Brunswick, (Me) March 31. Cold Fever .- A mortal and somewhat contagious disease has been, for several weeks past, slowly progressing in this town, to which & individuals have fallen victims, 6 of whom were heads of families, in the two instances it cut down both husband and wife. The first symptoms of the disorder have usually been pain and swelling in the extremities of some one of the limbs; this extending toward the body, the whole system immediately assumed a putrid state and ended in mortification. This disoder is supposed by attending physicians to be caused by the extreme and stady cold weather of the past winter, and is said by those acquainted with cases of the Cold or Spotted Fever, to resemble that disorder. Several who have been severely attacked with this Fever have recovered. We hear of no new cases since the death of Mr. Chase, noticed in this paper, and as the spring is far advanced there is no reason to expect any more.
