Knowledge
  - Assembly introspection of parameters / constraints through KWE tools
  - Configured drawings through design tables

## CAA V5

- CAA partnerships – ISOGEN for isometric drawings, EDSA for electrical analysis

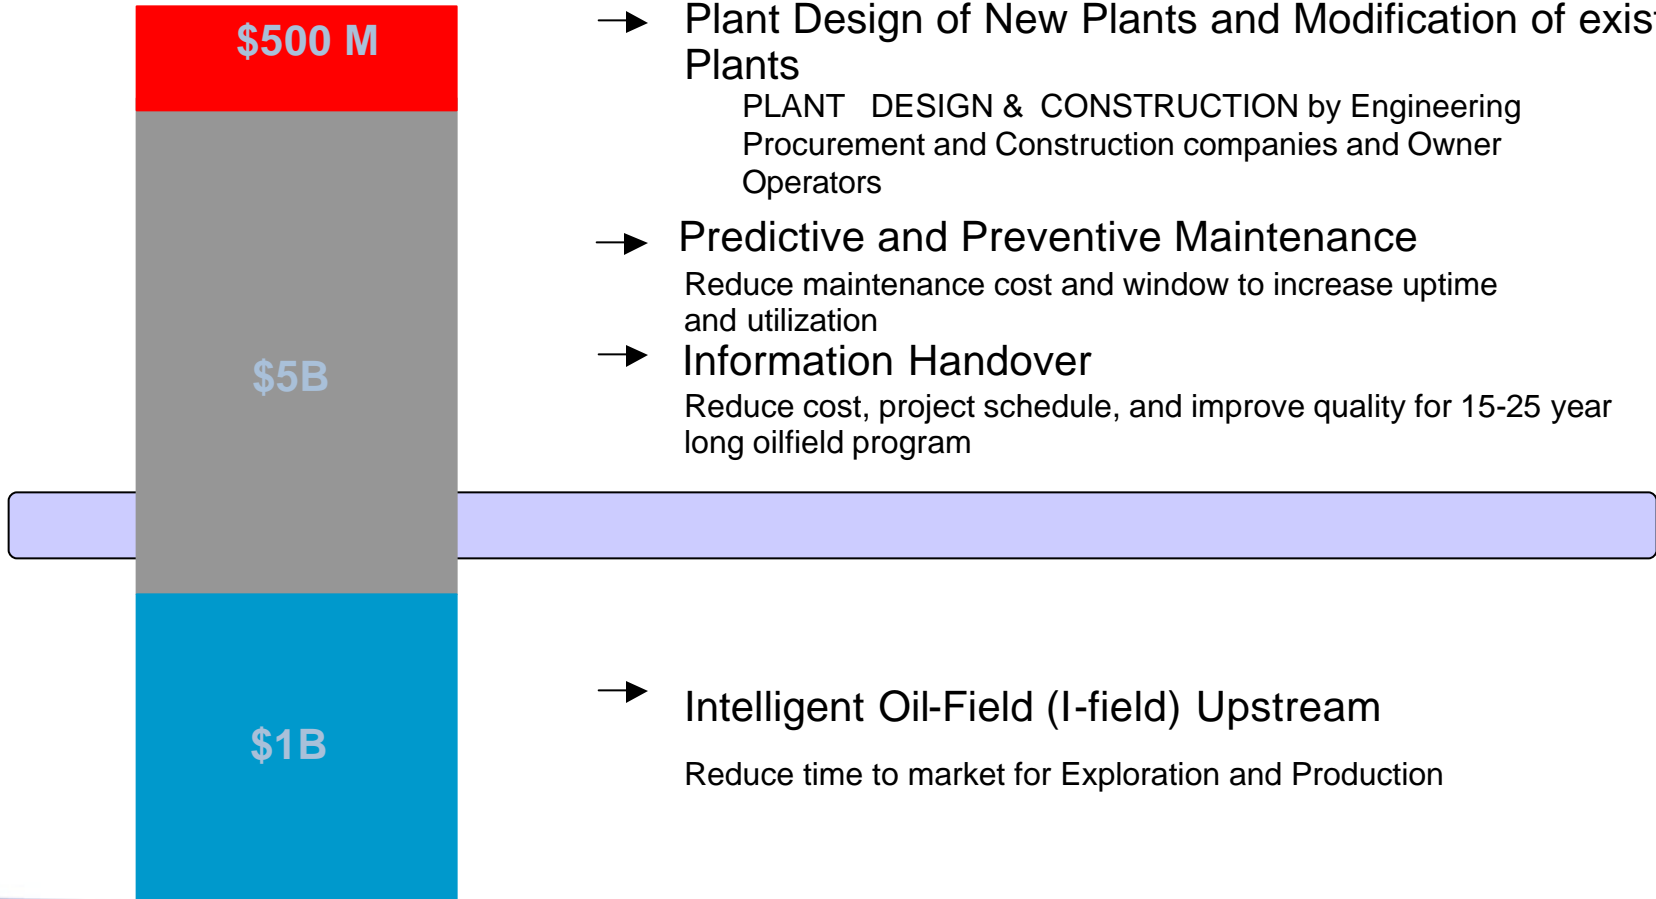

## COLLABORATIVE

- **Interfaces enhancements**
  - DGN: Microstation and Intergraph viewing
  - Pro-E file support capability
  - DXF: Export semantic text, layers
  - IGES-3D: Export P-curves, solid topology import
  - STEP: Export groups, show/no show, improved validation of properties
  
- **Data Management**
  - Run on top of WebSphere Application Server
  - SmarTeam performance improvements
  - Project Management Dashboard with MS Project
  - Integrated CATIA/SmarTeam, ie. navigator tree
  - SmarTeam templates for rapid deployment
  - Embedded Workflow – multi-level workflow definition
  - Improvements in adaptor interfaces
  - Support of SAP classifications
  - Completion of interoperability scenarios for Multi CAD support
  - Support for enhanced Relational Design with Contextual Links
  - Support for new Multi CAD integration

## PPR

- **TAA PPR Hub integration**

# In The Next Three Years C&P Spending \$\$\$ in the 4 Most Prevalent Solution Areas

# ALM involves complex extended enterprise business processes & data management requirements

Process - Technology Integration
