

## UAG / SharePoint – Remote access using SharePoint Designer

To follow my previous about an issue with SharePoint Designer when accessing a SharePoint site published with UAG (<http://blog.hametbenoit.info/Lists/Posts/Post.aspx?ID=181>) here is an update.

To avoid the error 'The server could not complete your request', you have to disable the **smuggling protection** located on the **Web Server Security** tab on the application property
