GENTLERES—The contemplated cleatag of the State Public Schools, in consequence of the apprehended fnability on the part of the Legie-

rise now exist in several of the German States. That all lotseries, no matter for what purpose established, are a species of gambling, we cannot attempt to deay. It ican however, he safely asserted that they are the least observious form of gaming, and open to fewer objections than any other games of chance. The lottery is resorted to by charches, faires, and all kinds of besevolent associations for the purpose of raising money. In gambling, in this way a man may lose his money—if for a good purpose, why regret it re-bet not his time, beatth and character, as he would at those games of chanse requiring his continual presence.

But hits excupie should than exist in recorting to the means suggested for creating a revenue and the second of a firstly based and fairly conducted State Lottery would bring about, the most important of which would be the end put, hereafter, to the sale of foreign lottery tickets, and the consequent saving of hundreds of thousands of oldlars annually to the population of our State. If the amount expended in New Orleans alone within the past twenty years for the support of the Royal Havana Lottery could be porrectly accretained and placed in figures, it, would appear fabrious.
