OFFICIAL GAZETTE OF STATE AND CITY.
FRINTED BY JEROME BAYON.

"THE HYION much be preserved," WEDNESDAY MORNING, OCT. 28, 1824.

The Wa regret being compelled to announce that we will generously pardon us the resustionant three days; and

sheet, and new printing apparatus; and then we shall court but as they are classed as soptic poisons with sulphuand deserve the favor of all our citizens, of whatever party retted hydrogen, they are believed to consist of hydro-

tween the city and the lakes, and can other vise he seenred

the presentation of reports from committees; but as unfors innately we had not been apprized of it till a late hour,

adverse to the project of constructing a longitudinal wharf being similar to that of putrescent budies, and acting permanent nor useful. They therefore presented a resolution ed, the virus of contagions effluvia must also operate

that wharves were the only effective relief that could be blood-as may be the case in bilious and trobus fevergiven to the port of the fith ward; that the project of the A proper consideration of this subject should suggest to proposed tongitudinal wharf should be adopted; and that an adjudication of the works should be forthwith

Gaiennie and Thomas; and the votes of Mesers Pichot. Labatut and Allard-5 to 4; Mr Baldwin being absent.

Mr Caldwell made an eloquent appeal on behalf of the manufacture and other converged and other processes of the service in the size of the appears of the converged in the convergence in the conve the city shown to be practical and useful. The project of

By the eastern mail of yesterday, we received New York, Philadelphia, Baltimore and Washington journals of the 14th just : and Charleston of the 19th. Their confents were great's anticipated by the arrival yesterday of the ship

The law relative to the press had not passed the chamber, The bill for reforming municipal corporations in England

was expected to have parsed the commons, as amended by the poers. This will raise an outery against the present ministry as well as the lords. Joseph Buonaparte with his brother Lucien had seem

all the cahin rooms in the New York packet this of the 8th ult, to sail for this country. They and the second and third sons of Louis Philippe often passed each other in the streets of Livernool, during the first week of last month, mutually recognizing un'y by a formal bow. The disturbances continued in Spain. The English auxili-

ary force were brought into action; and in the enset, ensued victory. Dan Car'ne is to be married to his niece, the sister of Jone Pedro and Mignel. A fraud had been committed on the Albany bank, by the

eachier, to the amount of \$290,000. It is said that either Major Raton or Mr George M Daleas

of Phila, will be appointed minister to Spain, instead of ma-

The Philadelphians intend to establish a steamboat navigation with Charleston.

Joseph Retner is in all probability the governor of Pennthe democratic ranks.

The Van Buren candidates have triumphed in Georgia. Judge Schley to whom Mr V B wrote his late letter on abofitionsets, in elected governor.

Boston is to have her railroad to Worcester, continued to Athany; and has probably terminated the abolition campaigns of the notorious Thompson.

AMERICAN CLAIMS ON NAPLES.

A VERMICAN CLAIMS ON NAPLES.

A letter from a friend at Washington, to the editors of the l'altmore American, dated Oct 12, seks no to state, 'for the information of our subscribers who hold certificates for the account inertalment of the Nespolitan Indomesty, that the E-states treasury department has received the sum of \$756,903 14, being the proceeds of 310,200 duests paid at Naples on the fish of last June, and making a dividend of batter than 13 1 2 per cent upon 1,925,034 68, the sofal amount of an according to the holders of sud servification on their meantains, at certain banks is

Manaria, or the efflusia writing from putrescent to. lies, whether animal or vegetable, are classed by chem- BEEATH OFFIRE BARRY, MINISTER TO SPAIN. dies, whether animal or vegetable, are classed by chemista among the septic poisons along with sulphurerted hydrogen; and the effect of venomeus animals. They are contagious and capable of exciting various diseases—the principal of which are dysentery and many species of fevers; although the typhus fever is generated in the human hody, from what is called the typhus of ones, and the service of the principal of which are dysentery and many species of fevers; although the typhus fever is generated in the human hody, from what is called the typhus of ones, the contagious virus of the player, and of the scarlet, typhus and jail fevers to the human hody. The contagious virus of the player, and of the scarlet, typhus and jail fevers to the contagious of the player, and of the scarlet, typhus and jail fevers to the contagious of the scarlet, typhus and jail fevers to the contagious of the scarlet of the player, and of the scarlet, typhus and jail fevers to the contagious of the player, and of the scarlet, typhus and jail fevers to the contagious of the scarlet of the player, and of the scarlet, typhus and jail fevers to the contagious of the player, and of the scarlet, typhus and jail fevers to the contagious of the player, and of the scarlet, typhus and jail fevers to the contagious of the player, and of the scarlet, typhus and jail fevers to the contagious of the player, and the player to the contagious of the player to the player to the contagious of the player to the player to the transfer to the player to the player to the player to the transfer to the player to the transfer to the player to the transfer to the player to the transfer to the player to ited distance through the intermedium of the atmosphere hierary.

than the march minimata. Contact of a diseased perturbed is said to no necessity for the communication of second property, and to no necessity for the communication of genus spirit, and probing, and the kind regards of the sont plague; but a proximity of two or three yards for typhus: try, which followed from us the son of a parties and intermediate infinence of the Wal-

gen united with sulphur, phospherus, carbon and azhte: Vesteriay we gave a cursory sketch of the intended plan and on this belief, they have had their action millified or which suggests to us the idea of recommending mills or fac- as chlorine and muriatic acid gas. The best neutraliwhere the levees will be made on both sides of it from the first to the third engine; or even on the sides of the engines of the engines of the engines are capable each of casting 150 draw immediately the effect of destroying the contagious machines necessary in any manufactory.

We may therefore hope that some capitalists will take add desired the material of the contagious material. The most offensive in any manufactory.

The most offensive in the most of the most offensive in the most of the most offensive in the most o

poposite the 6th ward, which they deemed to be neither chiefly through the skin when the blond becomes tainto'appropriate \$20 000 annually for milargement of the lowe whichly through the skin on the blood, and thence to the at the hatture from the lineation of the 7th ward levee, to stomach; unless in cases when putrescent food may, yet allowed the latter to be discussed. Measrs Caldwell, as well as chlorine and Phloride of lime neutralize the Schmidt, McFar'sne and Berev support the counter report : effect of the effluvia. Phiehotomy may howev r be use

aspeared among the periments and hid formetly hern plant frequent that here had not before even monocitive gles of such a project. Dr. The mass also amported the report by arguments drawn from the expersers allowed by the expersers allowed by the expersers allowed by the expersers allowed by the expersion in ready for paying and extended entering the special control of the transport of the count, not year, well calculated to digitally absorbed to district the first of the country of the expersers allowed by the expersers allowed by the expersers allowed by the expersers allowed by the expersion in ready for paying and extended entering the special control of the horself by the expersers allowed by the expersers

Still we find that though trees and houses act as screen against malaria, in confined situations they act as screens for it; for the Villa Borghese is perfectly deadly, though shounding in trees and thick avenues; but the air does not circulate through it; and want of air in moist aituations it

s had as excess of heat. The means of getting rid of the effects of malar's are there fore evidently indicated. The noxions efferia arises from the putreerent matter produced by heat and moisture, or hi moiding without ventilation. Get ril of the mainture which roman's animal or vegetable matter; and the anxious prin riple shall have been destroyed: First draining should precede flie Telling of trees in every instance—otherwise the virtu may be produced in the clusting of forests, although ther may be no evidence of noxions vapours previously existing heyond them. This is too clearly proved throughout this country; and was unfortunately demonstrated in cutting down trees for the construction of canal Carondelet and the Pontchartrain railroad through the swamp lands rearward of New Orleans-the former of which is believed by many to have caused the yellow fever as an epidemic in this city and the latter is proved to have augmented its influence Hence it is indispensable for the health of New Orleans tha the utmost presention Should be used by the draining com pany, in their landable project of draining the awamp between

the city and the lakes. While considering this subject we might tematk that ne sons have lived in the most unhealthy situations of Italy, hy neing simple means and timely precautions. Chateauvieux evivania. The city and county of Philadelphia have elected 40 years in perfect health, by not being ever exposed to the records an instance of a postmatter who lived at Treponti for him by a great majority, in consequence of the division in air hefore startise nor after sunset; and by living upstair neing a fire and slight nourishing food every night. Sunon in his travels in Italy & Sicily records similar benefits from similar means; but he also records instances of person suffering from exposure to the night air, and eating or drink ing too much. Planuel is also an excellent preservative for those not accessomed to moist atmospheres; as it preven the cutaneous shearptions of the nazious vapors; and the ernsional use of the fleshbrush, and warm hashe in which salt has been dissolved, have exerted a broopy influence securing or testoring health.
