PLATINA CEMENT

DR. ACHILLE LION, Dentist, of the Faculty of Paris, after many researches, has discovered this valuable composition, which he applies with the utmost success in plugging decayed teeth, and rendering them sound. The composition of the Platina Cement, which is entirely mineral is incorruptible; it is used cold, almost in a liquid state, and applied without the least pain. It immediately stops the enamel of the teeth when in a pasty. It will last for many years, and is a preservative of the tooth, but also to render eating agreeable.
