Question 1a of 10 ( 3 Gross Income 585860 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
Question: $\quad$ Nasir has an annual salary of $\$ 64,000$, and his company pays him twice a month. What is the gross income per paycheck that Nasir receives?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 1230.77$ |  |
| *B. | $\$ 2666.67$ |  |
| C. | $\$ 5333.33$ |  |
| D. | $\$ 10,666.67$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 2666.67$.
64,000/24

Question 1b of 10 ( 3 Gross Income 585861 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: $\quad$ Hallie has an annual salary of $\$ 58,000$, and her company pays her twice a month. What is the gross income per paycheck that Hallie receives?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 1115.38$ |  |
| *B. | $\$ 2416.67$ |  |
| C. | $\$ 4833.33$ |  |
| D. | $\$ 9666.67$ |  |

Global Incorrect Feedback
The correct answer is: \$2416.67.

## 58000/24

Global Incorrect Feedback
The correct answer is: $\$ 2958.33$.
71000/24

Question 2a of 10 ( 1 Required Deductions 585870 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: FICA deduction consists of ___.

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | income tax and health insurance |  |
| *B. | Medicare and Social Security |  |
| C. | Medicaid and Social Security |  |
| D. | pension and Medicare |  |

Global Incorrect Feedback
The correct answer is: Medicare and Social Security.

Question 2b of 10 ( 1 Required Deductions 585871 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: FICA deduction consists of $\qquad$ .

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | income tax and health insurance |  |
| B. | pension and Medicare |  |
| C. | Medicaid and Social Security |  |
| *D. | Medicare and Social Security |  |

Global Incorrect Feedback
The correct answer is: Medicare and Social Security.

Question 2c of 10 ( 1 Required Deductions 585872 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: FICA deduction consists of $\qquad$ .

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | income tax and health insurance |  |
| B. | pension and Medicare |  |
| *C. | Medicare and Social Security |  |
| D. | Medicaid and Social Security |  |

Global Incorrect Feedback
The correct answer is: Medicare and Social
Security.

Question 3a of 10 ( 3 Required Deductions 585877 )
Maximum Attempts: 1
Question Type: Multiple Choice

Maximum Score:
Question:

Bailee had a gross income of $\$ 2358.33$ during each pay period in 2009. If she got paid monthly, how much of her pay was deducted for FICA in 2009?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 410.35$ |  |
| B. | $\$ 1754.60$ |  |
| C. | $\$ 1881.95$ |  |
| *D. | $\$ 2164.95$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 2164.95$.
Her yearly income is $\$ 2358.33 \times 12=$ \$28,299.84.
FICA is $7.65 \%$ of her income.
$0.0765 \times \$ 28,299.84=\$ 2164.95$

Question 3b of 10 ( 3 Required Deductions 585878 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Quinton had a gross income of $\$ 2741.67$ during each pay period in 2009. If he got paid monthly, how much of his pay was deducted for FICA in 2009?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 477.05$ |  |
| B. | $\$ 2039.80$ |  |
| C. | $\$ 2187.85$ |  |
| *D. | $\$ 2516.85$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 2516.85$.
His yearly income is $\$ 2741.67 \times 12=$ \$32,900.04.
FICA is $7.65 \%$ of his income.
0.0765 x \$32,900.04 = \$2516.85

Question 3c of 10 ( 3 Required Deductions 585879 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
Question: Kassandra had a gross income of $\$ 3008.33$ during each pay period in 2009. If she got paid monthly, how much of her pay was deducted for FICA in 2009?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 2761.64$ |  |
| B. | $\$ 2400.65$ |  |
| C. | $\$ 2238.20$ |  |
| D. | $\$ 523.45$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 2761.64$.
Her yearly income is $\$ 3008.33 \times 12=$
\$36,099.96.
FICA is $7.65 \%$ of her income.
0.0765 x $\$ 36,099.96=\$ 2761.64$

Question 4a of 10 ( 3 Required Deductions 585884 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
Question:
A linguist had a gross income of \$53,350 last year. If $17.9 \%$ of his income got withheld for federal income tax, how much of the linguist's pay got withheld for federal income tax last year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 9.55$ |  |
| B. | $\$ 95.50$ |  |
| C. | $\$ 954.97$ |  |
| *D. | $\$ 9549.65$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 9549.65$.

$$
0.179 \times \$ 53,350=\$ 9549.65
$$

Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question:
A speech pathologist had a gross income of $\$ 62,650$ last year. If $18.9 \%$ of her income got withheld for federal income tax, how much of the speech pathologist's pay got withheld for federal income tax last year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 11.84$ |  |
| B. | $\$ 118.41$ |  |
| C. | $\$ 1184.09$ |  |
| *D. | $\$ 11,840.85$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 11,840.85$.
0.189 x $\$ 62,650=\$ 11,840.85$

Question 4c of 10 ( 3 Required Deductions 585886 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: A pharmacy technician had a gross income of \$57,250 last year. If $18.3 \%$ of his income got withheld for federal income tax, how much of the pharmacy technician's pay got withheld for federal income tax last year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 10,476.75$ |  |
| B. | $\$ 1047.68$ |  |
| C. | $\$ 104.77$ |  |
| D. | $\$ 10.48$ |  |

Global Incorrect Feedback

The correct answer is: $\$ 10,476.75$.
$0.183 \times \$ 57,250=\$ 10,476.75$

Question 5a of 10 ( 3 Required Deductions 585898 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Calvin received bimonthly paychecks of $\$ 2007.25$ last year. If $17.1 \%$ of his yearly income got withheld for federal income tax, how much got withheld for federal income tax from each of Calvin's paychecks last year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 34.32$ |  |
| B. | $\$ 82.38$ |  |
| *. | $\$ 343.23$ |  |
| D. | $\$ 823.78$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 343.23$.
$0.171 \mathrm{x} \$ 2007.25=\$ 343.23$.

Question 5b of 10 ( 3 Required Deductions 585899 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question:
Bianca received monthly paychecks of \$2985.25 last year. If $14.4 \%$ of her yearly income got withheld for federal income tax, how much got withheld for federal income tax from each of Bianca's paychecks last year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 42.99$ |  |
| B. | $\$ 51.59$ |  |
| *C. | $\$ 429.87$ |  |
| D. | $\$ 515.85$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 429.87$.
0.141 x $\$ 2,985.25=\$ 429.87$

Question 5c of 10 ( 3 Required Deductions 585900 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
Question: $\quad$ Alondra received weekly paychecks of $\$ 788.50$ last year. If $15.7 \%$ of her yearly income got withheld for federal income tax, how much got withheld for federal income tax from each of Alondra's paychecks last year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 643.73$ |  |
| *B. | $\$ 123.79$ |  |
| C. | $\$ 64.37$ |  |
| D. | $\$ 12.38$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 123.79$.
0.157 x \$788.50 = \$123.79.

Question 6a of 10 ( 3 State and Federal Income Taxes 585913 )
Maximum Attempts: 1
Question Type: Multiple Choice

Question: If employees pay the same percentage of their income to the government no matter how much they make, this is known as
$\qquad$ -.

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | progressive taxation |  |
| *B. | flat taxation |  |
| C. | regressive taxation |  |
| D. | federal income taxation |  |

## Global Incorrect Feedback

The correct answer is: flat taxation.

Question 6b of 10 ( 3 State and Federal Income Taxes 585914 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: If employees who make more money pay a higher percentage of their income to the government, this is known as $\qquad$ .

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | progressive taxation |  |
| B. | flat taxation |  |
| C. | regressive taxation |  |
| D. | federal income taxation |  |

## Global Incorrect Feedback

The correct answer is: progressive taxation.

Question 6c of 10 ( 3 State and Federal Income Taxes 585915 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: If employees pay the same percentage of their income to the government no matter how much they make, this is known as
$\qquad$ .

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | progressive taxation |  |
| B. | federal income taxation |  |
| C. | regressive taxation |  |
| *D. | flat taxation |  |

Global Incorrect Feedback
The correct answer is: flat taxation.

Question 7a of 10 ( 1 State and Federal Income Taxes 585926 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Which of these states had no state income tax in 2009?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | California |  |
| B. | Hawaii |  |
| C. | Massachusetts |  |
| *D. | Wyoming |  |

Global Incorrect Feedback
The correct answer is: Wyoming.

Question 7b of $\mathbf{1 0}$ ( 1 State and Federal Income Taxes 585927)
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Which of these states had a flat state income tax in 2009?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | Georgia |  |
| *B. | Michigan |  |
| C. | New Hampshire |  |
| D. | South Carolina |  |

Global Incorrect Feedback
The correct answer is: Michigan.

Question 7c of 10 ( 1 State and Federal Income Taxes 585928 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2

Question: Which of these states had a progressive state income tax in 2009?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | Florida |  |
| B. | Illinois |  |
| *C. | New Mexico |  |
| D. | Washington |  |

Global Incorrect Feedback
The correct answer is: New Mexico.

Question 8a of 10 ( 3 Required Deductions 585935 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Grayson lives and works in Indiana, which has a flat state income tax of $3.4 \%$. If his annual salary is $\$ 49,255$ and if he gets paid once a month, how much is withheld from his gross income for state income tax each pay period?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 139.55$ |  |
| B. | $\$ 167.47$ |  |
| C. | $\$ 1395.56$ |  |
| D. | $\$ 1674.67$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 139.55$. First, divide
his annual salary by 12 to get his monthly pay
( $\$ 49,255 / 12=\$ 4104.58)$. Then, calculate the state income tax $(\$ 4104.58 \times 0.034=$ \$139.55).

Question 8b of 10 ( 3 Required Deductions 585936 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2

Question: Makenzie lives and works in Colorado, which has a flat state income tax of $4.63 \%$. If her annual salary is $\$ 57,835$ and if she gets paid once a month, how much is withheld from her gross income for state income tax each pay period?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 223.14$ |  |
| B. | $\$ 267.78$ |  |
| C. | $\$ 2231.47$ |  |
| D. | $\$ 2677.76$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 223.14$. First, divide her annual salary by 12 to get her monthly pay $(\$ 57,835 / 12=\$ 4819.58)$. Then, calculate the state income tax (\$4819.58 x $0.0463=\$ 223.14$ ).

Question 8c of 10 ( 3 Required Deductions 585937 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
2
Question: Juliana lives and works in Pennsylvania, which has a flat state income tax of $3.07 \%$. If her annual salary is $\$ 41,995$ and if she gets paid once a month, how much is withheld from her gross income for state income tax each pay period?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 1289.25$ |  |
| B. | $\$ 1074.37$ |  |
| C. | $\$ 128.92$ |  |
| *D. | $\$ 107.43$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 107.43$. First, divide her annual salary by 12 to get her monthly pay ( $\$ 41,995 / 12=\$ 3499.58)$. Then, calculate the state income tax ( $\$ 3499.58 \mathrm{x}$ $0.0307=\$ 107.43$ ).

Question 9a of 10 ( 3 Required Deductions 585950 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: A high school student working part-time as a cook had a gross income of $\$ 7650$ last year. If his federal tax rate was $10 \%$ and his state tax rate was $5.3 \%$, what was the amount withheld from his pay last year in federal tax, state tax, and FICA combined?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 405.45$ |  |
| B. | $\$ 765.00$ |  |
| C. | $\$ 1170.45$ |  |
| *D. | $\$ 1755.68$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 1755.68$. All taxes
combined equaled $22.95 \%$. So, to find his
total withholding $0.2295 \times \$ 7650=1755.68$.

Question 9b of 10 ( 3 Required Deductions 585951 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question:
A high school student working part-time as a cashier had a gross income of $\$ 8125$ last year. If her federal tax rate was $10 \%$ and her state tax rate was $4.35 \%$, what was the amount withheld from her pay last year in federal tax, state tax, and FICA combined?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 353.44$ |  |
| B. | $\$ 812.50$ |  |
| C. | $\$ 1165.94$ |  |
| *D. | $\$ 1787.50$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 1787.50$. All taxes

$$
\text { combined equaled } 22 \% \text {. So, to find her total }
$$ withholding $0.22 \times \$ 8125=\$ 1787.50$.

Question 9c of 10 ( 3 Required Deductions 585952 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question:
A high school student working part-time as a shelf stocker had a gross income of $\$ 6675$ last year. If his federal tax rate was $10 \%$ and his state tax rate was $3 \%$, what was the amount withheld from his pay last year in federal tax, state tax, and FICA combined?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 1378.39$ |  |
| B. | $\$ 867.75$ |  |
| C. | $\$ 667.50$ |  |
| D. | $\$ 200.25$ |  |

## Global Incorrect Feedback

The correct answer is: $\$ 1378.39$. All taxes combined equaled $20.65 \%$. So, to find his
total withholding $0.2065 \times \$ 6675=\$ 1378.39$.

Question 10a of 10 ( 1 Required Deductions 585957 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: $\quad$ Which of the following is a required deduction?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | Medicare |  |
| B. | Health insurance |  |
| C. | Disability insurance |  |
| D. | Medicaid |  |

Global Incorrect Feedback

```
The correct answer is: Medicare.
```

Question 10b of 10 (1 Required Deductions 585958 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Which of the following is a required deduction?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | Medicaid |  |
| B. | Health insurance |  |
| C. | Disability insurance |  |
| *D. | FICA |  |

Global Incorrect Feedback
The correct answer is: FICA.

Question 10c of 10 ( 1 Required Deductions 585959 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: $\quad$ Which of the following is a required deduction?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | Social Security |  |
| B. | Health insurance |  |
| C. | Disability insurance |  |
| D. | Medicaid |  |

Global Incorrect Feedback
The correct answer is: Social Security.

Quiz: Take-Home Pay: Optional Deductions

Question 1a of 10 ( 3 Optional Deductions 588243 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
Question:
Braden's employer covers $70 \%$ of the cost of a $\$ 5100$-per-year health insurance plan, and Braden's share of the cost of the plan is his only optional deduction. How much is deducted from Braden's paycheck each month for health insurance?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 315$ |  |
| B. | $\$ 333$ |  |
| *C. | $\$ 127.50$ |  |
| D. | $\$ 126.50$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 127.50$. First, find the monthly cost of the health insurance plan by dividing by 12 . Then, multiply the monthly
cost by the employee's percentage of
participation.
$\$ 5,100 / 12=\$ 425$
$\$ 425 \times 0.3=\$ 127.50$

Question 1b of 10 ( 3 Optional Deductions 588244 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Eli's employer covers $60 \%$ of the cost of a \$4900-per-year health insurance plan, and Eli's share of the cost of the plan is his only optional deduction. How much is deducted from Eli's paycheck each month for health insurance?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 163.33$ |  |
| B. | $\$ 167.66$ |  |
| C. | $\$ 245.00$ |  |
| D. | $\$ 397.00$ |  |

## Global Incorrect Feedback

The correct answer is: $\$ 163.33$. First, find the monthly cost of the health insurance plan by dividing by 12 . Then, multiply the monthly cost by the employee's percentage of participation.
$\$ 4,900 / 12=\$ 408.33$
$\$ 408.33 \times 0.4=\$ 163.33$

Question 1c of 10 ( 3 Optional Deductions 588245 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Valerie's employer covers $80 \%$ of the cost of a \$4700-per-year health insurance plan, and Valerie's share of the cost of the plan is her only optional deduction. How much is deducted from Valerie's paycheck each month for health insurance?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 100$ |  |
| *B. | $\$ 78.33$ |  |
| C. | $\$ 340.15$ |  |
| D. | $\$ 400$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 78.33$. First, find the monthly cost of the health insurance plan by dividing by 12 . Then, multiply the monthly
cost by the employee's percentage of
participation.
$\$ 4,700 / 12=\$ 391.67$
$\$ 391.67 \times 0.2=\$ 78.33$

Question 2a of 10 ( 3 Pretax Income 588250 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: A marketing executive earns an annual salary of $\$ 78,300$, and she
contributes $\$ 6500$ per year to her $401(\mathrm{k})$ plan. If she has a required deduction for income taxes (federal, state, and local combined) of $27 \%$ of pretax income, how much is withheld in income taxes per year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 17,550$ |  |
| *B. | $\$ 19,386$ |  |
| C. | $\$ 21,114$ |  |
| D. | $\$ 22,896$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 19,386$. First, you
must find the pretax income by subtracting the 401(k) contribution from the salary. Then, multiply the percentage withheld for taxes by
the pretax income to get income tax
withholding. $\$ 78,300-\$ 6500=\$ 71,800$
$0.27 \times \$ 1,800=\$ 19,386$

Question 2b of 10 ( 3 Pretax Income 588251 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: A warehouse manager earns an annual salary of $\$ 65,700$, and he contributes $\$ 5800$ per year to his $401(\mathrm{k})$ plan. If he has a required deduction for income taxes (federal, state, and local combined) of $26 \%$ of pretax income, how much does he have withheld in income taxes per year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 15,080$ |  |
| *B. | $\$ 15,574$ |  |
| C. | $\$ 17,082$ |  |
| D. | $\$ 18,590$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 15,574$. First, you must find the pretax income by subtracting the $401(\mathrm{k})$ contribution from the salary. Then,

> multiply the percentage withheld for taxes by the pretax income to get the income tax
> withholding. $\$ 65,700-\$ 5800=\$ 59,900$
> $0.26 \times \$ 59,900=\$ 15,574$

Question 2c of 10 ( 3 Pretax Income 588252 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: A field project superintendent earns an annual salary of \$72,800, and she contributes $\$ 7900$ per year to her $401(\mathrm{k})$ plan. If she has a required deduction for income taxes (federal, state, and local combined) of $28 \%$ of pretax income, how much does she have withheld in income taxes per year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 22,596$ |  |
| B. | $\$ 22,120$ |  |
| C. | $\$ 20,384$ |  |
| *D. | $\$ 18,172$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 18,172$. First, you must find the pretax income by subtracting the 401 (k) contribution from the salary. Then, multiply the percentage withheld for taxes by the pretax income to get the income tax withholding.
$\$ 72,800-\$ 7,900=\$ 64,900$
$0.28 \times \$ 64,900=\$ 18,172$

Question:
The cost of $\$ 500,000$ worth of 20-year term life insurance for Derek is $\$ 96.21$ per month. If Derek's employer covers $85 \%$ of this cost, how much is deducted from Derek's gross income per year for life
insurance?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 81.78$ |  |
| *B. | $\$ 173.18$ |  |
| C. | $\$ 981.34$ |  |
| D. | $\$ 1154.52$ |  |

Global Incorrect Feedback
The correct answer is: \$173.18. First, find the yearly cost of the life insurance by multiplying by 12 . Then, multiply by the
percentage of the employee's participation.
$\$ 96.21 \times 12=\$ 1,154.12$
$\$ 1,154.12 \times 0.15=\$ 173.18$

Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question:
Last year, an automotive technician had a gross income of $\$ 32,200$, of which she contributed $6 \%$ to her $401(\mathrm{k})$ plan. If she got paid weekly, how much was deducted from each paycheck for her 401(k) plan?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 37.15$ |  |
| B. | $\$ 80.50$ |  |
| C. | $\$ 161.00$ |  |
| D. | $\$ 276.00$ |  |

Global Incorrect Feedback

The correct answer is: $\$ 37.15$. First, find the weekly pay by dividing the annual income by 52. Then, multiply the weekly pay by the
percent of contribution.
$\$ 32,200 / 52=\$ 619.23$
$\$ 619.23 \times 0.06=\$ 37.15$

Question Type: Multiple Choice
Maximum Score:
Question:
Whitney contributes $13 \%$ of her \$70,600 annual salary to her 401(k) plan. What is her pretax income?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 49,016$ |  |
| B. | $\$ 59,808$ |  |

| C. | $\$ 71,41.92$ |  |
| :--- | :--- | :--- |
| *D. | $\$ 61,422$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 61,422$. First, find the percentage contributed to the $401(\mathrm{k})$ plan.
Then, subtract that amount from the annual
pay.
$0.13 \times \$ 70,600=\$ 9178$
$\$ 70,600-\$ 9178=\$ 61,422$.

Question 8a of 10 ( 3 Optional Deductions 589271 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question:
Keegan's annual gross income is $\$ 66,800$, but FICA is deducted from his paycheck, and $28 \%$ of his salary is withheld for income taxes (federal, state, and local combined), as well. If his employer pays $85 \%$ of the cost of a $\$ 2600$-per-year health insurance plan, and if health insurance is Keegan's only optional deduction, what is his monthly take-home pay?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 3397.98$ |  |
| *B. | $\$ 3549.65$ |  |
| C. | $\$ 3975.50$ |  |
| D. | $\$ 5566.67$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 3549.65$. First, find the amount of deduction for taxes by multiplying the salary with the percentage withheld for taxes, including FICA. $66,800 \times(0.0765+0.28)=23,814.20$
Then, find how much is withheld for health insurance by multiplying the employee's
percentage contribution with the cost of insurance.
$2600 \times 0.15=390$
Subtract the two deductions from the annual
salary, and divide by 12 because the question is asking for monthly take-home pay.

$$
(66,800-(23,814.20+390)) / 12=\$ 3549.65
$$

Question 8b of 10 ( 3 Optional Deductions 589272 )

The correct answer is: $\$ 2808$.

Question 7a of 10 ( 2 Comparing Prices 589574 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: The table below compares the cost of living in Philadelphia and Cleveland, with the numbers representing percentages of the national average.

|  | Philadelphia |  |
| :--- | :--- | :--- |
| Cleveland |  |  |
| Overall | 92 | 78 |
| Food | 106 | 106 |
| Housing | 56 | 27 |
| Utilities | 130 | 126 |
| Transportation | 117 | 106 |
| Health | 102 | 113 |

If the national average for a gallon of gas is $\$ 2.59$, how much should you expect to pay for gas in Philadelphia versus Cleveland?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 3.03 / \$ 2.75$ |  |
| B. | $\$ 2.75 / \$ 3.24$ |  |
| C. | $\$ 2.34 / \$ 2.75$ |  |
| D. | $\$ 1.95 / \$ 2.59$ |  |

Global Incorrect Feedback
The correct answer is: \$3.03 / \$2.75. Since
Philadelphia's cost of transportation is $117 \%$
of the national average, take 1.17 and
multiply by 2.59 . Similarly, Cleveland's cost
is $106 \%$ of the national average, so take 1.06
and multiply by 2.59 .

| Question: |  | Which of the following scenarios demonstrates an exponential decay? |  |
|  | Choice |  | Feedback |
| A. | Store offering 30\% clothing | reduction off all men's |  |
| *B. | Store offering 30\% reduced items for | reduction on previously the next three days |  |
| C. | Store offering \$30 $\$ 300$ | off all purchases over |  |
| D. | None of the above |  |  |

Global Incorrect Feedback
The correct answer is: Store offering 30\% reduction on previously reduced items for the next three days.

Question 3b of 10 ( 1 Exponential Decay Functions 614002 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Which of the following scenarios demonstrates an exponential decay?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | A tennis tournament in which after each <br> round, half of the players are eliminated | Correct! |
| B. | A decathlon competition in which only the <br> first 10 move to the next competition |  |
| C. | A game of basketball in which teams are <br> ranked by the most games won |  |
| D. | None of the above |  |

Global Incorrect Feedback
The correct answer is: A tennis tournament in which after each round, half of the players are

## eliminated.

Question 3c of 10 ( 1 Exponential Decay Functions 614003 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Which of the following scenarios demonstrates an exponential decay?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | Value of a dollar invested in a savings <br> account |  |
| B. | Value of a dollar affected by constant <br> deflation |  |
| *C. | Value of a dollar affected by constant <br> inflation |  |
| D. | None of the above |  |

Global Incorrect Feedback
The correct answer is: Value of a dollar affected by constant inflation.

Question 4a of 10 ( 3 Exponential Decay Functions 614027 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Today a clothing store took $30 \%$ off the price of a dress, and for the next 3 days, it will take $30 \%$ off the previous day's price. If the price of the dress yesterday was $\$ 300.00$, what will be the price of the dress 3 days from now?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 72.03$ |  |
| B. | $\$ 102.90$ |  |
| C. | $\$ 147.00$ |  |
| D. | $\$ 210.00$ |  |

## Global Incorrect Feedback

The correct answer is: $\$ 72.03$.

The correct answer is: $0.57 \%$.

Question 6a of 10 ( 2 Compound Interest 616483 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: The graph of the equation representing compound interest is that of:

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | Linear function |  |
| *B. | Exponential function |  |
| C. | Quadratic function |  |
| D. | None of the above |  |

Global Incorrect Feedback
The correct answer is: Exponential function.

Question 6b of 10 ( 2 Compound Interest 616484 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: $\quad$ The graph of the equation representing simple interest is that of:

|  | Choice | Feedback |
| :--- | :--- | :--- |

| *A. | Linear function |  |
| :--- | :--- | :--- |
| B. | Exponential function |  |
| C. | Quadratic function |  |
| D. | None of the above |  |

## Global Incorrect Feedback

The correct answer is: Linear function.

Question 6c of $\mathbf{1 0}$ ( 2 Compound Interest 616485 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: $\quad$ The graph of the equation representing compound interest is that of:

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | Linear function |  |
| B. | Quadratic function |  |
| *C. | Exponential function |  |
| D. | None of the above |  |

Global Incorrect Feedback
The correct answer is: Exponential function.

Question 7a of 10 ( 2 Compound Interest 616488 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Dirk entered the following expression into his graphing calculator.
$13600 *(1+.02 / 4)^{\wedge}$
(4*12)

Which of these future values could he have been calculating?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | The future value of $\$ 13,600$ invested at 2\% <br> interest compounded annually for 4 years. |  |
| *B. | The future value of $\$ 13,600$ invested at 2\% <br> interest compounded quarterly for 12 years. |  |
| C. | The future value of $\$ 13,600$ invested at 4\% <br> interest compounded annually for 2 years. |  |
| D. | The future value of \$13,600 invested at 4\% <br> interest compounded semi-annually for 12 <br> years. |  |

Global Incorrect Feedback
The correct answer is: The future value of $\$ 13,600$ invested at $2 \%$ interest compounded quarterly for 12 years.

Question 7b of 10 ( 2 Compound Interest 616489 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Woodrow entered the following expression into his graphing calculator.
$15900 *(1+.04 / 2)^{\wedge}$

Which of these future values could he have been calculating?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | The future value of $\$ 15,900$ invested at 2\% <br> interest compounded annually for 4 years. |  |
| B. | The future value of $\$ 15,900$ invested at 2\% <br> interest compounded quarterly for 12 years. |  |
| C. | The future value of \$15,900 invested at 4\% <br> interest compounded annually for 2 years. |  |
| *D. | The future value of \$15,900 invested at 4\% <br> interest compounded semi-annually for 12 |  |

Global Incorrect Feedback
The correct answer is: The future value of $\$ 15,900$ invested at $4 \%$ interest compounded semi-annually for 12 years.

Question 7c of 10 ( 2 Compound Interest 616490)
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Erin entered the following expression into her graphing calculator.

```
14800*(1+.04/12)
```

Which of these future values could she have been calculating?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | The future value of $\$ 14,800$ invested at $4 \%$ <br> interest compounded monthly for 2 years. |  |
| B. | The future value of $\$ 14,800$ invested at $4 \%$ <br> interest compounded semi-annually for 12 <br> years. |  |
| C. | The future value of $\$ 14,800$ invested at $12 \%$ <br> interest compounded quarterly for 2 years. |  |
| D. | The future value of $\$ 14,800$ invested at $12 \%$ <br> interest compounded semi-annually for 4 <br> years. |  |

Global Incorrect Feedback
The correct answer is: The future value of $\$ 14,800$ invested at $4 \%$ interest compounded monthly for 2 years.

Global Incorrect Feedback
The correct answer is: $\$ 24,498,509.74$.

Question 8b of 10 ( 3 Continuously Compounded Interest 616508)
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: If $\$ 5,000,000$ is invested at $4 \%$ interest compounded continuously, how much will the investment be worth in 30 years?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 16,405,153.94$ |  |
| B. | $\$ 16,501,934.47$ |  |
| C. | $\$ 16,567,490.07$ |  |
| *D. | $\$ 16,600,584.61$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 16,600,584.61$.

| C. | May 1 |  |
| D. | June 1 |  |

Global Incorrect Feedback
The correct answer is: April 1.

Question 9c of 10 (3 Layaway 626715 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question: Micah and his cousins plan to all chip in to get their grandmother a $\$ 610$ Christmas present. They can afford to put it on layaway with a $5 \%$ down payment and pay $\$ 90$ a month after that. If payments are due at the beginning of each month, when should Micah and his
cousins make their first monthly payment?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | August 1 |  |
| B. | July 1 |  |
| *C. | June 1 |  |
| D. | May 1 |  |

## Global Incorrect Feedback

The correct answer is: June 1.

Question 10a of 10 (3 Layaway 626721 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
2
Question:
Tiffany put a $\$ 1550$ item on layaway by making a $20 \%$ down payment and agreeing to pay $\$ 120$ a month. How many months faster would she pay off the item if she increased her monthly payment to $\$ 180$ ?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | 4 months faster |  |
| B. | 7 months faster |  |
| C. | 11 months faster |  |
| D. | 18 months faster |  |

Global Incorrect Feedback
The correct answer is: 4 months faster.

Question 10b of 10 ( 3 Layaway 626722 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 2
Question:
Spencer put an $\$ 1880$ item on layaway by making a $20 \%$ down payment and agreeing to pay $\$ 170$ a month. How many months faster would he pay off the item if he increased his monthly payment to $\$ 260$ ?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | 3 months faster |  |
| B. | 6 months faster |  |
| C. | 9 months faster |  |
| D. | 15 months faster |  |

## Global Incorrect Feedback

The correct answer is: 3 months faster.

Question: Last year a construction worker had a gross income of \$29,700, of which he contributed $7 \%$ to his $401(\mathrm{k})$ plan. If he got paid monthly, how much was deducted from each paycheck for his 401(k) plan?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 39.98$ |  |
| B. | $\$ 86.63$ |  |
| *C. | $\$ 173.25$ |  |
| D. | $\$ 297.00$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 173.25$.

Question 6c of 36 ( 3 Optional Deductions 629081 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 5
Question: Last year a janitorial supervisor had a gross income of \$34,100, of which he contributed $8 \%$ to his $401(\mathrm{k})$ plan. If he got paid bimonthly, how much was deducted from each paycheck for his 401(k) plan?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 52.46$ |  |
| *B. | $\$ 113.67$ |  |
| C. | $\$ 227.33$ |  |
| D. | $\$ 389.71$ |  |

Global Incorrect Feedback
The correct answer is: \$113.67.

Question 7a of 36 ( 2 Linear Equations 629084 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score:
Question:
Gertrude accepted a job as a fashion model after being offered a $\$ 375$ signing bonus. If she makes $\$ 56$ an hour, which equation models Gertrude's total pay $y$, in dollars, as it relates to the number of hours $x$ that she works?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $y=56 x-375$ |  |
| *B. | $y=56 x+375$ |  |
| C. | $y=375 x-56$ |  |
| D. | $y=375 x+56$ |  |

Global Incorrect Feedback
The correct answer is: $y=56 x+375$.

Question 7b of 36 ( 2 Linear Equations 629085 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 5
Question: Gerald accepted a job as a jazz pianist after being offered a $\$ 425$ signing bonus. If he makes $\$ 24$ an hour, which equation models Gerald's total pay $y$, in dollars, as it relates to the number of hours $x$ that he works?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $y=24 x-425$ |  |
| *B. | $y=24 x+425$ |  |
| C. | $y=425 x-24$ |  |
| D. | $y=425 x+24$ |  |

Global Incorrect Feedback
The correct answer is: $y=24 x+425$.

Question 7c of 36 ( 2 Linear Equations 629086 )

Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 5
Question:
Hattie accepted a job as a makeup artist after being offered a $\$ 550$ signing bonus. If she makes $\$ 32$ an hour, which equation models Hattie's total pay $y$, in dollars, as it relates to the number of hours $x$ that she works?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $y=550 x+32$ |  |
| B. | $y=550 x-32$ |  |
| $*$ C. | $y=32 x+550$ |  |
| D. | $y=32 x-550$ |  |

Global Incorrect Feedback
The correct answer is: $y=32 x+550$.

Question 8a of 36 ( 3 Required Deductions 629162 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 5
Question: Leonard had $\$ 580$ for Medicare, $\$ 2400$ for state income tax, and $\$ 2480$ for Social Security deducted from his pay last year. How much did Leonard have deducted from his pay for FICA last year?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | \$2980, because FICA consists of Medicare <br> and state income tax |  |
| B. | \$2980, because FICA consists of Medicare <br> and Social Security |  |
| C. | \$3060, because FICA consists of Medicare <br> and state income tax |  |
| *D. | \$3060, because FICA consists of Medicare <br> and Social Security |  |

Global Incorrect Feedback
The correct answer is: $\$ 3060$, because FICA consists of Medicare and Social Security.

Question Type: Multiple Choice
Maximum Score:
Question: Bonnie invested $\$ 8000$ for 6 years in a savings account paying simple interest with a yearly interest rate of $1.5 \%$. How much simple interest did she earn?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $\$ 12$ |  |
| B. | $\$ 72$ |  |

| C. | $\$ 120$ |  |
| :--- | :--- | :--- |
| *D. | $\$ 720$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 720$.

Question 14c of 36 ( 3 Simple Interest 629706 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 5
Question: Harvey invested $\$ 6000$ for 2 years in a savings account paying simple interest with a yearly interest rate of $5.5 \%$. How much simple interest did he earn?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\$ 660$ |  |
| B. | $\$ 330$ |  |
| C. | $\$ 66$ |  |
| D. | $\$ 33$ |  |

Global Incorrect Feedback
The correct answer is: $\$ 660$.

Question 15a of 36 ( 2 Exponential Growth Funtions 629709 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 5
Question: $\quad$ Which of these values for $P$ and $a$ will cause the function $f(x)=P_{a^{x}}$ to be an exponential growth function?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $P=\frac{1}{7} ; a=\frac{1}{10}$ |  |
| *B. | $P=\frac{1}{7} ; a=10$ |  |

| C. | $P=7 ; a=\frac{1}{10}$ |  |
| :--- | :--- | :--- |
| D. | $P=7 ; a=1$ |  |

Global Incorrect Feedback
The correct answer is: $P=\frac{1}{7} ; a=10$.

Question 15b of 36 ( 2 Exponential Growth Funtions 629710 )
Maximum Attempts: 1
Question Type:
Multiple Choice
Maximum Score: 5

Question: $\quad$ Which of these values for $P$ and $a$ will cause the function $f(x)=P z^{x}$ to be an exponential growth function?

Question Type: Multiple Choice
Maximum Score: 5
Question: $\quad$ Which of these expressions is equivalent to $\log (16 \bullet 14)$ ?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\log (16)+\log (14)$ |  |
| B. | $\log (16)-\log (14)$ |  |
| C. | $\log (16) \bullet \log (14)$ |  |

D. $16 \bullet \log (14)$

Global Incorrect Feedback
The correct answer is: $\log (16)+\log (14)$.

Question 35b of 36 ( 2 Properties of Logarithms 629964 )

Question: $\quad$ Which of these expressions is equivalent to $\log (22 \bullet 11)$ ?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| *A. | $\log (22)+\log (11)$ |  |
| B. | $\log (22)-\log (11)$ |  |
| C. | $\log (22) \bullet \log (11)$ |  |
| D. | $22 \bullet \log (11)$ |  |

| Global Incorrect Feedback |
| :--- |
| The correct answer is: $\log (22)+\log (11)$. |

Question 35c of 36 ( 2 Properties of Logarithms 629965 )
Maximum Attempts: 1
Question Type: Multiple Choice
Maximum Score: 5
Question: $\quad$ Which of these expressions is equivalent to $\log (25 \cdot 18)$ ?

|  | Choice | Feedback |
| :--- | :--- | :--- |
| A. | $25 \bullet \log (18)$ |  |
| B. | $\log (25) \bullet \log (18)$ |  |
| C. | $\log (25)-\log (18)$ |  |
| *D. | $\log (25)+\log (18)$ |  |

Global Incorrect Feedback
The correct answer is: $\log (25)+\log (18)$.
