# Old Friend in a Red Jacket

By L. Dale Ahern, Editor

If you need information for a club talk on the Iowa Capitol, for a paper on the state flower and other state symbols, on the government of Iowa, or on our state's history; if you can't remember the name of a state official or wish to prove a point by quoting some election statistics; or, if you know it's some facet of Iowana but don't know where to find it, the source to turn to first is your old friend in the red jacket, the *Iowa Official Register*.

Often referred to as *The Red Book* because of the long-familiar red cover in which many copies are bound, the *Iowa Official Register* is, as the name implies, an official publication of the state of Iowa. The book was first authorized by law as an act of the Twenty-fourth General Assembly in 1892. Earlier versions of the *Register* were published by certain secretaries of state and others, but it was not until 1892 that it was sanctioned as an expense of state by the legislature.

Today authority for publication of *The Red Book* is vested in the secretary of state, but the superintendent of printing is responsible for getting it written, edited, printed, and distributed. The superintendent's authorization for this is set out in Chapter 16, Volume I, 1966 *Code of Iowa*, as follows: "The superintendent of printing shall . . . in odd-numbered years, compile for publication the *Iowa Official Register* which shall contain certain historical, political, and other statistics of general value, but nothing of a partisan character."

Although it is not known how many copies of the earliest volumes were distributed, copies of the 1886 book totaled 7,000. The 1892 law authorized 10,000 copies annually. The *Code of Iowa, 1897*, directed publication of 15,000 copies annually, and in recent years around 15,000 complete, cloth-bound copies and about 12,000 abridged, paper-bound copies have been published. The abridged copies contain all information in the cloth-bound copies except election tables.

Like Iowa's state rock, the geode—with its plain exterior covering myriads of sparkling mineral crystals—Iowa's *Official Register*, in simple red jacket, contains a many-faceted documentation of facts about our state. To keep its pages accurate and current, many articles must be revised or updated and other material freshly written for each new edition. While authority for this is vested in the secretary of state and the duty for carrying out the provisions of the law in the superintendent of printing, in recent years the actual work of editing *The Red Book* has been delegated to an editor engaged by the Iowa State Printing Board.

The *Official Register's* inception can be traced back to some little publications which were forerunners of the book as it has been known by many generations of Iowans. Several of these earlier efforts in government documentation are preserved in the State Department of History and Archives. One, entitled *Eighth General Assembly*, was published in 1860 and is merely a directory of the Iowa Legislature, is 8½ by 5½ inches in size and contains 7 pages. Another, entitled *Our State and Its Government*, was published in 1862 and, besides a legislative directory, contains statistics relative to the *Ninth General Assembly*. This little ancestor of the *Iowa Red Book* has the same dimensions as its predecessor of 1860 but contains twice as many pages.

In 1864 Secretary of State James Wright circulated a card on which he had printed a list of county and state officers, the vote on the head

of the ticket by counties, and the population of the counties. In general this plan was followed by successive secretaries until 1886.

The little 1873 booklet of 19 pages, listing executive and judicial officers and trustees of state institutions, is entitled *Iowa Official Register*, so today's *Red Book* can trace its official title back to that little volume. In 1879 a book almost identical in format and table of contents appeared. In six years the publication had grown 2 pages to a total of 21.

By the high proportion of space devoted to them, Iowa in the seventies showed much concern over crime and insanity, more than a third of the subjects treated relating to these problems: *Iowa Hospital for the Insane at Mount Pleasant*, *Iowa Hospital for the Insane at Independence*, *Building Commissioners for the Asylum at Independence*, *Committee To Visit Hospitals for the Insane*, *Asylum for Feeble-minded Children*, *Iowa Reform School*, *Iowa State Penitentiary*, and *Additional Penitentiary at Anamosa*.

In 1881 a volume similar to those of 1873 and 1879 appeared, bearing the unwieldy subtitle, *Executive and Judicial Officers of the State of Iowa—Also Trustees of State Institutions*. For several years between 1873 and 1886, *The Red Book* was known as the *Iowa Official and Statistical Table*, but, starting with the volume of 1886, the name *Iowa Official Register* has stuck.

In the *Iowa Official Register* of 1892, Secretary of State W. M. McFarland wrote a brief introduction in which he said, "The *Iowa Official Register*, as it is known today, was first published by Hon. Frank D. Jackson, secretary of state, in 1836. The material was compiled by C. S. Byrkit, then as now, deputy secretary of state. From that time Mr. Byrkit has had special charge of the work, and each year important improvements have been made, and new features added, till the *Official Register* of 1892 is confidently presented to the state as a public document of almost inestimable value to all classes of our citizens who are at all interested in public matters."

Mr. McFarland promised that, after 1892, state institutions would receive more attention, photo engravings of the main buildings of various institutions would be used, and, "in fact, it is proposed," he said, "to make the *Official Register* a perfect storehouse of information. As a non-partisan, political handbook, it is to be improved, as opportunity permits, putting in condensed form just such political facts as will be wanted by all parties." By and large this has been the objective of persons in charge of *The Red Book* down through the years.

An interesting sidelight of *The Red Book's* career is the fact that at least two private individuals attempted to launch such a publication in the early 1880's. In 1881 Herbert S. Fairall, of the *Iowa City Republican*, started an annual publication called *The Manual of Iowa Politics* with the objective of making it what the *Official Register* has since become. Although he discontinued it after a few years, his annual was well received, and within a few years copies were in demand and difficult to find. In 1882 F. D. Reed, of Oskaloosa, turned out a *Legislative Manual* of 194 pages, containing lists of public officers, rules of the Iowa House and Senate, and other information, but records indicate he had difficulty getting paid for his work, so this venture also had a short life.

Since 1892, however, *The Red Book* has been an official publication of the state of Iowa. Consolidating a wide range of information on Iowa's history, traditions, and government, *The Red Book* also presents minute mirrorings of the institutions and people whose combined functions keep the machinery of our state government running.

**Richard W. Gilbert, Administrative Assistant**

The supreme executive power of the state is vested in the Governor, whose term of office is two years.

No person is eligible for the governorship who has not been a citizen of the United States and resident of this state two years next preceding the election, and attained the age of 30 years at the time of said election.

The governor appoints all principal officers of the state not elected by the people, and certain officers connected with the state government, by and with the consent of the senate. When any office, from any cause, becomes vacant, and no mode is provided by the constitution and laws for filling such vacancy, he has power to fill such vacancy.

The chief executive also is responsible for taking final action on all laws enacted by the general assembly. He may approve, by signing, a bill passed by both houses or disapprove, by veto, or he may allow a bill to become law without his signature.

Also, the governor may call an extra session of the assembly when he feels the necessity of such action; may order adjournment of the legislature if the members cannot reach agreement when to adjourn; and must report to the legislature the financial condition of the state and his recommendation for any appropriate action concerning the financial status.

The governor has the task of granting or denying executive clemency in the form of restoration of voting rights, commutation of sentences, pardons, and remission of fines and forfeitures.

The specific duties also include being commander-in-chief of the military forces of state, chairman of the executive council, issuing notary public commissions, issuing land patents, and granting or denying extradition whenever there is a request for a fugitive from justice.

The governor has many obligations as the chief executive to the people of Iowa in addition to the specific statutory duties. These include meeting different groups or individuals, to discuss their problems which in some way have effect upon the government; conferring with Iowa's national delegation to coordinate national situations which might affect Iowa; answering voluminous correspondence from the electorate; and endeavoring to meet visitors who wish to come and visit the state capitol and the governor's office. In summary, the governor is the chief administrator of the state government and despite limited constitutional and statutory powers in many areas, is held responsible by the citizenry for the effective and efficient administration of the various departments and agencies.

## ROBERT D. RAY

### Governor of the State of Iowa

Robert D. Ray, 42, when first elected was one of the youngest men in the history of the State to be Governor; he is also the first Iowa Republican Governor to be re-elected to a second term in 18 years.

The Governor has testified before various Congressional committees concerning national questions, and before the President's Commission on Campus Unrest.

For the last two years he has headed Iowa's model "School Night for Scouting Program," and is an Honorary Advisor of the National Boy Scout Council.

## Department of Agriculture

(Office located on main floor of Capitol Building)

L. B. LIDDY, Keosauqua, Secretary of Agriculture

Term Expires January, 1973

Robert L. Lounsberry, McCallsburg, Deputy Secretary of Agriculture

The Iowa Department of Agriculture was established by the Fortieth General Assembly in 1923, consolidating several state divisions into one department. The object of the department is to encourage, promote and advance the interests of agriculture, including horticulture, livestock industry, dairying, cheese making, poultry raising, beekeeping, production of wool, production of domesticated fur-bearing animals, and other kindred and allied industries; to promote and devise methods of conducting said industries with a view to increasing production and facilitating an adequate distribution of the same at the least cost to the producer; to administer efficiently and impartially the inspection service of the state which is now or may be hereafter placed under its supervision.

Through its division of consumer protection, including supervisors and inspectors, the department enforces laws governing hatcheries, agricultural seeds, commercial feeds, dairy plants, fertilizers, agricultural limestone, food products, hotels and restaurants, pesticides, paints and oils, gasoline and kerosene, weights, measures and scales, and the quality control of dairy products.

The department has a marketing board, whose function is to promote the sale of Iowa agricultural products. The budget for this purpose was increased by the 1965 legislature.

A market news division, in cooperation with the United States Department of Agriculture, reports daily prices, volume receipts, movement of livestock, poultry and agricultural products.

Also in cooperation with the federal department is a statistical service including the annual state farm census, the price, production and utilization of stocks, inventory and marketing data on crops and livestock.

The state entomologist and staff devote particular attention to barberry pest control and to nurseries. The state botanist gives technical advice on weeds and seeds.

The weather division, in cooperation with the federal department, forecasts frost, gives flood and storm warnings, weather and crop summaries and the progress of the corn crop.

On January 8, 1971, the U. S. Department of Agriculture certified the Iowa meat inspection program equal to the minimum requirements under the provisions of the Wholesome Meat Act. The department now has full responsibility for inspection of meat slaughtering and processing plants doing business wholly within the state, with one-half of Iowa's budget for the meat inspection coming from federal matching funds supplied by USDA's Consumer and Marketing Service.

Judges formerly were elected by popular vote for terms of six years. But by amendment of the constitution in 1962, effective in 1963, judgeships became appointive by the governor from lists of nominees supplied by a judicial nominating commission. A judge is subject to a confirming popular vote one year after appointment. After a term of eight years he may declare his candidacy for another term.

Judges elect one of their number as chief justice and he holds this office until expiration of his term.

The supreme court has general appellate jurisdiction in both civil and criminal cases. There is no intermediate appellate court. The supreme court has authority to supervise the inferior courts, to prescribe the procedure in matters brought before it and the rules for admission of attorneys to the practice. It also has the power to prescribe rules of civil procedure, and any rules prescribed by the supreme court and reported to the legislature become effective unless vetoed by the legislature.

## Code Editor

(Appointed by the Supreme Court)

The Code Editor is required by law to prepare the manuscript copy of all laws, Acts, and joint resolutions passed at each session of the general assembly and arrange the same in chapters with comprehensive index. He is also required to submit such recommendations as he deems proper to each general assembly for the purpose of amending, revising and codifying such portions of the law as may be conflicting, redundant or ambiguous.

The principal duty of the office, of course, is to publish the Code.

The Code of Iowa contains all the general and permanent laws in the state. The first published Code was in 1851 and the Codes have been continuously kept up-to-date since then. Until 1924, each new Code was separately authorized by the General Assembly and a new editor appointed for each. In 1924, the position was made permanent and the law changed to provide publication each four years. The statute was amended in 1970 to provide for the Code to be published each two years.

The Code Editor must examine and apply each Act of the General Assembly to the body of existing law—eliminating all special and private Acts and the parts of the general Acts that may be temporary in nature. The Editor must determine the location of new legislation and assign chapter and section numbers as well as supply section headings, historical references and cross-references to enable the searcher in the law to trace the sources and origins of the ideas contained therein. Volumes of Tables of Corresponding Sections of Session Laws and Codes are also published. A comprehensive and detailed index to the Code must also be prepared and published each two years. The Code Editor is also required to publish, at such times as the supreme court shall by order direct, the rules of civil procedure and supreme court rules. He shall, immediately after the issuance of a new Code, prepare copy for the ensuing Code or supplement thereto, and at all times keep the same revised to date in the files of his office.

The Code Editor also publishes the administrative rules of all the various state governmental departments whenever a new Code is published. Semiannual supplements to these rules are also published. The Code Editor, or someone from his office, is designated by statute as secretary of the Legislative Department Rules Review Committee which meets each month.

The present Code Editor has been editing and publishing the Code for more than thirty years and has a tenure in the office of more than forty years.

## The District Court of Iowa

The district court is the trial court of general jurisdiction in Iowa in civil, criminal, juvenile, and probate matters. The state is divided into 18 judicial districts, each composed of from one to nine counties. The number of judges in each district is determined by a formula based on combined civil and criminal filings and population. At the present time there are 76 judges divided among the districts as shown by the list below. Under rules adopted by the Supreme Court of Iowa, effective Jan. 1, 1968, the Chief Justice—with the approval of the Supreme Court—appoints one judge for each district to serve as Chief Judge. The Chief Judge of each judicial district fixes the dates of the regular sessions of the district court. Date for trial of each specific case is fixed by the district judge who hears the case.

State Judicial Districts until Jan. 1, 1972.

The 64th General Assembly of Iowa established new judicial districts for the state as shown in the following Judicial District Map, effective Jan. 1, 1972. This redistricting reduces the number of judicial districts from 18 to 8.

State Judicial Districts beginning Jan. 1, 1972.

## Municipal Court

Any city, having a population of 5,000 or more, as shown by the last preceding United States census, may establish a municipal court. All civil townships in which said city or any part thereof is located shall constitute the municipal court district and its jurisdiction is co-extensive with the territorial limits of the county in which the court is located.

When a municipal court is established, all police courts, mayors' courts, justice of the peace courts and superior courts within the municipal court district are automatically abolished.

The judges of the municipal courts in the 14 Iowa cities which have these jurisdictions are as follows:

## Police, Mayors' and Justice Courts

Police courts are required in all cities of 15,000 or more population, wherein there is no municipal or superior court. These are courts of record and are supposed to be always open for business. Police courts may be established in cities smaller than 15,000 if so provided by municipal ordinance. Police judges are appointed by the city council unless municipal ordinance provides that they shall be elected.

Mayors' courts are found in all cities and towns under 15,000 in population which do not have a municipal, superior or police court. The only qualification for the office is being elected to serve as mayor.

The Iowa Code provides for the election of two justices of the peace for each township except in townships where there is a municipal court. But of some 3,000 possible justices in the state, actually there are approximately 500, because there have been no candidates for the vacancies. The jurisdiction of a justice of the peace is county-wide. A justice can act in place of a mayor, police judge or judge of a municipal or superior court if such judge is absent or unable to act. Justices of the peace are elected for two years. The only qualifications for the office are that the justice be a resident of the township and that he post bond.

## Judicial Nominating Commissions

Commissions to make nominations to fill vacancies in judgeships were established in the spring and summer of 1963 under terms of the constitutional amendment adopted in 1962, as implemented by chapter 80 of the Acts of the 60th General Assembly. Half the commissioners are elected by members of the bar, half are appointed by the Governor, and the chairman is the senior judge in the jurisdiction concerned. Vacancies in judgeships are filed by appointment by the Governor, who selects from among nominees designated by the nominating commission.

## State Judicial Nominating Commissioners

The seven first named were elected by the bar; the remaining seven were appointed by the Governor. This commission makes nominations to fill vacancies on the supreme court bench.

Elective—Don K. Walter, Burlington; William M. Dallas, Cedar Rapids; Richard G. Zellhoefer, Waterloo; John W. Tobin, Vinton; Arthur H. Johnson, Fort Dodge; Wendell Pendelton, Storm Lake; and Philip J. Willson, Council Bluffs.

Appointive—C. H. Wildman, Davenport; Donald E. Balster, Marion; Mrs. William Robinson, Hampton; Edris H. Owens, Newton; John M. Downey, Des Moines; William Beck, Spirit Lake; and William Sorenson, Jefferson.

## District Judicial Nominating Commissioners

Terms of District Judicial Nominating Commissioners in office in 1971 will terminate December 31, 1971. Their successors will be elected during the month of January by registered attorneys of Iowa to take office February 1, 1972. Length of term will be determined by lot by such commissioners. Since the **Red Book** is going to press near the end of the 1971 term and before new commissioners are appointed, names of District Judicial Nominating Commissioners do not appear here.

The University of Iowa was the first public institution of higher education founded by the state of Iowa. The date was Feb. 25, 1847, just fifty-nine days after Iowa had entered the federal union. The act which created the university was passed in the legislative chambers of Old Capitol, the first capitol building of the state and still in use by the University.

In the early days, the university was devoted primarily to the education of teachers for the secondary schools of Iowa. Classes began in 1855 with a student body of nineteen and a faculty of three. From this small beginning, the university has developed into a complex liberal arts, graduate, and professional institution offering programs of teaching, research, and educational public service in almost every phase of human knowledge.

**President Willard L. Boyd**

Throughout its history, the university has sought to reflect in its educational programs the same pioneering spirit which carried the early settlers westward. For example, it was the first state university to admit women students on an equal basis with men. It was an early leader in the general education movement, with its broad emphasis on the liberal arts.

Perhaps most significant of all, the university has shown a willingness to experiment in the "tailor-making" of curricula which cut across departmental barriers—traditionally low at Iowa. One result is the modern science of speech pathology and audiology, which originated at the university through just such cross-fertilization among several academic disciplines. Other examples include the significant and continuing contributions by university faculty to the study of child development in virtually all its aspects. The university's Institute of Child Behavior and Development, originally known as the Iowa Child Welfare Research Station, was the first organization of its kind to apply scientific principles on a comprehensive scale to the study of the normal child.

The university is organized in ten colleges—Business Administration, Dentistry, Education, Engineering, Graduate, Law, Liberal Arts, Medicine, Nursing, and Pharmacy—which together comprise more than eighty departments and seven schools. The schools, all within the College of Liberal Arts, are Art, Journalism, Letters, Library Science, Music, Social Work, and Religion.

In all its programs, the university seeks to serve the people of Iowa, and hence, the nation. Graduates of the university—more than 100,000 since the opening of the first classes—have gone out to assume useful places in society, as educated and productive citizens. Currently more than 3,600 degrees are awarded each year, ranging from the baccalaureate to the most advanced degrees in many specialized areas of knowledge. University research in medicine, physics, psychology, zoology, and numerous other fields has advanced man's knowledge of himself and the world around him and has contributed, both directly and indirectly, to a better life for all Iowa's citizens. The university's programs in art, music, drama, and creative writing, have done much to enrich the cultural life of Iowa and the Midwest.

### Public Service

In addition, the university provides many direct services to the state. Through its Division of Extension and University Services, thousands of Iowans are reached each year by programs in adult education, correspondence study, the distribution of films and other educational materials, and the sponsorship of on-campus short courses, conferences, and institutes. University services agencies such as the Bureau of Business and Economic Research, the Center for Labor Management, the Institute of Public Affairs, the Agricultural Law Center, the Institute of Agricultural Medicine, the Institute of Gerontology, and others are strongly oriented to Iowa's needs.

Annually, additional thousands of Iowans, regardless of means, receive the finest in medical treatment and care at the university's health center, operated as a service to the state and as a teaching and research arm of the university's Colleges of Medicine, Nursing, Pharmacy, and Dentistry as well as other health-related professions.

The University Health Center comprises the General Hospital; Children's Hospital, used primarily for orthopedics, dermatology, and rehabilitation; the State Psychopathic Hospital, the University Hospital School; and the State Tuberculosis Sanatorium at Oakdale, six miles from the main Health Center campus. Total capacity of the units is about 1,600 beds. Also located at the Health Center are the Iowa State Services for Crippled Children and the State Bacteriological (Hygienic) Laboratory, which provides services to agencies of state and local government, physicians, and others.

### Enrollment

During the past two decades the university's enrollment has nearly trebled as greater numbers of young people sought to prepare themselves for life and work in an increasingly complex society. In the near future, most of The University of Iowa's anticipated growth will occur in the health and graduate colleges. If present admissions policies are continued, an enrollment of 22,200 is forecast for the university by 1980.

Following is the annual record of enrollment at the university since 1952:

Year	Enrollment November 1	June to June on Campus of College Grade	All Types, Including Correspondence and Excluding Conferences and Short Courses
1952-1953	7,213	9,722	15,303

Although the university is large by most standards, it is of moderate size compared to many universities of its class, including most of its sister institutions in the Western or "Big Ten" Conference. And although growth has posed many problems, the university continues to preserve something of the atmosphere of a smaller college, while retaining the advantages of a large university. This is in keeping with the university's traditional concern for the individual human being and with its desire that education, far from being a form of mass communication, should remain an individual experience, fitted to the needs and aspirations of each student.

## The University

Iowa State University was one of the earliest institutions established in the movement to create an educational system uniquely suited to American democratic philosophy.

It was founded by the Iowa General Assembly in 1858. Four years later the national "people's college" movement was underwritten by the Morrill Land-Grant Act which made federal lands available to endow colleges whose aim was to promote "liberal and practical education . . . in the several pursuits and professions of life." Iowa was the first state to accept the terms of the Morrill Act. In March, 1863, the General Assembly awarded Iowa's grant to the recently-chartered institution at Ames.

Originally the Land-Grant colleges were primarily concerned with subjects relating to agricultural and industrial pursuits. Thus, Iowa State began as "Iowa Agricultural College," and in 1896 was given the more inclusive name, "Iowa State College of Agriculture and Mechanic Arts." In those beginning years it established a national—and in many cases international—reputation in the areas of agriculture, veterinary medicine, home economics and engineering.

Adapting land-grant philosophy to the changing needs of the twentieth century, Iowa State has maintained its preeminence in these areas, but has broadened and strengthened its work in other areas to the point that its largest enrollment now is in the sciences and humanities.

Increasing numbers of students find in the broad-based curricula of Iowa State opportunities to specialize in excellent programs of science and technology, and to acquire a general background of education in the liberal arts tradition.

### THE DEVELOPMENT OF THE UNIVERSITY

Iowa State opened its doors to a preparatory class in the fall of 1868, with instruction at the college level beginning the following March. A class of 26 was graduated at the first commencement in 1872.

The college pioneered in the establishment of agricultural curricula, was the first state institution to found a veterinary school, and helped move engineering from a small and narrow profession to its present key position in our industrialized society. The basic sciences were emphasized. Co-educational from its beginning, Iowa State took leadership in domestic economy (later to become home economics).

Graduate study was offered almost as soon as classes began and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science and veterinary medicine.

Iowa State shared the conviction with other land-grant institutions that all people should have access to the ideas and knowledge of the campus. By 1870 it was holding educational institutes in various Iowa towns. In 1903 it set the pattern of county cooperative extension as it is conducted now throughout the United States.

Iowa State's program became that of a university with special teaching responsibility in science and technology, an extension education

Dr. William R. Parks

program throughout the state, and extensive research interests to advance frontiers of learning.

Since 1959 it has been known as Iowa State University of Science and Technology.

Instruction is offered throughout the year, divided into four quarters of approximately 11 weeks each.

### The Iowa State Student

About 95 percent of the freshmen entering Iowa State were graduated in the upper half of their high school classes and 62 percent ranked in the upper quarter.

Iowa State is clearly the first choice of Iowa high school students who plan to continue their education in college. It enrolls more freshmen than any other college or university in the state. It has the largest undergraduate enrollment in the state.

At the three public universities in Iowa in 1970 the enrollment of new freshmen was 8,266. Iowa State's 3,868 freshmen constituted nearly 47 percent of that total.

The 1970 Iowa State undergraduate enrollment of 16,599 constituted 40.6 percent of the undergraduate enrollment at the public universities. In the four years previous to 1970 undergraduate enrollment of the universities increased by 7,959. Iowa State's share in that increase was 46.6 percent, or 3,711.

In the fall of 1970 new undergraduates at Iowa State totalled 4,902, of which 79 percent came directly from high school and 21 percent by transfer from another institution.

About 16 percent of the undergraduate students are from outside the borders of Iowa.

In 1969-70 the University awarded 2,910 bachelors degrees and 893 advanced and professional degrees. Since the first class was graduated in 1872, 76,638 degrees had been awarded as of June 30, 1970.

Enrollment of the University in the fall of 1970 was 19,620, almost double that of 10 years previously; and was distributed by areas of study as follows:

Agricultural Engineering .....	156
Agriculture .....	2,827
Education .....	1,195
Engineering .....	3,620
Home Economics .....	2,412
Sciences and Humanities .....	6,094
Veterinary Medicine .....	295

### Academic Programs

The University is organized into seven colleges, listed here with their chief academic programs. Most programs lead to the baccalaureate degree or to advanced degrees, but the technical institute offers two-year programs leading to a certificate. In many cases, certain majors, options or electives allow for increased specialization within programs. Those which are administered jointly by two colleges are listed within each college.

### Operating Budget

In the year ending June 30, 1970, the Iowa State University expenditures for operation were approximately \$100 million. Of this total about 25 percent was for instruction, about 26 percent for research, about 6 percent for Extension services and a little more than 27 percent for self-supporting enterprises such as the operation of the residence hall system and stores. The remainder was for the physical plant, administration, library, equipment, general expenses, scholarships and fellowships.

State appropriations accounted for about 33 percent of the income for the year, gifts, grants and contracts for about 23 percent, and self-supporting enterprises 23 percent. Federal appropriations contributed a little less than 4 percent and student fees about 12 percent. The remainder came from sales and endowment income, organized activities and miscellaneous other income.

### Physical Plant

As of June 30, 1970 the value of the land, buildings and equipment of the University, based on acquisition cost was \$148,802,832. Affiliated organizations—Memorial Union, Alumni Association, Iowa State University Press and the United States Atomic Energy Commission—had a physical plant on campus totaling \$30,046,350. Thus, the value of facilities available for use by the University and affiliated organizations was \$178,849,182. Somewhat more than half of the funds for construction of these facilities came from federal sources, student fees and rentals, or gifts and grants. The remainder came from state appropriations.

The University of Northern Iowa is a member of the American Association of Colleges for Teacher Education (AACTE), the American Association of State Colleges and Universities, and the Council of Graduate Schools in the United States. The university is fully accredited through the master's degrees and the six-year specialist's degrees by the North Central Association of Colleges and Secondary Schools (NCA) and by the National Council for Accreditation of Teacher Education (NCATE). The university is also accredited by the national Association of Schools of Music and by the National University Extension Association.

Created by act of the Iowa General Assembly, the university opened on September 6, 1876, as Iowa State Normal School and was authorized to grant the bachelor's degree in 1904. In 1909 the name of the institution was changed to Iowa State Teachers College and in the following 50 years achieved national status in teacher education. In 1961, the State Legislature broadened the function of the institution to offer programs of instruction in the liberal and vocational arts and changed the name to the State College of Iowa. The university now offers three baccalaureate degrees: the Bachelor of Arts, the Bachelor of Technology established in 1968, and the Bachelor of Music established in 1969. Programs leading to certification to teach are available on both of the first two degrees.

Graduate work leading to the master's degree was begun in 1952 and in 1960 the institution was authorized to offer the second year of graduate work and the Specialist in Education degree. The Master of Arts degree program was effected in 1965, and the Specialist's program in 1969.

The change to university status on July 1, 1967, brings increased attention to research and services, major changes in the administrative organization of the institution, and the offering of a far broader curriculum not only in education but in fields other than teaching along with an increased emphasis on graduate work. The function of the university is described as follows:

"The University shall offer undergraduate and graduate courses of instruction, conduct research and provide extension and other public services in the areas of its competence to facilitate the social, cultural and economic development of Iowa. Its primary responsibility shall be to prepare teachers and other educational personnel for schools, colleges and universities and to carry out such research and provide consultative and other services for the improvement of education throughout the

**President Dr. John J.

state. In addition, it shall conduct programs of instruction, research and service in the liberal and vocational arts and sciences and offer such other educational programs as the State Board of Regents may from time to time approve."

### Organization

The academic structure of the university consists of five colleges, each governed by a dean, which house a total of 30 departments. These colleges include the Graduate College and the following instructional divisions:

**Business and Behavioral Sciences:** Business, Business Education and Office Administration, Economics, Geography, History, Home Economics, Political Science, Psychology, Sociology and Anthropology.

**Education:** Curriculum and Instruction, Educational Media Center, Educational Psychology and Foundations, Library Science, Physical Education for Men, Physical Education for Women, School Administration and Personnel Services, Teaching.

**Humanities and Fine Arts:** Art, English Language and Literature, Foreign Languages, Music, Philosophy and Religion, Speech, Speech Pathology and Audiology.

**Natural Sciences:** Biology, Chemistry, Earth Science, Industrial Arts and Technology, Mathematics, Physics.

### Enrollment and Staff

Enrollment at the University of Northern Iowa has increased dramatically from 3,616 students enrolled for on-campus college credit in the fall of 1960 to 11,651 persons under instruction in the fall of 1971. The majority of the students are residents of Iowa.

The instructional and administrative staff numbers some 680 and the nonacademic staff about 615. The teaching faculty is composed of 20 percent instructors, 43 percent assistant professors, 18 percent associate professors, and 19 percent professors. More than 37 percent of those who teach college-level classes have the doctor's degree.

The Malcolm Price Laboratory School at UNI offers work from pre-school through the twelfth grade, and provides an excellent facility where students in the teacher education program may observe and participate in classroom activities. The school is also a laboratory for research and experimentation in teaching techniques and materials.

### Undergraduate Education

While teacher education remains a primary function of the university, the offerings in both liberal and vocational arts are increasing each year. Basic difference between curricula in teacher education and those in liberal arts and the vocational-technical areas is that the latter curricula do not require the work in professional education courses and student teaching needed for teacher certification. Teacher education programs require 130 semester hours for graduation, with 124 semester hours required for the liberal and vocational arts Bachelor of Arts degrees.

The Bachelor of Technology degree allows the student a choice of major in one of three areas: technical institute education, trade and industrial education, or industrial technology. The degree programs vary from 133 to 127 hours and require at least one year of recent and significant technical or trade experience in industry in addition to the course work.

The Bachelor of Music degree prepares students for careers as performers as well as for other fields where a high degree of musical knowledge or performing skill is required. This degree does not provide for teaching certification, but it is possible to take part of the necessary work during the undergraduate program and the remainder as a post-graduate and thus earn a teaching certificate. Majors have a choice

of five areas: voice, piano, organ, orchestral instruments, and theory-composition; each requires a total of 130 semester hours.

The university seeks to guarantee a reasonable breadth in each of its graduates with a requirement in general education. The recently revised general education program of 40 semester hours, effective the summer of 1971, is flexible in structure and consists of a wide and diverse selection of work in the humanities, social sciences, mathematics and science, psychology, physical education, and communication skills. Most of the courses in this program are required of each student unless he can demonstrate adequate competency in the area.

In addition to the degree programs, UNI offers several pre-professional and para-professional programs in cooperation with other institutions. Pre-professional work is available in law, medicine, dentistry, physical therapy, engineering, and a two-year Nursing Program with the University of Iowa. Para-professional programs include the Freshman Academic Program with Allen Memorial School of Nursing, Waterloo, and a three-year program in Medical Technology with both Allen Memorial School of Medical Technology and Schoitz School of Medical Technology, Waterloo.

### Graduate Education

The university offers four graduate degrees: the Master of Arts, the Master of Arts in Education, the Specialist, and the Specialist in Education. A cooperative doctoral program in educational administration is also available which may be started at the University of Northern Iowa and completed at the University of Iowa.

A number of curricula leading to the Master of Arts degree are available to provide graduate training for classroom teachers in the elementary and secondary schools and the junior colleges, or for those interested in additional education who do not plan to teach. The following curricula are available: art, biology, business, business education, chemistry, counseling, earth science, English, English linguistics, French, geography, history, home economics education, industrial arts, library science, mathematics, mathematics for elementary schools, music, physical education, physics, political science, school business management, science, science education, social science, sociology, Spanish, speech, speech pathology, technology, and teaching English as a foreign language. The program is highly flexible, the specific curriculum for each student being prescribed by the student's undergraduate background, his experience, and his future plans.

The Master of Arts in Education degree is awarded for the satisfactory completion of the graduate curricula in elementary education, school administration and supervision, student personnel services, special education, school business management, education of the visually impaired, educational psychology, educational media, and developmental and remedial reading.

The Specialist and Specialist in Education degrees require a minimum of two years of graduate study and are designed for such specialists in the fields of science education, education as school principals and superintendents, curriculum coordinators and consultants, education and school psychologists, reading clinicians, school business managers, guidance counselors, supervisors of industrial arts, and professionals in the field of college student personnel services. The programs are open to students who have the master's degree and at least one year of teaching experience.

### Service Responsibilities

The university has a definite responsibility to assist school administrators and teachers throughout the state with instructional and administrative problems. Conferences are held on campus each year; pamphlets, monographs, and books are published and distributed at cost; staff members serve as consultants at workshops and conferences; radio and television programs are broadcast each week; and extension classes

and correspondence study are made available to teachers in service. The university owns and operates an FM-radio station, the equipment for which was purchased from funds donated by alumni and friends of UNI.

Consultant services to the schools of the state are also an important program. In addition to the aid given by UNI staff members to schools which ask for assistance, the program provides an opportunity for university staff to keep in touch with public schools.

The university also provides consultant services to business and industry with staff members engaged in consultative and in-service education work throughout the state. Workshops and conferences are organized for business and industrial groups and special non-credit courses are offered for such people.

The University of Northern Iowa Center for Urban Education is part of the Educational Opportunity Program, and works closely with the various departments of the university. Designed to increase the educational opportunities of the disadvantaged of all ages, the Center is in the process of developing programs to prepare teachers and others to work in urban areas. The Center is located in the heart of the urban area of Waterloo, Iowa.

## Iowa Braille and Sight Saving School Vinton

Frank Rocco, Ph.D., Superintendent

The Iowa Braille and Sight Saving School was opened at Iowa City April 5, 1853. Nine years later (August, 1862), the school was moved to its present location at Vinton.

The Iowa Braille and Sight Saving School is an educational facility which offers a complete educational program for partially-sighted and totally-blind boys and girls from pre-school through high school. Counseling parents of pre-school and school-age children is part of the program offered.

A modern curriculum includes team teaching, ungraded multi-level instruction and a Montessori-based, pre-school program.

In addition to academic subjects, special emphasis is placed upon vocational preparation, physical education and instruction in orientation and mobility, including the use of the long cane for travel. Students are prepared for college entrance, vocational school entrance and direct post-school employment.

Supported by appropriations made by the state legislature, the school is governed by the State Board of Regents. No charges are required for room, board, laundry, tuition, and educational supplies. In addition to the regular school term, a summer school program is offered. This program is designed primarily for instruction in orientation and mobility (cane travel) and enrichment activities. Blind or partially-sighted children who are not enrolled at the school for the regular term may attend the summer program.

In addition to the Thanksgiving, Christmas, and Easter vacations, a home week-end program is in operation at the school. This program requires that each student return to his home at designated week-ends throughout the year. Parents are encouraged to visit the school as often as possible and to have their children return home on week-ends.

In 1943, a special instructional program was developed to meet the needs of pupils with partial vision, in addition to the already established program for blind children. Students in this program use large-type material as their basic reading medium. All specialized equipment, such as lighted magnifiers, material for enlargement and duplication, etc., are available.

A full social program under the direction of trained and experienced personnel, and extra-curricular activities such as bowling, swimming,

wrestling, track, skating, band, chorus and scouting round out the program.

Individualized instruction is made possible both by a continuous progress curriculum and an annual enrollment of approximately 145 students, permitting a very favorable teacher-pupil ratio.

Tours of the facility are conducted on Tuesday and Thursday afternoons. For further information write the superintendent's office.

## Iowa's Area Schools

Iowa State Department of Public Instruction  
(Mailing Address is: Grimes State Office Building,  
Des Moines)

Paul F. Johnston, State Superintendent  
Area Schools and Career Education Branch

DR. WILLIAM M. BAILEY, Associate Superintendent--Area Schools  
and Career Education Branch, Des Moines

CHARLES R. MOENCH, Des Moines, Director, Area Schools Division

W. O. SCHUERMAN, Des Moines, Director, Career Education Division

ROBERT YEAGER, Ankeny, Chief, Fiscal Control

The Iowa Sixty-first General Assembly in 1965 approved legislation permitting the development of a state-wide system of post-secondary educational institutions operated under the direction of the State Board of Public Instruction. These institutions were officially designated as area schools and were to be organized by merged areas which included two or more counties. The boards of education of county school systems were authorized to plan for the merger of county school systems, or parts thereof, to develop a merged area. Each merged area was required to have a minimum of at least 4000 public and private pupils in grades 9 through 12.

The merged areas were authorized to develop area schools as either area community colleges or area vocational schools. The statement of policy contained in the original enabling legislation and amended in 1967 by the Sixty-second General Assembly identified the following categories as appropriate educational opportunities and services to be provided by the area schools:

1. The first two years of college work including preprofessional education. (This does not apply to those merged areas that organized as area vocational schools.)
2. Vocational and technical training.
3. Programs for in-service training and retraining of workers.
4. Programs for high school completion for students of post-high school age.
5. Programs for all students of high school age who may best serve themselves by enrolling for vocational and technical training while also enrolled in a local high school, public or private.
6. Student personnel services.
7. Community services.
8. Vocational education for persons who have academic, socio-economic, or other handicaps which prevent succeeding in regular vocational education programs.
9. Training, retraining, and all necessary preparation for productive employment of all citizens.
10. Vocational and technical training for persons who are not enrolled in a high school and who have not completed high school.

The funding of the area schools was provided for through a combination of federal, state, and local funds and student tuitions. These funds include a local three-quarter mill levy on property within the merged area for operational funds and an additional three-quarter mill levy for the purchase of sites and construction of buildings. The levy for sites and construction must be approved by the voters in the merged area for a period not to exceed five years. General state aid is distributed to area schools on the basis of \$2.25 per day for the average daily enrollment of full-time students and the full-time equivalent of part-time students. The individual area school has the authority to establish tuition. Tuition for residents of Iowa, however, is not to exceed the lowest tuition rate per semester, or the equivalent, charged by one of the three state universities.

There are currently 15 area schools in operation. The merged areas of these 15 area schools include major portions of 98 of the 99 counties in Iowa. Cherokee County, the last county to remain outside of the merged area system, is now in the process of making arrangements to merge with the area schools and will be officially a part of the merged area system by July 1, 1971. Eleven of the area schools have been organized as area community colleges and four have been organized as area vocational schools. All 15 area schools are approved by the State Board of Public Instruction and by the State Board of Regents.

The legislation permitting the development of the area schools provided a procedure whereby the public junior colleges operated by local public school districts could be converted into area schools. There were 16 public junior colleges operating in Iowa at the time the area schools

were organized. One or more of these local public junior colleges had operated since 1918 when the first public junior college in Iowa, Mason City Junior College, was organized. As the area schools were organized, all of the 16 public junior colleges merged with these new institutions. Emmetsburg Community College, the last of the public junior colleges to merge with an area school, merged with Area III—Iowa Lakes Community College on July 1, 1970.

Eight of the area schools have developed as multi-campus institutions. These area schools merged with existing public junior colleges and in some instances have developed additional attendance centers more convenient to large population centers. A total of 25 major campuses are now operated by area schools with additional programs located on numerous smaller satellite attendance centers.

The total enrollment for all area schools during the 1969-70 school year was 118,000 including adult education registrations. The total full-time equivalent enrollment of all students was equal to 23,744.

# History of Iowa

By William J. Petersen

Superintendent, the State Historical Society of Iowa and  
Professor of Iowa History at the State University of Iowa

Long before the coming of the white man the ancestors of the Indian roamed the land that is now Iowa. Frequently referred to as Mound Builders, these shadowy inhabitants are best commemorated in the Effigy Mound National Park above McGregor. Dr. Charles K. Keyes, who served for 30 years as state archeologist, identified at least six different prehistoric cultures—the Algonkian, Hopewell, Oneota, Mill Creek, Effigy Mound, and Glenwood. The Algonkian culture was found over nine-tenths of Iowa, while the other five were more localized—the Hopewell, Oneota, and Mound Builders being largely in eastern Iowa, the Glenwood in southwest Iowa and the Mill Creek in northwest Iowa. Evidence of their presence in Iowa is recorded in village sites, cave and rock shelters, shell heaps, mounds, cemeteries, trails, spirit places, rock carvings and paintings, stone dams or fish traps, flint and hematite quarries, boulder effigies, caches, workshops, and enclosures.

The Indian who roamed Iowa in historic times knew little or nothing about these ancient people. Almost a score of tribes belonging to three different linguistic stocks have been associated with the Iowa country since the advent of the white man. The Ioway, Winnebago, Osage, Oto, Missouri, Omaha, Ponca, Sisseton, and Wahpeton were tribes belonging to the Dakota or Siouan Linguistic Stock or Family. They are commonly referred to as Plains Indians. Their bitter enemies were the Woodland or canoe people—members of the Sauk, Fox, Mascoutin, Illinois, Chippewa (Ojibway), Miami, Ottawa, and Potowatomi tribes. These were members of the Algonquian Linguistic Stock or Family. The Iroquoian stock is only remotely associated with Iowa, being mainly responsible for driving other tribes from the Michigan, Ohio, and Indiana area west of the Mississippi into Iowa.

## The French in Iowa

The written history of Iowa began on June 17, 1673, when Joliet and Marquette and their five rugged voyageurs paddled out of the Wisconsin River and into the Mississippi opposite present-day McGregor. Eight days later, on June 25, Joliet and Marquette met the Illinois Indians near the mouth of the Iowa River. It was the first meeting between the white man and the Indians on Iowa soil.

The French lost no time in exploring the vast wilderness drained by the Mississippi and its tributaries. In 1680 LaSalle sent an expedition under Michel Aco to discover the headwaters of the Mississippi. Aco and his two companions, Father Hennepin and Antoine Auguel, were captured by the Sioux Indians above the mouth of the Wisconsin River but were later released and fled down the Mississippi. Another Frenchman, Nicholas Perrot, taught the Miami Indians how to mine lead in the Galena-Dubuque area and hunted buffalo with them in Iowa. Perrot was the first white man to meet and describe the Ioway Indians. Lahontan and LeSueur left records of their exploits, and William DesLisle drew an amazingly accurate map of Louisiana in 1718 showing the first river-to-river road across Iowa from the mouth of the Wisconsin to the Big Sioux River. DesLisle located Ioway Indian villages on Lake Okojoji and the Big Sioux. The expedition of Joseph Des Noyelles with 80 French soldiers and their Indian allies against the Sauk and Fox Indians ended in a pitched battle at the Raccoon Fork of the Des Moines on April 19, 1735.

### Spain in Iowa . . .

The Spanish Period covers a scant four decades from 1762 to 1800. Jonathan Carver and Peter Pond, two Connecticut Yankees who visited northeast Iowa in 1766 and 1773 respectively, were the first to appear during the Spanish regime. Jean Marie Cardinal mined lead in the Dubuque area during the Revolutionary War and actually lost his life in the defense of St. Louis. Thereafter, Spain assumed control and made three land grants in Iowa—to Julien Dubuque in 1796, to Louis Honore Tesson in 1799, and to Basil Giard in 1800. Dubuque was the only permanent settler in the Spanish Period, living at the mouth of Catfish Creek from 1788 until his death in 1810.

### Louisiana Purchase

In 1800 Spain retroceded the land west of the Mississippi to France. Napoleon in turn sold it to Jefferson in 1803. One hundred and thirty years had passed under French and Spanish rule since the discovery of Iowa by Joliet and Marquette, but a scant score of names are remembered in history. On March 26, 1804, Congress provided for the government of the newly acquired territory by dividing it into two separate jurisdictions—the Territory of Orleans and the District of Louisiana. The Iowa country formed a part of the District of Louisiana, which was placed under the jurisdiction of the Governor and Judges of the Territory of Indiana. In 1805 Iowa became a part of the Territory of Louisiana, in 1812 it was a part of Missouri Territory, and in 1821, when Missouri was admitted into the Union, Iowa was left unorganized territory without government of any kind.

Exploration of the Iowa country promptly followed the Louisiana Purchase. Lewis and Clark ascended the Missouri in 1804, requiring 33 days to pass along the western border of Iowa. Sergeant Charles Floyd, the only man to die on this expedition, was buried on the present site of Sioux City. In 1805 Pike ascended the Upper Mississippi, recommending the present site of Burlington and the bluff below McGregor as suitable locations for military posts. Other notable Americans explored Iowaland: Stephen H. Long, Henry R. Schoolcraft, and Stephen Watts Kearny were outstanding military men. Manuel Lisa was a Missouri River fur trader, while George Catlin spent eight years painting pictures of Indians on the Upper Mississippi and Missouri frontier. Caleb Atwater, G. C. Beltrami, Nicollet, Father DeSmet, Marryat, Murray, and Fredrika Bremer left eye-witness accounts of Iowaland more than a century ago. As a result of Kearny's Dragoon expedition of 1835, Lieutenant Albert Miller Lea wrote his *Notes on the Wisconsin Territory: Particularly with Reference to the Iowa District or Black Hawk Purchase*. Published in Philadelphia in 1836, this was the first book dealing specifically with Iowa. In the years that followed, John Plumbé, Jr., Isaac Galland, John B. Newhall and a dozen others published books that focused the attention of millions on Iowa.

### Forts in Iowa . . .

The presence of the Indian and the fur trader led to the establishment of forts in the Iowa country. Fort Madison, the first American fort in Iowa, was erected in 1808 and evacuated and burned in 1813. Fort Edwards, located opposite the mouth of the Des Moines River, was erected in 1815. Fort Armstrong was erected on Rock Island in 1816, and Fort Crawford at Prairie du Chien the same year. Fort Des Moines No. 1 was built on the present site of Montrose by Colonel Kearny in 1834. Fort Atkinson, Fort Dodge, Fort Des Moines No. 2, Fort Sanford, and Fort Crogan are other military establishments associated with early Iowa history.

The *Western Engineer* made the first steamboat voyage up the Missouri as far as present-day Council Bluffs in 1819, while the *Virginia*

ascended the Mississippi to Fort Snelling in 1823. Ten years later, on June 1, 1833, permanent settlement began in Iowa. Iowa was attached to Michigan Territory for purposes of government in 1834, and formed a part of the newly-created Wisconsin Territory in 1836. The first federal census showed 10,531 inhabitants in the Black Hawk Purchase that year.

### Iowa As a Territory

On July 4, 1838, the Territory of Iowa was born, with Robert Lucas serving as first governor. The territory was named by Albert M. Lea in 1836 from the Iowa River, which derived its title from the Ioway Indians. Twenty-two counties containing 23,242 inhabitants had been established west of the Mississippi in the Black Hawk Purchase and other Indian cessions in 1838. Between 1833 and 1838, churches were founded, schools, academies, and seminaries established, newspapers published, and a bank opened. The first public surveys were begun in 1837, and two land offices established the following year at Burlington and Dubuque.

### Statehood!

Scarcely had the Territory of Iowa been established when a clamor arose for statehood. In 1844 a constitution was adopted featuring low salaries, limited indebtedness and restrictions on banks and corporations. Congress refused to accept the boundaries requested by the people in 1844, and they in turn rejected those proposed by Congress. A new constitution with the present-day boundaries (embracing 56,147 square miles) was adopted in 1846. Iowa was admitted into the Union as the first free state in the Louisiana Purchase on Dec. 28, 1846.

### Politics . . .

Democrats dominated state politics between 1846 and 1854. Ansel Briggs was elected first governor, and A. C. Dodge and George W. Jones were named United States senators. A steady flow of northern immigrants during the 1850's, coupled with the successful campaign of dynamic James W. Grimes in 1854, swept the Whigs into office. Two years later Grimes founded the Republican Party in Iowa. Subsequently Dodge and Jones were defeated, the Constitution of 1857 was adopted, and the capital moved from Iowa City to Des Moines. Ralph P. Lowe became the first Republican governor in 1858. Only five Democrats—Horace Boies (1890-94), Clyde Herring (1933-37), Nelson Kraschel (1937-1939), Herschel Loveless (1957-1961), and Harold E. Hughes (1963-1969)—have served as governors in the intervening one hundred years that were marked largely by Republican chief executives.

The names of many Iowans are written boldly in the annals of the Republican party. James W. Grimes, James Harlan, Samuel J. Kirkwood, William Boyd Allison, Jonathan P. Dolliver, and Albert B. Cummins achieved high distinction in their day. Allison served 36 years in the United States Senate. Among the Representatives the names of C. C. Dowell, Gilbert N. Haugen, J. A. T. Hull, William P. Hepburn, and David B. Henderson loom large. In addition to these legislators, Iowans have achieved high rank in the councils of the nation: 15 have served in presidents' cabinets, Henry A. Wallace was elected vice president, and Herbert Hoover gained the presidency.

Although Republicans dominated state politics, there have been occasional revolts. These revolts have come mainly from the tillers of the soil. Iowa is an agricultural state. Farmers drew up the constitution of 1846, formed the first agricultural societies in 1852, held the first state fair in 1854, formed an agricultural college in 1858, and established in 1877 a society that grew into the Iowa state dairy association. When hard times came, however, thousands of Iowa farmers deserted the

Republican party to support third-party movements. James B. Weaver was twice nominated for the presidency and the Granger and Populist movements won strong support.

### Iowa and War

The settlement of Iowa grew out of the Black Hawk War. Iowa men fought gallantly in the Mexican War. Such names as Buena Vista, Butler, Cerro Gordo, Guthrie, Hardin, Mills, Palo Alto, Ringgold, and Taylor commemorate famous men and battles.

Iowa furnished almost 80,000 men in the Civil War. Her troops were especially prominent in such battles as Wilson's Creek, Pea Ridge, Shiloh, Iuka, Corinth, the siege of Vicksburg, the capture of Fort Donelson, and Sherman's march to the sea. Over 12,000 Iowa men were killed, 9,000 wounded, and another 10,000 discharged because of ill-health.

Iowa men served with equal distinction in the Spanish-American War, World War I, World War II, and the Korean conflict. Veterans from these wars have played an important role in state and local politics. At its peak, the G.A.R. counted 20,324 members, whereas the American Legion numbered over 44,000 members before World War II.

### Transportation—Communication

Steamboats plied the Upper Mississippi and the Missouri before the opening of white settlement in 1833. In 1848 the telegraph reached Iowa; in 1854 the first railroad reached the Mississippi opposite Davenport; in 1856 the first bridge spanned the Father of Waters between Rock Island and Davenport. The North Western was the first railroad to reach Council Bluffs, the first bridge to span the Missouri was built at that point. Railroad mileage reached its peak in 1914 with over 10,000 miles of track in Iowa.

Telephone construction in Iowa began about 1878. Today almost every farm in Iowa can boast a telephone. The introduction of the automobile around the opening of the 20th century was followed by actual horseless carriage manufacture in Iowa.

### Religion and Education

The first church in Iowa was erected by the Methodists at Dubuque in 1834. By 1838 the Baptists, Congregationalists, Quakers, Presbyterians, and Roman Catholics had established churches. Inspired Christian leaders are associated with the Iowa story, many notable names being associated with the numerous academies, seminaries, and colleges that dotted the state during the 19th century. Iowa Wesleyan College, established in 1842, is the oldest collegiate institution in Iowa, and Grinnell College is the second oldest college. A score of other denominational schools supported by church-going citizens who have often expressed their faith in the temperance movement and moral crusades, attest Iowa's claim to the title of "Corn and Bible Commonwealth." In addition to denominational colleges, the State University of Iowa at Iowa City, Iowa State University at Ames, the University of Northern Iowa at Cedar Falls, and 16 public junior colleges afford Iowa children an opportunity to receive collegiate training.

Iowa's richest asset over the years has been its crop of fine children. These have grown and achieved fame as artists and actors, baseball players and billiard players, musicians and novelists, architects and industrialists, preachers and poets, statesmen, scientists and scholars. Whether serving in their home town, their state, in the nation, or in some far-flung corner of the world, these sons and daughters of Iowa demonstrate by their actions and accomplishments the truth of Sidney Foster's toast to his native state in 1886: "In all that is good, Iowa affords the best."

## The Indians in Iowa

The Mesquakie Indians who are residents and voters in Iowa number around 500. Iowa was for many years the cherished home of their ancestors and friends.

They own, as a tribe or family, 3,800 acres of land in the Iowa River valley in Tama County. This is their collective farm, bought by them with their own money, managed and cultivated by them, on which they live, where they study and have their religious services. The State of Iowa many years ago by law gave them authority to own tribal land and property and the title is held in trust for them. They pay taxes and those qualified are voters.

They have a genuine democratic government for themselves, elect a council of managers, and the council has a chief or president. They have a school and all of the younger people can write the English language. Some of the older ones have never learned other than their own language, which is used by all of them.

The Mesquakie tribe is of the Algonquin family. They formerly lived on the Atlantic coast, then moved westward through New York and Canada and in Wisconsin in the early fur trading days, they formed a federation with their kinsmen, the Sacs, or Saukies. The Mesquakies were called by the traders Reynards or Foxes and their name means the "people of the red earth." A century ago they lived in several camps along the Mississippi River, then moved into the Des Moines valley, followed the agency and army to Raccoon forks, and departed from Des Moines when Iowa was admitted as a state.

Some of the Mesquakies so loved their homes in Iowa that they gave up their government payments and returned from their southwestern reservations. The state gave them permission to live in Iowa as a tribe, and with money received in settlement with the government they bought their present lands.

On their Tama County farm they live in comfortable houses and dress, in the main, as their white neighbors. Formerly the head men resisted efforts at educating the young, but now they go to school and are apt scholars. They keep their wickiups, not to live in, but for their visits and ceremonies. They also have one large tribal hall in which they hold their religious ceremonies regularly, several services each week conducted in their own language by their own leaders and preserving their own forms of worship.

They are quite skillful in various industries—weaving, basket making, bead work and in leather. One-third of the land is cultivated but the remainder is largely rough pasture land. The tribe has a tractor, but uses horses for farm work. They raise cattle, hogs and chickens.

## Iowa in the Civil War

By Edith Wasson McElroy, Executive Secretary  
Iowa Civil War Centennial Commission

Iowa had not yet celebrated its fifteenth year of statehood when the Civil War began. The state's population centered along the Mississippi River and across the southern and central areas of the state.

*Maj. Gen.*  
*Samuel B. Curtis*

In the census of 1860, one county (Osceola) did not report a single inhabitant. O'Brien listed eight. Of a total population of 675,000, 116,000 men were subject to military duty. Percentagewise, Iowa contributed more men to the Civil War military services than did any other state, north or south. More than 75,000 volunteers were sent to the armed forces, over one-sixth of whom were in their graves before Appomattox.

Forty-eight infantry regiments, nine cavalry regiments, and four batteries of artillery were organized during the four years of fighting. Almost one-half of the eligible male population in Iowa bore arms, a record that has never been exceeded in any war since.

Iowa had four major generals—Dodge, Curtis, Steele, Herron, and several brigadier generals. Many Iowa generals went on to state and national prominence following the war.

Our troops fought at Wilson's Creek in Missouri, Pea Ridge in Arkansas, Forts Henry and Donelson, Shiloh, Chattanooga, Chickamauga, Missionary Ridge and Rossville Gap. They were at Vicksburg, Iuka and Corinth. They were with the Army of the Potomac in Virginia and fought under Sheridan in the Shenandoah Valley. They were buried at Andersonville. They marched on General Banks' ill-starred expedition to the Red River. They marched and countermarched, skirmished and fought across most southern states.

Twenty-seven Iowans won the Congressional Medal of Honor first awarded in the Civil War.

Few Iowa soldiers were native born. They came from Pennsylvania and New England, New York, Ohio and Indiana. Small southern farmers unable to compete with the great slaveholders followed the Mississippi River to Iowa and their sons wore the Union blue. Many soldiers were immigrants from foreign lands. Scarcely a state or a nation but was represented on Iowa's Civil War roster.

## Iowa's First War Governor

Samuel Kirkwood came to Iowa in 1854. The son of a Maryland farmer, he lived in a log cabin pre-dating the Revolution until he was ten years old. He was then sent to Washington to school. When he was

*Gov. Samuel J. Kirkwood*

twenty years old, the family moved west, traveling by covered wagon to Ohio. In 1856 Kirkwood was a delegate to the convention which organized the new Republican party in Iowa and from that time on his name was prominent in party circles.

Difficulties beyond those confronting any other Iowa governor awaited Kirkwood when he journeyed in an old Concord stage, wallowing through snowdrifts to Iowa's new capitol. Des Moines in 1860 was a shabby frontier town of less than 3,000 inhabitants. The new statehouse was more than a mile from hotels, with streets little more than wagon tracks through the swampy river bottom leading up to it. The new governor had no aides, no staff, not even a private secretary. Typewriters

were unknown. With the help of friends who volunteered their services, Kirkwood answered by hand the voluminous correspondence that came to his desk.

When the tidal wave of war rolled over the state, Kirkwood was faced with providing equipment and supplies for the thousands of volunteers who poured into the crude camps. In May, 1861, the general assembly voted \$800,000 worth of bonds, a tremendous sum for those days. Selling the bonds was not so easy. The state was in debt. Taxes were delinquent. The people were impoverished by the debacle of the late fifties. To buy guns, the governor pledged his personal resources. With no guarantee of repayment, the state's banks came to his aid. Private citizens loaned thousands of dollars. Railroads carried soldiers without cost. Farmers gave food. The communities uniformed their companies. Most Democrats, forgetting party animosities, joined with Republicans in advancing the Union cause. Southern sympathizers were silent. Newspapers wrote of little else than the war. Ministers preached that to serve the state was to serve the Lord. And by the thousands Iowa's young men volunteered.

When Governor Kirkwood visited President-elect Lincoln in Springfield and told him, "Iowa will not be frightened into abandoning its principles," he spoke truly. Iowa was excited by the unhappy state of the Union, but would never consent to its dissolution. Dissenters existed but they were a minority.

On President Lincoln's first call for volunteers, the state's quota of ten companies was mustered six days before the official date. The second call was filled so promptly that the Second Regiment preceded the First into the field by a day.

The Mississippi River was the great thoroughway to the south down which Iowa's troops moved by river packet. Naturally the first camps sprang up along its banks. Communications throughout the state were slow and centralization of training centers was imperative. From three to five days were required for a letter to reach Des Moines from Keokuk. Copies of the Burlington *Hawk-Eye* were carried from Eddyville to Des Moines, a distance of 75 miles, by "pony express."

Volunteers were abundant, but not guns. April 29, 1861, Kirkwood wrote to the secretary of war in Washington: "For God's sake send us arms. I ask for nothing but arms and ammunition—we have the men to

use them. Three regiments are waiting and five thousand guns are required at once." Meanwhile the men drilled with brooms. At Shiloh

Iowa regiments marched from river boat to battlefield to load their guns for the first time under enemy fire.

The first camps were bleak and crude, with little thought of sanitation or physical comfort. As the war dragged on some camps took on permanence with rude buildings of rough boards. Other camps were rows of tents, which vanished when the troops marched out, to bloom again when a new contingent arrived.

*Old Spring house at Camp Harlan. Soldiers' initials carved in its stone walls are plainly visible.*

### Military Organization

The regiment was the unit of command, its colonel named by the governor. Despite the political overtone, the average ability of officers was high. Mistakes in their selection were made, but in the field the unit officer soon disappeared. A certificate of sobriety was required by the governor from all elected officers; even so, drunkenness as well as incompetency occurred. Permitting the men to elect their officers was not always successful from a military viewpoint. It did have one noteworthy advantage; the elected officer had the respect and liking of his men, important in the civilian army. Few field or staff officers had previous military experience. The Civil War officer learned his trade on the march and on the battlefield. The majority of the officers, high and low, were community and state leaders before the war. They were sincere and honest men fighting for a cause in which they believed.

As was that of the governor, the adjutant general's office was overwhelmed. Soon after Bull Run, Kirkwood appointed Nathan B. Baker to the post. Baker was no tyro in executive matters. A graduate of Harvard, he studied law in the office of Franklin Pierce. In New Hampshire, his native state, he served as a journalist, clerk of the court, member of the legislature, twice speaker of the house, and finally governor.

Kirkwood and Baker were a strong team. Both men were high level executives with deep concern for Iowa's troops. Arbitrary rules, mistreatment, arrogance, brought quick and vigorous attention from the governor and adjutant general. So efficient was Baker's conduct of his office, that it was cited by the War Department as the ideal for that of adjutant general.

### Internal Dissension

While as a state Iowa stood staunchly by the Union, it had its internal dissension. Many Iowans had a southern background and accepted slavery and a state's right to secede. The *Peace* (Copperheads as they were often called) Democrats as differentiated from the *War* Democrats

who supported the war effort, and the Knights of the Golden Circle worked against the state and national administration's program. The Knights opposed the draft, encouraged desertion, discouraged volunteering. Organized in many sections of the state, they were said to number 42,000 in all. Refugee Confederate soldiers and paid agents fomented the disaffection. The so-called Mahony wing of the Democratic Party was in outspoken opposition. With so many Union supporters at the front, this boring from within became an increasing danger.

In South English, Peace Democrats paraded through the town challenging townspeople gathered in a Republican convention. A shot was fired which led to others. Tally, their leader, was killed. Rumors flashed that several thousand armed men were readying an attack on the town.

Governor Kirkwood ordered eleven companies of Home Guard to the scene and hurried there himself. Faced with armed resistance, the Tally enthusiasts lost their thirst for revenge and disbanded.

While history records no Civil War battle on Iowa soil, invasion from slave-owning Missouri was a constant threat, as were the warlike Sioux to the northwest. Log stockades to protect the women and children were built from Chain of Lakes in Emmet County to Sioux City. The legislature authorized the formation of the Border Brigade which brought further security to the scattered settlers.

*Col. James B. Weaver*

News of the Union defeat at Bull Run brought rejoicing to Missouri secessionists, and new fear of an invasion to Iowa's southern border counties. Citizens slept with guns at hand and Governor Kirkwood authorized the organizing of militia in southeastern Iowa.

When word came on Sunday, Aug. 4, 1861, that a Confederate band, the number varying from 500 to 1,500, was approaching Athens, Missouri, across the Des Moines River from Croton, Capt. David Moore with Belknap's Rifles and Capt. Sample's cavalry (on foot) set out from Keokuk to meet the enemy. Detachments from the Fifth and Sixth Infantry in camp at Burlington, as many as could be armed, arrived too late. The battle was over and the enemy in retreat. As the rebels were mounted, a forced march into Missouri was unable to overtake them. Two landmarks of that day still stand—the Benning House on the Missouri side of the river, its wall punctured by a cannon ball, and the Sprouse House on the Iowa side where the wounded were cared for.

In southwestern Iowa, the first companies to reach the rendezvous of the Fourth Iowa Regiment were hurried from Council Bluffs under Colonel Dodge to repel a threatened Confederate invasion in that area.

The final raid into Iowa was by Missouri guerillas in 1864. A dozen young men rode boldly into Davis County, robbing, murdering and looting. Bloomfield's county fair was in progress and a posse quickly formed. Under Col. James Weaver they rode out only to find the raiders had fled across the border.

## The Underground Railroad

Iowa had many stations on the underground railroad, an organization of men and women, many of them Quakers, who actively assisted runaway slaves to reach Canada and freedom.

Many of these stations still stand. In barns, houses, cellars, devoted men and women found a few hours of security and rest for the fleeing Negroes. One of the best known is Salem in Henry County. Its settlers were predominantly Quakers who at risk of life and property befriended the black men. Armed Missourians with baying bloodhounds often rode

Map showing the routes traveled from the South by escaped slaves to Salem, Iowa, and the routes on the "Underground Railroad" traveled North and East to freedom. Salem, Iowa, was the main "Office" on this carefully organized escape route set up by Quakers.

close on the escaping slaves.irate slave owners threatened to shoot or hang those helping the Negroes, and to burn their buildings.

Ruel Daggs, a fire-eating Missouri planter, lost many slaves by the Salem route and was particularly violent in his threats. Once he had a cannon planted in front of the Lewelling

Stone House where he claimed his slaves were hidden. Another time he roared into town with a small army proposing to destroy the village. The unperturbed Quakers refused to be scared. Later Daggs brought suit against Elihu Frazer and eighteen others for \$10,000 for the part they played in the loss of his "chattels." He valued his men slaves at \$2,000 each; women at \$1,000 each and children at \$500 each. The number lost totaled \$9,000, so he added \$1,000 to pay for help hired to replace the missing slaves. He had, he set forth, "casually lost possession" of his slaves and traced them to Salem where the defendants helped them to escape. He won a jury verdict on Sept. 19, 1850, but the records do not show its nature.

John Brown, the noted abolitionist, had many friends in the underground and was often in Iowa. After his Kansas battles, he fled to the Quakers in this state. While these men of peace did not condone Brown's shedding of blood, they agreed with his anti-slavery stand.

In Tabor, West Liberty and Springdale, the old warrior was a frequent visitor. To Grinnell, Des Moines and other towns he came less frequently. Tabor, nearest underground station to the south, was settled by Ohio abolitionists, and in the late fifties its square was often crowded with covered wagons loaded with immigrants bound for Kansas. Many of these men and women were abolitionists, and around the campfires discussions of slavery raged far into the night.

In Tabor, John Brown drilled his followers for the fighting ahead and stored arms and ammunition. To Tabor came the sick and wounded from his Kansas battles. The dauntless old man himself sought the peace and quiet of Iowa firesides to rest and brood and talk with his friends.

The stately old stone Lewelling House still stands in Salem and is open to the public. In its kitchen, furnished as in Civil War days, the stone steps into the cellar which slaves followed to their hiding place, may be seen.

## Iowa's Second War Governor

*Gov. William M. Stone*

William Milo Stone was born in New York state and moved to Ohio at the age of six. His formal education consisted of two winters in a country school. He read law in James Matthews' law office in Co-shocton, Ohio, with whom he practiced until he moved to Iowa and established himself at Knoxville. There he purchased the *Knoxville Journal*.

When Fort Sumter was fired on, Stone held the office of district judge. When word of the attack came, he raised a company in Knoxville of which he was elected captain. A few weeks later he received his majority. At Blue Mills he was wounded and at Shiloh taken prisoner.

After three months' captivity he was chosen one of three Federal officers paroled by the Confederates to arrange an exchange of prisons. The mission was unsuccessful and Stone returned to Richmond and surrendered to the Confederate authorities. So pleased was Jefferson Davis with his conduct that he sent him back to make another try. This time the mission was accomplished, at least a general exchange followed.

His experiences gave Stone much publicity and on his return to Knoxville after his liberation, he was made colonel of the Twenty-second Iowa infantry. During this service he was wounded at Vicksburg and again returned home. While recuperating he was nominated as governor on the Republican ticket to succeed Kirkwood, who declined to run for a third term, and resigning his commission, Stone made the campaign which elected him.

A slender, erect, handsome man, he possessed unlimited self-confidence and tremendous industry. His military service popularized him with the soldiers.

### Iowa's Graybeards

By special authority of the War Department, the 37th Iowa Volunteer Infantry was made up of men beyond military age. Their average age was 57; more than one hundred were in their 60s; a number were 70; at least one man was past 80.

The Graybeards served as prison and provost guards, relieving younger men for active duty. For a time they guarded supply trains. Passing through guerilla territory, one train was attacked. Four men were wounded, of whom two died. When riding atop swaying trains proved too strenuous for their aging bodies, the men were returned to prison guard duty.

After Lee's surrender, the weary Graybeards asked to go home. In recommending their discharge General Willich pointed out they had given some 1,300 sons and grandsons to the Union Blues.

On May 24, 1865, the regiment was mustered out at Davenport. It was the only regiment of men beyond the army's age limit to serve in the Civil War. The regiment had a high reputation as prison guards, being more humane than was common in that day.

## Iowa in the Spanish-American War

In this nation's conflict with Spain over Cuba's independence between April and August, 1898, Iowa lost many times as many men from disease as from active engagement. The men who served in Iowa's four regiments of infantry and the two batteries of light artillery numbered 5,696. Two were killed in action, 38 were wounded, and 163 died from disease.

Out of the war came men who later served their state and national governments in high positions—Dan Turner, Corning, governor, 1931-1933; Joe Hanley, Muscatine, later lieutenant governor of New York state; Lloyd Thurston, Osceola, member of the state legislature, and the U. S. Congress, national commander-in-chief, 1954-1955, United Spanish War Veterans; Horace M. Havner, national commander-in-chief of the United Spanish War Veterans 1947-1948; and Guy Gillette, Cherokee, U. S. Senator, 1936-45 and 1949-55.

The leaders of the American Army in World War I were all veterans of this war. Among them were such men as Mathew A. Tinley, Council Bluffs, colonel of the famous Iowa Regiment, the 168th Infantry, and all of the field officers of that regiment.

## Iowa in World War I

(April 6, 1917, to Nov. 11, 1918)

The total number of men registered in Iowa for service, and possible service, during World War I, was 523,478. This grand total was divided as follows:

Class of June 5, 1917, aged 21 to 31, both inclusive . . . . .	217,914
Class of June-August, 1918, age 21 . . . . .	21,671

The total number of men and women from Iowa in World War I service is placed at 114,224, divided as follows:

In the army, 96,726 enlisted men, 4,975 officers, 611 nurses.

In the marines, 1,044 enlisted men, 30 officers.

In the navy, 10,211 enlisted men, 525 officers, 40 nurses, 42 yeomen.

This registration was for the purpose of uncovering persons, 45 through 64 years of age, who possessed critical skills required in war production or civilian activities vital to the successful prosecution of the war effort. This age group was not subject to military service.

The number of officers and enlisted men and women from Iowa in World War II is placed at 262,638. No distinction is made between persons who entered service through induction or enlistment. Although no specific figures are available, it is estimated that persons served in the various components as follows:

## Iowa in the Vietnam War

As the *Iowa Official Register* goes to press, more than 70,000 Iowa men have been engaged in the Vietnam War, which began August 5, 1964.

All persons serving in this war are doing so under the Universal Military Training and Service Act as amended, requiring registration of all male individuals born on or after Aug. 22, 1922. Registration of such persons is required when they reach the age of 18.

As of March, 1971, Iowa had suffered 616 casualties resulting from hostile action and 68 resulting from other causes. These figures include 15 casualties suffered by members of the Iowa Army and Air National Guard units mobilized during 1968. About 1800 Iowa Army and Air National Guardsmen mobilized in 1968 returned to National Guard status during 1969.

The above figures are from statistics released by the Public Affairs Department of the Department of the Army, Washington, D. C., and compiled in Iowa by the Adjutant General's Office at Camp Dodge.

## Center of State Government

The government of Iowa centers in the venerable golden-domed capitol, which presides over a constellation of twelve other buildings on its park-like ninety-three acres, and ten buildings or quarters which the state owns or leases in downtown Des Moines. Planned in 1870, the capitol was designed to house all the state's activities, but they have overflowed into one building after another as the state has grown and its functions have multiplied. Although the capitol no longer houses all the government, it still is the center of administration, of legislation and of judicial interpretation.

Here come the committees from communities, the lobbyists to see the legislators, the litigants and lawyers to contest appealed cases. Here also come the sight-seeing delegations, men and women, and throngs of school children. Especially during legislative sessions the children come, marshaled by their teachers, to parade up the grand staircase, look at the murals, gaze into the dome, sit in the legislative galleries, maybe even to be introduced to the legislature or to meet the governor.

There were 418 persons employed in the capitol when the Iowa State Capitol Planning Commission made a survey. But when the legislature is in session there are also 185 legislators and their 185 secretaries and a staff of some sixty legislative clerks and assistants. And visitors throng the corridors at a rate of 600 to 700 a day during legislative sessions. Capitol visitors in guided groups in the first half of 1967 numbered between 75,000 and 100,000. Focal point of activity, aside from the legislative halls, is the cafeteria in the ground floor corridor, where hundreds have a meal or a lunch or at least a cold drink in the course of the day.

Rivaling the capitol for historic interest is the State Historical Building, where library resources and museum exhibits abound and guided tours are conducted. First in volume of employment is the state office building, with some 1,347 persons employed. State employees in other buildings in Des Moines aside from the capitol numbered 820 when the planning commission survey was made.

## How Site Was Selected

Location of the capitol on its commanding site resulted from a series of decisions that began almost with statehood. The new state quickly recognized that the capitol should be farther west than Iowa City, and the First General Assembly in 1846 authorized a commission to select a location. Amidst rivalries a Jasper County selection was made, and then rejected. In 1854, the Fifth General Assembly decreed a location "within two miles of the Raccoon forks of the Des Moines River." The exact spot was chosen when Willson Alexander Scott gave the state 9½ acres where the capitol now stands.

A group of Des Moines citizens built a temporary capitol (which was later bought by the state), near where the soldiers' and sailors' monument now stands. In 1857 Governor Grimes proclaimed Des Moines to be the capital city, and state papers and functions were transported thither. The temporary capitol was in use for thirty years, until destroyed by fire, but in the meantime the permanent capitol was being planned and built.

The General Assembly in 1870 established a capitol commission to employ an architect, choose a plan for a building, not to cost more than \$1,500,000, and to proceed with the work, but only by using funds available without increasing the tax rate.

The board employed Edward Clark, architect of the capitol extension at Washington, to aid in selecting plans and modifying them to keep the cost within the limits of appropriations. The board also instituted tests to ascertain whether Iowa stone could be found suitable for building. John C. Cochrane and A. H. Piquenard were designated as architects,

and a cornerstone was laid Nov. 23, 1871. A smaller, fulltime commission was appointed in 1872. Much of the original stone had deteriorated through waterlogging and severe weather, and had to be replaced, and the cornerstone was relaid Sept. 29, 1873.

Although the building, as planned, could not be constructed for \$1,500,000, the Cochrane & Piquenard design was retained and modifications were undertaken. Mr. Cochrane resigned in 1872, but Mr. Piquenard continued until his death in 1876. He was succeeded by two of his assistants, M. E. Bell and W. F. Hackney. Mr. Bell resigned in 1883 to become supervising architect for the treasury department in Washington, and Mr. Hackney continued until completion of the building.

Successive legislators made appropriations, and the commission built within the limits of the funds appropriated. The building was dedicated in January, 1884, when the general assembly was in session. The governor's and other offices were occupied in 1885. The supreme court room was dedicated in 1886.

The building commission made its final report June 29, 1886. The cost had totaled \$2,873,294.59. The audit showed only \$3.77 unaccounted for in the fifteen years. The commission bemoaned that it could not have had another \$30,000 to finish the frescoes and build the south and west steps.

In 1902, in order to modernize and repair the building, a third capitol commission was created. While work proceeded, a disastrous fire in the north wing Jan. 4, 1904, ruined the house chamber and damaged other offices. The commission restored the building, purchased paintings and mosaics, and redecorated almost all the interior. The original decorations are still in the senate. These expenditures raised the total cost of the capitol to \$3,296,256.

## Design of Capitol

The architectural design of the capitol, rectangular in form, with great windows and high ceilings, follows the traditional pattern of the nineteenth century planning for public buildings, a modified and refined Renaissance style which gives the impression of strength and dignity combined with utility.

The commanding feature is the central towering dome. This is constructed of steel and stone and covered with 23 carat gold. The gold leafing was replaced in 1964-1965 at a cost of \$79,938. The dome is surmounted by a lookout lantern that may be reached by long and winding stairs, and it terminates in a finial that is 275 feet above the ground floor. The rotunda beneath the dome is 67 feet in diameter. Four smaller domes of simple design rise from the four corners of the capitol. The pediment over the front entrance discloses a fine piece of allegorical sculpture.

Stone for the basement was quarried in Johnson County, Iowa; granite came from Iowa boulders; stone of the main structure from St. Genevieve and Carroll counties, Missouri; steps, columns and other parts from Anamosa, Iowa; Cleveland, Ohio; Sauk Rapids, Minn.; Lamont and Joliet, Ill. Imported and domestic marble of twenty-nine kinds was used in the interior; and the wood used was nearly all from Iowa forests of walnut, cherry, catalpa, butternut and oak.

As is so often the case with public buildings, visitors are likely to enter on the ground floor. Although the majestic approach is up the long hill and stone steps from the west, the convenient entrance is from the parking lots on the east. The ground floor corridors are busy with cafeteria service, and in the busy season this area is thronged. Here visiting groups may stop at the custodian's office to obtain information and to inquire about guide service. There are information desks also on the upper floors.

The beauty, dignity and arrangement of the interior become apparent as the visitor stands under the dome on the first floor. Broad,

lofty corridors extend west, north and south. Walls are highly decorated. The grand staircase is to the east. Suites opening from the south corridor are those of the governor, auditor of state and treasurer of state. The supreme court and secretary of agriculture are to the north, and the secretary of state to the west and the attorney general to the east.

The grand staircase ascends to a landing and divides north and south to bring visitors to the floor above, where the house of representatives is on the north, the senate on the south and the law library on the west.

The senate hall is 58 feet long, 91 feet wide and 41.9 feet in height. It is finished in marble, white oak and scagliola, and is furnished in mahogany. The figures in the ceiling represent Industry, Law, Agriculture, Peace, History and Commerce.

The hall of the house of representatives is 74 by 91.4 feet, and 47.9 feet in height. It is finished in marble, scagliola and black walnut.

The law library is 108.4 feet long, 52.6 feet wide and 44.9 feet high. It is furnished in ash and chestnut and beautifully wainscoted in marble.

### The Mural "Westward"

Extending full width of the east wall over the staircase is the great mural painting, "Westward," an idealized representation of the coming of the people who made Iowa. This was completed as part of the 1904 decoration. Edwin H. Blashfield, the artist wrote of it:

"The main idea of the picture is a symbolical presentation of the Pioneers led by the spirits of Civilization and Enlightenment to the conquest by cultivation of the Great West. Considered pictorially the canvas shows a prairie schooner drawn by oxen across the prairie. The family ride upon the wagon or walk at its side. Behind them and seen through the growth of stalks at the right, come crowding the other pioneers and later men. In the air and before the wagon are floating four female figures; one holds the shield with the arms of the State of Iowa upon it; one holds a book symbolizing enlightenment; two others carry a basket and scatter the seeds which are symbolical of the change from wilderness to plowed fields and gardens that shall come over the prairie. Behind the wagon and also floating in the air, two female figures hold respectively a model of a stationary steam engine and of an electric dynamo to suggest the forces which come with the later men. In the right hand corner of the picture, melons, pumpkins, etc., among which stand a farmer and a girl, suggest that here is the fringe of cultivation and the beginning of the prairie. At the left a buffalo skull rather emphasizes this suggestion."

On the upper floor level above the "Westward" painting are six mosaics in six arched panels depicting Defense, Charities, the Executive, the Legislative, the Judiciary, and Education. These were made in Venice from small pieces of colored stone, according to designs by Frederick Dielman of New York, who also designed the mosaic panels Law and History in the Congressional Library.

Twelve statues, high within the rotunda, beginning north of the library door, represent History, Science, Law, Fame, Art, Industry, Peace, Commerce, Agriculture, Victory, Truth and Justice.

Eight lunettes, or half-moon-shaped paintings, surrounding the rotunda are the work of Kenyon Cox, famous American artist. They are entitled: Hunting, Herding, Agriculture, the Forge, Commerce, Education, Science, Art. They are allegorical and indicate the progress of civilization.

At the top of the staircase on the south wall is a painting of a basket of corn by Floyd V. Brackney, a native of Marshall County. This picture was the center of the Iowa exhibit at the Panama-Pacific Exposition in San Francisco.

The battle flags carried by the Iowa regiments in various wars are preserved in niches on the main floor—Civil War thirty-six; Spanish-

American War thirteen; First World War twenty-six. In the west hall is a plaque done by Nellie V. Walker in commemoration of the work of Iowa women in the fight for civic and political equality. In the south hall is a 26-foot photographic enlargement, showing the grand review of the 168th Infantry on the capitol grounds following its return from France in 1919.

A lofty banner, stretched high under the vault of the dome, is a G. A. R. emblem, painted by Joseph Czizek on the occasion of a Des Moines convention of the Grand Army of the Republic, and retained as a permanent decoration by order of Governor Kendall in 1922.

Above the grand stairway, facing the large "Westward," are quotations. On the south side is one by Patrick Henry: "No free government or the blessings of Liberty can be preserved to any people but by a firm adherence to Justice, Moderation, Temperance, Frugality and Virtue and by a frequent recurrence to fundamental principles."

On the north side is one by G. W. Curtis: "Courageous confidence in the intelligence of the community is the sure sign of leadership and success."

Underneath it is one by Solon: "The ideal state—that in which an injury done to the least of its citizens is an injury done to all."

To the west is a quotation from William Pitt: "Where law ends tyranny begins."

Around the rotunda on the frieze above the columns is the famous Abraham Lincoln quotation: "That government of the people, by the people, for the people, shall not perish from the earth."

## The Governor's Office

On Jan. 1, 1885, Governor Buren R. Sherman became the first occupant of the present offices of the governor of Iowa, following dedication of the state capitol building the year before. Much of the decoration and original furnishings of that day are still preserved in the four-room suite. The large, ornate mahogany table in the center of the reception room is an example. The frescoed ceilings were painted in watercolors on the wet plaster more than 80 years ago.

The governor's private office was moved from the center room to the west office by Governor Albert B. Cummins in 1902. The governor's desk also was installed at that time and has been used by all subsequent chief executives of Iowa. Governor Nathan Kendall (1921-1925) provided the solid, straight-back chairs for visitors. Frescoes of the Great Seal of the State of Iowa and of the Iowa Territorial Seal adorn the ceiling of the governor's private office.

The grandfather clock in the governor's private office dates from about 1750 and once was owned by the prominent Iowa author Emerson Hough of Newton (1857-1923). The tall clock in the office of the executive assistant is the original master clock controlling other clocks in the law library, supreme court, and legislative chambers. Operated by air, the clock must be wound once a week.

The offices are 23 feet 9 inches from floor to ceiling. The draperies are velvet and lined with satin with an underdrape of semi-sheer fabrics. Lamps in the inner office are of pewter. Prisms of cut Czechoslovakian crystal decorate the chandelier in the reception room. The woodwork was carved in cherry and mahogany by skilled German craftsmen. The hearths and wainscoating are of fine domestic and imported marble. Paintings in the offices are the works of Iowa artists.

## Home of Iowa's Governors

Nearly two miles west of Iowa's gold-domed capitol, shaded in the summer and protected in the winter by luxuriant trees and shrubs, stands the imposing brick house that the governor of Iowa calls home. Located at 2900 Grand Avenue in Des Moines, the Philadelphia Colonial

**The Governor's Mansion**

house only in recent times became the home of Iowa's first family. The **three-story brick building** was constructed in 1903. It was not until 1947, however, that it was purchased by the state.

The house was built by W. W. Witmer. The state bought it from Gerold S. Nollen, then chairman of the board of Bankers Life Company. Mrs. Nollen was the daughter of the builder. Iowa paid \$27,200 for the house and its 240 by 200-foot lot. Remodeling cost another \$22,800, and \$22,421 was spent on furnishing and redecorating the mansion. In January, 1949, Governor William S. Beardsley became the first chief executive of the state to live in the freshly refurbished home. Subsequent governors who have lived at the mansion were Leo A. Hoegh, Herschel C. Loveless, Norman A. Erbe, Harold E. Hughes, and the present governor, Robert D. Ray.

On the first floor are a spacious drawing room, dining room, library, kitchen and private dining room. There is also a screened porch. Five bedrooms and a sitting room are located on the second floor. Two rooms which are used as servants' quarters are on the top floor. The house has four baths. As one enters the first floor hall, he is greeted by a wide colonial staircase with a shining mahogany handrail and white balustrade. The woodwork in the drawing room and library is oak. The mansion's furnishings are a blend of the modern and the traditional. The dining room table is mahogany, three-pedestal, in the Duncan Phyfe style.

Many of the furnishings are gifts. There is a big samovar which was used by Edwin T. Meredith, Sr., when he was secretary of agriculture in the Wilson administration. One hundred volumes were donated in 1949 to the mansion's library by the State Historical Society of Iowa. Other items of interest include a century-old mahogany card table, an antique French oil lamp, four-postered canopied bed, two antique walnut chests, two Lowestoft vases, a Sheffield silver tray, two antique Sèvres porcelain vases, a pair of mahogany Chippendale twin beds and an antique walnut serving chest.

## Striking Monuments

The most striking monument on the capitol grounds is the granite shaft rising 145 feet, erected to the memory of the soldiers and sailors of the Civil War. The heroic bronze figure "Victory" is predominant, while at the base there are four groups representing different branches of the military or naval service, and numerous historical plaques and medallion portraits of typical soldiers. The original design was by Harriet A. Ketcham, and work was commenced in 1894. A small and

appropriate memorial to Christopher Columbus, erected by Iowa citizens of Italian ancestry, stands nearby.

General Grenville Dodge erected a monument honoring Iowa's long-time Senator William B. Allison. This is an allegorical design of heroic dimensions, depicting civic duties in the public service, and it is encompassed by a flower bed.

West of the capitol is an impressive bronze statuary group depicting the Pioneer. The cannon and mortar on the grounds are of Civil War days. The grave of Willson A. Scott, one of those who gave the state the capitol grounds, is near where he lived and is appropriately marked. A bronze cannon taken in the Spanish-American War and the head-piece of the Battleship Iowa are near the historical building. A granite block dedicated to the soldiers of the Spanish-American War also stands on the plaza east of the capitol.

In 1950, the fine record of Iowa citizens in war bond drives was rewarded with the presentation of a replica of the Liberty Bell, and it is stationed just across the street west of the State office building. Boy Scouts presented a replica in miniature of the Statue of Liberty, and it is erected between Grand Avenue and the parking area east of the capitol. A stone erected by the W. R. C. in honor of Crocker Post No. 12, Department of Iowa, was set in 1944.

Iowa's memorial to Abraham Lincoln, a statue of Fred M. and Mabel L. Torrey, depicting the Civil War president and his son Tad, was dedicated in 1961. This was commissioned by Friends of Lincoln, Inc. It is on the west approach to the capitol.

A Japanese temple bell and bell house, presented to the state of Iowa by the prefecture of Yamanashi in Japan, stand on an eminence on the south edge of the capitol grounds. They express appreciation for a gift of purebred breeding hogs and corn sent to Yamanashi after the typhoon of 1959. Dedication was in 1962.

## State Activities Overflow

Originally the whole state government was housed in the capitol, but departments through the years have outgrown it, one by one or in groups, until now there are thirteen state-owned buildings on or adjacent to the capitol grounds, one state-owned building in downtown Des Moines, and four downtown buildings in which space is leased.

First major building to be added to the capitol group was the state historical building, planned originally in 1896 to house the Aldrich historical collection, but now the home of the state historical department and of a variety of library and museum functions. Known as the Historical Memorial and Art Building, it is 260 by 110 feet in size, built at the turn of the century and enlarged by an addition in 1908.

The limited area of the capitol grounds became a major political issue, and the Thirty-fifth General Assembly in 1913 set up a tax to raise \$3,000,000 to purchase lots, buildings and residences to clear the way for expansion to 93¼ acres. The land was landscaped, drives were put in, and a system of lighting was installed to enhance the beauty of the capitol.

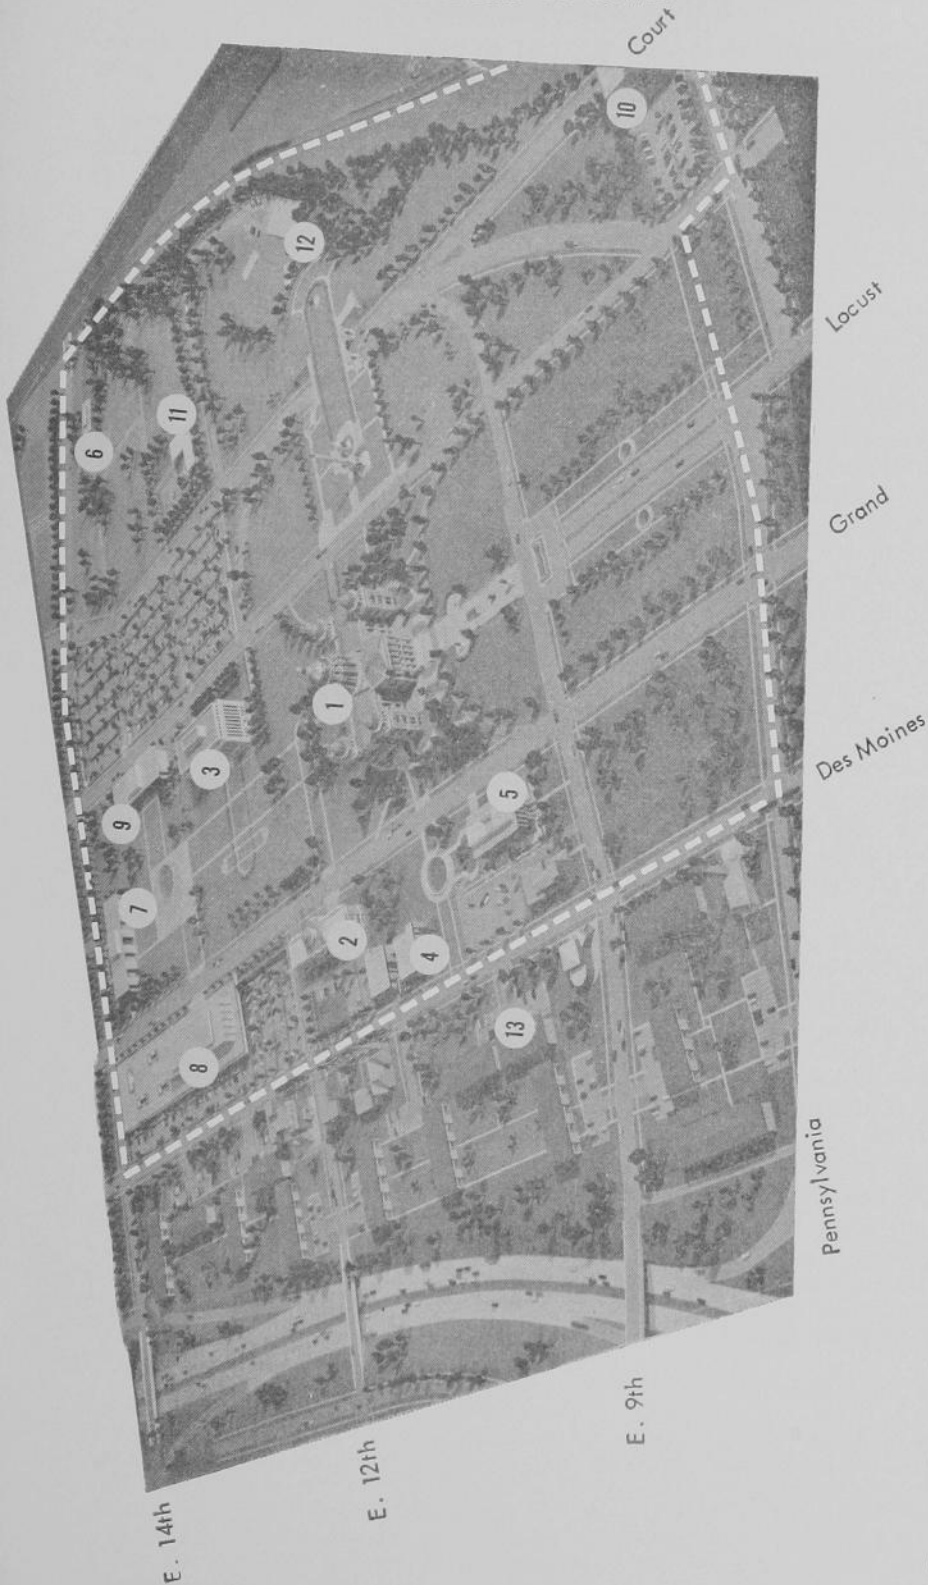

The six-story-and-basement office building, 120 by 246 feet in size, was started with an appropriation by the Forty-ninth General Assembly of \$1,650,000, available July 1, 1941. First department to move in was social welfare, Sept. 1, 1951, and occupancy was completed when the department of public instruction moved April 24, 1952. Total cost of the building was \$4,935,892.45. A tunnel from the new office building to the statehouse was completed early in 1953 at a cost of \$92,841.71.

The International Harvester Building, on the southwest corner of the statehouse grounds, was bought in 1945. Total cost including remodeling of its five floors was \$541,972.

The Amos Hiatt school building, southeast on the grounds, was remodeled for use of the commerce commission. After being condemned, the former school building was authorized for demolition by the 63rd General Assembly and was razed in 1969. An old school building on the northwest corner of the grounds was razed. The former home for governors north of the capitol was fitted for training of disabled persons.

Purchase of the old Y.M.C.A. building at Fourth Street and Keosauqua Way for \$300,000 was authorized by the Fifty-eighth General Assembly in 1959.

The Iowa Employment Security Commission moved into a new office building in October, 1963. The Fifty-ninth General Assembly in 1961 financed construction in part by the use of non-refundable reserve funds accumulated from taxes paid by Iowa employers to the federal government for administration of the unemployment insurance program. This money, representing 85 per cent of the \$1.7 million construction cost, will be returned to the Iowa Unemployment Trust Fund over a period of years by amortization grants by the federal government. The remainder of the building cost came from a \$75,000 appropriation from the state general funds and from an authorization allowing the use of \$225,000 from the Iowa Public Employees' Retirement System for its offices. The new building is at 1000 East Grand Avenue across from the statehouse. Its light gray exterior brick closely resembles the color

of the stone walls of the capitol, and emphasis on the vertical dimension keeps the three-story new building in harmony with the much taller statehouse.

The contour of the building was modified in 1971 by construction of a three-story addition to house the ever-expanding programs administered by the Iowa Employment Security Commission under the direction of the manpower administration.

## 20-Year Building Plan

The Sixty-first General Assembly in 1965 adopted a master plan and guide for the future expansion and development of the state capitol grounds. This was the plan presented by the Capitol Planning Commission, as directed by the Sixtieth General Assembly. It was entitled "Planning for 20 Years."

Three steps toward carrying out the plan were taken by the Sixty-first General Assembly, as follows:

1. Adoption of the plan.
2. Authorization for purchase of land by the state executive council. The proposed addition will extend east to East Fourteenth Street, north to Des Moines Street and south to the railroad track.
3. Appropriation of \$3,000,000 for a new state office building. A legislative advisory committee was named to act with the executive council to employ architects, approve plans and let contracts.

The program follows the lines of a plan presented to the Sixtieth General Assembly, which included construction of the Employment Security Building, now accomplished.

Additional steps proposed by the 20-year plan are:

- Transfer to the new office building of the department of agriculture.
- Provision of committee and conference rooms in the capitol and relocation of the capitol cafeteria.
- Consolidation of the vocational rehabilitation division, with new construction.
- Razing of the Amos Hiatt Building, Kasson Building, frame residences of the rehabilitation center and the paper warehouse.
- Landscaping of the entire grounds and both sides of bordering streets.
- An underground parking garage to accommodate 250 automobiles for use of legislators and state officials. Relocation of parking lots now east of the capitol.
- Provision of humidity controlled space for the traveling library, medical library and law library.
- New and adequate space for the state courts.
- Erection within the twenty years of a third office building.
- Relocation of the heating plant when present boilers need to be replaced.

The capitol planning commission, with authority of the executive council, is conducting a study to update the 20-year plan and to develop detailed plans for landscaping, parking, and locations of future buildings.

## The Government of Iowa

The government of the State of Iowa is based upon a constitution adopted by the people and upon statute laws enacted from time to time by the general assembly.

Iowa has always used the separation of powers doctrine, dividing the governmental authority into its legislative, executive and judicial components. Iowa has had two state constitutions, the first approved in 1846, the second in 1857. Only eight states are now using constitutions adopted prior to the Iowa constitution of 1857.

The Iowa constitution's "Bill of Rights," Article I, is one of the best sections of the state constitution. It has been used as a reference guide for the model state constitution written by the National Municipal League and by the framers of the 1948 New Jersey constitution.

**The Electorate**—All men and women who have lived in Iowa for six months, in the county in which they claim residence for 60 days, and in the precinct 10 days, are entitled to vote if they are citizens of the United States 21 years of age or over. Persons convicted of infamous crimes and those declared idiotic or insane are, however, disfranchised. The right of women to vote in Iowa is based upon the nineteenth amendment to the United States constitution.

**Election Days**—The regular elections for national, state, district and county officers are held on the Tuesday following the first Monday of November of the even-numbered years. Candidates, with a few exceptions, are nominated at the primary election held on the first Tuesday after the first Monday in September preceding the general election. Provision is also made for nominations by petition or convention. Political parties must use the primary for nominating candidates, but in case no candidate receives the necessary 25 per cent of the primary, a convention may nominate.

The regular election date for municipal officers is the first Tuesday following the first Monday of November of the odd-numbered years. If a municipal primary election is necessary it is held on the second Tuesday prior to the regular municipal election.

## Legislative Department

**General Assembly**—The legislative authority of the State of Iowa is vested by the constitution in a general assembly which consists of a senate and a house of representatives. The terms of both senators and representatives begin on the first day of January following their election. Regular sessions are held biennially, commencing on the second Monday of January of the odd-numbered years. Special sessions of the general assembly may be called by the proclamation of the governor. Refer to S.J.R. 4.

**House of Representatives**—The house of representatives of the 1967 legislature (the Sixty-second General Assembly) consisted of 124 members, elected for two years from the districts shown by the map. This arrangement, however, is temporary and is subject to change by amendment of the state constitution. Any person who has resided in the state for one year and has the qualifications of a voter is eligible for election as a representative. Women were admitted to the general assembly by an amendment of the state constitution adopted in 1926.

The house of representatives elects a speaker and other officers. Each house makes its own rules of procedure.

**Senate**—In the Sixty-second General Assembly there were 61 senators. Senators are elected for four-year terms so arranged that approximately half the terms expire at the end of each biennium. Senators must be 25 years of age and have the other qualifications required of representatives.

Members of both houses of the general assembly have been paid \$40 a day through the length of the session. The speaker and lieutenant governor received \$80 a day.

## Executive Department

**Elective Officers**—The constitution of Iowa makes provisions for a governor, lieutenant governor, secretary of state, auditor of state, treasurer of state and attorney general, who are elected for terms of two years at the regular biennial elections in the even-numbered years. In addition, the general assembly has made provision for a secretary of agriculture, elected for two years. A board of commerce commissioners of three members, formerly elective, became appointive by the governor in 1963. A superintendent of public instruction is chosen by a state board of public instruction. Members of this board are appointed by the governor, largely from nominations made by county boards of education.

**Governor**—The supreme executive power of the state is vested in the governor. It is his duty to see that the laws are enforced, to supervise the official business of the state, to make recommendations to the general assembly, and to appoint various officers and boards. Most major appointments are subject to confirmation by the senate. He has the power to call special sessions of the legislature and veto acts passed by the general assembly, but a majority of two-thirds of each house may pass a bill over his veto. To qualify as governor, a person must have been a citizen of the United States and a resident of the state for at least two years and must be 30 years of age or over at the date of election.

**Lieutenant Governor**—The lieutenant governor, who must possess the same qualifications as the governor, succeeds the governor in case of the death, resignation or disability. His chief function is to act as president of the senate.

**Appointive Officers**—In addition to the elected executive officers mentioned, there are a number of appointive officers, including the comptroller, the superintendent of banking, the insurance commissioner, the labor commissioner, the adjutant general, the commissioner of public health, the industrial commissioner and commissioner of public safety, all appointed by the governor, usually with the approval of the senate. The governor also appoints the members of a number of administrative boards, including the commerce commission, the state board of regents, the board of control of state institutions, the state tax commission, the board of parole, the state conservation commission, the liquor control commission, the state highway commission, the unemployment compensation commission, the state board of health and board of social services.

**Executive Council**—The executive council is an ex officio board made up of the governor, secretary of state, auditor, treasurer and secretary of agriculture.

**State Printing Board**—The state printing board has three ex officio members—the secretary of state, auditor and attorney general—and two members appointed by the governor. The board appoints the superintendent of printing.

## Judicial Department

The judicial department of the State of Iowa is vested by the constitution in a supreme court, district court and inferior courts as the general assembly shall provide.

**Supreme Court**—The supreme court consists of nine justices, who, until amendments of the constitution in 1962, were elected officers, with terms of six years. Vacancies now occurring are filed by appointment by the governor, from lists of nominees provided by the state judicial nominating commission. The term is at least eight years, on approval by referendum of the voters at a judicial election. The justices name one of their number as chief justice, and he serves in that capacity until the expiration of his term. The supreme court appoints a reporter of the supreme court who is also the code editor, a supreme court statistician, and a clerk.

**Attorney General**—The constitution also provides for an attorney general who is elected at the regular biennial election for a term of two years. He represents the state in legal matters, gives advice to state officers, and has, in addition, certain administrative functions.

**Judicial Districts**—The State of Iowa is divided by law into eighteen judicial districts composed of from four to nine counties. Each district has from two to eight judges. Judges were elective officers until amendment of the constitution in 1962 made them appointive by the governor from lists of nominees provided by district judicial nominating commissions. Retention in office is subject to subsequent approval at a judicial election.

There are now seventy-five district judges in the state. One of the district judges presides over the district court sessions in each county. A county attorney and a clerk of the court are elected by the voters in each county.

**Inferior Courts**—The general assembly has provided also for inferior courts. Each township is authorized to elect two justices of the peace who hear cases involving minor offenses and hold preliminary hearings of more serious charges. Municipal courts, superior courts, police courts and mayors' courts are authorized in cities and towns under various restrictions. Municipal courts are optional in cities having a population of 5,000 or more and superior courts in cities with 4,000 or over. Both municipal and superior court judges are elected for four-year terms.

**Municipal Courts**—If a city has neither a municipal nor a superior court, the council shall appoint a police judge in commission governed and city manager cities and may provide for the election or appointment of a police judge in such cities under the general law. In all municipalities having none of these special courts, the mayor acts as the police judge.

**Jury trials**—Jury trials are the rule for serious cases, but under certain conditions may be waived or denied. Petit jurors consist of twelve persons who must be "electors," except in some courts of restricted jurisdiction where the number of jurors may be six persons.

## Local Government

**County Officials**—The State of Iowa is divided into ninety-nine counties, the boundaries of which may not be changed unless the change is approved by the voters of each county concerned. A board of supervisors consisting of three, five or seven members is the chief administrative agency in the county. They appoint a county engineer, county home steward, medical examiner, county welfare director and other administrative officials. In addition, an auditor, who is the clerk of the board of supervisors, a sheriff, county attorney, recorder, treasurer, and clerk of the district court are elected by the voters, the terms being four years except for the county attorney, who is elected for two years. The supervisors are also authorized to create the office of public defender to represent accused persons unable to pay for their own attorneys.

A county superintendent of schools is chosen every three years by a county board of education. The county assessor is chosen by the board of supervisors, county board of education and the mayors of the various towns in the county, for a term of six years. They likewise fix his salary.

**Local Functions**—The Iowa county is a quasi-political corporation which collects municipal, school, county and state taxes, enforces state laws, has charge of poor relief and certain other welfare activities, and shares with the state highway commission the management of the roads and bridges in the county.

Townships which in earlier days were effective units of local government within the counties, have lost almost all of their functions, except for the election of justices of the peace, in which many townships default.

**City Government**—The laws of Iowa also authorize the incorporation of cities and towns. These municipalities derive their authority from the general assembly and have only the powers specifically granted to them. Four cities and towns are governed by special charters<sup>1</sup> granted before the adoption of the present constitution which forbids such acts of incorporation. Four cities have the commission form of government<sup>2</sup>; six have adopted the city manager plan by popular election<sup>3</sup>; and thirteen others have a city manager by ordinance<sup>4</sup>. Members of the commission are elected by the voters. The city manager in cities adopting that plan by a popular vote is appointed by the council.

**Municipal Classes**—All other municipalities are under the general law. Municipalities are classified according to population into cities having 2,000 or more population and towns having less than 2,000 population. In approximately 920 municipalities, the government is by the mayor-council system, in which the mayor and members of the council are elected by the voters for two-year or four-year terms.

**City Councils**—The council is the policy-making body in municipal government and it is also the chief administrative agency in the mayor-council cities. The mayor presides over the council, although he is not a member, and has the power to veto acts of the council subject to a two-thirds majority vote over his veto. He supervises municipal activities and in cities and towns which do not have a municipal, superior or police court, he serves as police judge. He also appoints certain officers, including the marshal or chief of police, the city health officer, and members of the police and fire board, and other officials that the council may direct him to appoint. The city solicitor and clerk, and in some cases the engineer and members of the zoning board of adjustment are chosen by the council.

The Department of Revenue assists county and city assessors in the administration and equalization of personal and real property. Also, the department assists the assessors in recommendations of value on personal property. Numerous other duties are performed by the department such as those defined under Chapter 421, Code of Iowa. The Homestead tax credit is defined in Chapter 425, Code of Iowa. Military service tax exemption is found in Chapter 426-A and §427.3 to 427.7 inclusive, Code of Iowa.

## **Budgets Prepared and Submitted**

**Preparation**—All taxing districts except townships must at least twenty days prior to Aug. 15 of each year prepare a budget of anticipated expenditures and estimated amount to be raised by taxation by funds. Rural schools post budget estimates ten days before dates of hearing. Other taxing districts subject to the budget law publish their 642.

**Certification**—After hearing and decision of local board, budgets are certified to the county auditor not later than Aug. 15. (§24.17)

**Submitted to State Comptroller**—As soon as taxes are certified by each local board and have been computed by the county auditor, he shall forward a copy of each budget, together with a summary of all budgets to the state comptroller.

**County Budget**—On or before Jan. 31 of each year, each county is required to appropriate in detail anticipated expenditures for every office or department for each and every purpose for which expenditures are authorized or demanded. The budget in detail must be completed and adopted by Dec. 31 of the preceding year. This procedure is appropriating in detail the budget certified in August by funds.

**State**—On or before Sept. 3, next prior to each biennial legislative session, all departments and establishments of the government shall transmit to the state comptroller estimates of their expenditure requirements for each fiscal year of the ensuing biennium.

The comptroller shall prepare and file in his office, on or before the first day of December of each even-numbered year, a state budget report.

Not later than Feb. 1 of the year of each biennial legislative session, the governor shall transmit to the legislature a document to be known as a budget, setting forth his financial program for each of the fiscal years of the ensuing biennium.

## **Levies**

The boards of supervisors fix the county levies. Cities and towns certify their tax levies. The State Tax Commission fixes the rates necessary for a state levy on property, if any. There is no state tax levy affixed on property except for a one mill levy on monies and credits which was voted by the people to pay the Korean War bonus. In addition there is a .340 levy made to pay interest and principal on World War II Service Compensation Bonds.

## Origin and Naming of Iowa Counties

(Of the two dates given for each county, the first is the date of establishment, when the county was put on the map; the second is when county government was organized. While population was sparse, an unorganized county might be attached to a neighboring organized county for purposes of administration. As settlement moved west, the legislature established 60 so-called "paper counties" in 1851, completing the theoretical roster of 99 counties, but in many of them it was a matter of years before county governments were organized. In some instances, the dates are significant of changes in county names or boundaries.)

## Iowa Centennial Memorial Foundation

### Iowa Statehood Centennial Commemorative Half Dollar

The sale of memorial half dollars in Iowa's Centennial Year, 1947, brought the state \$188,000. This fund is administered by the Iowa Centennial Memorial Commission, and has grown to more than \$240,000. The commission is authorized to spend the income from the fund for awards and scholarships, amounting to approximately \$6,225 yearly. This amount provides for 25 to 30 scholarships each year.

In 1951 the Iowa Award was created and presented to ex-President Herbert Hoover, and in 1956 to Jay N. Darling. More than 175 scholarships to Iowa colleges and universities have been granted.

Membership of the commission includes all former governors, four citizen members, and several state officials who serve ex officio. The commission was set up in 1949 by Governor Robert D. Blue. Members include the governor, who is chairman; president of the state board of regents, secretary; state treasurer, treasurer; and attorney general, attorney.

Citizen members are Mrs. Mary Humeston, Albia; Mrs. Helen Mitchell, Mason City; Ralph Evans, Davenport; and John M. Henry, Des Moines.

### Use of State Banner by Legislature

The Sixty-first General Assembly, by Senate Concurrent Resolution No. 1, resolved: "That on each day when either the house or senate convenes that the state banner shall be raised on the flag poles directly over the chambers of either and that the state banner shall be lowered at each time the house or the senate adjourns for the day."

This usage replaces the prior employment of the United States flag for this purpose, which the legislative resolution declared to be improper.

## The Capitol Building

The capitol building stands as a symbol of the state, and the center of its government, on an eminence east of the Des Moines River. Its golden dome, visible from the far reaches of the valley, surmounts a dignified structure of modified Renaissance architecture, typical for the style of the 1870's and 1880's, when it was built.

Broad lawns and great stone steps sweep down westward from the capitol toward the river and the Des Moines business district. Lawns, with flower beds, trees, shrubs and monuments, extend to the south, and parking lots and auxiliary buildings to the east and north. The entire area of capitol grounds includes ninety-three acres.

The capitol houses the offices of the governor, secretary of state, auditor, treasurer, attorney general and secretary of agriculture, the chambers of the supreme court, the state senate and house of representatives, and the law library. Other offices of state government are found also in the capitol, and in the state office building, the state historical building and other buildings on and adjacent to the capitol grounds and in downtown Des Moines.

The cornerstone of the capitol was laid Sept. 29, 1873, and the building was dedicated in 1884. Construction was brought to a close in 1886. The cost was \$2,873,294.50. Expenditures were increased to a total of \$3,296,256 by repairs, restoration and redecorating following a fire in the north wing Jan. 4, 1904.

The exterior of the building is entirely of stone, with elaborate columns and handsomely designed cornices and capitals. The substructure is of dark Iowa stone topped by a heavy course of vari-colored granite cut from glacial boulders gathered from the Iowa prairies. The superstructure, or main part of the building, is of buff colored sandstone from quarries along the Mississippi River in Missouri.

The capitol is 364 feet long, north and south, by 247 feet wide. The dome, rising 275 feet above the ground floor, is overlaid with 23 carat gold.

One of the most impressive government buildings in the world—with its majestic gold domes rising above stately pillars of granite—Iowa's capitol is a fitting bulwark to stand against evils in our land and to hold high those principles inherent in the Iowa motto:

"Our liberties we prize, and our rights we will maintain."

## Symbols, Traditions, and Song

**GREAT SEAL OF IOWA . . .** was adopted in 1847 by act of the First General Assembly. It is retained in the custody of and under the control of the governor.

### IOWA STATE BANNER

On March 29, 1921, the Thirty-ninth General Assembly adopted a resolution designating a design for a flag to be known as the "State Banner."

The banner was designed by Mrs. Dixie Cornell Gebhardt of Knoxville and sponsored by the Iowa Society of the Daughters of the American Revolution and consists of three vertical stripes of blue, white and red, with the blue stripe nearest the staff and the white stripe in the center depicting a spreading eagle bearing in its beak blue streamers on which is inscribed in white letters the state motto, "Our liberties we prize, and our rights we will maintain." The word "Iowa" in red letters is just below the streamers.

**WILD ROSE, STATE FLOWER OF IOWA . . .** was officially designated as the flower of the state by the Twenty-sixth General Assembly in extraordinary session. The resolution was adopted May 7, 1897.

**EASTERN GOLDFINCH, STATE  
BIRD OF IOWA . . .** adopted by the  
Forty-fifth General Assembly, by a  
concurrent resolution March 22, 1933.  
It is often called a wild canary.

**“THE OAK,” OFFICIAL STATE TREE** for the State of Iowa, was so designated by a resolution of March 13, 1961, adopted by the Fifty-ninth General Assembly.

This specimen selected by the State Forester.

**GEODE, STATE ROCK OF IOWA**  
. . . adopted by the Sixty-second  
General Assembly by a house joint  
resolution. The resolution was signed  
by the Secretary of State March 13,  
1967.

Major S.H.M. Byers, in his day the "poet laureate" of Iowa, wrote the words set to music for this official song for the Hawkeye State.

## IOWA'S FLAG SONG

By act of the joint session of the General Assembly of Iowa on March 24, 1949, the Iowa Flag poem, written by E. O. Osborn of Knoxville, and the music written by Esther May Clark of Oskaloosa, were officially adopted as the Iowa Flag Song, in honor of the Iowa flag, designed by Mrs. Dixie Cornell Gebhart of Knoxville.

## The Declaration of Independence

In Congress, July 4, 1776

The unanimous Declaration of the Thirteen United States of America

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation—We hold these truths to be self-evident, that all men are created equal, that they are endowed by the Creator with certain inalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.—That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed.—That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government and to provide new Guards for their future security.—Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.—He has refused his Assent to Laws, the most wholesome and necessary for the public good.—He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operations till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.—He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.—He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.—He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.—He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.—He has endeavored to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new Appropriations of Lands.—He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.—He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.—He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.—He has kept among us, in times of peace, Standing Armies, without the Consent of our legislatures.—He has

affected to render the Military independent of and superior to the Civil power.—He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws, giving his Assent to their Acts of pretended Legislation:—For quartering large bodies of armed troops among us.—For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States:—For cutting off our Trade with all parts of the world:—For imposing taxes on us without our Consent:—For depriving us in many cases, of the benefits of Trial by Jury.—For transporting us beyond Seas to be tried for pretended offences:—For abolishing the free System of English Laws in a neighboring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:—For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:—For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.—He has abdicated Government here, by declaring us out of his Protection and waging War against us.—He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.—He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.—He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.—He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions. In every stage of these Oppressions We have Petitioned for Redress in the most humble terms; Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people. Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations which, would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.—

WE, THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, in General Congress, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by Authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT STATES; that they are absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do.— And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes and our sacred Honor.

JOHN HANCOCK.

# Constitution of the State of Iowa

## Introduction

Iowa was organized as a separate Territory by an act of Congress approved on June 12, 1838, but it was not until 1844 that steps were taken to secure admission into the Union. A constitutional convention met at Iowa City in October, 1844. The Constitution drafted by this convention was twice submitted to the voters of the Territory of Iowa and twice rejected by them, largely because of dissatisfaction with the boundaries of the proposed State.

A second constitutional convention met at Iowa City in May, 1846. The Constitution drafted by this convention was ratified by a majority of 456 votes at an election held on August 3, 1846, and Iowa was admitted as a State on December 28, 1846.

The Constitution of 1846, however, contained a number of provisions which were found to be unsatisfactory in practice. One of these was the prohibition of banking institutions. As a result of this dissatisfaction the legislature in 1855 provided for an election on the question of calling a convention to revise or amend the Constitution of 1846. The vote was 32,390 for a convention and 14,162 against a convention. Delegates were elected on November 4, 1856, and the convention met at Iowa City on January 19, 1857.

The delegates drafted a new Constitution which was submitted to the people at an election held on August 3, 1857, and ratified by a vote of 40,311 to 38,681. This Constitution went into effect by proclamation of the governor on September 3, 1857.

The Constitution of 1857 has, since that time, remained the fundamental law of the State of Iowa; but it has been amended a number of times.

<sup>4</sup>This amendment was proposed by the General Assembly in 1880; readopted in 1882; ratified at a special election held on June 27, 1882; and certified adopted on June 28, 1882. <sup>5</sup>The word "white" was eliminated by an amendment in 1868.

<sup>6</sup>The word "male" remains in this section of the State Constitution, but it was rendered inoperative by the Nineteenth Amendment to the Constitution of the United States, adopted in 1920. The General Assembly of Iowa ratified the Nineteenth Amendment on July 2, 1919.

<sup>18</sup>The three sections in brackets (34, 35, and 36), with the exception of the part in parentheses in Section 34, were added by an amendment adopted in 1904. But the three sections, as amended, were nullified by a United States District Court decision, *Davis v. Synhorst*, 217 F. Supp. 492 (1963), which held that the 1904 and 1923 amendments, in combination, prevented proportionate representation in both houses of the General Assembly, and were indvidiously discriminatory and in violation of the equal protection clause of the fourteenth amendment to the Constitution of the United States. In a further decree, *Davis v. Synhorst*, 225 F. Supp. 689 (1964), the court authorized the General Assembly to adopt an apportionment plan to serve until new constitutional provisions dealing with apportionment should be adopted. Under the authorization the Sixtieth Extra General Assembly passed an apportionment plan (S.F.1) under which the Sixty-first General Assembly was apportioned and elected. The number of senators was set at fifty-nine, and of representatives at 124.

[If, upon the completion of the canvass of votes for Governor and Lieutenant Governor by the General Assembly, it shall appear that the person who received the highest number of votes for Governor has since died, resigned, is unable to qualify, fails to qualify, or for any other reason is unable to assume the duties of the office of Governor for the ensuing term, the powers and duties of the office shall devolve upon the person who received the highest number of votes for Lieutenant Governor until the disability is removed and, upon inauguration, he shall assume the powers and duties of governor.]<sup>19</sup>

### Election of State Officials

Each two years in Iowa, the people elect their governor, lieutenant governor, secretary of state, auditor of state, treasurer of state, secretary of agriculture and attorney general.

State commerce commissioners were elective officials until 1959 when the Fifty-eighth General Assembly enacted legislation providing for their appointment by the governor, beginning in 1963. The superintendent of public instruction is named by the State Board of Public Instruction.

Justices of the supreme court and judges of the district court are appointed by the governor from lists of nominees presented by judicial nominating commissions. This system of appointing judges was provided by an amendment to the state constitution approved by the people at an election in 1962.

Members of the senate are elected for four years; house members for two years.

### Terms of County Officers

Elected county officers are the clerk of court, auditor and sheriff, elected in 1968 for four-year terms; the treasurer and recorder, elected in 1970 for four-year terms; the county attorney, elected in 1970 for a two-year term; and the county supervisors, elected for four-year terms which overlap. Elections are held in even-numbered years.

### Election of Federal Officials

Federal elections occur each four years, on the first Tuesday after the first Monday in November in 1968, 1972, and so on. The constitution provides that the only elected federal officials are the President, vice-president, U. S. senators and U. S. representatives. All other officers are appointive—practically all by the President. U. S. senators serve a term of six years; house members serve terms of two years, being elected in even-numbered years.

## Iowa Veterans' Organizations

### Grand Army of the Republic

The Grand Army of the Republic was a patriotic and fraternal organization of the Union survivors of the military and naval forces of the Civil War who served between April 12, 1861, and April 9, 1865.

Iowa was one of the first states of the Union to attempt organization of the Grand Army of the Republic, receiving as a department its first charter on July 12, 1866. Its permanent organization dates from Jan. 23, 1879.

There were over 519 posts chartered in Iowa. Membership stood at its peak in 1890 when 52,013 veterans held membership.

Six veterans of the Civil War served as governors of Iowa. Colonel William M. Stone of Knoxville, 1864-1868; Colonel Samuel Merrill of McGregor, 1868-1872; Colonel Cyrus C. Carpenter of Fort Dodge, 1872-1876; Captain Joshua G. Newbold of Mount Pleasant, 1877-1878; Captain Buren R. Sherman of Vinton, 1882-1886; Lieutenant Colonel Francis M. Drake of Centerville, 1896-1898.

To the Grand Army of the Republic goes the credit for having instituted Memorial Day, with all the tender and reverent patriotism which that occasion always reveals, and for having kept alive, in history and story, the brave deeds performed upon the battlefields by many a gallant soldier. To them goes the credit of having preserved the Union at a critical period in its history. Their average age when they fought the war was nineteen.

Nate E. Kendall, former governor of Iowa, was principal speaker at the dedication of the Iowa monument on the battlefield of Shiloh. He eulogized the veterans of that sanguine conflict, when he said: "No soldiery ever entered a field with such noble purpose, and none ever merged with a record of such glorious accomplishment. When our beloved flag was insulted, when our territorial integrity was threatened, when our national life was imperiled, they promptly responded to the appeal of President Lincoln, and cheerfully embraced self-immolation to secure the perpetuity of the government of the people, by the people and for the people, and to render positive the certainty that the government, after being baptized in the sacred blood of the Revolutionary fath-

ers, should not disappear from the earth, but that it, under God, should have everlasting life.

"And over the graves of the fallen dead the spring has cast its tender violets, the summer its gorgeous field of flowers, the autumn its golden withered leaves, the winter its blanket of snow. All is forgiven, all is forgotten except the glorious results of the combat in which our soldiers were engaged.

"The United States of America! The immortal principles of justice and equity which underlie it! The incomparable benefits which it secures to its citizenship. The inestimable sacrifices which have been suffered to maintain it! It is our home, our country, our beloved government, bequeathed to us forever by the venerated fathers, the most invaluable inheritance ever bestowed upon the sons of men."

The Iowa Department lost its last member in death on Sept. 20, 1949, of James P. Martin of Sutherland. Thus the last Iowa member of that long line of the Grand Army of the Republic answered "taps" and bivouacked on the eternal camping grounds.

The 55th General Assembly dismantled the G.A.R. room in the capitol and stored the records with the History and Archives department.

## Spanish-American War Veterans

The United Spanish War Veterans came into existence because of the desire to carry on the comradeship that came from their associations in the service with the only 100 per cent volunteer army the world has ever known.

In this organization, the Iowa Department is one of 52 departments. At the headquarters office are kept the records of the organization and personnel. Plans are made for the annual encampment, and service is given in claims for pensions for widows plus assistance with the aid and attendant allowance under Public Law 90-77.

Evelyn M. Fischer, 856 First Street, Webster City 50595, is in the office in the Capitol Building one day a week, usually on Tuesday or Wednesday, or by appointment. Mail may be sent to her either at her home address or the Capitol Building.

## The American Legion in Iowa

The American Legion was born in Paris, March 15, 1919. The Legion was launched formally at St. Louis, May 8, 1919, by World War veterans from nearly every state in the Union, who had been selected by temporary secretaries named at the request of Theodore Roosevelt, Jr., who acted under instructions from the Paris caucus.

The first Iowa state convention was held in Des Moines, Sept. 4, 1919. The First national convention of delegates from the newly organized state departments was held in Minneapolis on Armistice Day, 1919.

The American Legion Auxiliary of mothers, wives, sisters and daughters of Legionnaires was organized in 1921.

Hanford MacNider established the Iowa Legionnaire with Frank Miles as editor on March 4, 1921. He was succeeded as editor on April 1, 1946, by A. F. Faber who served until Jan. 3, 1965. The present editor is Glenn M. Dugger.

The Department of Iowa headquarters is located at 2221 East 42nd Street, Des Moines 50317. There are nine districts in Iowa with 653 local posts and an approximate annual membership of 100,000.

The Iowa Department has been the winner of the James A. Drain national community service trophy for the past 29 consecutive years.

Iowa has been in the national American Legion's Big Ten Department since 1934.

The Iowa Department stresses the national program of Americanism, national security, child welfare and rehabilitation, in addition to many youth programs to develop good citizenship.

Iowa has contributed leadership to the national organization through three national commanders, General Hanford MacNider of Mason City, J. Ray Murphy, formerly of Ida Grove, and Donald E. Johnson of West Branch.

The Iowa Department has provided three national chaplains for the American Legion: Msgr. Edward Smith, Sioux City; Msgr. Pat N. McDermott, Atlantic; and Father Albert J. Hoffmann, Dubuque.

Two Iowans have served as national vice-commanders: G. M. Brown, Whiting, and V. J. Maxheim, Clinton.

## The Disabled American Veterans in Iowa

The Disabled American Veterans, commonly known as the D. A. V., was organized nationally in 1920 by groups of disabled veterans then undergoing vocational training courses and chartered by Congress in 1932, to render service to, for and by disabled veterans. The D. A. V. has, ever since its inception, been the spokesman for the disabled war veterans of America, in Congress and before its various committees as well as before the Veterans Administration and its local regional offices and facilities.

During 1920 and 1921 the first three chapters of the Iowa department were organized in the vocational training centers at Des Moines, Iowa City and Ames. The department of Iowa D. A. V. held its first state convention in 1922 at Iowa City.

The Disabled American Veterans in Iowa have grown to 32 chapters and over 3,000 members. The national service officer in Iowa is Buford L. Phillips, located at 921B Federal Building, 210 Walnut, Des Moines. The state headquarters are in Des Moines. The address is P.O. Box 793 and the adjutant and business manager is Buford L. Phillips.

## American Veterans of World War II, Korea and Vietnam

The American Veterans of World War II, commonly known as the AMVETS, were organized nationally in September, 1944, at Kansas City, Mo. The AMVETS were granted a national charter by an act of Congress and President Truman signed the measure on July 23, 1947. AMVETS is the only nationally chartered World War II veterans' organization.

AMVETS got their start in Iowa at Atlantic in 1944, and were incorporated as the Iowa Department of AMVETS on May 2, 1945. The first state convention was held in Des Moines in 1947. AMVETS were recognized as a nationally chartered World War II veterans' organization by the Iowa legislature in March, 1949, and entered as such in the Iowa Code.

The AMVETS principles are (1) to promote world peace, (2) to perpetuate the American way of life, (3) to help the veteran help himself.

The AMVETS have a national and state auxiliary comprised of the wives, mothers and sisters of World War II veterans.

The Iowa Department headquarters are located at 406 East Fourth Street, Ankeny, Iowa, with Ben C. Kroma as executive director and

national service officer. Currently the Iowa Department has 70 AMVET posts covering all parts of Iowa, and is the third largest AMVET department in the nation.

Ed Corry, formerly of Des Moines, later of Chicago, now deceased, a past state commander, was national commander. Ed Gallagher of Waterloo, past state commander, was president of the AMVETS national service foundation for several years. Herbert Bennett of Fort Dodge, also a past state commander, served as president of the AMVETS national convention corporation for several terms. Harold Shaftner of Cedar Rapids, past department commander, is now national executive committeeman of Iowa.

Iowa AMVETS assemble in convention each year to elect new officers. The fiscal year begins July 1 and ends June 30. Any person who served actively in the armed forces any length of time between Sept. 16, 1940, and cessation of Vietnam hostilities, is eligible to become a member.

## Iowa Veterans of Foreign Wars

The Veterans of Foreign Wars, Department of Iowa, was granted its charter by the national organization on May 26, 1921. Its objects are fraternal, patriotic, historical and educational; to preserve and strengthen comradeship among its members and to assist worthy comrades; to perpetuate the memory and history of its dead, and to assist their widows and orphans; to maintain true allegiance to the government of the United States and fidelity to its constitution and laws; to foster true patriotism, to maintain and extend the institutions of American freedom, and to preserve and defend the United States from all her enemies, whomsoever. V. F. W. is comprised only of American men who have served honorably in the army, navy, marine corps, air force or coast guard of the United States, in hostile waters or on foreign soil during any foreign war, insurrection, or expedition.

Veterans of Foreign Wars has a Ladies Auxiliary of mothers, wives, sisters and daughters, and a fraternal order consisting of the Military Order of Cooties of V. F. W. members.

The Department of Iowa, consisting of 198 posts, has its headquarters at 3601 Beaver Avenue, Des Moines 50310.

## Iowa State Association Rainbow Division Veterans

While the 42nd Division was serving as a part of the Army of Occupation along the Rhine River, in Germany, a universal desire arose to perpetuate in civil life the bond of wartime comradeship by forming an organization of all Rainbow veterans. During March 1919, the call for a convention went out to all units of the Rainbow Division and as a result, representatives from each of the divisional units met in the city of Bad Neuenahr, Germany. There was formed the "Rainbow Division Veterans."

The 168th Iowa Infantry commanded first by Col. E. R. Bennett, then by Colonel Mathew A. Tinley was a unit in the Rainbow Division and upon return of the regiment to its home state of Iowa, immediate plans were formulated to establish Rainbow Veterans chapters. The first chapter was formed in Des Moines, followed by Sioux City, Council Bluffs, Creston and Waterloo. The Des Moines chapter was the principal chapter, the others carried on as sub-chapters. As the years passed by and a greater interest developed among veterans of the Rainbow Division, the Iowa State Association Rainbow Division Veterans was formed in Des Moines, in March 1936. The Des Moines chapter became the Col.

E. R. Bennett Chapter, Council Bluffs the Mathew A. Tinley Chapter, Sioux City the Northwest Iowa Chapter, Waterloo the Cedar Valley Chapter, while the Creston Chapter continued under that name. Other chapters were formed in Ottumwa; Cedar Rapids; in Mason City the North Iowa Chapter; Oskaloosa; and the Douglas MacArthur Chapter in Red Oak. The Iowa association is a member of the National Association Rainbow Division, which has its national headquarters in Roanoke, Virginia. Col. Mathew A. Tinley of Council Bluffs, Homer W. Gardner of Des Moines, Theodore Johnson and Ralph Heasty, Cedar Rapids, have served as president of the national association.

The national association holds its annual reunion July 12, 13, 14 of each year. The reason for the National Reunion being held annually on July 12, 13, and 14 is to commemorate the Battle of Champagne which occurred July 14, 1918. The Iowa state association meets annually in April. The Iowa State Reunion was originally held March 5 and 6 to commemorate the first engagement of the regiment with the enemy in the trenches in Lorraine. This date was later changed to April because of adverse weather conditions occurring in March. The Rainbow Division was re-activated at Camp Gruber, Oklahoma, in July of 1943 and those who served with the division in World War II are also eligible for membership. Iowa contributed 3,800 National Guardsmen to the division in World War I and 750 in World War II. The organization is the most closely knit of any American division that served in both World War I and World War II. It has chapters in 36 states with a total paid membership of 7,000 and a full time national secretary. It permits Rainbow comradeship in civil life, a most fitting memorial to the Rainbow dead, and a rich heritage to its descendants. The Iowa Rainbow Auxilliary is active in community services, visitation to Veterans' administration hospitals and has the largest membership in the national association. Mrs. Ethel Gardner and Mrs. Helen Davidson have served as National Auxilliary Presidents.

The State Secretary of the Iowa Association is George M. White, Oskaloosa.

## China-Burma-India Veterans Association

The Carl F. Moershel Basha of Iowa was organized in Des Moines in November, 1952, and is for veterans of World War II who served in the China-Burma-India Theater. The late Mr. Moershel, of Homestead, had served in India as a lieutenant colonel with the Tenth Air Force and was one of the fourteen Iowans who started the Iowa Basha. (Basha is an Indian word for house or hut.)

There are more than 500 CBI veterans on the Iowa mailing list. National headquarters for this organization is at the War Memorial Center in Milwaukee, Wisc. National reunions are held each year and Iowa has been host twice—at Cedar Rapids in 1960 and at Des Moines in 1968.

Iowa meetings are held twice a year in different cities. The national charter for the Iowa Basha is on display at the Ox Yoke Inn at Amana, as the owner of this restaurant is a CBI veteran and most state spring meetings have been held there.

Darwin Carlile of Perry was the first state commander. Ray Alderson of Dubuque has served for many years as state adjutant and finance officer. Neil Maurer of Laurens edits and publishes the national magazine, *Ex-CBI Roundup*, which is mailed monthly to CBI veterans in all states. Iowans who have served as national CBIVA officers include Donald V. Doyle of Sioux City, judge advocate; Alderson, Maurer and William Leichsenring of Amana, junior vice commanders; and Carlile, service officer.

## American Legion Boys State and Girls State

The Iowa Department of The American Legion annual American Legion Boys State is held in June at Camp Dodge, Iowa. Based on limitation as to housing facilities, 832 high school juniors are chosen by the local American Legion posts to attend this one-week schooling in the duties, privileges, rights and responsibilities of American citizenship.

Likewise, each year 304 girls completing their junior or third year of senior high school attend American Legion Girls State held on the campus of State College of Iowa, Cedar Falls, in June. This activity is sponsored by the American Legion Auxiliary, Department of Iowa.

The entire program is nonpartisan and nonmilitary. It is a school in statesmanship, an operating, mythical 51st state where the boys and girls elect city, county and state officials and carry out all of the functions of government.

Upon registration the boys are assigned to mythical cities in mythical counties, they become members of either the Federalist or Nationalist party. Political caucuses are held, party platforms adopted, and, in a manner as approximate to Iowa law as possible under the circumstances, candidates for all offices are nominated and elected. The legislature passes laws, the courts try cases, bureaus function, city councils pass ordinances, all under the guidance of experienced counsellors. Hawkeye Boys State was originated in 1938.

The girls also are taught by actual participation the fundamental principles of Iowa government. They follow the process from the establishment of city government, through the filing of nomination papers and campaigning for office to the election and installation of the governor and other state officials. During this week, the auxiliary requests city, county and state officials to talk on their particular duties and responsibilities.

Two girls are selected to attend Girls Nation in Washington, D. C., where they are taught the functions of the federal government.

Two Boys Staters are selected each year to attend Boys Nation, which is held at American University, Washington, D. C. This session is to expose these young men to the functions of federal government.

Previous to that time, the supervision of insurance had been under the direction of the auditor of state.

The commissioner of insurance has general control, supervision, and direction over all insurance business transacted in the state, and is charged with the responsibility of administering the laws of the state relating to insurance.

Under the law, all securities in which the reserves of Iowa life insurance companies are invested are required to be deposited with the commissioner and complete records are kept showing each item on deposit at all times.

The commissioner supervises all transactions relating to the organization, reorganization, liquidation and dissolution of domestic insurance corporations. He supervises the sale in the state of all stock or other evidences of interest either by domestic or foreign insurance companies. He is the statutory receiver in the event of liquidation of any Iowa insurance company.

All foreign companies, as well as all local companies, must, before engaging in the insurance business in this state, obtain a certificate of authority from the commissioner of insurance. These certificates expire annually on April 1, and action is taken on their renewals after analysis of complete financial statements filed covering the condition of the company as of the previous year end. All insurance agents must likewise obtain individual licenses to solicit business. In 1964 there were 1,002 insurance companies authorized to do business in the state, and approximately 100,000 individual licenses were issued.

A state statute requires insurance companies to file rates with the insurance commissioner for approval, and a rating division has been set up with the insurance department to handle rate filings together with supporting statistical information. There are approximately 1,200 filings per month.

The commissioner conducts examinations of all domestic insurance organizations three times a year. He may also make an examination of any foreign insurance company authorized or seeking to be authorized to do business within the state. All policy forms used by any company within the state are required to be approved by the department.

## **Commission for the Blind**

Main Office, Rehabilitation Center and Library located at  
Fourth and Keosauqua, Des Moines

732 Higley Building, Cedar Rapids

620 Black's Building, Waterloo

Commission members are appointed by the Governor for three-year terms and confirmed by the Iowa Senate.

KENNETH JERNIGAN, Des Moines, Director.

MRS. WAYNE BONNELL, Fort Dodge; term expires June 30, 1972.

ELWYN HEMKEN, Blairsburg; term expires June 30, 1973.

MRS. HERBERT JOHNSON, Charles City; term expires June 30, 1974.

The Commission for the Blind, created in 1926, offers services to the blind in Iowa in order that they may receive the necessary training and opportunity to become independent, competitive citizens. There are several departments of the commission through which such help is given.

At the rehabilitation center in Des Moines blind adults are given instruction in the skills of blindness. Courses for students include Braille, travel, home management (cooking, cleaning, shopping and sewing), shop work with regular industrial machinery, typing and personal grooming. There are also other courses in attitudes and techniques that bring to the student a true understanding of blindness—that it need not mean helplessness and is, in fact, no more than a physical nuisance if training and opportunity are available. It is important to the blind person (especially the newly blind) to learn that blind persons are actually working as full time, regular electricians, machinists, farmers, lawyers, scientists, teachers, salesmen, etc. For those who are unable to attend the center, the home teaching department gives such instruction.

When a blind person has acquired proficiency in the skills of blindness, the vocational rehabilitation department offers him specific training in a vocational skill. The blind person is then helped in finding and obtaining employment.

The library for the blind distributes, as does a public library, reading material to the blind of the state. This material is in the form of Braille books and magazines, recorded books and magazines on talking book records, and taped material. It also distributes talking book machines on which the records may be played. Library service is available to any blind person over five. Homework units are established in the homes of some blind persons, and products produced are marketed throughout the state.

The commission serves as a center source of supply for a great variety of specialized products, tools and aids useful to the blind, children as well as adults. Braille watches and clocks; Braille writing devices; Braille paper; specialized rulers and other measuring devices which can be read by touch; canes of all types; cooking utensils with specially marked dials; standard playing cards with Braille markings added; other games such as chess, checkers, bingo, and scrabble (with special markings as needed); Braille thermometers and barometers; specially marked volt meters and similar electrical measuring devices; specially marked insulin syringes for blind diabetics; and Braille cook-books are samples of the items stocked. These items are made available to the blind of the state at the commission's cost, or they are provided without cost when the blind person is unable to pay, when there is a clearly demonstrated need for the product, and when the resources of the commission will permit. The commission also assists blind persons to procure at cost certain needed nonspecialized items such as tape recorders, tape, and headphones for talking book machines. Again, there are instances in which these items are provided without charge when there is need and when resources will permit.

A number of blind children do not attend the Iowa Braille and Sight Saving School at Vinton but are enrolled in regular public schools throughout the state. Upon request the commission works with the division of special education of the Department of Public Instruction to procure books and specialized material for those children and to provide counseling and guidance.

A register of the blind in Iowa showing cause of blindness, age, and other statistical information valuable in program evaluation and planning, is maintained by the commission. There are an estimated 6,000 blind people in Iowa. About 5,000 use the library services; about 500 to 600 each year use the vocational rehabilitation program; several hundred receive instruction through the home teachers; and about 100 are involved at homework production.

## Duties of State Department of Public Safety

The Iowa State Department of Public Safety was created by the Forty-eighth General Assembly (1939) by consolidating several departments and divisions under one executive designated as commissioner of public safety. The purpose of this consolidation was to facilitate coordination among enforcement agencies and safety organizations on all levels of government within Iowa. Today, the State Department of Public Safety includes the following divisions:

### Division of Highway Safety Patrol

HOWARD R. MILLER, Polk County, Colonel.

The Iowa highway safety patrol was created by the Forty-sixth General Assembly (1935) and brought to its present strength of 400 uniformed members by the Sixty-first General Assembly (1965).

The duties of the highway patrol are to enforce all motor vehicle laws, to exercise general police powers (with restrictions stated in Chapter 80, Code of Iowa, 1962); to investigate serious traffic accidents occurring on the highways; to conduct hearings in connection with the suspension of operators' and chauffers' licenses; to conduct examinations and issue drivers' licenses, and to promote highway safety through its own programs.

### Division of Criminal Investigation

ROBERT D. BLAIR, Polk County, Chief.

County and municipal enforcement agencies may come to the criminal investigation division for assistance in difficult criminal investigations, though the division is not a local policing unit. The division is called upon to investigate matters involving the internal security of state government, and to co-operate with elective and appointive officials in such investigations.

The division is divided into investigative and identification sections, and a technical laboratory. The investigative section assigns special agents to work with local peace officers who have requested assistance in special criminal cases; the identification section contains fingerprints, criminal records, photographs and other information necessary to effective criminal law enforcement, and the modern technical laboratory includes the scientific equipment and the technicians necessary to effective criminal investigation and crime prevention.

## **Division of Radio Communications**

This division is responsible for providing radio communications for the Iowa highway safety patrol, the criminal investigation division, and other state agencies. Services and facilities of this division, through the police radio network, also are available to all county and municipal enforcement agencies, to state and federal offices of civil defense, and for interstate police communication.

This division operates on a 24-hour daily basis through nine police radio stations located at Atlantic, Belmont, Cedar Falls, Cedar Rapids, Denison, Des Moines, Fairfield, Maquoketa, Storm Lake and through automatic repeater stations at Burlington, Cresco, Glenwood, Lake Park, McGregor, Merrill, Moorhead, New Market and Van Wert.

The division is responsible for the control of the sale of controlled substances, assists in the training of local law enforcement agencies, and maintains close liaison with federal agencies. The major responsibility of the division is the control of the sale and distribution of controlled substances within the state.

## **Division of Fire Protection and Investigation**

**WILBUR R. JOHNSON**, Polk County, Fire Marshal.

The duties of this division are to enforce all state laws relating to arson, to investigate causes of fires, and to promote fire safety and prevention through education. This division has direct jurisdiction over the licensing and titling of motor vehicles, official vehicles, and nonresident vehicles and also over the issuing of licenses to itinerant merchants. The division maintains complete records of all motor vehicle licenses and titles issued and of revenue collected. With certain exceptions, all revenues collected from issuance of motor vehicle registrations and titles goes to the state's road use tax fund.

## **Division of Motor Vehicle Dealers' License**

The safety education division was created by action of the Forty-eighth General Assembly for the purpose of promoting highway safety through public information and education. The division co-operates with national, state and local civic organizations and official agencies in stimulating and developing the effectiveness of Iowa's traffic safety program.

Mailing lists are maintained to disseminate public information concerning accident trends, new traffic legislation, posters, pamphlets and other safety materials to schools, organizations, official agencies and new media. ## Geological Survey

GOVERNOR ROBERT D. RAY, Chairman.  
 LLOYD R. SMITH, Auditor of State.  
 WILLARD L. BOYD, President, State University of Iowa.  
 STANLEL M. WAWZONEK, President, Iowa Academy of Science.  
 SAMUEL J. TUTHILL, Director and State Geologist, Iowa City, appointed by the Geological Board.

The fundamental function of the Geological Survey is to collect, interpret, and report information on basic geologic features, including surface and groundwater, and products of the state including coal, gypsum, sand and gravel, ceramic clay and shale, limestone and dolomite, raw materials for the manufacture of cement, ore deposits, and other mineral resources. Extensive geophysical studies have augmented the normal geological studies. As the repository for all basic geologic and water data obtained in the state, the survey makes every effort to secure all

such data and, in turn, to reduce the data so that it is meaningful and available to all agricultural, industrial, and governmental organizations and to individual citizens.

In addition to the basic data program, the survey conducts various research programs aimed at furthering the geologic and hydrologic knowledge of the state. The programs range from re-evaluation and manipulation of extant data to complex data gathering and interpretive surveys. The knowledge gained through research leads not only to better management of our known resources, but also to discovery, utilization and protection of the resources of Iowa. To implement research in hydrology and to expedite topographic mapping in the state, the survey uses the authority granted in section 305.8, Code of Iowa, to cooperate with the Water Resources Division and the Topographic Division of the U. S. Geological Survey in cost-sharing programs. Cooperative programs with the Water Resources Division accomplish the collection and dissemination of data on water wells, water levels, streamflow and sediment loads, lake levels, and other hydraulic data. In cooperation with the Topographic Division on ongoing program of topographic mapping of the state, by 7½-minute quadrangles and 15-minute quadrangles, is conducted.

The basic method of information dissemination is in formal reports and maps published by the Iowa Geological Survey. These publications include special county reports and maps covering geology and mineral production. There are four technical papers on Iowa coal and ten water-supply bulletins. Recently an updated geologic map of Iowa and a mineral resources map of Iowa have been published. The publication of a new "public information" series is forthcoming. In the absence of a report on a particular area of interest or where a detailed report is necessary for a specific purpose, unpublished special reports are provided to governmental units. To further the value of the reports, the survey acts in a consultative capacity to those nonprofit groups who seek assistance. Except where the state can expect to acquire important information, consultations with private consulting firms are not performed, but the survey data bank and files are freely available for the use of all.

In its role as consultant, the survey has the responsibility of providing information about naturally occurring resources. In this context the survey assumes a strong responsibility in advising local and regional planners as to effects various land uses will have on the environment under the existing geologic and hydrologic conditions of an area. The study of geologic conditions as they affect land-use planning and environmental preservation is an important interpretative function of the state geologist and his staff.

Consultation with various state and federal agencies with regulatory powers over activities affecting the environment is a part of the ongoing program of the survey. In accordance with chapter 84, Code of Iowa 1962, the state geologist acts as the oil and gas administrator.

NORMAN W. KLADSTRUP, Executive Director, West Des Moines.

The Higher Education Facilities Commission is the only state agency responsible for planning and administering programs of assistance to both public and private colleges and universities throughout Iowa. Represented on the nine-member commission are the Board of Regents, the

Department of Public Instruction, the Association of Private Colleges and Universities, the Advisory Committee on Vocational Education, each house of the legislature and the general public.

Established in April, 1964, to implement the federal assistance program for construction of academic facilities provided by the Higher Education Facilities Act of 1963, the commission now administers the eight programs described below:

**Construction Grants for Academic Facilities**—The commission receives project applications from colleges and universities for federal funds under the Higher Education Facilities Act of 1963, verifies their eligibility and assigns relative priorities for grants. On the basis of these priority ratings, the commission then recommends to the U. S. Office of Education the distribution of Iowa's allotted funds. These funds are used in the construction or expansion of classroom, laboratory, library and administration facilities. Through the fiscal year ended June 30, 1971, a total of \$28,464,481 in federal grants assisted with construction of 22 projects at the public community colleges and technical institutes, 21 projects at the Regents institutions, and 43 projects at the private colleges.

**State of Iowa Scholarships**—In May, 1965, the legislature authorized establishment of a state-supported scholarship fund and appropriations for awards totaling \$1,350,000 for fiscal years 1966 through 1971. Selected on the basis of academic ability and financial need, 1,969 Iowa college freshmen and 1,544 sophomores, who received renewal awards, have benefited from the program. Certificates of Achievement are awarded to applicants who demonstrate high academic achievement. Monetary awards, insofar as funds will permit, also are granted to those who show financial need. The 64th General Assembly appropriated \$525,000 to continue the state scholarship program through the 1971-73 biennium.

**Equipment Grants**—Title VI, Part A, of the Higher Education Act of 1965 provides financial assistance for the improvement of undergraduate classroom instruction in colleges and universities. Since April, 1966, Iowa's allotments for equipment grants totaled \$1,132,889. Forty-one Iowa colleges and universities have benefited from these grants, which are reviewed and recommended by the commission.

**Guaranteed Loans for College Students**—The Higher Education Act of 1965 also provides for a Guaranteed Student Loan Program under Title IV, Part B. This plan permits students to borrow from commercial lending institutions at a low rate of interest, partially subsidized by the federal government, on easy repayment terms. Started with a federal reserve fund of \$247,000 in August, 1966, the state appropriated an additional \$1,600,000 for reserve purposes. Total deposits now include \$247,000 of federal funds and \$1,500,000 of state funds, an amount sufficient to endorse loans up to \$17,470,000. State funding for additional loans under this program was discontinued in 1968 in favor of the Federally Insured Student Loan Plan.

**Guaranteed Loans for Vocational Students**—A similar loan program for vocational students was established by the National Vocational Student Loan Insurance Act of 1965 and was funded by the 62nd General Assembly with an appropriation of \$400,000 to be used as reserve moneys to guarantee loans. Funds on deposit include \$26,010 of federal funds and \$325,000 of state funds. This provides endorsement capacity for loans up to \$3,510,100. Since 1968, new loans for vocational students have been endorsed under the Federally Insured Student Loan Plan.

**Loans for Medical Students**—As a potential remedy for the shortage of general practitioners throughout Iowa, the 62nd General Assembly appropriated \$200,000 for loans to medical students who agree to prac-

tice general medicine in Iowa. An additional \$300,000 was appropriated by the 63rd General Assembly. A portion of the loan is forgiven for borrowers who practice at least five years in the state, and the entire loan is forgiven after ten years of service. As of June 30, 1971, the program has assisted 95 medical students who have graduated and 66 students who will graduate by 1974. The 64th General Assembly appropriated \$300,000 for continuation of the loan program for the biennium of 1971-73.

**Comprehensive Planning**—Federal funds totaling \$292,904 were allotted during fiscal years 1966 through 1971 for the purpose of comprehensive planning in higher education. The commission uses these funds to determine facilities requirements on Iowa campuses, to encourage the wise use of the federal assistance provided, and to conduct other related statewide planning studies at Iowa's colleges and universities.

**Iowa Tuition Grant Program for Private College Students**—In 1969, the General Assembly established the Iowa Tuition Grant Program to provide financial assistance for Iowa students enrolled in Iowa's private colleges and universities. The legislature appropriated \$1,500,000 for grants in the academic years 1969-70 and \$3,000,000 for grants in 1970-71. Qualified students enrolled as undergraduates at the participating colleges may receive assistance of from \$40 to \$1,000 each year. The amount of the grant, based on the student's estimated financial need, is limited to tuition and fees minus the average that the student would pay at a state university. During the first two years of the program, 5,702 students, or some 40 percent of the financially needy students, received grants. For the 1971-73 biennium, the 64th General Assembly appropriated \$8,000,000 for continuation of the program.

### Purpose of the Iowa Development Commission

The activities of the Iowa Development Commission are focused on the economic growth of the state, achieved in an orderly fashion. It is the function of the commission to maintain continued recognition of Iowa's greatness in agriculture, to aid in the development of its rapidly growing industrial economy, and to promote its assets in the field of recreation and travel.

Iowa's position as a leader in agriculture is widely acknowledged; the products of its fertile soil will remain one of the mainstays of the state's economy. Meanwhile, its industrial assets—productive labor force, governmental climate, natural resources, central location, utilities and transportation facilities—have become widely recognized throughout the nation as being conducive to the profitable operation of manufacturing facilities. Recent legislation, such as municipal revenue bonds and state-

wide development authority financing, uniform commercial code, vocational education, open port warehousing and comprehensive regional planning, has been designed to assist Iowa's industrial development.

Operation of the commission is divided into five areas—research, development, agriculture, public relations and tourism and travel.

Records of Iowa's accomplishments in agriculture and assessments of its assets in industrial development, together with evaluation of changing conditions which affect Iowa's economic future, are maintained by the commission through its research division.

The development division devotes itself to assisting manufacturing firms already located in Iowa, attracting new industries to the state, and to aiding and representing Iowa communities which seek to diversify their economy through the addition of manufacturing operations. The division works closely with chambers of commerce and local development groups to create a favorable industrial climate. Close liaison is maintained at the executive level with manufacturing firms throughout the nation, with management consulting firms and with all organizations interested in industrial development.

The responsibility for creating favorable public opinion for Iowa, recognition of its accomplishments in agriculture and industry, and for developing an awareness in the nation of Iowa's cultural, social and economic advantages lies with the public relation division. The commission uses all available media to tell the story of Iowa to the public. National advertising programs designed to relate the advantages of Iowa as a location for industry and as a tourist attraction are also the responsibility of the division. It also lends its cooperation to other state agencies in preparing publications for distribution to the general public. Requests for information about Iowa number approximately 100,000 annually.

The goal of the agriculture division is to enhance the image of Iowa agriculture in general and specifically to promote the sale of agricultural products not only within the state, but more importantly out of the state and throughout the world. The division works closely with representatives of farm organizations, agricultural associations, other state institutions and industrial groups to improve the economic standards of Iowa farmers through the development and coordination of effective marketing programs. To accomplish its goal, the division participates in and sponsors tours, meetings, conferences and foreign food fairs, assists commodity groups with foreign sales representation and hosts foreign agricultural buyers in Iowa. The division also provides information to those inquiring about Iowa agriculture.

The tourism and travel division provides information about Iowa's outstanding vacation and recreation facilities to the growing number of travelers. It also assists communities in promoting their events and accommodations for visitors. The division carries out its promotional efforts through participation in recreation and travel expositions, through publications, special projects and other methods.

In all of its endeavors, the commission seeks closer liaison between industry and agriculture, greater promotion of industrial use of agricultural products and greater knowledge of developments in all fields which could favorably affect the economic welfare of the state.

## **Iowa Employment Security Commission**

(Administrative Office at 1000 East Grand Avenue, Des Moines)

**JAMES T. KLEIN**, Worth County Republican, Public Representative, Chairman; term expires June 30, 1973.

**GEORGE A. LUNDBERG**, Polk County Republican, Labor Representative, Vice Chairman; term expires June 30, 1975.

**J. WAYNE JANSSEN**, Hardin County Democrat, Employer Representative; term expires June 30, 1971, or serves until a successor is named and qualified.

ABE CLAYMAN, Des Moines, Dem., term expires June, 1977.

KEITH V. SCHROEDER, Executive Secretary.

JEROME W. CORBETT, Director, Employment Service Division.

JOHN A. PETERS, Director, Unemployment Insurance Division.

EDMUND R. LONGNECKER, Dir., Iowa Pub. Emp. Retire. System.

Under Chapter 96, Code of Iowa, the Iowa Employment Security Commission administers a program designed to promote security against unemployment. This program includes both an unemployment insurance service and employment service to Iowans.

Unemployment insurance is designed to provide the employee with a partial replacement of his wage loss because of involuntary unemployment and is paid for wholly by Iowa employers. The employment security law levies a tax upon employers of four or more workers in commercial and industrial employment areas. This tax accumulates in a trust fund and is paid to eligible unemployed workers for a maximum of 26 weeks in a 12-month period. When a worker meets all the eligibility requirements and no suitable work is available, he is paid weekly benefits based upon his earnings. During 1970 fiscal year, Iowa unemployment insurance benefit payments totaled \$22,300,600. The trust fund balance at the close of the 1970 fiscal year was \$126,904,000.

In Iowa each employer is rated on his actual experience and if his employment record is stable, his contribution rate may be lower than the standard rate. This "experience or merit rating" provides another strong incentive to provide steady work and avoid layoffs. Almost one-half of all covered employers in the last several years have not been required to pay any state contribution tax because they have stabilized their employment. Major changes have been made in the coverage, taxing, and benefit provision of chapter 96. These changes will become effective January 1, 1972.

The Iowa State Employment Service, established by legislative action in 1915, was put under the administrative control of the Iowa Employment Security Commission in 1936. The 34 offices, located in key Iowa cities, provide a complete manpower service to Iowa residents. Staffed by career professionals, these offices are part of a federal-state system of 2,000 public employment service offices.

Placement service, job counseling, and aptitude and proficiency testing are available to all workers. Labor market information is gathered, analyzed and disseminated. Special service is offered to veterans, older workers, minority group members, youth and the handicapped. The Employment Service works with other agencies and organizations in solving the employment problems of workers, employers and the community. During the 1969 fiscal year, 90,665 job placements were made.

Under terms of an agreement with the U. S. Department of Labor, the commission administers the unemployment insurance program for ex-servicemen and for federal civilian employees.

The Iowa Employment Security Commission is responsible for the administration of the Iowa Public Employees Retirement System, Chapter 97B, Code of Iowa. Employees and employers, each contribute 3½ percent of the employee's salary up to \$7,800 for the program. Some 110,000 persons employed by the state, cities, counties and school districts take part in the program.

Chapter 97C, Code of Iowa and Title II of the federal social security act extend the protections and benefits of the federal social security act to employees of the state and its political subdivisions. In administering this program, the Iowa Employment Security Commission is responsible for requiring the filing of social security wage reports and for collecting social security taxes from the state of Iowa and its political subdivisions.

The commission has added responsibilities under federal legislation including the area redevelopment act, the manpower development and training act, the trade expansion act, the public works acceleration act, the economic opportunity act, and the work incentive program.

## Iowa Industrial Commissioner

(Workmen's Compensation Service)

Office—East Sixth and Des Moines Streets

ROBERT C. LANDESS, Commissioner; term expires June 30, 1973.

KENNETH L. DOUDANA, Deputy Commissioner.

JOHN GOLVIN, Deputy Commissioner.

HELMUT MUELLER, Deputy Commissioner.

ALAN R. GARDNER, Deputy Commissioner.

The Workmen's Compensation Law was enacted by the Thirty-fifth General Assembly in 1913. The industrial commissioner administers this law. Iowa was one of the first states to provide benefits for injuries and occupational diseases sustained by industrial workers. Injuries resulting in death, permanent disability or temporary disability must be reported to the commissioner. If the injured worker and employer agree on compensation a memorandum thereof is approved by the commissioner. If an agreement cannot be reached, either the employee or employer may request an arbitration hearing before a deputy commissioner in the county where the injury occurred. Arbitration decisions are reviewed by the commissioner and may be appealed to a district court or the supreme court. Settlement agreements or awards may be reopened for three years after the last payment if the injured employee has a change of condition.

The industrial commissioner also investigates and settles workmen's compensation claims by all state employees and peace officers, and pursues subrogation recovery from persons who negligently injure them.

The industrial commissioner is a member of the Employment Agency License Commission and the State Board of Vocational Rehabilitation.

## Iowa Liquor Control Commission

(Office located 300 Fourth St., State Office Building)

Appointed by the Governor. Term of six years.

KENNETH W. ANDERSON, Scott County, Republican, Chairman; term expires June 30, 1975.

HOMER R. ADCOCK, Polk County, Democrat; term expires June 30, 1971.

REV. CARL G. SINNING, Carroll County, Republican; term expires June 30, 1973.

EARL J. BAUM, Polk County, Executive Secretary.

The commission has sole power to buy, import, sell, and control the sale of liquors; to establish, maintain and discontinue state liquor stores and special distributors in such cities and towns as deemed advisable; to rent, lease and equip any building or any land necessary to carry out the provisions of the act; to appoint necessary employees; to determine the nature, form and capacity of packages kept or sold under the act and to prescribe the labels and seals to be placed on same; to license, inspect and control the manufacture of alcoholic liquors in Iowa; and to make rules and regulations necessary for carrying out the provisions of the act.

The Sixtieth General Assembly in 1963 amended the Liquor Control Act to permit the sale of liquor by the drink, and to provide for the issuance of retail licenses by the commission, if applications are approved by city or town councils or boards of county supervisors. The 1963 act also provided that the commission would establish a liquor law enforcement division with an attorney as director, and five assistant directors.

# Iowa Merit Employment Department

## Merit Employment Commission

WILLIAM C. HUBBARD, Iowa City; term expires June 30, 1973.

AL MEACHAM, Grinnell; term expires June 30, 1973.

JAMES B. MORRIS, JR., Des Moines; term expires June 30, 1975.

THELMA HEITSMAN, Corning; term expires June 30, 1977.

JULIAN L. TORGERSON, Sioux City; term expires June 30, 1975.

WALLACE L. KEATING, Des Moines, Director of Merit Employment.

The Sixty-second General Assembly passed a bipartisan Act establishing in the State of Iowa a system of personnel administration based on merit principles and scientific methods for governing the appointment, promotion, welfare, transfer, layoff, removal and discipline of its civil employees, and other incidents of state employment. It provides that all appointments to positions in the classified service shall be made solely on the basis of merit and fitness. The Act established a Department of Merit Employment and a Merit Employment Commission which originally consisted of three members. Membership was expanded to five members by the Sixty-third General Assembly. The members are appointed by the Governor, subject to approval of two-thirds of the membership of the Senate.

It is the duty of the Merit Employment Commission to appoint a Director of Merit Employment, to adopt rules for administration of the merit system, to approve the classification plan, to submit the pay plan to the Executive Council for approval, and to hear appeals of disciplinary actions.

It is also the duty of the Commission to represent the public interest in the improvement of personnel administration in the state merit system; to advise the governor and the director on problems concerning personnel administration; to foster the interest of institutions of learning and of industrial, civic, professional, and employee organizations in the improvement of personnel standards in the state merit system; to make any investigation which it may consider desirable concerning the administration of personnel in the state merit system and make recommendations to the director with respect thereto; and to make an annual report and special reports and recommendations to the Governor.

The Director of Merit Employment, as executive head of the department, directs and supervises all administrative and technical activities of the department. He is charged with the responsibility of developing and putting into continuous effect policies and procedures which are based on the principles requisite to merit system administration. These involve the classifying of positions; the maintenance of the pay plan; the recruitment of qualified candidates for possible public employment; the preparation, administration, and scoring of examinations; the preparation, custody, and maintenance of lists of eligibles; certification of the eligible list to the agencies as vacancies occur; maintenance of complete personnel records including appointments, salary advancements, promotions, and terminations; and auditing the payrolls to insure compliance with the regulations in all personnel actions.

The merit system covers approximately 17,000 employees. Each original appointee must meet the minimum requirements as defined in the class specifications, pass a practical examination, be selected from among the top three eligibles available on the eligible list, and serve a one-year probationary (working test) period before being awarded a permanent merit system appointment. Permanent employees may be discharged only for cause, and have the right to appeal to the commission in case they are of the opinion that any action has been unfair or discriminatory.

## Iowa Natural Resources Council

J. JUSTIN ROGERS, Chairman; term expires June 30, 1975.  
CLIFFORD M. NASER, Vice Chairman; term expires June 30, 1973.  
MABEL MILLER, Secretary; term expires June 30, 1975.  
MERWIN D. DOUGAL term expires June 30, 1977.  
R. LEE FEIL; term expires June 30, 1977.  
J. W. HOWE; term expires June 30, 1973.  
LESLIE C. KLINK; term expires June 30, 1977.  
HUGH TEMPLETON; term expires June 30, 1975.  
SAMUEL J. TUTHILL; term expires June 30, 1973.  
OTHIE R. McMURRY, Director.  
R. G. BULLARD, Water Commissioner.

The Iowa Natural Resources Council was created in 1949 by the Fifty-third General Assembly, which assigned the council the duty and authority to establish and enforce an appropriate comprehensive state-wide program for the control of water and the protection of the surface and underground water resources of the state (Chapter 455A, Iowa Code 1962.) The duties and responsibilities of the council were enlarged in 1957 by the Fifty-seventh General Assembly, which established a permit system for the regulation of water use and assigned administration of the permit system to the council. These duties were further enlarged in 1963 through enactment of an oil and gas conservation law to be administered by the council through the office of the state geologist (Chapter 84, Acts of the 60th General Assembly).

The Resources Council is composed of nine members appointed to overlapping six-year terms by the governor with the advice and consent of the senate. The members, who serve on a per diem basis, must be electors of the state and are selected from the state at large solely with regard to their qualifications and fitness to discharge the duties of office without regard to their political affiliation. The director of the council, qualified by training and experience, serves as its executive officer having charge of the work of the council under its direction and orders.

The functions and duties of the Resources Council include the establishment and administration of comprehensive state-wide programs for flood control and for the conservation, development and use of the waters of the state. The council has been designated as the agency to maintain liaison with federal agencies conducting investigations and studies of projects for navigation and flood control affecting the state and to make official comments on project reports. The council also acts as the coordinating agency for flood control and water resources projects on the local and state level. The council approves or disapproves plans for any structure, dam, obstruction, deposit or excavation in or on any floodway and may abate as a public nuisance any of the foregoing which adversely affects flood control.

The permit system for regulated uses of water is administered by a water commissioner and deputies chosen by the council. The water rights law declares that all waters within the state, both surface and underground, belong to the people of the state and are subject to regulated use for beneficial purposes. Except for a few uses defined in the law as non-regulated, any use of 5,000 gallons or more per day is subject to regulation. Permits may be granted for any period of time not to exceed ten years and are reviewed prior to renewal or extension. Priority is given only to the use of water for ordinary household purposes, for poultry, livestock, and domestic animals. The council establishes the average minimum flow for a given point on a watercourse and may

Issue permits for beneficial use of water therefrom if the average minimum flow is preserved.

The oil and gas conservation law (Chapter 84, Acts of the 60th General Assembly) was enacted to conserve and protect the oil, gas and water resources of the state. Impetus for passage of the law was provided by the discovery of a deposit of commercially acceptable crude oil in Washington County in 1963 and the resultant increased drilling activity. Administration of the law was assigned to the Iowa Natural Resources Council through the office of the state geologist. The council has adopted administrative rules defining in detail its requirements under the law.

## Iowa Real Estate Commission

(Office located in Executive Hills)

C. R. Galvin, Knoxville, Director

MELVIN D. SYNHORST, Secretary of State and Chairman.

JACK D. SCHUCK, Parkersburg; term ending June 30, 1973.

LESTER E. CALVERT, Des Moines; term ending June 30, 1973.

STEPHEN G. DARLING, Iowa City; term ending June 30, 1975.

DONALD E. KNUDSEN, Eagle Grove; term ending June 30, 1975.

The first real estate license law was enacted by the Forty-third General Assembly and became effective January 1, 1930. The law was administered by the secretary of state, who was designated as real estate commissioner. This law was amended and revised by the Fifty-first General Assembly to provide, among other things, that as of January 1, 1946, the law would be administered by a five-member commission comprised of the secretary of state as chairman and four additional members appointed by the Governor with the approval of the Senate.

A thorough knowledge of the real estate license law and state regulations is necessary to obtain a state license to enter the real estate business, and to enable a person established in business to do his part in maintaining the ethical standards desired by the profession and required by law.

The present law requires a rather complete and comprehensive written examination for all applicants which is held six times a year at a specific time and place set by the commission.

The fees for a broker's and salesman's examination are \$20 and \$10, respectively. The same amount is charged each year for renewal of the license which expires on December 31 of the year of issuance.

The department is charged with the responsibility of regulating and investigating the business conduct of all real estate licensees in their relationship with the public, and holds hearings on formal complaints which contain evidence which would indicate a violation of the law.

A law enacted by the 1966 state legislature provides that each broker must maintain a trust account in which he cannot commingle personal funds in excess of \$100. This account is subject to audit at any time by the Iowa Real Estate Commission and each broker must sign forms provided by the commission authorizing such an audit before a broker's license can be issued—either new or renewal.

The commission is also charged with the responsibility of regulating the filing of subdivided lands, as enacted by the General Assembly of the State of Iowa, section 713.24, Code 1962, and amended in 1965.

In 1878, the Seventeenth General Assembly created a board of railroad commissioners. In 1937, the Forty-seventh General Assembly, by House File 133, changed the name from "board of railroad commissioners" to "Iowa State Commerce Commission."

The powers and duties of the Iowa State Commerce Commission, in addition to the regulation of public utilities, are: to generally supervise all railroads in the state, both steam and electric, except street railroads; to inquire into any neglect or violation of the laws of the state by any railroad corporation doing business therein; to make examinations and inspections of the physical condition, conduct and management of such railroads and report their conditions to said companies; to examine any of the books, papers or documents of any such corporation; to examine under oath employees of such corporation; to issue subpoenas, administer oaths and compel the attendance of witnesses; to make and fix maximum schedules of freight rates for such corporations, such schedules to be deemed reasonable until disapproved; to bring suits to enforce its orders; to inquire into the management of the business of such carriers and to obtain from them full and complete information necessary to enable the commissioners to carry out the objects of the law; to hear, investigate and determine all complaints alleging unreasonable rates, unjust discrimination, undue preference, violation of the long and short haul clause, or other infractions of the commission law, and make proper orders thereupon; to establish joint through rates, upon application, over two or more connecting lines; and to have the same authority over express companies as the act confers concerning railroads.

Before any railroad company may condemn lands for additional depot grounds, or for straightening or relocating track, the permission of the commission must be obtained.

The Thirty-fifth General Assembly, 1913, gave to the commission the power to grant to individuals or corporations "engaged in the manufacture, sale or distribution for sale of electric current for light, power or heating purposes, the right within the state, except in cities and towns, to erect and maintain poles, wires, towers, fixtures and other necessary construction for the purpose of conducting electricity for lighting, power and heating purposes, over, along and across any public lands, highways or streams or the land of any person or persons, and to acquire the necessary interests in real estate therefor." It also provided that transmission lines proceeding under the provisions of the law should be subject to "such reasonable regulations as the commission may from time to time prescribe."

The Fortieth General Assembly, 1923, conferred on the commission the power to issue certificates authorizing motor carriers to operate over the public highways of the state, upon a showing that the proposed service would promote "the public convenience" and authorized the board to prescribe rules and regulations for the operation of motor vehicles used by such carriers "for the protection and safety of the public." The Forty-first General Assembly, 1925, revised the laws on the subject, but left their administration with the railroad commission.

The Forty-third General Assembly, 1929, provided for the supervision or regulation by the commission of persons operating motor trucks principally used for public transportation of freight for compensation, not operating over regular routes nor between fixed termini.

The Forty-fourth General Assembly, 1931, provided that pipe lines shall be subject to regulation by the board under a permit issued by the board.

The Fifty-third General Assembly, 1949, provided for the supervision or regulation by the commission of persons operating motor trucks used for transportation of freight for compensation under contract.

The Fifty-seventh General Assembly, 1957, provided that persons engaged in transportation for compensation of liquid products in bulk

upon any highway in this state should be required to obtain from the commission a certificate declaring that public convenience and necessity require such operation.

The Fifty-eighth General Assembly, 1959, created a highway grade crossing safety fund, which the commission was empowered to administer. On application, the commission will consider the need and benefits accruing to the railroad and governmental unit, as to public use, and after a hearing is held the commission will determine the allocation of costs between interested parties, the balance to be paid from the highway grade crossing fund. Provided, however, no part of the fund may be used in connection with the improvement or construction of a federal aid highway.

The Sixtieth General Assembly, 1963, provided for regulation by the commerce commission of rates and services of public utilities to the extent and manner provided in chapter 490A. The Commission was authorized and empowered to intervene in any proceedings before the federal power commission or any other federal or state regulatory body when such decisions would adversely effect the cost of any public utility service within the state of Iowa. Public Utilities as covered by this Commission include those furnishing gas by piped distribution system or electricity to the public for compensation; furnishing communications services to the public for compensation; and furnishing water by piped distribution systems to the public for compensation. The rate regulation of mutual telephone companies, in which at least fifty percent of the users are owners, telephone companies having less than 2,000 stations, municipally-owned utilities, unincorporated villages which own their own distribution system and cooperative corporations or associations are not subject to regulation by the commission.

#### Commerce Counsel

The Thirty-fourth General Assembly, 1911, created the office of commerce counsel, to be appointed by the Iowa State Commerce Commission for a term of four years, subject to confirmation by the senate. The law provides that the counsel may appoint assistants, subject to the approval of the commissioners.

The duties of the office briefly are as follows: to be legal advisor of the Iowa State Commerce Commission; to investigate and present matters with reference to intrastate rates, and prosecute same before the Iowa State Commerce Commission or before any court to which same may be taken; to investigate on his own motion, or at request of the State Commerce Commission, all matters involving interstate rates in which the people of Iowa are interested or affected, and present same to the Interstate Commerce Commission and prosecute to final determination; to act as attorney and counsel for and represent the Iowa State Commerce Commission in all courts of this state or the United States, in which the validity of any order of the State Commerce Commission is in issue; to institute and prosecute in any of the courts any and all suits necessary for proper enforcement of any rule or order of the said Iowa State Commerce Commission or make defense therein wherever said rule or order may be questioned or involved.

4. To provide fiscal and administrative management of a multi-million dollar program that combines federal funds with state and local moneys.

#### **Method of Operation**

1. Evaluate the impact of crime, determining such things as causes and motivations.

2. Seek methods to improve police standards, in areas such as recruitment, salaries, organization and management, field procedures, equipment and communications.

# Iowa State Department of History and Archives

State Historical Building

(East 12th and Grand Avenue, Des Moines)

Jack Musgrove, Curator

Curator is selected by the Board of Trustees—the Governor, a member of the Supreme Court and the Superintendent of Public Instruction.

The State Historical, Memorial and Art Department was organized in 1892 by Charles Aldrich. The State Historical Building was erected in 1898, with an addition to present size in 1908.

The Department was reorganized in 1939 as the Iowa State Department of History and Archives. Under this reorganization plan the department encompasses six divisions, each functioning to preserve the history of Iowa.

The Archives Division has under its jurisdiction all records of state transactions, legal, legislative and administrative papers. These now total over 50 million places of information and are constantly on the increase. However, every item is catalogued and is readily retrieved if the occasion arises. The State Archives Division was moved into larger quarters in the Harvester Building, Seventh and Court Avenue, and already storage space is at a premium.

ANNALS OF IOWA is concerned with the quarterly publication of factual written matter pertinent to Iowa History. This division was founded over 100 years ago and has served well to preserve and publish items of historical value.

The Census Division is used to establish records of birth and genealogy and in many cases can provide the only records of birth and residence available to some citizens. The census records date back more than 100 years and are a very valuable source of historical information to genealogists and researchers.

The Historical Library contains a wealth of historical material in the form of grave records, county histories, genealogical reference books and history books pertaining to Iowa and its growth. This library collection consists of over 50,000 volumes and is considered to be the best source of historical and genealogical information in the Midwest. In addition, the manuscripts and papers of famous Iowans are catalogued and housed in the Historical Library.

The Newspaper Division also plays an important part in preserving history as it is written day by day. Daily and weekly papers from each of the 99 counties in Iowa are received, catalogued, and microfilmed. They then become part of the most complete newspaper collection in the Midwest. These publications provide an invaluable source of on-the-spot history to researchers and cover the development of Iowa from the earliest times.

The Museum Division provides the people of Iowa and visitors from other places a comprehensive look at the history of our state. Museum exhibits cover fully the story of Iowa told by rocks and fossils up to and including the Atomic Age. Here the people of Iowa can see how our state has developed from the primitive prairie state of yesterday into the progressive Iowa of today. The Iowa State Museum is an unrivaled and unique institution in which all Iowans can take pride; its doors are open every day of the year to welcome individuals or groups. School groups of all ages make use of the guide services, and lectures are provided to emphasize any phase of history or pre-history.

Museum displays encompass all facets of the history of our state. Displayed are tools, utensils, and implements used by Iowa pioneers to conquer the wilderness and make it productive. Pioneer transportation

items range from ox wagons, stage coaches, and early automobiles to those of the airplane age. There is a fine collection of Kentucky rifles, both flintlock and percussion, as well as many other early firearms.

Progress in telephone communication is exemplified by a collection of telephone instruments that present the history of telephones in Iowa from first to latest.

The Indian history of Iowa is traced from the earliest cultures to modern times. Many ancient artifacts are on display along with an unexcelled collection of more recent Indian materials including beadwork, canoe and wickiup. The civil history displays include antique glassware, tools, household items, and artifacts used by pioneer Iowans in their pursuit of everyday living. These things help us to get a glimpse of life as it was in the past. War relics and souvenirs on display also help to depict the part that Iowa and Iowans have played in the military activities of past years.

The geology of Iowa is represented by rock samples, mineral specimens and fossils from every formation in the state, covering over a half billion years of geologic time. On display is an unrivaled exhibit of fossil starfish and crinoids from LeGrand, an area famous throughout the world for the fine specimens which have been obtained there.

The wildlife exhibits portray the bird and animal life of Iowa both past and present. As man encroaches further on the habitat of these animals and they come closer to extinction, displays such as these afford the only opportunity for the average person to view them. A set of bird study skins are also maintained for use by study groups and conservation organizations.

The use of the department's facilities by individuals, school and college groups is on the increase and the staff of the Department of History and Archives is always ready and able to aid the public in its quest for historical facts.

### Iowa State Board of Public Instruction

The Fifty-fifth General Assembly established the State Board of Public Instruction, consisting of nine members—one member selected from each of eight congressional districts as they existed on January 1, 1953, and one member appointed by the Governor and confirmed by the Senate—each serving a term of six years. The Sixty-second General Assembly amended the law again. It now reads as follows: The State Board of Public Instruction, hereinafter called the state board, shall consist of nine members who shall be appointed by the Governor with the approval of two-thirds of the members of the Senate. Not more than five members shall be of the same political party.

The state board is a policy-making body of lay people, with the same relationship to all the public schools in Iowa as that existing between the county board of education and the county school system, or the local board of education and the local district.

The state board is directed by statute to appoint the state superintendent every four years after January 1, 1955, with the approval of two-thirds of the Senate. The law provides for the appointment of a deputy superintendent and employment of the professional staff and clerical personnel deemed necessary by the board to carry out its obligations.

The functions of the Iowa State Department of Public Instruction are classified into three categories: leadership, regulatory, and operational.

Educational leadership is the major purpose served by the department. Although the department provides other services, its primary purpose is the growth and development of education in the state for the benefit of all Iowans. Through such leadership, the department helps to mobilize, unify, and coordinate all the positive forces concerned with improving education. It strives to give common direction to the efforts of all.

Such leadership involves analyzing the nature and future direction of education and communicating with the public about such trends. This leadership role is also exercised by (1) planning for each major area of service and coordinating the planning for the total state program of education; (2) conducting research to assist in formulation of policy and evaluation of programs; (3) offering advisory services by persons specialized in certain phases of school operations; (4) providing coordination to promote unity and encourage proper balance; (5) supplying information to keep the public aware of educational needs and progress; and (6) supporting inservice education to foster the continuing growth of all persons engaged in education in the state.

The regulatory function of the State Department of Public Instruction is aimed primarily at assuring that the basic provisions for education in the constitution are available to all children in the state and that state laws enacted to supplement and enrich those basic provisions are enforced. The state delegates broad authority to local school districts for the management and operation of educational programs; but, at the same time, the department has been charged with guaranteeing at least minimum performance through regulations known as "standards" for Iowa schools. These standards are established by statute or by the department through the authority granted it by the statutes.

The operational function is carried out through (1) services offered to local school districts when the scope, expense, or technical nature of these services makes them more easily offered on a broad scale, and (2) centralized service to individuals, such as vocational rehabilitation.

The state superintendent is given the responsibility for coordinating the department's work. He meets this obligation by working through six major branches: (1) Administration; (2) Planning and Management Information; (3) Instruction and Professional Education; (4) Pupil Personnel Services; (5) Area Schools and Career Education; and (6) Rehabilitation Education and Services. Each of these branches is headed by an associate superintendent working under the general supervision of the deputy superintendent.

## Information on State Fair

For over 100 years, the Iowa State Fair has been gaining steadily in size, prestige and public service. Today, it is nationally recognized as America's greatest agricultural and livestock fair. Situated in the heart of the world's wealthiest agricultural empire, it is the focal point each year for exhibitors of the finest livestock and farm products. In attendance, too, it stands in the front rank of the great educational and entertainment expositions on the North American continent.

The Iowa State Fair, the original "State Fair" of a best-selling novel and of two hit motion pictures, is held in Des Moines each year. It runs for 10 days in late August.

The livestock show, largest of its kind in America, attracts over 11,000 of the finest farm animals from 20 leading agricultural states. The 4-H and F.F.A. shows, state-wide congress of farm young people's organizations and their livestock and projects, add to the fame of the fair.

Emphasis on the meatier strains of livestock, more suitable for consumer wants and needs is being increased at the Iowa State Fair. The fair continues to pioneer in the most advanced pork, lamb and beef carcass shows in the nation.

Over 250 companies and industries of Iowa display in the giant machinery and farm implement show. More specialized space is being added each year, such as travel village, Teen Town, Heritage Village, etc.

People are not forgotten at the Iowa State Fair—in fact, people make the fair. The fair is planned so everyone can become involved in an educational or worth-while activity. Individuals may express themselves by exhibiting photographs, works of art, culinary, gardening, needlework, flowers, pigeons, rabbits, poultry, participating in school science show, church exhibits, outdoor cookout contests and in many other ways.

From the huge State Fair grandstand, one of the finest amphitheaters in the nation, fairgoers witness a varied series of spectacles and events, including national championship auto races, midwest circuit horse races, thrill day, musical extravaganzas, fireworks and circus acts.

The first and second Iowa State Fairs were held in Fairfield, Iowa, in 1854 and 1855. From 1856 to 1879, the State Fair moved from city to city. It was held in Muscatine in 1856 and 1857; Oskaloosa, 1858 and 1859; Iowa City, 1860 and 1861; Dubuque, 1862 and 1863; Burlington, 1864-1866; Clinton, 1867 and 1868; Keokuk, 1869, 1870, 1874 and 1875; and Cedar Rapids, 1871, 1873 and 1876-1878.

In 1879 the State Fair moved to Des Moines to stay. In 1884 the legislature appropriated \$50,000 to purchase a state fairgrounds on condition that the City of Des Moines raise an equal amount for buildings and facilities. The city concurred, and Iowa thus became the second state in the northwest to acquire a permanent site for its fair.

In 1923 the general assembly changed the former method of fair administration by providing for an Iowa department of agriculture and a state fair board, and giving this board the duty of managing the fair and the custody of the fairgrounds. Now the fair board comprises one director from each congressional district, and three directors at large elected at the annual meeting in December of the state agricultural convention. Official delegates to the convention represent each of the 103 fairs in Iowa. There are three ex officio directors on the fair board and these include the governor, secretary of agriculture and president of Iowa State University. The president and vice president of the fair are elected by the board from the elected directors. The state fair board selects the secretary and the treasurer of the fair.

All operating expense, maintenance and other costs of the fair are paid out of fair receipts, except where the legislature may deem it advisable to make a special appropriation for such purposes.

Since 1902 the legislature has appropriated \$1,520,188 for the construction of permanent buildings on the fairgrounds, purchase of additional land and for necessary improvements. In recent years, however, the State Fair has used only its own revenues for these purposes. Altogether, since 1902, the fair itself has expended \$4,833 830 for maintenance and improvements from actual profits of the fair. One major building project financed by fair funds is the fireproof 4-H Girls' dormitory, which was formally opened and presented to the Girls' 4-H Club for their use at the 1950 Iowa State Fair. Another is the Radio and Television Center providing studios for programs originating on the grounds as well as established programs featuring well known announcers and entertainers. This building was built and in use in 1956. Premiums, amounting to over \$220,000 a year, are also provided by the fair for winners in exhibits and contests.

## History and Development of the State Highway Commission

The Iowa State Highway Commission was created by the general assembly in 1904. The law empowered Iowa State College to act as the State Highway Commission. The state board of education appointed Dean Anson Marston of the engineering division and Dean Charles F. Curtiss of the agricultural department of Iowa State College to serve as directors of the commission.

The directors selected Thomas H. MacDonald to serve as secretary and engineer for the commission. The duties of the commission from 1904 to 1913 were to make investigations and studies of highway conditions, to provide information and advice to local road authorities, and to conduct annual road schools for county and township road officials.

In 1913, the Thirty-fifth General Assembly created a State Highway Commission separate from Iowa State College. It was composed of three members, the dean of engineering from the state college and one member from each major political party appointed by the Governor. T. H. MacDonald was named chief engineer of the commission, a post he held until he resigned in 1927 to become the nation's first chief of the U. S. Bureau of Public Roads.

Today, the highway commission operates under Chapter 307 of the 1962 Code of Iowa. Chapter 307 was adopted by the general assembly in 1927 and created a five-member highway commission all appointed by the Governor, with no more than three of whom could be from the same political party.

The 1927 reorganization of the highway commission also placed the primary road system under the direct control and supervision of the Iowa State Highway Commission. Throughout the succeeding years, the state has placed many more responsibilities with the commission. In 1956, the growing network of interstate and defense highways was begun in Iowa. The commission is also responsible for state park and institutional roads and for general supervision of the secondary and farm-to-market road systems.

Today, the more than 112,000 miles of public roads and streets are the lifelines of the state's economy and its society. The planning, engineering, and maintenance of these important arteries is the responsibility of the Iowa State Highway Commission, county boards of supervisors, and city councils.

### Organization of the State Highway Commission

On December 1, 1966, a director of highways was named to the chief administrative position of the highway commission. To the director was delegated the responsibility for the administration of all policy determined by the commission.

A realignment of the commission's organization structure in 1967 and 1969 coordinated all administrative functions under six divisions, namely, Administrative, Finance, Planning, Support Services, Development and Operations. Six district engineers supervise construction and maintenance operations throughout the state.

### Outline of State Highway Commission Work

The State Highway Commission is responsible for the construction and maintenance of the primary highway system including institutional roads. Five highway commissioners, appointed by the Governor with the approval of the Senate, are responsible for all policy determination, allocation of resources, and approval of all programs and budgets.

The chief administrative officer, who is appointed by and responsible

to the commission, is the director of highways. The director, through the divisions and departments of the organization, implements the policies and directives of the commission. The chief engineer serves as deputy director and supervises all engineering functions.

Commission meetings, open to the public, are held every other Wednesday at the central offices in Ames. Commission members determine policy matters, confer with local and regional delegations or individuals, and award contracts for highway construction, purchase of materials and equipment used in highway work.

Major functions of the organization are to (1) maintain a current inventory of existing highway facilities, (2) project future highway needs and resources, (3) plan and design the necessary additional facilities, (4) construct new facilities as resources become available, (5) maintain highway facilities in a safe and well-kept condition for the traveling public, and (6) to construct and maintain toll bridges.

In addition to the commission's responsibility for the construction and maintenance of all primary roads, the statutes impose joint control with the 99 county boards of supervisors over construction on the farm-to-market system. The highway commission has no authority to originate projects on the farm-to-market system, but action by the counties is subject to commission approval. Iowa law also requires the commission to approve secondary road budgets, construction programs, and contracts for construction of roads and bridges, and advise secondary road officials on special road problems. The commission also provides engineering assistance to other state departments.

The highway commission's 65-year history is a continuing story of progress in providing better and safer roads to serve the state's urban and rural needs. Iowa's highways, roads and streets continue to be a vital factor in the healthy growth of its agricultural, industrial and commercial economy.

The Iowa State Highway Commission's constant goal is to build and maintain as fine a system of roads as is economically possible.

### Iowa Legislative Service Bureau

The Legislative Service Bureau's purpose is to provide research, bill drafting, and other staff services to committees and individual members of the Iowa General Assembly. These services are provided on an objective, nonpartisan basis by a professionally trained staff. Bureau policies are established by the seventeen-member Legislative Council, to whom the Bureau Director is responsible.

Major studies requested by the General Assembly, either house of the General Assembly, a legislative committee, or twenty or more members of the General Assembly are undertaken by the Bureau staff upon approval by, and in accordance with priorities established by the Council. Final reports of the studies conducted during a legislative interim are distributed to all members of the General Assembly. Service Bureau staff personnel do not make recommendations to legislators, but the Council or a legislative committee delegated by the Council to participate in a study may make recommendations to the General Assembly on the basis of facts gathered by the Service Bureau.

Minor research and reference projects, which can be completed by a Service Bureau staff member with a limited amount of work, are performed at any time upon the request of any legislator without the necessity of specific approval of the Council.

Bills are prepared by the Service Bureau for introduction in the General Assembly, at the request of any committee or individual member. The services performed range from review and possible revision of legislative proposals developed elsewhere to complete drafting of bills on the basis of objectives stated by the requestors. Nearly 3,500 requests for preparation of bills and amendments to bills were handled by the Bureau during each of the past two legislative sessions.

The Bureau was first established in 1955 as the Legislative Research Bureau. The agency's title was changed to Legislative Service Bureau, and the former Legislative Research Committee was redesignated the Legislative Council and given added responsibilities, by the 1969 regular session of the Sixty-third General Assembly.

The Fifty-sixth General Assembly established the Iowa State Traveling Library Board of Trustees consisting of five members, who are ap-

pointed by the governor. No member of the board shall be a practicing librarian; three members may be chosen from a list submitted by the Iowa Library Association; and one member may be from a list submitted by the superintendent of public instruction. Members are appointed for terms of five years.

The functions and duties of the Iowa State Traveling Library are those spelled out in the Iowa Code 303.16-303.23 for the *General State Library*. The role of the library is research, bibliographic service, the supplying of books and audio-visual materials—including maintenance of a country-wide inter-library loan service—as well as consultant service to all state officials, state departments and state employees, to state-wide organizations, state mental, correctional and welfare institutions, to individuals without public library service, to college and university libraries and 455 public libraries in Iowa.

The Iowa State Traveling Library also has developed a broad and expanding specialized collection of books on Iowa and by Iowa authors, including manuscript, pamphlet and newspaper materials, and periodicals published in Iowa.

Serving as the official state library agency, the Iowa State Traveling Library administers the funds made available under the Federal Library Services and Construction Act. The funds are distributed to public libraries across the state through a system of cooperative areas.

Seven of these cooperatives are in full operation. Each has a central office located within its boundaries, staffed with professional librarians who offer a variety of services of central ordering, processing, cataloging, book rotation and consultation to member libraries in the area. These centers also act as clearing houses for reference requests and interlibrary loan requests through the Iowa Library Information Teletype Exchange (I-LITE). Operational in September, 1969, I-LITE became the vehicle for facilitating statewide interlibrary loans and reference services. As of July, 1971, five academic libraries, the School of Library Science, University of Iowa, 15 public libraries and the Iowa State Traveling Library are members of the system.

In addition, in conjunction with the Department of Social Services, the Iowa State Traveling Library is accelerating its program of providing materials and consultant services to the libraries within all the state institutions.

Established by Governor Robert Lucas in 1839, the library has grown from 1600 volumes to over 300,000 volumes, phonodiscs and films. The Iowa State Traveling Library has seen tremendous growth during the last biennium and continues to seek out new ways to improve the program of state-wide extension and betterment of local libraries with the aid of the federal funds made available on a matching basis.

The Iowa State Traveling Library operates under plans developed by the Governor's Advisory Council on Libraries. The Library Services and Construction Act amendment of 1970 directed each state to appoint a council to develop a new five-year plan for libraries. The council has 18 members who represent public, school, academic, institutional and special libraries, libraries serving the handicapped and disadvantaged and library users.

(Office located on Ground Floor of Capitol Building)

**WILLIAM F. GALL, Des Moines, Superintendent.**

The superintendent of buildings and grounds of the state of Iowa, under the direction of the governor, is authorized to provide, furnish and pay for public utilities, service, heat, maintenance, minor repairs and equipment in operating and maintaining the official residence of the governor of Iowa, located at 2900 Grand Avenue, Des Moines.

It is also the duty of the superintendent, except as otherwise provided by law, to have charge of, preserve, and adequately protect the state capitol and grounds, and all other state grounds and buildings at the seat of government and all property connected therewith or used therein or thereon, to see that all parts and apartments of said buildings are properly ventilated and kept clean and in order; to see that all visitors at proper hours are properly escorted over said grounds and through said buildings, free of expense; to have at all times charge of and supervision over the police, janitors, and other employees of this department in and about the capitol and other state buildings at the seat of government; to institute in the name of the state, and with advice and consent of the attorney general, civil and criminal proceedings against any person for injury or threatened injury to any public property under his control; and to keep plans and surveys of the public grounds, buildings and underground constructions at the seat of government; to perform all duties required by law or order of the executive council.

The present staff consists of 157 regular employees. In addition to a janitorial group of 86, there are 12 elevator operators, 11 firemen and engineers, four electricians, three gardeners, two plumbers, five painters, four garage drivers and mechanics, one storekeeper, one bookkeeper, one administrative assistant, and one secretary. The buildings and grounds department, with its handful of artificers, in addition to maintaining the grounds, give attention to alterations, repairs, replacements and general maintenance of all buildings on the capitol grounds of nearly 100 acres.

Many visitors trek to this seat of government each day of the year. The increase in number of visitors seems to indicate a growing interest in the affairs of state, as well as a desire to enjoy the beauty of the capitol buildings and grounds. During the legislative session, the number of daily visitors varies from 500 to 2,300. In the past year there were guests from each of the 50 states and many foreign countries.

Under the Governor's general direction, supervision and control.

STANLEY L. McCAUSLAND, Des Moines, Director.

Appointed by the Governor with Senate approval.

The Department of General Services, created by the 64th General Assembly of Iowa in 1971, is responsible for services performed by the State Comptroller, State Executive Council, State Printing Board, State Car Dispatcher, State Communications Director, and the Buildings and Grounds Department. Under the general direction, supervision, and control of the Governor, the Department of General Services is headed by a director who is appointed by the Governor with the approval of two-thirds of the Senate.

The director's duties include:

1. Establishing and developing, in cooperation with various state agencies, a system of uniform standards and specifications for purchasing. The law provides that all items of general use be purchased through the department, except items used by the highway commission, institutions under the control of the board of regents, the commission for the blind, and any other agencies exempted by law.

The director may purchase items through the highway commission, institutions under the control of the board of regents, and any other agency exempted by law from centralized purchasing.

2. Administering the provisions of the Iowa Code authorizing the Governor to appoint a state car dispatcher and to assign all state-owned motor vehicles to state officers and employees, or to state offices, departments, bureaus, and commissions.

5. Establishing, supervising, and maintaining a system of centralized electronic data processing, including a data processing service center for the benefit of the state agencies in need of data processing services.

This subsection shall not apply to electronic data processing equipment, personnel, and services operated and maintained by the state highway commission and institutions under the control of the board of regents. However, these agencies shall notify the director before contracting for additional data processing equipment, operating systems, or

programming systems and shall cooperate with the director to benefit other state agencies by joint use.

6. Administering the operation of the state's educational radio and television facilities, including coordination of all communications of state government to effect maximum practical consolidation and joint use of communications services.

7. Establishing, supervising, and maintaining a central mail unit for the use of all state officials, agencies, and departments located at the seat of government.
