

Following the 2nd World War there were still all the surviving members of the SS, who were all involved in the hell-scale genocides against Jews, Slavs, Poles, Communists, Socialists, Gypsies and so forth.

The last of these bastards from hell's-farts died a few years ago, while their offspring survive as watch dogs unto the present day. Close to several million by any wise-guy's guestimates.

Then there were all the companies and wealth that was confiscated from the victims and handed over to the kiss-asses of hell farts, and on which these 2nd rate humans survived through the difficulties of post war Europe, until they felt that it really was their very own.

Last but not least, it was the 20 million strong slave labour that enabled hell's-farts to hang around for so long. Those who managed to survive received some compensation during the time of the Schroeder Fischer Government. The predecessor, fatso-cabbage, was not interested, as his political patrons were themselves involved in the holocaust and the slave labour and confiscation of jewish property. Thanks wikimedia.
