A TOUCH OF POETRY.

Poor Pond Lilies on a Hot Day Bring
Ont the Best in Human

Nature.

M was bot, very but, the car was close eindery An overdressed girl across The anale was chewing gum, working her to the exasperation of the beholda commercial traveler, who carried ma "line" of perfumery, was testing his somepies, and heavy wafts of sickish iness floated abroad as he sniffed. A hoby was crying; a small child patrolhe aisle lurching wildly into his the word haseengers as the train swung served curves, and occasionally tumbling same ends of projecting dress suit cases. Am apoplectic old gentleman, with rolls mink fat at the back of his neck, where sed uncomfortably, waking himself the his naps with explosive snorts: & pale woman leaned back, looking min, with a fan in one hand and a vial and raits in the other. The mercury stood 🕶 😘 relates Youth's Companion

two dear!" mouned one of two women farmering in company. "Isn't this dread-sai? The heat alone is killing; and then Mail to stuffy and sordid and hurried hateful! We rush and we suffer, and there isn't even an alleviation.

makes me remember my traveling should last summer about this time. We should have the hurry; much of the way we should and the temperature was personal. Everybody was comfortable and sorts of pretty, poetic little chings kept happening that it is a should be remember.

"Let—me—see: this is the 15th, isn't well, on the 15th we were coaching in the lake region, and the dear little, pury-faced English children ran after the coach and tossed sprigs of red rowandownies into our laps. Of course we threw pennies; but it didn't seem like the buying and selling—it was much make charming and poetic."

The train slowed up, and the waterby boy came aboard—a hungry, thre-shanked, bare-legged, red-headed parts youngster, with an armful of white the cool green pads and trailing redbers stems. A suggestion of crystal marters, quiet coves and dipping boughs inwested to float in with their fragrance.

The women bought; the apoplectic man choked himself awake, and manify had a fatal attack in his struggle with his pocketbook. The drummer bathshed his lottles and the chew-

there gam girl her solled paper novel and should bought flowers. The pallid wommen, in a burst of extravagance, took a secreta, and buried her face in them. But the tired mother with the baby and the facebling child could not afford any, almost such she looked longingly, and the looked for them.

The boy noticed.

Want some, kid?" he said, laying a segmentions bunch in her lap. "Plenty name in the pond, maken; and my own. 19 and brother always likes 'em."

He tucked yet another in the hand of the bigger tot, who sucked the cool term in solemn wonder; and then has-may slipping out of the door, he awing the self off the step as the train started.

That was better than the rowan-merries," said the traveling woman,

MISHAPS OF FOOTBALL.

** Conse of Padding and Protective Apparatus.

possible injuries that may be acceived during a well-contested game of football run all the way from a small scratch or bruise to a fracture the skull or a fatal internal injury, and the ordinary mishaps, although mainful, and perhaps temporarily disabling are sedom serious in their reserves. They are bruises, sprains, disabling and fractures, says Youth's markets.

Nuises are less frequent now than the the early days of the game in Amerams, for they are fairly well guarded means to the padding of shins. Knees, this has and shoulders—skull caps, earmorder tive armor.

A simple bruise, of it is at once proleaved by a pad of color or wool, need
to necessitate the withdrawal of the
gasper from the same. As soon as the
game is over, however, the injured
that should be bathed with hot water
and then covered with a hot compress,
making firm pressure. In two or three
the part should be gently rubbed
manipulated to order to reduce
swelling and cause absorption of
effused blood.

A sprain is usually more serious, but a depends much upon which joint is affected. There is usually a rupture of cost or more of the ligaments, or in the *** especially, one of the earnings of we count may be dislocated. If the success to slight, and it is imperative that the player continue, it may be are this to bandage the joint snugly. is the self in a Seather cap, or, in The case of a spreamed finger the joint wise to properly but by strapping the fire yes to its muchber. HIS EVANESCENT COURAGE.

Juvenile Trick Rider link "Veryous Perspiration" When a Parlor Match Snapped.

Dart Wantland is the five-year-old son of Mr and Mrs. C. E. Wantland, and has achieved considerable summer-resort fame as the trick fider of the Glen Park donkeys, relates the Denver Post. The-boy is a mirth-provoking youngster, who carries his assumption of manly dignity so far that he sometimes gets beyond his depth in the current of events.

This week he accompanied his mother to the office of the Broadway theater. Coming back, she took the short cut to Seventeenth street that leads through the corridors of the Brown Palace hotel, and the boy, with all the manifices of his five years, was discussing the prospects of the "Prince of Pilsen."

"I like a show with lots of shooting in it." he was saying as they entered the hotel rotunda. "I want you to take me to a show that's full of shootin". I won't be afraid of the shootin'. It can't scare me, not much."

This last hold asseveration was delivered as the pair were in the middle of the Brown rotunds. The luckless boy had attracted the notice of everyone within earshot, and just then he stepped on a parlor match, which blew up with what seemed like a terrific bang.

"Wow!" yelled the lad, and he cluing to his mother and screamed in tones of horror. He denies he yelled "murder" and "police," but the hotel guests who saw his sudden transition from swaggering bravery to terror say that these were the words he shricked.

It was a crestfallen youth who sat at the table of the Metropole that evening, surveying the guests and wondering how many knew of his inglorious defeat by the parlor match. A member of the "Prince of Pilsen" company, with whom he had struck up an acquaintance on short notice, noted the boy's look of humility and abstraction and said:

"Hello, Dart! What is 'the matter

"this evening?"
"I don't feel well," said the boy, with
a touch of his swaggering bravado: "L

think I have nervous perspiration!"

The bitterness of being laughed at again was so saddening to-him that he was silent for as much as an hour and a half.

PRETTY THINGS TO WEAR.

New Notions in Dress That Have Been lutroduced in the Season's Costames.

The "multicolored idea" extends even

to gloves this year. Kids come in all the cloth shades, with bindings and stitchings of the brightest colors. Plush tops and velvet underbrims will be frequently seen in the stylish winter

hats, says the New York Tribune.

Persian lamb trimming of lustrous fiber is one of the important accessories of the season. It comes in galloons of various widths and appliques of different forms, which, however, are invariably edged with a plain or novelty fiber braid. These will be much used, both in millinery and dress trimming, as will also wool embroideries on chiffon or taffeta in oriental or pompadour colorings and cloth cut work in two colors outlined in black and white or pongee colored silk cord. Garnitures of wool embroidery in multicolors, with fringe ornaments and dangles, are attractive novelties.

Cuffs are the center of interest in the sleeve line this season. Otherwise there is no radical departure in outline, or architecture. The baggy puff, which is slightly diminished by means of gores, has been shifted somewhat more toward the elbow. But the cuff of the season, those specimens especially which adorn the more dressy costumes and coats, seem to combine the ideas and all the different eras in the history of dress, and are indeed glowing tributes to the

Ingenuity of the sartorial artist.

There is no tendency toward striking eccentricities in fall models, says Toilettes. They are graceful, smart and novel, but the differences in our are slight and the chicuess consists rather in the shaping of adjuncts and disposition of trimming. The eye has gradually become accustomed to an increased length of shoulder and fullness of skirt in the fashionable silhouette, and the replacing of the pouched blouse by fitted fronts has been too gradual for the result to appear really startling now.

Teaching the child to Obey.

A mother should be careful to make only reasonable demands upon her child's obedience, but when once made, to enforce them implicitly. A thing once refused should never be yielded to masing. When it is possible the reason for the refusal should be explained to the child. One should be very careful never to enter into a contest over a point that cannot be enformed. A child may be made to do certain things, but no power on earth can force him to do othore, or to say works that he has made up to mind not to say. The prodent in that will entor a her authority and teach electence on the proof dithat she as surrect in mirates to both. Promis that the knows she entitle carry the will two I until the habit of obscience is former in them fore will be no useus-

OUR DAIRY PRODUCTS

American Mith and Butter Compared
with the European Product.

Bost Exhibits at Paris Exposition Were from the tnited States— Denmark Our Only Equal in Excellence.

Dairy experts of the agricultural department say that our management of the dairy business has greatly improved in the past few years. Some ten or 12 years ago we sent to Europe a great many interior cheeses which gave a bad name abroad to American cheese, and our exporters suffere! from this reputation for a number of years. The superiority of our dairy profiles, is, however, again recognized in foreign markets, says the New York Sun.

One of these dairy experts, who has recently been making special investigations in Europe, says that not many years ago some of the foreign milk supply establishments of Europe were greatly superior in many respects to the best in América. To-day, although some of the European milk companies do a larger business and have more extensive and costly plants than we have built, there are a considerable number of city milk supply establishments in this country which surpass any of the European plants. They are superior in their buildings and equipment, the efficiency of their management and in the purity and high average quality of the milk and cream served to their custom-

It is a remarkable fact that at the special show of perishable dairy products at the Paris exposition, in July, 1900, where French, producers had every opportunity-of exhibiting their goods in the best possible shape; the only samples of natural milk and cream which were sweet and palatable after noon on the exhibition day were from dairies in New York and New Jersey, then 18 days from the cow. There was also an exhibit of natural milk and cream from a farm in central Illinois in bottles exactly as sent daily to Chicago families. and although 20 days old the producthad keep sweet until the day before the show; and even later it was better than

24 hours after mulking. The American product; had been preserved solely by cleanliness and cold, and no milk supply company in Europe duplicated this performance.

The expert adds that there are many private dairies in the United States which make butter as fine as any other in the world; and the same is true of our best creameries. The best creamery butter is quite the equal of the best Danish, but there is no such uniformity of product, and a larger proportion of our butter is inferior in quality. This results from the wide extent of territory and variety in climate and local conditions which affect the 8,000 or more creameries. It is also due to the great differences in methods and management.

There is ample room for improvement in American reameries, but the only foreign country from which they can profitably harned is Denmark, where the best creameries are models of cleanliness, good order and assemble management. The investigator says that the butter of Holland has lost its commercial standing because it is so commonly achievrated and sold as genuine butter. In nearly all other parts of Europe laws restricting

strict and fairly well enforced.

Friel. Normandy butter in rolls selfs at the very highest price in the London market, and superior butter is made elsewhere in France in limited quantity. Yet the average quality of French butter is second-rate. Belgium is a grade higher while Germany. Switzerland and Italy are lower. Switch and Finland may be placed still higher and Denmark casily.

"TOURIST FACE" IN LONDON.

holds the blace of bonor

Trade Mark of American Visitors
Who Fly About from Sunrise
Until Midnight.

The "tourist face" is the latest importation from the United States. It is the trademark of American visitors, whose energy in the holiday season is simply appalling. Our American consins are at present the busiest people in London. They fly about with unabated vigor from sunrise until midnight, and then complain that the town has gone to bed. The result of this is the "tourist face," says a correspondent of the Philiadelphia Press.

You can see it in the Strand any afternoon. Nervous, dyspeptic looking men, clutching red guide brooks, stride hurriedly through the crowd. They wear an anxious! worried look. Women with long, blue veils doating from their hats keep up with the procession while wise displaying the inevitable guide bead Occasionally a sin passes driven at full speed. It contains a man from Missouri or Arizona, in trunsit from the Tower

Many Americans now in London come at and for a rest? Some of them are exceptly order to their passicians. But the Strain of loading at fourtee, these turk chartles and interminable rows of oil painting has not improved it are conducte. More than one had seeming test for from the tension of Wall street is withing harder than he can did in

the stander and the formation suffered by the American tourist. If emust be appared doing who have been and doing who have been set a sort more pumplaged with visitors that the omnibutes are not running for Thours's after they are ready to began the day. One enterprising party from Marquetre. Much, see a Hoomsburg boarding noise the other morning for a day schind of plenear, and were formed to change an allength cab.

ALL ON ACCOUNT OF FLORA.

Maguiar Effect of "bouting "Hello, Mae" in Some Parts of Borth Carolina.

"I was waiting for a train at a wayside station in Moure county, N. C.
ine day," said John Gilbert, the travling groceryman, according to the
New York Sun, "and in a man that
mane out of a store up the street a
ittle way and was crossing over to
inother store I was sure I recognized
los McCann, a fellow traveling man,
ilthough I wondered at his being
lown in that country, so I holisred at
him

"Hetto-o-o, Mac!"

"Three men were walking up the callroad track at least a hundred yards away. They instantly stopped, purped around, and each one of them shouled back.

" 'Hello!'

"Two men came harrying out of the waiting room of the station and taked what was wanted. A man who was nailing a board on a fence two blocks up the street dropped his hammer and walked smartly toward the station. A window in a house across the track was quickly raised, and a man with a shock of red hair stuck his head out and hollered:

"Helio"

"Four other citizens came burried ty out of a store on the other side of the railroad, and looked inquiringly toward me, but Joe McCann didn't took around, and in a moment I saw that he wasn't Joe McCann at all.

"The train came along just then and I got aboard, puzzled at the commotion that shout of mine at the supposed Joe McCann had caused among to many citizens of the hamlet.

"I was followed into the car by a man who was standing on the station platform near me when I halled the man of mistaken identity, and who seemed much pleased at the result of it. He sat down in the seat ahead of me and said:

"That was the first time you've tried 'em, I see. You didn't get a rise out of as many of 'em as you will after you get used to it. If I had hollered em up, now, you'd have thought there was a dog fight in town, the way they'd have bobbed out to see what I wanted. You want to put

"I began to think that the hamlet was a fresh air smalle asylum, and that here was another of its patients but for a holiday. I guess I must have looked my thoughts, for the man quit his grimming and said.

"'You was trying 'em. Wasn't

you?"
I told him I wasn't trying anybody that I knew of, and explained
why I had happened to raise the shout
that seemed to have turned everybody

"Oh! said be, 'that's francy. Then I'll have to tell you about it' "It's all on account of Flora. Flora Macdonaid You know the story of Flora, of course? The beauiful Scotch lassie, who saved Prince

"Well, after she saved him she married a Scotch muckamuck of the same surname as hers, and came with him and a big colony of canny Scotch to this side of the water. They set tled on the North Carolina coast. somewhere about the present site of Fayetteville, and got along first rate. "When the colonies began to fight the mother country, Flora Macdonald didn't like it. She and her tolks regained to her native land, and guite a number of her colonists went along "But there was plenty of them left when the war ended, and their degrendants are thick in all this part of North Carolina Thus it is, go where you may, he real-outs, you will find the woods full of Mars-Marigods, Mardonalds, McBrides, McNells, Macphersons, McCrymmonses, Marivers, McDuffies, Mackenzies, McDades, Macleans, Macintoshes and bosts of other, Macs. One man back here in the place we just left is what you might call a triple Mac. His name is

Macdonald Marleod McIver.

"'So, if you step into almost any settlement around here in Moore county, and along the Cape Fear river, and holler "Maci" as you did back wonder, only louder, you'll be apt to have pretty much every able-bodied man in the place answering the call And that's why I thought you were trying 'em. So, if you ever do try em, put more lung in your holler, and could get a rise that would make Flora Macdonald weep tears of joy if she could only see it."

"I never tried it, but from what I -aw at that little bamlet I don't behave the man was giving me very much of a jolly."

MEN ARE NOW LACING

Fashionables Find Stays Conducive to Proper Form.

Dainty Little Affairs for (Asching in the Portly Fronts of Mascaline Eathetes tre the Correct Caper.

Man has failen from his high estate into a "straight front." It is a silly little affair, with yards of silk laces behind and steel hooks in front. It is composed of unimpeachable drilling and warranted whale bones, and it is for all the world like the cute little Olga Nethersole models that set the corset world atlame a short time ago. But for all its lightsome manuer, it is a corset with a mission, and not autocratic. He who compresses his increasing coundity into its clinging confines doubts that it theroughly understands its business, says the New York World.

He conceals it beneath a negliger shirt and a bland smile; to say nothing of a belt that betrays a downward tendency in front. You know it Lovely woman by its aid for the past year and a half has defied the most expert of the sterner sex to estimate the extent of her embonpoint by any number of inches. But then there was the pouch shirt want and the marvelously gored skirt and all the other misleading "effects" to dazzle the eye of the uninitiated.

But with the man the elongated belt, is quite another story. It is more than a supicious circumstance—it is a distinct announcement that his new-found "chestiness" and the waggle of his walk do not alone emanate from proper pride. They have a good and sufficient reason—a reason that is three inches tighter than the trousers band, and guaranteed to give a "lovely form." It is another case of cherchez in femme. A woman is at the bottom

Not content with the revamping of feminine figures, sagging manly outlines appealed to her sympathies, and in a moment of enthusia-in she vowed that man should part with the recognized trade mark of the epicure and acquire a back." A "young back" is the

word about "straight-fronts". They were far too wise for that. The corset, however, as evolved, fills the bill. The shortest style is ten inches in front.

12 inches and even more being the extent of different models.

Like those of the other gender, it is short about the waist and long below it, and it is intended for the stout man to curb a "front" with an impetuous curve and to keep his hips in clastic shape. "Bay windows "it is said, will disappear after a few months' wearing, and the line from neck, to waist will lengthen several inches. The lean man, without any curves, exuberant or other, will find in the corset the happy change of contour he desires.

Whether, or not in the case of those who are so far fallen into flosh that hereof measures are necessary for straight-front purposes, the feminine garter will be resorted to and the pulley process applied, is not yet known. Man is two new in harness to be able to speak for himself on this subject. As woman adopted the male stock and garter for her summer comfort, it would only stem a matter of fair, or hard but in the interest of his new-far. Lygune its layest advocate should be given a demonstration of how to put on his corner.

EARLY WOMEN PRYSICIANS.

Were Beset by Difficulties and Discouragements Unknown at the Present Pime.

"How little the medical women of the day abow of the approvances and arritations that women physicians were subjected to in their first years of prative," says Dr. Townsend to her articles on "New York's Medical Women and Their Work," in Pearson's "of the spub- of male physicians, who declined to counsel with them, of the refusal of medical societies to admit them, even the rejustance of druggists to compound their prescriptions. Frequently, their signs would be torn from their office doors. What they bore in the way of insults can scarcely be estimated. Now, nearly every college is open to them fift the full and free pursuit of knowledge

The has taken only 41 years to accomplish the result—less than an ordinary. Inferime. Since that time Canada and the United States have opened the doors of fid medical codeges to both sexes, and eight for women alone now exist. The average number of medical women productes each, year is about 900 and it is estimated that there are nearly eject women, physicians, practs ing in this country.

TEXAS CATTLE FOR AFRICA.

Fine Stock for Breeding Purposes

Ment is Luces Sumbors to

That Country.

It was announced in January last that a large number of Texas cattle were to be sent to South Africa, and in the course of time if was believed the shipments would amount to at least 100,000 head. On account of the rindepest and the neglect of South African cattle during the recent war that region was compelled to import many beef cattle, says the New Yorks. Sun.

This news that came from Texas was doubtless interpreted by many to mean that ... south Africa was importing American literion the inof. If appears, however, that this was not the case.

Seweral shipments have arrived at Délascoa Bay and then been firminded to this great pluteau of the Trinsvall. The Gold Fields News of a meent data contains an interesting description of these shipments which makes it evident that the micellial Terms sattle are not the highword, fond to med kind usually assessed with the name.

To to June 30 last 4.050 giged of cattle from Texas had arrived in the Transvart and seeven more consumments were on the way, which would bring the number up to: 12.350. Most of these cattle are fire, picked heifers and well-bred bulls. They arrived in excellent/condition, and the first shipment, by the Atlantian, which carried the record cargo of cattle to: South Africa, consisting of 2.555 head, had only 22 casualties on the way. Thei significant fact is that Texas cat-

the arms to be used largely as breeding struck to replenish the big Boer stock farms. For this purpose excellent stock of good breed is being selected. The steam ship Cranley, for example, discharged a cargo of 1,500 helfers and a few built, all of which were raised out the boost stock farms of southern Texas, the carrier consisting entirely of Shirthborns. Shorthorn-Herefords, Jerseys, Holsteins and pure bred Devons.

Holsteins and pure bried Devous.

The wast majority of the cattle which have merived are in far better condition than most veld-fed. Afrikander cattle after at moderate wister season. Depots have them established at Victoria and other places, where the stock must go before reaching the utilimate purchaser.

are taken to Africa by a large private company under covernment direction. The error prise is haredon South Mota as a beneficient work, for it is believed that the importation of such useful strains of breeding stock will eventual.

The present importations from Texas

CAT CHUCKING A NEW GAME.

ly tenci to an all-round improvement in
