

Technogym official supplier of  
Fitness equipment to the Olympics

The Paralympics has a  
world class fitness centre.

The building is designed  
to be converted into  
> along with the adjacent  
? centre  
a school. when the games  
are over. Rooms are therefore  
outfitted as classrooms, an  
auditorium and science  
laboratories.

Gym

Equipment is supplied by  
Technogym, an Italian  
company that has supplied gym  
equipment for the Olympics  
since 2000. Equipment has been  
provided not just for the main sites  
but for all the Olympic venues.

Gym

Equipment is increasingly oriented towards ~~maximum~~ flexibility, allowing athletes to <sup>select the</sup> ~~exercise~~ the muscles they want to exercise.

In addition to the equipment there are also a number of trained instructors in its use on hand, as many athletes from poorer countries have never seen such equipment before.

These instructors included not just ones concerned with physical training, but with motivational training as well.
