

## **Five Devices**

### **Names of the five devices**

The focus in a facet may be either formed or sharpened, whenever warranted (even by the classifier himself), by one of the following five devices:

- Chronological Device (CD)
- Geographical Device (GD)
- Subject Device (SD)
- Alphabetical Device (AD)
- Enumeration Device (END)

Colon classification exploits the help of these devices wherever helpful and possible.

### **Advantages**

Avoid enumeration and shorten an array in a schedule.

Gives autonomy to the classifier, etc.,
