COMMERCIAL.

OFFICE OF THE PIC. }
FRIDAY EVENING, November 20, 1857. }

Sentiment in our general market has been undecided, but for some of the leading articles there has been a good demand. Cotton went off very freely in the early part of the week, with a further advance in prices, but subsequently the demand fell off, and a portion of the improvement was lost. In Sugar and Molasses the transactions have been larger, but generally at reduced rates. Flour has improved, with a limited supply offering, but Corn has been dull and drooping. Provisions continue extremely dull, with a drooping tendency. Freights have been steady and in fair request, and Exchange has considerably advanced.

COTTON.—Arrived since the 6th instant, 20,570 bales. Cleared in the same time 32,380 bales for Liverpool, 3,386 for Havre, 1,864 for Amboyne, 1,616 for Bremen, 1,062 for Genoa, 94 for Barcelona, 568 for the Sebastian, 93 for Tampico, 166 for Boston, and 1,210 bales for New York; together 52,439 bales; making an addition to stock of 7,131 bales, and leaving on hand, including all on shipboard and in the presses and pickeries not cleared, a stock of 147,196 bales.

The market opened on Saturday with an active demand, which resulted in sales of fully 8,500 bales at an advance of ⅛c in prices. On Monday factors raised the rates ⅛c, and sold 8,000 bales, and on Tuesday over 9,000 bales were sold at about the same quotations. On Wednesday, however, buyers generally withdrew from the market, and the sales were confined to 1,900 bales, mostly at reduced prices, parties generally awaiting the Arabia's advices, which were fully due. Yesterday the demand was actively renewed at reduced rates, and 9,600 bales were sold on a basis of 11⅞@11⅝c for middling to strict middling, leaving to-day only 1,000 bales changed hands making a total for the week of 30,500 bales. The market closes dull and unsettled, under the influence of the Arabia's news. Rates were received at an early hour in the day, and stopped business.—We can give no quotations for the present.

TOBACCO.—There has been some enquiry, but the transactions reported during the week reach merely 600 kegs, which leaves our stock unaltered, with regard to prices, and can give no reliable quotations.

Arrived since the 6th instant, 39,570 bbls. Cleared in the same time for Cuba 926 bbls, Genoa 47, Liverpool 241, and coastwise 32 bbls; together, 1,046 bbls. Stock in warehouse and on shipboard not cleared, 6,270 bbls.

IMPORTANT TO COTTON PLANTERS
By which their incomes must be Doubled.
THE undersigned has invented and obtained letters-patent from the United States for the arrangement and application of machinery for manufacturing Sized Cotton into Yarns by one continuous process, from the Gin through the preparation and spinning machinery, in such a manner that all waste or covering of COTTON YARN will be at least Ten Per Cent.; and as it is unnecessary in my process the use of machinery to prep the cotton into bales, or its handling at all, and there to open and disentangle it, which are very destructive in their effects upon the fibre, but are indispensable to those of ginning and baling. To Cotton Manufacturers, my YARNS are made of fabrication fibre, and hence will be fifty per cent stronger, will command advanced prices, and they will obtain all competition in any market.
The undersigned is prepared to dispose of privileges to use his patent, or Machinery will be furnished on to operate, with complete instructions how to use it, how to obtain the best machinery, and all other necessary particulars, on application personally or by letter, or on communication with me at my rooms corner Bryan and Dauphin streets, up stairs.

Notice to Ladies.
ANTEPHELIC MILK.
TEN THOUSAND FLASKS RECEIVED IN
No More Wrinkles! No More Freckles!
Preservation and Regeneration of the Skin and the Complexion.
ANTEPHELIC MILK so advantageously known, is employed in France principally for the preservation of the face against freckles, which are said to be indelible. This prejudice no longer exists. Eight years of constantly increasing success has proved that the Antephelic Milk has not yet encountered a simple or freckle, a blotch or spot appearing upon a lovelace, which it has not at once removed. It is also supreme, externally only, and left the clear and healthy complexion.
Antephelic Milk is not only an infallible specific against the affections above stated, but, mixed with water, and employed a gentle manner in the morning ablutions, it purifies the skin, without irritating or altering it, gives tone to the coloring secretions, whether pale, sooty or yellow, and destroys all sorts of pimples and roughness of the skin, preventing the return of freckles, consequently prevents the formation of early wrinkles, and by its specific virtues, gives to the skin and preserves for it the purest freshness of color.
A single flask will suffice to give to the skin all the appearance of youthfulness which may be indefinitely maintained, by using one or the other occasionally in the manner indicated in the prospectus.
P. S. The Fragrant Vegetable Powder of the same maker completes the toilette of ladies who desire to preserve the beauty.

PRINCIPAL DEPOT, NO. 64 WHITE STREET, N. Y.
Behind the engraved likeness of hope may now be published for the remedy not only capable, but most admirably cure the horrible disease. But one trial will surely prove the truth. Do not wait late an early grave, when a sure remedy is at hand.
Some persons are flimsy, full of anxiety and doubts in regard to what is or is not a cure. One dose relieves and removes a portion of the disease, the lungs are not destroyed, leaving a cavity? We answer, certainly not, neither is this necessary in order to effect a perfect cure. If the treatment be commenced in season, but little or no portion of the lungs be lost. It is necessary only to arrest the disease, and when this is done, the concrete substance deposited in the tissue of the lungs, gradually hardens, and is finally entirely absorbed, leaving, perhaps, a little cohesion somewhere which is quite harmless, and the patient finds himself in possession of whole lungs and sound health. But suppose the disease is not arrested at this early stage. The inflamed tubercle produces irritation: the irritation brings on inflammation of that part of the lung; the inflammation leads to ulceration, and the destruction of a portion of the tissue is the result, a cavity is formed which enlarges and does its work of evil unless the cause, the deposit or tubercle is arrested. Now, does your remedy effect a cure? *Most assuredly it does.* As soon as the disease is arrested, the system masters the absorbent or expectorated, and nature either furnishes the cavity with a lining membrane, or what is more common, where it is of large size, its walls fall together and heal up, leaving a scar; and the remaining portion of the respiratory apparatus is left in a condition to function through the whole physical economy, becomes somewhat enlarged, takes on increased action, and substantially compensates for that which has been destroyed.
The medicine is in a powdered state, but readily prepared for using in a liquid form, according to the directions which accompany each. Dupatches are promptly made by mail and express.

Price.—One box, $3; three boxes, forwarded at one time, $8; half dozen, $14; one dozen, or any number greater, $24 a box.
The postage in the United States, not over 3000 miles, is 15 cents a box. In all cases the amount should be inclosed in money or stamps. We are responsible for no money sent to be sent by mail

A New Medicine Discovered.
AFTER long experiments, the author has succeeded in discovering this Remedy, which is as mild as it is effectual, and never destroys the appetite. Prove it by a dose of quinine in cases of intermittent fevers. For gout, sixty drops in the morning will stop the most violent fits. As for rheumatism, one bottle is generally sufficient.
Two bottles and a half a bottle, with the pamphlet accompanying the same.

Notice to the Ladies.
ANTEPHELIC MILK.
TEN THOUSAND FLASKS RECEIVED IN
No More Wrinkles! No More Freckles!
Preservation and Regeneration of the Skin and the Complexion.
ANTEPHELIC MILK so advantageously known, is employed in France principally for the preservation of the face against freckles, which are said to be indelible. This prejudice no longer exists. Eight years of constantly increasing success has proved that the Antephelic Milk has not yet encountered a simple or freckle, a blotch or spot appearing upon a lovelace, which it has not at once removed. It is also supreme, externally only, and left the clear and healthy complexion.
Antephelic Milk is not only an infallible specific against the affections above stated, but, mixed with water, and employed a gentle manner in the morning ablutions, it purifies the skin, without irritating or altering it, gives tone to the coloring secretions, whether pale, sooty or yellow, and destroys all sorts of pimples and roughness of the skin, preventing the return of freckles, consequently prevents the formation of early wrinkles, and by its specific virtues, gives to the skin and preserves for it the purest freshness of color.
A single flask will suffice to give to the skin all the appearance of youthfulness which may be indefinitely maintained, by using one or the other occasionally in the manner indicated in the prospectus.
P. S. The Fragrant Vegetable Powder of the same maker completes the toilette of ladies who desire to preserve the beauty.
