CIFICIAL GAZETTE OF STATE AND CITY.
FRIVTED BY JEROME BAYON.

"THE UNION must be preserved," MONDAY MORNING, BEPT. 28, 1836. The mail of Saturday brought no intelligence of importance; nor any papers of later date from New York than the 12th, which was received on Thursday last.

The health of New Orleans continues good; and we have reason to conclude with many experienced persons long

resident here that the yellow forer has ceased as an epidemic This is sufficient to inv to capital state teride among us It is an undoubted fact that the sickness partially prevailed in the country, no aggravated cases of disease have occurred

in the city during the past summer. The health of New Orleans being thus comparatively excollent, and the most prompt means being nowlin progress no the great mart of the south.

Captain Thompson was arrested for debt on Thursday \$5000. Bu the has not yet got any securities.

CARBOLTON .- The railroad from the city to Carrolton on the Musissippi, distant about four and a half miles, was opened for travel on Saturday last. The route passes through a level and beautiful country; very high, dry and arable land; and affording one of the most pleasant drives in the southern states. It passes through the limits of an ancient firest of live onke; peculiarly interesting as being one of the very few of its kind now remaining in the south. Probably this was the wood visited by Mrs Trollope as the 'Cynthia of the minute; although she does not inform us of her sacri'

We were very much gratified in witnessing the various improvements during the progress of the drive; and could not help hoping that next sammer the forest of live oaks would their escorts. New Orleans affords few such conveniences as might be given to Carrolton, if the proper accommodations were there made for entertainment and residencethe drive is not like other roates over swa noy lands, which present no objec's for delight or contemplation.

Yet even at the present time, balls and dinners might be g ven at the Carrolton hotel with some success-as we have no doubt the directors of the company will herenfter render their means of traveling and other accommodations as invitthe experienced and conrecous conductor of the hotel.

The fare is but 25 cents, while that on the Pontchartrain certainly the drive to Carrolton is much more pleasant for all directions towards Texas; that namerous attempts have those whose business does not compel them to go to the been made to plunder foreigners; and one of these is an fialakes. Don Lorenzo de Zavala. But fortunately Zavala has arrived To secure it, this city may shortly become the glory as well in safety in New Orleans. His only crime secme to have been his resignation as Mexican minister at Parist and this having boldly written to Santa Anna that though he had consented to represent the Mexican republic, he could not list, underwent a preliminary investigation before Justice thank of representing a military dictator—that fo merly he Shamburgh on Friday, and was permitted to be bailed for (Santa Anna) had owed his success in arms to the justice of his cause; but now his cause was a bad one; and that libes

ral principles would put him down. A filth is an address to the people of Texas, from Horatic A Alaberry, dated Columbia, August 8th 1835-in which he states that when in New Loon early in that month he had been au horized by the committee of vigitance and safety for Columbia, to acquire accurate information of, the designs of the Mexican government towards Texas. He states that for 5 years he had watched the movement in the southern states of the republic while there resident; and that he verly believes that the only security for Texas is in the prompt defermination of her citizens to oppose the military in establishing a central government or an arbitrary despotism within their jurisdiction, which is doubtless their intention: for he says the principal mon of Mexico in office civil, military and exchalastical deny the rights of the present colonists in During the discussion of the resolution, members retired; been au horized by the committee of vigitates and safety for he rendered fit for an agreeable ramble for our ladies and and exclusionitical deny the rights of the present coloni-te in Texas to their property, and that the lands must be given up for their own natives. They have therefore resolved to move a large number of troops to Texas to change the whole form and order of government, and place Mexicans on y in office-to establish their posts and custom housesto expel from the country several of the most influential citizens, whose names they have long since had on a proscribed list, chiefly those who were engaged with the soldiers some three years since-liberate all slaves and set them ing as possible; and we entertain as little doubt that their loose on their owners-and lastly to call up the empressa efforts will be efficiently supported by Mr John McDonneil, rior and demand of them their colonizing contracts with the government; and annul those of all who have introduced more colonists than were permitted in the grants.
