The screenshot displays the IBM Wave for VM management console. The main window shows a network diagram with several virtual machines (VMs) connected to a central switch. The VMs are labeled with IP addresses: 192.168.12.0, 192.168.11.0, and 192.168.10.0. The interface includes a left-hand navigation pane with options like 'Enable all', 'Full scan', 'Logoff user', 'Physical scan', and 'Refresh data'. Below the network diagram, there is a table listing the VMs and their status.

Virtual Name	Instance	OS	IP	IP	OS	Status	Progress
