LORNE & FROST,
ad4 31 Chartres st

TO THE SUGAR PLANTERS OF LOUISIANA.

N. BILLIOUX' PATENT FOR MAKING SUGAR—The undersigned having been appointed agents of Messrs. Derrick and Felix, proprietors of the South Western States of America and Territory of Louisiana, and assignees of the Patentee, hereby give notice that they are prepared to contract for the erection of the above named apparatus in the most approved manner, and to be delivered and set up in time for the ensuing crop.

The various sizes are as follows, viz:

No. 1, capable of boiling 4 hhds in 24 hours.				
2,	do	do	12	do
3,	do	do	18	do
4,	do	do	24	do
5,	do	do	30	do

The sugar produced by this process is increased at least 25 per cent. in weight and 50 per cent. in quality over that obtained by the usual process. The molasses decreases 10 per cent. in quantity, and is of a very superior quality. The sugar is made whiter by the use of concentrated lye, instead of employing muscle or bipeeding. The saving of fuel is another important consideration. The whole process can be properly preserved in sufficient to make the crop of sugar—and if sugar cane is not used, one cord of wood per hogshead is the average consumption. The only fuel used for the evaporation of the strong engine. The new method of sugar making is the strong engine, and the only fuel used for the evaporation of the juice of the cane. The Patent vacuum pan, invented by Mr. Jacques Rillieux, and used in the Parish of St. Louis, is the best ever used, and is far superior to any other apparatus in existence. Orders received until the end of April.

For terms, conditions, &c, apply to

ap28-y3m WM RUSHTON & Co, 87 Magazine
