ANOTHER PROTEST. Purely as an act of courtesy towards the espectable gentlemen who ask the publication of the subjuined report of a Whig meeting in Aerenator, and with an emphatic expression of our onqualified dissent from its statements, ob-

our ouqualified dissent from its statements, objects and tendency, we give it insertion. We need scarcely say that the disserations preventing smains the Whigs of the Second Congressional District—or rather among a portion of them residing in Ascension and St. Martin—are a source of profound regret to every split thinking and true-hearted. Whig. That they threaten as with dofeat in she only District which a Damocratio Legislature has coulded to the Whigs a indubitable, but there are political calemities greater than the loss of a Congressional District. The broils and heart brinings created by this unhappy quarrel—the bitter feelingsit engenders will, we fear, rectlast the temporary overset but our party may have to the temporary reverse that our party may have the first destings it conceiled. Per party may have the soffer. It is conceiled, perhaps, to reflect, that the city Whige are bisneciese in this fead. The companies of their misquided berthere in the country prove how unfounded is the charge upon them of dictation and desputiem. The city Whige are accused of sticking to one man, while the country. Whigh sell us, through their organ, that they were willing to nominate a city and state, but not the candidate of the city and state, but not the candidate of the city and state, but not the candidate of the city and state, but not the candidate of the city and state of the city and over seast upon the Whige of Orleans. The shows a maximum in their preference—now the gentlement from the city had ever been placed in nomination, awe city had ever been she colone—the spontaneous and willing choice of the city delegates. Why should they have abandoued him? What possible protest could have been alleged for an act, which, under the circumstances, would have been one of talsed the nomination by the votes of the city delegates. Why should they have abandoued him? What possible protest conducts are without an excuss for their conduct.

This unpleasant controversy has no charms for us; but we cannot suffer the action of the secondary are without an excuss for their conduct.

This unpleasant controversy has no charms for the resolutions published below, contains a series of gratuitous assumptions. The Convention dad decide that the electoral beats how the subject the action of the series of gratuitous assumptions. The propriety of holding a new Couvention is subject we are content to leave to the unbiassed deliberations of the Whiga of that portion of the city attached to the Datrict. If they think such a course consonant with their rights, where dignity, and their sense of justice, we shall not allow our private sentiments to indisence their enlightened judgment. But whatever may be the result of this movement, the Whig delegates from New Orleans are not resuments for it. They have perfumed their resuments for it. espensible for it. They have performed the to the Donaldsonville Convention to sustain
