LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the International Program License Agreement.

Program Name: IBM TotalStorage SAN File System Software
Program Number: 5765-FS2
Authorization for Use on Home/Portable Computer: 2

Explanation of terms:

Authorization for Use on Home/Portable Computer:

″1″ means that the Program may be stored on the primary machine and another machine, provided that the Program is not in active use on both machines at the same time.

″2″ means that You may not copy and use this Program on another computer without paying additional license fees.

Specified Operating Environment

The Program's specifications and specified operating environment information may be found in documentation accompanying the Program, if available, such as a read-me file, or other information published by IBM, such as an announcement letter.

Program-unique Terms

This Program is licensed on a capacity basis, subject to the exclusions listed below. A licensee is required to pay the sum of two charge units: a per-processor charge for the number of processors in the SAN File System metadata servers and a per-processor usage charge for the processors in the application servers connected to SAN File System. You may only install this Program on prerequisite hardware, which is specified in the announcement letter. You are licensed to use this Program only to manage files on a single SAN File System cluster. You are licensed to use this Program Product only for the amount of capacity on the metadata servers and application servers for which you have received proper authorization from IBM. This Program is only supported for use with host servers, storage subsystems, and SAN configurations identified by IBM as being supported for attachment to the TotalStorage SAN File System.

embedded version of IBM WEBSPHERE APPLICATION SERVER - EXPRESS: The Program is accompanied by an embedded version of IBM WebSphere Application Server - Express (″embedded Application Server - Express″). Your use of the embedded Application Server - Express components is limited to use in support of your licensed use of the Program. The embedded Application Server - Express components may not be used for any other purpose.

The following paragraphs titled "JAVA CONNECTOR ARCHITECTURE," "DISABLING DEVICE," "MULTIPLE COMPONENT VERSIONS," "THIRD PARTY COMPONENTS," "SOURCE CODE," and "EXCLUDED COMPONENTS" apply to your use of IBM TotalStorage SAN File System Software, and the term "Program" in these paragraphs shall mean IBM TotalStorage SAN File System Software.

JAVA CONNECTOR ARCHITECTURE: The Program includes Java Connector Architecture (JCA). Your use of the JCA technology is limited to use in conjunction with the Database Connection Pooling function of the Program only. The JCA may not be used for any other purpose.

DISABLING DEVICE: The Program may include a disabling device that will prevent certain features from being used. You will not tamper with such disabling device or otherwise change the Program.

MULTIPLE COMPONENT VERSIONS: The media for the Program may include multiple versions of the same Program component, such as versions designed for different operating systems and versions translated into different languages. Each Proof of Entitlement for the Program authorizes you to use a single version of a Program component. You are not authorized to use multiple versions of the same Program component under the same Proof Entitlement, even if multiple versions of a component are included on the media for the Program.

THIRD PARTY CODE: The Program contains, and future updates and fixpacks to the Program may contain, certain third party components which are provided to you under terms and conditions which are different from this Agreement, or which require IBM or third parties that provide IBM products ("Third Parties") to provide you with certain notices and/or information. For each third party component, either IBM or Third Parties will identify any such third party component in a "README" file (or in an updated "README" file accompanying the fixpack or update), or in a file or files referenced in such "README" file (and shall include any associated license agreement, notices and other related information therein), or the third party component will contain or be accompanied by its own license agreement (for example, provided when installing or starting such component, or accompanying such component in a file entitled "README", "COPYING", "LICENSE" or a substantially similar title, or included among the Program's paper documentation, if any). Your use of each third party component which contains or is accompanied by its own license agreement, or for which IBM or Third Parties have identified a license agreement in one of the above "README" files (or in a file or files referenced therein), will be subject to the terms and conditions of such other license agreement, and not this Agreement. By using or not uninstalling such third party components after the initial installation of such third party components (thereby giving you access to the applicable license agreements, notices and information), you acknowledge and agree to all such license agreements, notices and information, including those provided only in the English language. You agree to review any updated "README" files which accompany updates and fixpacks to the Program.

The Program contains the following third party components:

- Help System 2.1.3 (source code only)
- SNIA CIMOM

SOURCE CODE: Some of the components of the Program may be provided in source code form. Notwithstanding anything to the contrary in this Agreement, Program services are only provided for the unmodified, binary code versions of these components included in the Program packaging, and not for the source code for these components or for any modifications of such components you may create.

EXCLUDED COMPONENTS: Notwithstanding the terms and conditions of any other agreement you may have with IBM or any of its related or affiliated companies (collectively "IBM"), the following terms and conditions apply to all "Excluded Components" identified in this License Information document: (a) all Excluded Components are provided on an "AS IS" basis; (b) IBM DISCLAIMS ANY AND ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF NON-INFRINGEMENT OR INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE; (c) IBM will not be liable to you or indemnify you for any claims related to the Excluded Components; and (d) IBM will not be liable for any direct, indirect, incidental, special exemplary, punitive or consequential damages with respect to the Excluded Components.

Dispositions spécifiques au Logiciel

This Program is licensed on a capacity basis, subject to the exclusions listed below. A licensee is required to pay the sum of two charge units: a per-processor charge for the number of processors in the SAN File System metadata servers and a per-processor usage charge for the processors in the application servers connected to SAN File System. You may only install this Program on prerequisite hardware, which is specified in the announcement letter. You are licensed to use this Program only to manage files on a single SAN File System cluster. You are licensed to use this Program Product only for the amount of capacity on the metadata servers and application servers for which you have received proper authorization from IBM. This Program is only supported for use with host servers, storage subsystems, and SAN configurations identified by IBM as being supported for attachment to the TotalStorage SAN File System.

embedded version of IBM WEBSPHERE APPLICATION SERVER - EXPRESS: The Program is accompanied by an embedded version of IBM WebSphere Application

Server - Express ("embedded Application Server - Express"). Your use of the embedded Application Server - Express components is limited to use in support of your licensed use of the Program. The embedded Application Server - Express components may not be used for any other purpose.

The following paragraphs titled "JAVA CONNECTOR ARCHITECTURE," "DISABLING DEVICE," "MULTIPLE COMPONENT VERSIONS," "THIRD PARTY COMPONENTS," "SOURCE CODE," and "EXCLUDED COMPONENTS" apply to your use of IBM TotalStorage SAN File System Software, and the term "Program" in these paragraphs shall mean IBM TotalStorage SAN File System Software.

JAVA CONNECTOR ARCHITECTURE: The Program includes Java Connector Architecture (JCA). Your use of the JCA technology is limited to use in conjunction with the Database Connection Pooling function of the Program only. The JCA may not be used for any other purpose.

DISABLING DEVICE: The Program may include a disabling device that will prevent certain features from being used. You will not tamper with such disabling device or otherwise change the Program.

MULTIPLE COMPONENT VERSIONS: The media for the Program may include multiple versions of the same Program component, such as versions designed for different operating systems and versions translated into different languages. Each Proof of Entitlement for the Program authorizes you to use a single version of a Program component. You are not authorized to use multiple versions of the same Program component under the same Proof Entitlement, even if multiple versions of a component are included on the media for the Program.

THIRD PARTY CODE: The Program contains, and future updates and fixpacks to the Program may contain, certain third party components which are provided to you under terms and conditions which are different from this Agreement, or which require IBM or third parties that provide IBM products ("Third Parties") to provide you with certain notices and/or information. For each third party component, either IBM or Third Parties will identify any such third party component in a "README" file (or in an updated "README" file accompanying the fixpack or update), or in a file or files referenced in such "README" file (and shall include any associated license agreement, notices and other related information therein), or the third party component will contain or be accompanied by its own license agreement (for example, provided when installing or starting such component, or accompanying such component in a file entitled "README", "COPYING", "LICENSE" or a substantially similar title, or included among the Program's paper documentation, if any). Your use of each third party component which contains or is accompanied by its own license agreement, or for which IBM or Third Parties have identified a license agreement in one of the above "README" files (or in a file or files referenced therein), will be subject to the terms and conditions of such other license agreement, and not this Agreement. By using or not uninstalling such third party components

after the initial installation of such third party components (thereby giving you access to the applicable license agreements, notices and information), you acknowledge and agree to all such license agreements, notices and information, including those provided only in the English language. You agree to review any updated "README" files which accompany updates and fixpacks to the Program.

The Program contains the following third party components:
- Help System 2.1.3 (source code only)
- SNIA CIMOM

SOURCE CODE: Some of the components of the Program may be provided in source code form. Notwithstanding anything to the contrary in this Agreement, Program services are only provided for the unmodified, binary code versions of these components included in the Program packaging, and not for the source code for these components or for any modifications of such components you may create.

EXCLUDED COMPONENTS: Notwithstanding the terms and conditions of any other agreement you may have with IBM or any of its related or affiliated companies (collectively "IBM"), the following terms and conditions apply to all "Excluded Components" identified in this License Information document: (a) all Excluded Components are provided on an "AS IS" basis; (b) IBM DISCLAIMS ANY AND ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF NON-INFRINGEMENT OR INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE; (c) IBM will not be liable to you or indemnify you for any claims related to the Excluded Components; and (d) IBM will not be liable for any direct, indirect, incidental, special exemplary, punitive or consequential damages with respect to the Excluded Components.

프로그램 고유 조항

This Program is licensed on a capacity basis, subject to the exclusions listed below. A licensee is required to pay the sum of two charge units: a per-processor charge for the number of processors in the SAN File System metadata servers and a per-processor usage charge for the processors in the application servers connected to SAN File System. You may only install this Program on prerequisite hardware, which is specified in the announcement letter. You are licensed to use this Program only to manage files on a single SAN File System cluster. You are licensed to use this Program Product only for the amount of capacity on the metadata servers and application servers for which you have received proper authorization from IBM. This Program is only supported for use with host servers, storage subsystems, and SAN configurations identified by IBM as being supported for attachment to the TotalStorage SAN File System.

embedded version of IBM WEBSPHERE APPLICATION SERVER - EXPRESS: The Program is accompanied by an embedded version of IBM WebSphere Application Server - Express (″embedded Application Server - Express″). Your use of the embedded Application Server - Express components is limited to use in support of your licensed use of the Program. The embedded Application Server - Express components may not be used for any other purpose.

The following paragraphs titled ″JAVA CONNECTOR ARCHITECTURE,″ ″DISABLING DEVICE,″ ″MULTIPLE COMPONENT VERSIONS,″ ″THIRD PARTY COMPONENTS,″ ″SOURCE CODE,″ and ″EXCLUDED COMPONENTS″ apply to your use of IBM TotalStorage SAN File System Software, and the term ″Program″ in these paragraphs shall mean IBM TotalStorage SAN File System Software.

JAVA CONNECTOR ARCHITECTURE: The Program includes Java Connector Architecture (JCA). Your use of the JCA technology is limited to use in conjunction with the Database Connection Pooling function of the Program only. The JCA may not be used for any other purpose.

This Program is licensed on a capacity basis, subject to the exclusions listed below. A licensee is required to pay the sum of two charge units: a per-processor charge for the number of processors in the SAN File System metadata servers and a per-processor usage charge for the processors in the application servers connected to SAN File System. You may only install this Program on prerequisite hardware, which is specified in the announcement letter. You are licensed to use this Program only to manage files on a single SAN File System cluster. You are licensed to use this Program Product only for the amount of capacity on the metadata servers and application servers for which you have received proper authorization from IBM. This Program is only supported for use with host servers, storage subsystems, and SAN configurations identified by IBM as being supported for attachment to the TotalStorage SAN File System.

embedded version of IBM WEBSPHERE APPLICATION SERVER - EXPRESS: The Program is accompanied by an embedded version of IBM WebSphere Application Server - Express (″embedded Application Server - Express″). Your use of the embedded Application Server - Express components is limited to use in support of your licensed use of the Program. The following paragraphs titled ″JAVA CONNECTOR ARCHITECTURE,″ ″DISABLING DEVICE,″ ″MULTIPLE COMPONENT VERSIONS,″ ″THIRD PARTY COMPONENTS,″

″SOURCE CODE,″ and ″EXCLUDED COMPONENTS″ apply to your use of IBM TotalStorage SAN File System Software, and the term ″Program″ in these paragraphs shall mean IBM TotalStorage SAN File System Software.

JAVA CONNECTOR ARCHITECTURE: The Program includes Java Connector Architecture (JCA). Your use of the JCA technology is limited to use in conjunction with the Database Connection Pooling function of the Program only. The JCA may not be used for any other purpose.

Each Proof of Entitlement for the Program authorizes you to use a single version of a Program component. You are not authorized to use multiple versions of the same Program component under the same Proof Entitlement, even if multiple versions of a component are included on the media for the Program.

THIRD PARTY CODE: The Program contains, and future updates and fixpacks to the Program may contain, certain third party components which are provided to you under terms and conditions which are different from this Agreement, or which require IBM or third parties that provide IBM products (″Third Parties″) to provide you with certain notices and/or information. Your use of each third party component which contains or is accompanied by its own license agreement, or for which IBM or Third Parties have identified a license agreement in one of the above ″README″ files (or in a file or files referenced therein), will be subject to the terms and conditions of such other license agreement, and not this Agreement. By using or not uninstalling such third party components after the initial installation of such third party components (thereby giving you access to the applicable license agreements, notices and information), you acknowledge and agree to all such license agreements, notices and information, including those provided only in the English language. You agree to review any updated ″README″ files which accompany updates and fixpacks to the Program.

The Program contains the following third party components:
