2. Januar 2013

On the 28th of April 2012 the contents of the English as well as German Wikibooks and Wikipedia projects were licensed under Creative Commons Attribution-ShareAlike 3.0 Unported license. An URI to this license is given in the list of figures on page 31. If this document is a derived work from the contents of one of these projects and the content was still licensed by the project under this license at the time of derivation this document has to be licensed under the same, a similar or a compatible license, as stated in section 4b of the license. The list of contributors is included in chapter Contributors on page 29. The licenses GPL, LGPL and GFDL are included in chapter Licenses on page 35, since this book and/or parts of it may or may not be licensed under one or more of these licenses, and thus require inclusion of these licenses. The licenses of the figures are given in the list of figures on page 31. This PDF was generated by the  $\text{\LaTeX}$  typesetting software. The  $\text{\LaTeX}$  source code is included as an attachment (`source.7z.txt`) in this PDF file. To extract the source from the PDF file, we recommend the use of <http://www.pdflabs.com/tools/pdftk-the-pdf-toolkit/> utility or clicking the paper clip attachment symbol on the lower left of your PDF Viewer, selecting Save Attachment. After extracting it from the PDF file you have to rename it to `source.7z`. To uncompress the resulting archive we recommend the use of <http://www.7-zip.org/>. The  $\text{\LaTeX}$  source itself was generated by a program written by Dirk Hünniger, which is freely available under an open source license from [http://de.wikibooks.org/wiki/Benutzer:Dirk\\_Huenniger/wb2pdf](http://de.wikibooks.org/wiki/Benutzer:Dirk_Huenniger/wb2pdf). This distribution also contains a configured version of the `pdflatex` compiler with all necessary packages and fonts needed to compile the  $\text{\LaTeX}$  source included in this PDF file.

# 1 Der Körper im Allgemeinen

- Die Oberfläche eines erwachsenen Menschen beträgt etwa 1,8–2 m<sup>2</sup>
- Ein erwachsener Mensch wiegt im Durchschnitt zwischen 60–80 kg (Extreme: 34–615 kg). Die Höhe liegt bei 175 cm (Extreme: 59–272 cm)
- Das Volumen eines erwachsenen Menschen beträgt ungefähr 0,075 m<sup>3</sup>.
- Die Dichte eines normalen erwachsenen Menschen beträgt etwa 1055 kg•m<sup>-3</sup>.<sup>1</sup>
- Das relative Gewicht der einzelnen Organe beträgt: Muskulatur<sup>2</sup> 29 %, Haut<sup>3</sup> 17,4 %, Skelett<sup>4</sup> 11,6 %, Gehirn<sup>5</sup> 2,3 %, Leber<sup>6</sup> 2 %, Blutkörperchen<sup>7</sup> 1,8 %, Lunge<sup>8</sup> 1,6 %, Darm<sup>9</sup> 1,4 %, Nieren<sup>10</sup> 0,5 %, Herz<sup>11</sup> 0,4 %, Milz<sup>12</sup> 0,2 %, Bauchspeicheldrüse<sup>13</sup> 0,1 %.
- Der erwachsene menschliche Körper besteht aus etwa 10 bis 100 Billionen Zellen<sup>14</sup> ( $10^{13}$ – $10^{14}$ ). Nebeneinander aufgereiht ergeben sie eine Kette, die den Äquator über 50 mal umschlingen würde. Pro Stunde werden etwa 1 Mio neue Zellen gebildet. Eine andere Berechnung gibt  $6,25 \times 10^{13}$  Zellen an.
- Die durchschnittliche Zellgröße liegt zwischen 10–20 µm (tausendstel mm).
- Zu den kleinsten Zellen gehören die Körnerzellen<sup>15</sup> der Kleinhirnrinde<sup>16</sup> (3–4 µm), die Lymphozyten<sup>17</sup> (5–6 µm) und die roten Blutkörperchen<sup>18</sup> (7,5 µm im Durchmesser)
- Die größte Zelle des menschlichen Körpers ist die Eizelle<sup>19</sup> 0,1–0,2 mm im Durchmesser. Sie ist mit dem bloßen Auge gerade noch zu erkennen. Zu den "Zellriesen" zählen auch gewisse Nervenzellen, die, ihre Hauptverlängerung allerdings mitgerechnet, bis zu 1,0 m Länge erreichen. Die Zellkörper der Neuronen<sup>20</sup> sind natürlich klein, sie liegen bei 5–150 µm.
- Die Lebensdauer der Zellen ist verschieden, sie hängt von ihrer Aktivität ab. 90 % unserer Körperzellen werden jährlich mindestens einmal gewechselt. Die roten Blutkörperchen leben 120–130

Tage, die Leberzellen 10–15 Tage, die weißen Blutkörperchen<sup>21</sup> 1–3 Tage. Die Schleimhautzellen des Dünndarms<sup>22</sup> 30–35 Stunden, also müssen etwa 74 % dieser Zellen täglich neu gebildet werden.

- Die Temperatur<sup>23</sup> des menschlichen Körpers liegt durchschnittlich bei 36,9 °C
- Von den über 100 bekannten elementaren Grundstoffen konnten im menschlichen Körper etwa 30 nachgewiesen werden: 10 sind im Prozentsatz von 99,9 vorhanden und heißen deshalb Makroelemente: Sauerstoff<sup>24</sup> 63 %, Kohlenstoff<sup>25</sup> 19 %, Wasserstoff<sup>26</sup> 9 %, Stickstoff<sup>27</sup> 5 %, Kalzium<sup>28</sup> 1 %, Phosphor<sup>29</sup> 0,7 %, Schwefel<sup>30</sup> 0,64 %, Natrium<sup>31</sup> 0,26 %, Kalium<sup>32</sup> 0,22 %, Chlor<sup>33</sup> 0,18 %. Die restlichen 0,1 % stellen die sogenannten Mikroelemente dar. Zu ihnen gehören Magnesium<sup>34</sup> 0,04 %, Eisen<sup>35</sup> 0,003 %, Fluor<sup>36</sup>, Selen<sup>37</sup>, Zink<sup>38</sup>, Zinn<sup>39</sup>, Kupfer<sup>40</sup>, Mangan<sup>41</sup>, Nickel<sup>42</sup>, Kobalt<sup>43</sup>, Bor<sup>44</sup>, Brom<sup>45</sup>, Jod<sup>46</sup> (nur 0,0003 %), Arsen<sup>47</sup>, Tellur<sup>48</sup>, Titan<sup>49</sup>, Molybdän<sup>50</sup>, Aluminium<sup>51</sup>, Gold<sup>52</sup> u.a. In Gramm ausgedrückt bei einem Menschen von 70 kg in abgerundeten Werten: Sauerstoff 44 kg, Kohlenstoff 14 kg, Wasserstoff 7 kg, Stickstoff 2,1 kg, Kalzium 1 kg, Phosphor 700 g, Kalium 170 g, Schwefel 140 g, Chlor 70 g, Natrium 70 g, Magnesium 30 g, Eisen 3 g Kupfer 300 mg, Mangan 100 mg Jod 30 mg.

Die geringe Menge dieser Elemente, manchmal können sie nur mittels spezieller Methoden (Atomabsorption, Massenspektografie) nachgewiesen werden, sagt jedoch nichts über ihre Rolle, die sie im Organismus spielen, aus.

52 <http://de.wikipedia.org/wiki/Gold>

- Die chemischen Elemente<sup>53</sup> bilden im erwachsenen Organismus verschiedene Verbindungen, organische und anorganische, die in Prozenten ausgedrückt wie folgt vertreten sind:
  - Wasser<sup>54</sup> 60–70 %, Säuglinge<sup>55</sup> bis zu 75 %
  - Kohlenhydrate<sup>56</sup> 0,6 %
  - Eiweiß<sup>57</sup> 15 %
  - Fett<sup>58</sup> 10 %
  - Mineralsalze<sup>59</sup> 5 %
- Ein Erwachsener von 70 kg Körpermasse besteht demnach aus 46 Liter Wasser, 12 kg Eiweiß, 7,5 kg Fett, 0,7 kg Zucker und 3,8 kg verschiedene Salze
- Die verschiedenen Organe<sup>60</sup> unseres Körpers enthalten unterschiedliche Wassermengen so z.B. das Gehirn<sup>61</sup>: etwa 90 % der Organmasse, die Muskeln<sup>62</sup>: etwa 79 %, die Leber<sup>63</sup> etwa 70 % der Organmasse, Knochen<sup>64</sup>: etwa 20–44 % je nach dem Alter; Mittelwert: 32 %, Blut<sup>65</sup>: etwa 78 % der Masse; Zahnschmelz ist das wasserärmste Gewebe: 2 %;
- Die Haut<sup>66</sup> eines Erwachsenen hat eine Oberfläche von etwa 2 m<sup>2</sup> und ein Gewicht von etwa 4 kg. Rechnet man auch die Unterhaut mit ihren Fetteinlagen hinzu, wiegt die Haut 15–16 kg, was etwa 1/5 des Körpergewichts entspricht. Somit ist die Haut nach der Muskulatur das zweitschwerste Organ unseres Körpers;
- Auf die verschiedenen Körperabschnitte entfallen folgende Prozentsätze der Gesamtoberfläche der Haut: Rumpfvorderseite: 20 %, Rumpfrückseite: 18 % Ober- und Unterarm: 13 % Hand: 4,6 %, Ober und Unterschenkel: 32 %, Fuß: 6,4 %, Kopf: 6 %;
- 1 cm<sup>3</sup> Haut enthält: 6 000 000 Zellen, 25 Berührungs punkte, 13 Kältepunkte, 2 Wärmepunkte, 200 Schmerzpunkte, 10–25 Druckpunkte, 1 m Blutgefäße, 4 m Nerven, 100 Schweißdrüsen, 15 Talgdrüsen und 20–200 Haare (Durchschnitt für den gesamten Körper); (siehe zum Vergleich auch im Kapitel Sinnesorgane bei Tastsinn nach)
- Die Haut ist ein äußerst wichtiges Ausscheidungsorgan. Etwa 4 Millionen Schweißdrüsen<sup>67</sup> dienen der Wärmeregulation des Körpers. Die Schweißdrüsen sind recht ungleichmäßig verteilt. Die meisten kommen in der Hohlhand<sup>68</sup> und an der Unterseite des Fußes<sup>69</sup> vor: etwa 300–400/cm<sup>2</sup>. Die täglich abgesonderte Schweißmenge beträgt etwa 800 ml. Schwankungen sind verbunden mit äußerer Temperatur, physischen Anstrengungen, eingenommenen Flüssigkeiten, Nierentätigkeit<sup>70</sup> und Gesundheitszustand. Man verliert im Leben 19 kg tote Zellen.
- Das menschliche Haar<sup>71</sup> ist 0,07–0,18 mm dick (Schwankungen nach Farbe)

53 <http://de.wikipedia.org/wiki/Chemisches%20Element>

54 <http://de.wikipedia.org/wiki/Wasser>

55 <http://de.wikipedia.org/wiki/S%C3%A4ugling>

56 <http://de.wikipedia.org/wiki/Kohlenhydrat>

61 <http://de.wikipedia.org/wiki/Gehirn>

62 <http://de.wikipedia.org/wiki/Muskel>

63 <http://de.wikipedia.org/wiki/Leber>

64 <http://de.wikipedia.org/wiki/Knochen>

65 <http://de.wikipedia.org/wiki/Blut>

66 <http://de.wikipedia.org/wiki/Haut>

67 <http://de.wikipedia.org/wiki/Schwei%C3%9F>

68 <http://de.wikipedia.org/wiki/Hand>

69 <http://de.wikipedia.org/wiki/Fu%C3%9F>

70 <http://de.wikipedia.org/wiki/Niere>

71 <http://de.wikipedia.org/wiki/Haar>

- Die Zahl der Kopfhaare schwankt zwischen 88.000 und 150.000; sie ist von der Farbe abhängig. z.B. blondes Haar: 150.000, braunes Haar: 110.000 schwarzes Haar: 100 000, rotes Haar: 88 000. Täglicher Haarausfall: 40–120 Haare (Normalausfall). Ein Kopfhaar wächst pro Tag 0,2–0,3 mm, Zuwachs im ganzen Leben 50 m. Ein Barthaar 0,4–0,6 mm, Nasenhaare 2 m im Leben.
- Der tägliche Zuwachs eines Fingernagels<sup>72</sup> beträgt 0,086 mm, der eines Zehennagels, 0,05 mm. Die Fingernägel wachsen im Laufe des Lebens demnach um maximal [(365x120)x0,086 = ca. 3800] 4 Meter.
- Jeder Mensch beherbergt ca. 100 Billionen Bakterien. Sie sind ein notwendiger Teil des menschlichen Lebens geworden. Wir brauchen sie zum Überleben. So befinden sich auf der (sauberen) Hand ca. 200–1 000/cm<sup>2</sup>.

---

<sup>72</sup> <http://de.wikipedia.org/wiki/Nagel%20%28Anatomie%29>

## 2 Der Bewegungsapparat

- Das menschliche Skelett<sup>1</sup> besteht aus 206 bzw. 210 Knochen<sup>2</sup>, deren Gesamtgewicht etwa 10 kg beträgt. Hinzu kommen 14–24 Sesamknochen<sup>3</sup> und 32 Zähne<sup>4</sup>. Die Knochen zeichnen sich durch eine beeindruckende Festigkeit aus. So hält z.B. der Oberschenkelknochen<sup>5</sup> eine Kraft von 15000 Newton<sup>6</sup> aus, das Schienbein<sup>7</sup> sogar eine Kraft von 16500 N. Ein Knochenspan von 1 mm Dicke hält eine Kraft von 150 N aus.
- Der Durchmesser schwankt zwischen 2,6–50 mm (Extreme: im Mittelohr<sup>8</sup>-Oberschenkelknochen)
- Der Mensch hat insgesamt 639 Muskeln<sup>9</sup>, davon etwa 400 Skelettmuskeln, deren Gewicht etwa 25–30 % des Körpergewichts entspricht. Die Kaumuskeln<sup>10</sup> entfalten eine bedeutende Kraft: im Schneidezahngebiet<sup>11</sup> etwa 200 N, im Backenzahngebiet<sup>12</sup> etwa 700–1000 N. Die Tagesgesamtleistung unserer Muskulatur beträgt etwa 3 Megajoule<sup>13</sup>, das entspricht der Arbeit eines Krans, der einen 6-Tonnen-LKW samt Anhänger 50 Meter hoch hebt.
- Dynamometrie<sup>14</sup>: Mann: mit dem rechten Arm 50 kg/m, mit dem linken Arm 40 kg/m; Frau mit dem rechten Arm 40 kg/m, mit dem linken Arm 30 kg/m
- Maximale Dauer-Fortbewegungsgeschwindigkeit ohne Hilfsmittel: 8 km/Stunde (Extrem 22,2 km/Stunde beim 10.000-Meter-Lauf<sup>15</sup>)
- Maximale Kurzzeit-Fortbewegungsgeschwindigkeit: fast 40 km/Stunde beim 100-Meter-Lauf<sup>16</sup>
- Bis zum zweiten Lebensjahr 150 km krabbeln, 22 Tsd. km gehen
- Die Knochen im menschlichen Körper bestehen zu 50% aus Wasser, aus 15,75% Fetten, zu 12,4% aus Knorpelmasse und 21,85% mineralischen Bestandteilen, davon ist der Großteil Kalzium.
- Die Wirbelsäule mit 33 Knochen besteht aus 7 Halswirbeln, 12 Brustwirbeln, 5 Lendenwirbeln, 5 Kreuzbeinwirbeln und 4 Steißbeinwirbeln (Das Steißbein kann auch aus 5 Wirbeln bestehen)
- Der Schultergürtel besteht aus 4 Knochen, 2 Schlüsselbeinen und 2 Schulterblättern
- Der Brustkorb besteht aus 12 Rippenpaaren, 1 Brustbein und den 12 Brustwirbeln. Es gibt 2 Arten von Rippen, 14 sternale Rippen die am Brustbein hängen und 10 asternale Rippen, von denen 6 am Rippenbogen ansetzen und 4 frei ohne Bindung an weiteren Rippen oder dem Brustbein hängen.

### 3 Das Nervensystem

- In unserem Körper gibt es etwa 100 Milliarden Nervenzellen (Neuronen<sup>1</sup>). Davon befinden sich etwa 14 Milliarden im Gehirn<sup>2</sup> und davon wieder 9 bis 10 Milliarden in der Großhirnrinde<sup>3</sup>.
- Unser Gehirn wiegt zwischen 1350 und 1500 g (Gesamthirn). Davon entfallen auf das Großhirn<sup>4</sup> etwa 1188 g und das Kleinhirn<sup>5</sup> etwa 140–144 g, auf die übrigen Hirnteile das restliche Gewicht. Das Gehirn des Erwachsenen wiegt also etwa 1/33–1/44 des Körpergewichts. Absolut genommen haben Elefant<sup>6</sup> und Wal<sup>7</sup> ein schwereres Gehirn als der Mensch, doch nicht der absolute Wert ist entscheidend, sondern das Verhältnis des Gehirngewichts zum Körpergewicht. Einige Beispiele: Mensch 1/33–1/44, Schimpanse<sup>8</sup> 1/150, Hund<sup>9</sup> 1/500, Elefant 1/560, Wal 1/15 000, Arbeitsbiene<sup>10</sup> 1/175, Ameise<sup>11</sup> 1/280, Maikäfer<sup>12</sup> 1/3300.
- Nirgends im Tierreich ist gleichzeitig ein so hohes absolutes und ein so hohes relatives Hirngewicht vorhanden wie beim Menschen.
- Die Oberfläche der Großhirnrinde beträgt etwa 2200 cm<sup>2</sup>, das entspricht einem Quadrat von etwa 47 cm Seitenlänge. Die Dicke der Rinde beträgt 1,5–5 mm. Der Mensch hat die relativ dickste Großhirnrinde: etwa 80 % des gesamten Hirngewichts. (Zum Vergleich beim Pferd<sup>13</sup> etwa 67 %, beim Meerschweinchen<sup>14</sup> etwa 40 %).
- Die Großhirnrinde besteht aus 6 Zellschichten (Schwankungen je nach Hirnregion) und ist gefurcht. Hinsichtlich des Furchungsreichtums steht unser Gehirn jedoch erst an 5. Stelle (nach dem Elefanten, dem Tümmler<sup>15</sup>, dem Schimpansen und dem Pferd. Zwischen dem Windungsreichtum der Rinde und dem Intelligenzgrad besteht augenscheinlich keine direkte Beziehung. Es gibt hochentwickelte Säuger mit furchenarmen Gehirnen (Hund) und tieferstehende Säuger mit furchenreichen Gehirnen (Schaf<sup>16</sup> und Esel<sup>17</sup>).
- Das Gewicht des Rückenmarkes<sup>18</sup> beträgt beim Menschen 2 % des Hirngewichts, bei den Anthropomorphen 5 % und bei den übrigen Säugern 23–47 % des Hirngewichts.

---

1 <http://de.wikipedia.org/wiki/Neuron>

14 <http://de.wikipedia.org/wiki/Meerschweinchen>

15 <http://de.wikipedia.org/wiki/T%FCmmler>

16 <http://de.wikipedia.org/wiki/Schaf>

17 <http://de.wikipedia.org/wiki/Esel>

18 <http://de.wikipedia.org/wiki/R%FCckenmark>

- Das Gesamtgewicht unserer Nervenzellen beträgt etwa 21,5 g, eine mittelgroße Nervenzelle der Rinde wiegt 1/25 Tsd. mg
- Die Zahl der möglichen Verbindungen, welche die etwa 15 Milliarden Neuronen des Gehirns untereinander eingehen können, erreicht wahrhaft astronomische Werte. Infolge der sehr großen Zahl dieser möglichen Kombinationen stimmen 2 Menschen in ihren Gehirnleistungen niemals überein.
- Der Nervenimpuls wird zu den Nervenzellen (Axonen<sup>19</sup>) mit einer Geschwindigkeit von etwa 0,5–120 m/s weitergeleitet. Die Nervenimpulse haben eine Spannung von etwa 120 mV.
- Das Gedächtnis des Menschen kann nur 5–7 Argumente (Chunks<sup>20</sup>) im Kurzzeitgedächtnis speichern. Im Leben lernt man 2000 Menschen mit Namen kennen, mit 150 befreundet man sich für eine Zeit.
- Der Mensch braucht 7–12 Stunden Schlaf pro Tag (abhängig vom Alter), Extreme: durch Hirnschäden Jahrzehnte ohne Schlaf.

---

19 <http://de.wikipedia.org/wiki/Axon>

20 <http://de.wikipedia.org/wiki/Chunking>

# 4 Die Sinnesorgane

## 4.1 Sehsinn

- 90–95 % aller Sinneswahrnehmungen des Menschen sind optische Reize.
- sichtbares Licht im Spektrum der elektromagnetischen Strahlen: 390–760 nm
- es werden bei guten Lichtverhältnissen 1 Mio Farben unterschieden 10 Millionen Farbflächen, etwa 150 benennbare Farben erkannt.
- Lichtempfindlichkeit: Rekord: 5 Lichtquanten (-photonen), ein Blitz von 500 nm erkannt
- Normalsichtigkeit: 0,67–1, ein Mensch mit einer Augenhöhe von 2 m kann theoretisch 5,4 km weit sehen.
- Auflösungsvermögen 1/120 Bogengrade
- Brennweite der Linse: 69,9–40,4 mm (Vergleich Eule 250–500 mm, Frosch 5 mm)
- Sehschärfewinkel (minimum separabile): 25 Bogensekunden, bzw. 3–5 Winkelsekunden; Rekord: 0,85" (Vergleich Rhesusaffe: 34")
- Gesichtsfeld: 180°, (Scholle, Frosch 360°)
- Verschmelzungsfrequenz: 60 Bilder/sec = 60 Hz bei Tag ohne Bedeckung (Libelle 300 Bilder/sec)
- die Netzhaut (Retina) des Auges hat eine Oberfläche von  $3,5 \text{ cm}^2$  und ist 0,1–0,4 mm dick. Sie ist das eigentliche Sehorgan, das aus etwa 132 Millionen Sehzellen besteht, davon etwa 125 Millionen „Stäbchen“ für das Schwarz-Weiß-Sehen und etwa 7 Millionen „Zäpfchen“ für das Bunt-Sehen. Der Sehnerv besteht aus etwa 1 Million isolierten Fasern
- der Druck in der Bindegewebe-Arterie ist  $(4666 \pm 1333) \text{ Pa}$  (entspricht  $(35 \pm 10) \text{ mm Quecksilbersäule}$ ).
- auf ultraviolette und infrarote Strahlen reagiert die Haut mit Bräunung bzw. Rötung/Blasen; für das Auge ist dieser Teil des Spektrums unsichtbar.
- Ionisierende Strahlen können eine verändernde Wirkung auf den Körper haben, in Abhängigkeit von der Dosis und davon, ob der ganze Körper oder nur ein Teil bestrahlt wurde, können gesundheitliche und u.U. auch tödliche Wirkungen, ggf. erst nach einiger Zeit, auftreten. Absolute Grenzwerte gibt es nicht.
- Ein Mensch schlägt seine Augenlider etwa 415 Mio. mal in seinem Leben.

## 4.2 Gehörsinn

- Mindestgröße des Reizes:  $8 \times 10^{-18} - 4 \times 10^{-17} \text{ Watt}$
- Differenzierungsvermögen:  $\frac{1}{4}$  Ton = 5 Hz, ein geübtes Gehör kann sogar Unterschiede von 1 Hz wahrnehmen
- Schallpegel: 0–170 dB, bei der Schmeißfliege 0,3–17.400
- geflüsterte Stimme wird bis 6–8 m gehört, Gespräch bis 20 m, Schreie bis 200 m. Rekord 17 km bei günstigen Bedingungen
- Hörfähigkeit: 16–21.000 Hz, (vom Alter abhängig), Fledermaus bis 400.000 Hz

- Hörschärfe (räumliches Auflösungsvermögen):  $8,4^\circ$  (kleinster Winkel bei dem 2 Schallquellen getrennt wahrgenommen werden), bei der Katze:  $1,5^\circ$
- Vibrationsschwelle bei 0,2 kHz optimale Frequenz: 1000 Hz
- das Cortische Organ (Innenohr) besitzt etwa 14 000 Hörzellen, die je 50 Sinneshärchen von 5 Mikron Länge aufweisen
- Die menschliche (Sing-)Stimme reicht von 65,41–523,25 Hz (C–c<sup>2</sup>) (Männer) bzw. von 150–1046,51 Hz (a–e<sup>3</sup>) (Frauen und Kinder). Sprechstimme 130 Hz  $\pm$  10 Hz (Männer), 260 Hz  $\pm$  15 Hz (Frauen und Kinder).
- Die Stimmstärke reicht von 5–130 dB (Extreme)
- Alle 2 Std wird bis zum 10. Lj ein neues Wort gelernt (= 43 800 Wörter)

## 4.3 Geschmacksinn

Differenzierung: es gibt 5 Geschmacksrichtungen

- süß (Saccharin): 0,001 g/l
- sauer (Salzsäure): 0,01 g/l
- salzig (NaCl): 1,0 g/l
- bitter (Chinin): 0,0004 g/l
- umami (Aminosäuren bzw. Glutamat)

Vermutlich gibt es weitere Geschmacksrezeptoren, die Fett gesondert wahrnehmen. Das geschmackliche Empfinden von Schärfe ist lediglich auf die Aktivierung von Schmerzrezeptoren zurückzuführen.

## 4.4 Geruchssinn

In 1 Liter Luft werden erkannt:

- $4 \times 10^{-9}$  (0,000 000 004) g Aceton
- $16 \times 10^{-12}$  (0,000 000 000 016) g Kampfer
- $500 \times 10^{-15}$  (0,000 000 000 000 5) g Vanillin
- $450 \times 10^{-15}$  (0,000 000 000 000 45) g Ethylmercaptan
- $350 \times 10^{-15}$  (0,000 000 000 000 35) g Skatol
- Differenzierungsvermögen: 1000 Gerüche Der Geruchssinn des Hundes übertrifft den des Menschen etwa 1000 mal
- Die Riechschleimhaut hat eine Oberfläche von etwa  $5 \text{ cm}^2$  und enthält etwa 10 Millionen Riechzellen und etwa 150 Schleimdrüsen.

## 4.5 Tastsinn

- Schwingungen von  $0,02 \mu\text{m}$  werden noch wahrgenommen
- in der Lederhaut gibt es: 40 000 Vater-Pacinische Tastkörperchen 40 000 Ruffinische Wärmekörperchen, 240 000 Krausesche Kältekörperchen 500 000 Meissnersche Tastkörperchen 60 Millionen Merkelsche Tastscheiben, und etwa 4 Millionen freie Nervenenden (Schmerzempfindung). Die Verteilung dieser Sinneskörperchen weicht in den verschiedenen Körperregionen ab.

# 5 Der Blutkreislauf

## 5.1 Blutmenge und Blutzellen

- ein Erwachsener hat zwischen 5–7 Liter Blut, das ist 1/12 der Körpermasse). Auf 1 mm<sup>3</sup> Blut entfallen etwa 5 Mio rote Blutkörperchen (beim Mann, bei der Frau etwa 4,5 Millionen), 5000–7000 weiße Blutkörperchen und etwa 300 000 Blutplättchen. In 5 Liter Blut gibt es somit etwa 25 Billionen rote Blutkörperchen und etwa 30 Milliarden Leukozyten. Erythrozyten besitzen einen Durchmesser von etwa 7,5 µm und sind etwa 2 µm hoch. Seitlich aneinandergereiht ergäben die roten Blutkörperchen eine Kette, die den Äquator etwa 5 mal umschlingen würde. Geldrollenartig gestapelt ergeben sie einen Stapel von etwa 60000 km. Die Gesamtoberfläche der roten Blutkörperchen beträgt etwa 3000 m<sup>2</sup>; täglich werden etwa 200 Mrd. rote Blutkörperchen produziert.

## 5.2 Masse

- das Herz, der "Motor ohne Ruhepause", ist ein faustgrosser Hohlmuskel, der eine Masse von etwa 280 g (Frau) – 310 g (Mann) hat;

## 5.3 Herzfrequenz

- das Herz des Erwachsenen schlägt etwa 70 mal pro Minute , etwa 4200 mal pro Stunde , etwa 100 000 mal pro Tag , etwa 37 Mio. mal pro Jahr und etwa 2,6 Milliarden mal in einem 70jährigen Leben . Frauenherzen schlagen im Durchschnitt etwas schneller als Männerherzen. Bei ausdauertrainierten Frauen und untrainierten Männern kann es auch umgekehrt sein.

## 5.4 Schlagvolumen und Pumpleistung

- bei jedem Schlag (Dauer: 0,8 Sekunden) pumpt das Herz (linke Herzkammer mit arteriellem Blut) in Ruhe etwa 70 ml Blut in den Körperkreislauf (Schlagvolumen). Das sind bei 70 Schlägen/Minute: pro Min. 4,9 Liter Blut (gerundet: 5 l), pro Stunde 294 Liter, pro Tag 7.056 Liter, in einem Jahr 2.575.440 Liter, in einem Menschenleben von 80 Jahren sind das 210.240.000 Liter Blut.
- bei starken Anforderungen kann das Herz die 5-fache Blutmenge umwälzen, wobei die Steigerung zur Hauptsache von der erhöhten Schlagfrequenz herführt.

## 5.5 Leistung

- die Arbeitsleistung des Herzens ist dementsprechend groß. Um ein Schlagvolumen in den Kreislauf zu pumpen, leistet das Herz eine Arbeit von 1/5 Meterkilopond. Das entspricht einer Arbeit von 20 000 Meterkilopond/Tag, Die etwa 180 Millionen Liter Blut, die in einem 70jährigen Leben gepumpt werden, würden einen Tankwagenzug mit etwa 10000 Waggons füllen;

## 5.6 Kapillaren

- die Blutkapillaren haben einen Durchmesser von 5–25 Mikrometer und eine Länge von 0,5–4 mm. Hintereinander geschaltet erhielte man ein Rohr von etwa 160 000 km Länge was etwa 1/2 der kleinsten Entfernung Erde–Mond entspricht. Die Oberfläche der Kapillaren zusammengenommen beträgt etwa 6000–7000 m<sup>2</sup>

## 5.7 Blutflußgeschwindigkeit

- Das Blut benötigt etwa 1 Minute um den kompletten Körper einmal zu durchqueren. Diese Menge ist gleich dem Herzminutenvolumen, also dem Blutvolumen, das in einer Minute vom Herzen ausgeworfen wird. Es entspricht in etwa der Blutmenge im Körper: ca. 6 Liter.
- das Blut kreist in den Blutgefäßen mit folgenden Durchschnittsgeschwindigkeiten: Aorta und große Arterien: 20–50 cm/sec, kleine Arterien 5,6–5,8 cm/sec; Arteriolen: 0,28–0,30 cm/sec, Kapillaren: 0,03–0,05 cm/sec, Venen 2 cm/sec.

## 5.8 Blutdruck

- der Blutdruck beträgt in Ruhe etwa 120 mm Hg systolisch ( in der Herzauswurphase) und 80 mm Hg diastolisch ( in der Herzfüllungsphase ). Durch die Elastizität der Schlagadern sinkt der Blutdruck diastolisch nicht auf Null ab. Unter starker körperlicher Belastung steigt der Blutdruck bis auf 200 / 100 mm Hg an.

## 6 Der Verdauungsapparat

- die 6 großen Mundspeicheldrüsen sondern täglich 1–2 Liter Speichel ab. Die Menge des abgesonderten Speichels ist unter anderem von den Speisen abhängig, die wir im gegebenen Moment zu uns nehmen. Im Leben werden etwa 50 t Speichel produziert
- der Magen kann bis zu 3 Liter fassen. Verschiedene Speisen verbleiben hier verschieden lang, Beispiele: Flüssigkeiten: meist nur einige Minuten; Reis: 1,5 Stunden, Gemüse, Brot, weiche Eier: etwa 3 Stunden; gebratenes Fleisch: 4–6 Stunden; sehr fettes Fleisch und Ölsardinen 8 Stunden und noch mehr. Etwa 35 Millionen Drüsen der Magenschleimhaut sondern täglich 1–2 Liter Magensaft ab.
- Der Dünndarm misst etwa 5 m Länge . Seine vielen Millionen Drüsen sondern pro Tag etwa 3 Liter Verdauungssaft ab.
- Die Oberfläche der Dünndarmschleimhaut wird durch etwa 6–7 Millionen Darmzotten ungemein stark vergrößert: etwa  $40 \text{ m}^2$  . Diese Riesenfläche gewährleistet die sogenannte Darmabsorption der verdauten Nährstoffe.
- Die Leber wiegt etwa 1,5 kg und besteht aus etwa 1 Million Läppchen. Sie ist das größte Drüsengewebe des Körpers;
- der Speisebrei durchwandert den Dickdarm in 7–10 Stunden, wobei etwa 80 % der etwa 8 Liter Wasser, die täglich in die Verdauungswege abgegeben werden, wieder in den Körper zurückkehren;
- ein Erwachsener verdaut pro Jahr etwa das 7fache, im Laufe eines 75 jährigen Lebens etwa das 500-fache des eigenen Körpergewichts an Nahrung
- Ein Durchschnitts-Europäer verzehrt in 70 Jahren folgende Mengen an Nahrungsmitteln: 30 Tonnen Kartoffeln, 25 Tonnen Brot, 18 Tonnen Fleischwaren, 15 Tonnen Gemüse, 10 Tonnen Früchte, 5 Tonnen Fisch, 25 000 Liter verschiedene Getränke (Milch, Bier usw.) 160 kg Schokolade, 7300 Eier, 84 kg Salz.
- Ohne zu essen kann der Mensch bis zu 40 Tage leben, ohne zu trinken nur 3–6 Tage.

## 7 Der Atmungsapparat

- das absolute Gewicht der Lungen beträgt etwa 1300 g. Die Differenz bei Mann und Frau ist maximal 200 g.
- Die Atemluft besteht zu 78% aus Stickstoff und zu 20,8% aus Sauerstoff, der Rest sind Kohlen-dioxid (0,03%, durch Verbrennungsvorgänge mittlerweile 0,038%) und andere Gase (Edelgase, Kohlenmonoxid).
- die Zahl der kleinen Bronchien beträgt etwa 230 000, die Zahl der Lungenbläschen (Alväolen) liegt zwischen 300 und 450 Millionen. Sie ergeben eine Atmungsfläche von 90–150 m<sup>2</sup>. Die Alväolarkapillaren ergeben eine Fläche von etwa 140 m<sup>2</sup>;
- bei einem gewöhnlichen Atemzug werden etwa 500 cm<sup>3</sup> Luft in die Lungen eingesogen. (= Atem- oder Respirationsluft).
- Nach normaler Einatmung können weitere 1500 cm<sup>3</sup> Luft, durch angestrengtes Einatmen in die Lungen eingesogen werden (= Komplementärluft). Desgleichen können nach normaler Ausatmung durch höchste Anstrengung noch etwa 1500 cm<sup>3</sup> Luft ausgeatmet werden (= expiratorisches Reservevolumen). Die genannten Volumina ergeben die so genannte Vitalkapazität der Lungen. Sie beträgt also im Durchschnitt 3500 cm<sup>3</sup>. Nach maximalen Ausatmen verbleiben immer noch 1500 cm<sup>3</sup> Luft in der Lunge (= Residualvolumen). Zusammen mit der Vitalkapazität ergibt sich das gesamte Lungenvolumen zu 5000 cm<sup>3</sup> (= Totalkapazität). Schwankungen sind jedoch häufig.
- die Zahl der Atemzüge: etwa 16/Minute. Dabei werden 10 Liter Luft/Minute ein- bzw. ausgeatmet. Die Tagesleistung der Atemmuskulatur beträgt ca. 25 kNm (KiloNewtonmeter); Bis zum 21. Lj. Wird die Luft von 3,5 Mio Luftballons eingearbeitet.
- Die sich nach dem maximalen Einatmen in den Lungen befindliche Luft reicht bei einem gesunden Erwachsenen in Ruhe etwa 5min aus um das Gewebe mit Sauerstoff zu versorgen. Allerdings setzt nach dem Ausatmen in 20 Sekunden ein starker Atemreiz ein, nach dem Einatmen in 60 Sekunden. Manche Perlentaucher bleiben bis zu 4–6 min unter Wasser, der Rekord liegt bei über 15 min.
- pro Minute werden die Lungen von etwa 6 Liter Blut durchströmt. Dabei nehmen sie etwa 300 ml Sauerstoff auf;

## 8 Der Ausscheidungsapparat

- die Nieren wiegen durchschnittlich je 130 g und haben ein Volumen von etwa  $120 \text{ cm}^3$ ;
- die Struktur- und Funktionseinheiten der Nieren sind die Nierenkanälchen (Nephrons), von denen es etwa 1 Million/Niere gibt. Sie haben eine Länge von je 40 mm (im Durchschnitt). Aneinander gereiht ergäben sie ein Röhrchen von 80–100 km Länge. In den Nierenkanälchen wird der Harn gebildet;
- die Nieren werden täglich von etwa 1508 Liter Blut durchströmt. Dabei treten in den Nierenkörperchen der Nephronen etwa 191 Liter eiweißloses Blutplasma aus den Nierenarteriolen in das Nephron über (Primärharn). Beim Durchströmen der Nierenkanälchen werden aus dem Primärharn etwa 178,5 Liter Wasser rücksorbiert (zusammen mit verschiedenen Salzen und Glukose). Was übrig bleibt, ist der konzentrierte Harn, etwa 1–1,5 Liter/24 Stunden, der ausgeschieden wird. Die Menge des täglich ausgeschiedenen Harns ist von verschiedenen Faktoren abhängig, wie: Gesundheitszustand, Wasserzufluss, Arbeitsregime, äußere Temperatur. Zuckerkrankene scheiden täglich mehrere Liter Harn aus; im Diabetes insipidus sind es sogar bis zu 30 Liter täglich. Im Laufe des Lebens produzieren die Nieren etwa 40.000 l Urin.
- Wasser wird auch durch die Haut (etwa 450 ml/Tag), durch die Lungen (etwa 550 ml/Tag) und durch den Kot (etwa 150 ml/Tag) abgegeben;

## 9 Der Fortpflanzungsapparat

- Die Normalmaße des männlichen Fortpflanzungsorgans, des Penis, werden zwischen 7,25–11,5 cm in schlaffem Zustand und mit 12–19 cm in erigiertem Zustand angegeben. Extreme 1–44,5 cm (?? beide krankhafte Erscheinungen). Der Kamasutra kennt drei Größen des typisch männlichen Organs: "Hengst" (18–25 cm), "Stier" (16–18cm) und "Hase" (13–15, 5 cm). Der Umfang variiert im erigierten Zustand zwischen 8,5–12 cm. Eine in 1970 durchgeführte Studie ergab, dass der längste Penis 23.75 cm (im erregten Zustand!) betrug. In einer früheren, multikulturellen Studie, wurden allerdings andere Längen erfasst: fast 30,5 cm!
- Der größte Busen wird mit 220 cm Brustumfang und einem Gewicht von etwa 50 kg angegeben (Bertha Drews).
- Der Orgasmus dauert normalerweise 5–7 Sekunden. Extreme: mehr als 30 Sekunden (bei einer Frau).
- Im Durchschnitt hat der Mensch 2.580 mal Sex mit 5 verschiedenen Partnern, ist 2 mal verliebt
- die menschliche Samenzelle wiegt etwa 2 milliardstel Gramm, die Eizelle wiegt etwa 8,5 Milligramm. Die befruchtete Eizelle wiegt etwa 20 mg. Der Embryo von 2 Monaten wiegt 1 g, das Kind bei der Geburt etwa 3,5 kg, d.h., das 175.000 fache von den 20 mg der Anfangsmasse. In den 9 Monaten der Schwangerschaft werden aus der befruchteten Eizelle etwa 3 Billionen Zellen. Vergleicht man 1 Zelle mit einem Haus, dann ähnelt das Embryonalwachstum der Entstehung und Vergrößerung einer Siedlung. Nach 9 Monaten wäre statt einem Haus eine Mammutstadt vorhanden, die etwa 10mal größer wäre als alle Städte und Dörfer der Welt zusammengenommen.

# 10 Die Zeit

## 10.1 Lebenserwartung

- Die durchschnittliche Lebensdauer des Menschen liegt weltweit bei 73 Jahren, Frauen leben durchschnittlich 5 Jahre länger als Männer. Rekord: 122 Jahre (Jeanne Calment<sup>1</sup>)

Lebenserwartung in Westeuropa bei Frauen 79 j, Amerika 80, Afrika 55.

- Mittlere Lebenserwartung in der Bundesrepublik Deutschland
  - Frauen 82 Jahre
  - Männer 77 Jahre
  - Raucher 8 Jahre weniger

## 10.2 ... und womit die Zeit verbracht wird

25 Jahre schlafen und

- 4.000 × Sex

3,5 Jahre essen und trinken

- 45,5 Schweine
- 3,2 Rinder
- 5,1 Ziegen
- 926 Hühner
- 16.269 Eier
- 6.921 l Milch
- 5.192 Brote
- 5.000 kg Kartoffeln
- 8.028 Äpfel
- 6.859 Möhren
- 3.367 Schokoladentafeln
- 4.049 Riegel
- 11.586 l Kaffee
- 8.857 l Bier
- 1.881 l Wein
- 88.287 Zigaretten

6 Monate auf der Toilette

---

<sup>1</sup> [http://de.wikipedia.org/wiki/Jeanne\\_Calment](http://de.wikipedia.org/wiki/Jeanne_Calment)

- 2.900 kg Ausscheidungen
- 3.651 Rollen Toilettenpapier

12 Jahre reden, 2 Jahre telefonieren

- 461.782.349 Worte (bei 16.000 Worten täglich)

12 Jahre fernsehen

- 6 Fernsehgeräte

2 Jahre Auto o. Ä. fahren, 6 Monate im Stau stehen

- 9,8 Autos
- 44.820 l Kraftstoff
- 819.214 km Autofahrt
- 4 Fahrräder
- 25.160 km Fußweg

8 Jahre arbeiten, 2 Wochen küssen

Dabei werden insgesamt hinterlassen

- 35.800 kg Müll
  - 3.796 Windeln
  - 8.000 kg Verpackungen für Lebensmittel

### Wie verbringen wir unsere Zeit?

Einer Studie von *Geo Wissen* (36/2005) zufolge verbringt der „ganz durchschnittliche Deutsche“ seine (Lebens-)Zeit folgendermaßen:

- 24 JAHRE UND 4 MONATE schläft der Mensch
- 7 JAHRE arbeitet er
- 5 JAHRE wendet er fürs Essen auf
- 2 JAHRE UND 10 MONATE verplaudert, vertratscht und verscherzt er
- 2 JAHRE UND 6 MONATE verbringt der Deutsche im Auto
- 2 JAHRE UND 2 MONATE kocht er oder schmiert Brote
- 1 JAHR UND 10 MONATE lernt er und bildet sich fort
- 1 JAHR UND 7 MONATE betätigt er sich sportlich
- 16 MONATE putzt er seine Wohnung
- 12 MONATE geht der Deutsche ins Kino, Theater oder zu Konzerten
- 9 MONATE verbringt er auf dem Weg zur Arbeit
- 9 MONATE wäscht und bügelt der Deutsche
- 9 MONATE spielt er mit seinen Kindern
- 6 MONATE sitzt er auf der Toilette
- 6 MONATE steht der Deutsche im Stau
- 5 MONATE setzt er seine Wohnung instand
- 4 MONATE spielt er am Computer
- 3 MONATE nimmt er an Vereinssitzungen teil
- 3 MONATE vertreibt er sich die Zeit in Kneipen
- 3 MONATE bringt der Deutsche beim Arzt zu
- 12 WOCHEN betätigt er sich beim Vorspiel
- 2 WOCHEN küsst er

- 2 WOCHEN betet er
- 17 TAGE geht der Deutsche jagen, fischen und sammeln und
- 16 STUNDEN erlebt er den sexuellen Höhepunkt

# 13 Licenses

## 13.1 GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright © 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed. Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program—to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you can), that you receive source code or can get it if you want to, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it:

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patent holders applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

These precise terms and conditions for copying, distribution and modification follow. TERMS AND CONDITIONS 0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you", "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion. 1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging of a Major Component, but which is not part of that Major Component, or (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run

the object code and to modify the work, including scripts to control the objects. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work. 2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary. 3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures. 4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee. 5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

\* a) The work must carry prominent notices stating that you modified it, and giving a relevant date. \* b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices." \* c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it. \* d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copy are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate. 6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

\* a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium); accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange. \* b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium); accompanied by a written offer, valid for at least three years and for as long as you offer spur parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to the Corresponding Source from a network server at no charge. \* c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b. \* d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements. \* e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is ensured.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying. 7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

\* a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or \* b) Requiring preservation of specified reasonable legal notices displayed by software containing it; or \* c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or \* d) Limiting the use for publicity purposes of names of licensors or authors of the material; or \* e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or \* f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License, along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way. 8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License, (ignoring any patent license granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license; and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time that you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so. 10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives every license to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has or it can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it. 11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work in which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law. 12. No Surrender of Others' Freedoms.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, if you cannot convey a covered work under these conditions, then a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program. 13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such. 14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of

acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version. 15. Disclaimer of Warranty.

THE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION. 16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PRO-

GRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. 17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does> Copyright (C) <year> <name of author> This program comes with ABSOLUTELY NO WARRANTY; for details type 'show w'. This is free software, and you are welcome to redistribute it under certain conditions; type 'show c' for details.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author> This program comes with ABSOLUTELY NO WARRANTY; for details type 'show w'. This is free software, and you are welcome to redistribute it under certain conditions; type 'show c' for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lGPL.html>.

## 13.2 GNU Free Documentation License

Version 1.3, 3 November 2008

Copyright © 2000, 2001, 2002, 2007, 2008 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed. 0. PREAMBLE

The purpose of this License is to make a manual, textbook, or other functional and useful document "free in the sense of freedom": to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or noncommercially. Secondly, this License preserves the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.

This License is a kind of "copyleft", which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.

We have designed this License in order to use it for manuals for free software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference. 1. APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to use the work under the conditions stated herein. The "Document", below, refers to any such manual or work. Any member of the public is a licensee, and is addressed as "you". You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.

A "Modified Version" of the Document means any work containing any portion of the Document, or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A Secondary Section is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document's overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be of a matter of historical connection with the subject or with related matters, or of legal, commercial, philosophical, ethical or political position regarding them.

The Invariant Sections are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.

The "Cover Texts" are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A "Transparent" copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic transformation to a variety of formats suitable for input to text formatters. A copy made in an otherwise transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not transparent. An image format is not transparent if used for any substantial amount of text. A copy that is not "Transparent" is called "Opaque".

Examples of suitable formats for Transparent copies include plain ASCII without markup, TeXinfo input format, LaTeX input format, SGML or XML using a publicly available DTD, and standard-conforming simple HTML, PostScript or PDF for human modification. Examples of transparent image formats include PNG, XCF and JPG. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, SGML or XML for which the DTD and/or processing tools are not generally available, and the machine-generated HTML, PostScript or PDF produced by some word processors for output purposes only.

The "Title Page" means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, "Title Page" means the text near the most prominent appearance of the work's title, preceding the beginning of the body of the text.

The "publisher" means any person or entity that distributes copies of the Document to the public.

A section Entitled XYZ means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that

translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as "Acknowledgements", "Dedications", "Endorsements", or "History".) To "Preserve the Title" of such a section when you modify the Document means that it remains a section Entitled XYZ (according to this definition).

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License. 2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies. 3. COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document. 4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

\* A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there are any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission. \* B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement. \* C. State on the Title page the name of the publisher of the Modified Version, as the publisher. \* D. Preserve all the copyright notices of the Document. \* E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices. \* F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below. \* G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice. \* H. Include an unaltered copy of this License. \* I. Preserve the section Entitled "History", Preserve its Title, and add to it an item stating at least the title, year, author, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled "History" in the Document, create one stating the title, year, author, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence. \* J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the "History" section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission. \* K. For any section Entitled Acknowledgements or "Dedications", Preserve the Title of the section, and preserve in the section

all the substance and tone of each of the contributor acknowledgements and/or dedications given therein. \* L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles. \* M. Delete any section Entitled Endorsements". Such a section may not be included in the Modified Version. \* N. Do not retitle any existing section to be Entitled Endorsements" to conflict in title with any Invariant Section. \* O. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section Entitled Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties—for example, statements of peer review or that the text has been approved by an organization enough number of copies you must also follow the conditions in section 3.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version. 5. COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled "History" in various original documents, forming one section Entitled "History"; likewise combining any sections Entitled Acknowledgements", and any sections Entitled "Dedications". You must delete all sections Entitled Endorsements". 6. COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document. 7. AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an aggregate if the copyright resulting from the compilation or is not used to limit the legal rights of the compilation's users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document's Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate. 8. TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

If a section in the Document is Entitled Acknowledgements", "Dedications", or "History", the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title. 9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it. 10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <http://www.gnu.org/copyleft/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License or any later version applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Document. 11. RELICENSING

"Massive Multiauthor Collaboration Site" (or "MMC Site") means any World Wide Web server that publishes copyrighted works and also provides permanent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A "Massive Multiauthor Collaboration" or "MMC" contained in the site means any set of copyrighted works published on the MMC site.

"CC-BY-SA" means the Creative Commons Attribution-Share Alike 3.0 license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

"Incorporate" means to publish or republish a Document, in whole or in part, as part of another Document.

An MMC is eligible for relicensing if it is licensed under this License, and if all versions that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing. ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the "with" ... Texts" line with this:

Copyright (C) YEAR YOUR NAME. Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.3 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. A copy of the license is included in the section entitled "GNU Free Documentation License".

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the "with" ... Texts" line with this:

with the Invariant Sections being LIST THEIR TITLES, with the Front-Cover Texts being LIST, and with the Back-Cover Texts being LIST.

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing these examples in parallel under your choice of free software license, such as the GNU General Public License, to permit their use in free software.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

GNU LESSER GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright © 2007 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work. 1. Exemption to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL. 2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed where the facility is invoked), then you may convey a copy of the modified version:

\* a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

### 3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under

terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- \* a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.
- \* b) Accompany the object code with a copy of the GNU GPL and this license document.

### 4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

- \* a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.
- \* b) Accompany the Combined Work with a copy of the GNU GPL and this license document.
- \* c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.
- \* d) One of the following:
  - \* 0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and

under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source. o 1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

- \* e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

### 5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

\* a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

- \* b) Give prominent notice with the combined library that part of it is a work based on the Library, and, explaining where to find the accompanying uncombined form of the same work.

### 6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.
