

The following gentlemen were elected officers of the Union Bank on Saturday last—J. B. Perrault, cashier, H. R. Denis, auditor, and A. Mazonroux.

The case of Governor Houston was proceeded in by the house of representatives on the 3d instant, when Mr. Key concluded his speech in his defence.

Governor Neill, of Illinois, had issued orders to Brig. Gen. Neill, to raise a battalion of six hundred men to meet at Beardstown on the 22d ultimo, to assist General Atkinson in driving Black Hawk and his followers beyond the limits of that state.

By a paragraph in the Hagerstown (Maryland) Torch, it appears that there are one hundred or eight hundred arrivals and departures from that place per week, and that three daily stages leave that place regularly for Baltimore.

Mr. Dallas, of Pa., lately introduced into the senate of the United States a bill to amend the criminal laws. The first section provides for the punishment of any person having in his possession, with intent to pass, any counterfeit notes, orders or checks of the Bank of the United States.

The Niagara Gleaser says that a man of the name of Lector, who had made a will—the disposition of his property being known to his two sons—was murdered by one of them to obtain his share of the property. The parol was found concealed on some stray.

Claims on Naples adjusted—By the sloop of war Ontario, in 32 days from Gibraltar to the Hampton Roads, the pleasing intelligence is furnished that Mr. Nelson, United States chargé d'affaires, has effected an arrangement with the Neapolitan government, by which the whole of our claims on that government have been adjusted.

To the editor of the Bee. Six—Permit me through the medium of your estimable journal to enquire the reasons why the official paper does not publish in French the ordinances and resolutions passed by the city council.

Our news from Havre, which sailed on the 5th April, the news collector has this moment arrived in town with Havre papers of the 3d. We learn by these papers of the departure of the mail to say that there had been some serious disturbances in Paris, caused by the rioters.

These appeared to exist considerable alarm throughout France in consequence of the existence of cholera in Paris, April 3.—The Monitor states the number of persons attacked by cholera from its commencement until 4 o'clock in the afternoon to be 735 of whom 428 are men and 277 women.

At the weekly meeting of the Academy of Sciences, on Monday, Baron de Humboldt communicated a very interesting information that, through his means, a magenta observation had been founded in the island of Cuba, which, together with that of Mr. Angelo Berthelotti, of M. de Humboldt at Berlin, and that which he learned Baron had established at Peking under the direction of M. Fuss, extended the means of measuring diurnal magnetic observations over 108 degrees of longitude, with the additional advantage that all those observations are furnished with similar instruments by which the same may be made in any part of the world.

by depositing on its shore a suitable and useful proportion of the gold and silver currency, if it is not repaid by paper, or subjected to legal restrictions.

3d. That there are inherent and ineradicable defects in the system which regulates the standard of value in both gold and silver, its instability as a measure of contracts, and its utility as the practical currency of a particular nation, are serious imperfections; whilst the impossibility of maintaining both metals in concurrent circulation, so as to be in constant and uniform circulation, appears to be clearly ascertained.

4th. That the standard being fixed in one metal, is the nearest approach to invariableness, and precludes the necessity of further legislative interference.

5th. That gold and silver will not circulate promiscuously and concurrently for similar purposes of circulation, and that the coinage of either metal by extension in circulation will be attended with the most dangerous consequences to the public confidence, and the circulation of the coin.

6th. That if the national interest or convenience should require the permanent use of gold and silver, and that also of silver dollars, the issue of bank bills of one, two, three, five, and ten dollars, should be prohibited.

7th. That if it should hereafter be deemed advisable to maintain both gold and silver coins in steady circulation, and to preserve silver as the measure of commerce and contracts, gold must be restricted to small payments.

8th. That if it is the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

9th. That the amount of alloy heretofore submitted to the following analysis:
Gold coin 237.6 261
Silver coin 118.8 132
Half eagle 59.4 68

10th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

11th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

12th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

13th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

14th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

15th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

16th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

17th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

18th. That the intention to preserve silver as the principal measure of exchange, permanently and securely, it will be necessary to estimate the relative value of gold under its present average, or probable future value in general commerce.

BY HEWLETT & RASPILLER, Auctioneers.

Valuable City Property ON WEDNESDAY, 30th May inst., will be sold at Hewlett's Exchange Coffee House, at half past 12 o'clock, to close a lot.
