

Quickstart Services for IBM Tivoli TEM, SUA and TADd Independent Software Vendors Catalogue

IBM Tivoli TEM, SUA, TADd

Maximize the Value of your C&SI Solution

This offering helps you to setup SwKBT instance for catalog management and extend ISV catalog with coverage for custom software installation. SwKBT instance is the central catalog management system for TEM SUA and TADd offerings.

- You need to manage growth and complexity of Software Licensing.
- You would like to realize the benefits of Independent Software Vendors (ISV) licenses inventory and monitoring.
- You need to control escalating software licensing costs.
- You would like to successfully and speedily implement in your pilot environment to realize a more rapid time to value.
- You would like to extend the breadth and depth of ISV software discovery.

Benefits

- Decrease software costs by optimizing software license use through ISV discovery and monitoring.
- Accurately measure software use.
- Manage software licensing contracts and licenses in centralized location.
- Implement ISV catalog management system (SwKBT) for unified catalog extensions.
- Dedicated ISV software detection and monitoring for unique and not common software instances
- Extensibility of discovered and monitored combination of release-platform signatures.

Deliverables

- Perform the installation and configuration of IBM SwKBT instance for customized catalog management.
- Provide guidance for catalog buildup, product hierarchy modeling and signatures production.
- Provide knowledge transfer and best practices.
- Provide information on common issues and basic architecture advantages.
- Duration – calculated based on size of ISV catalog extensions. Onsite or remote assistance.
