

Monolingual Wikis

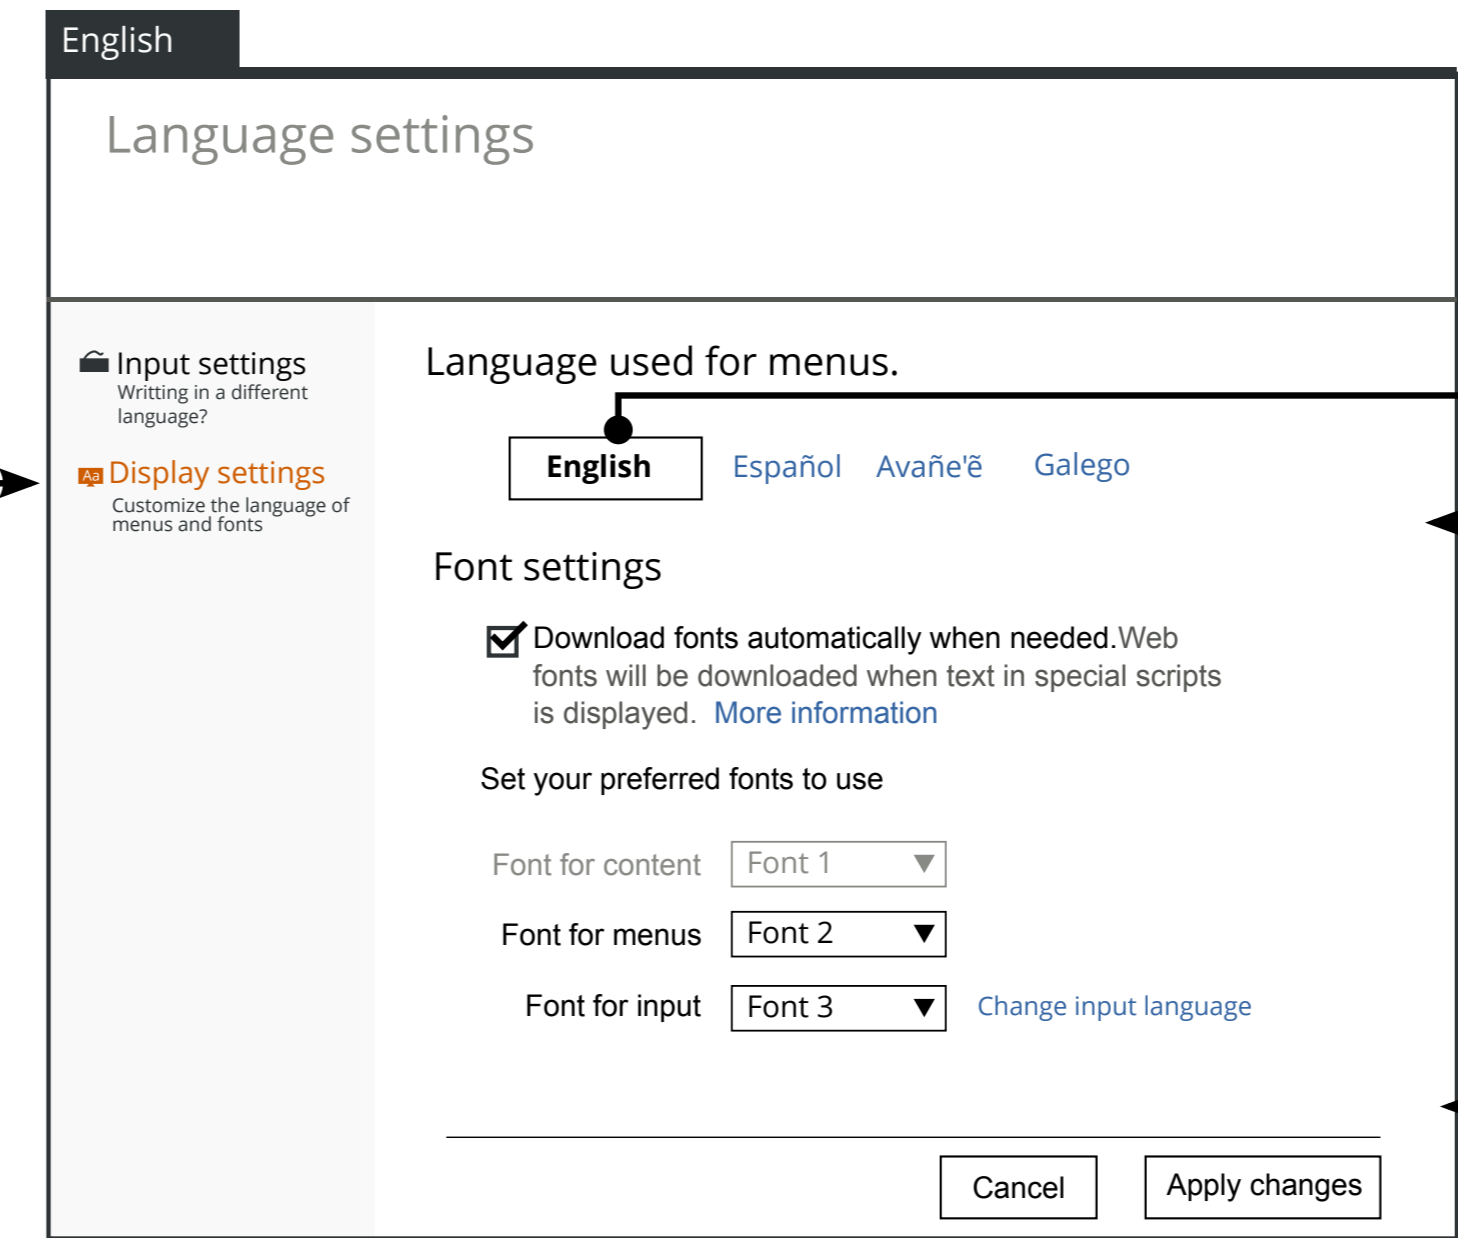

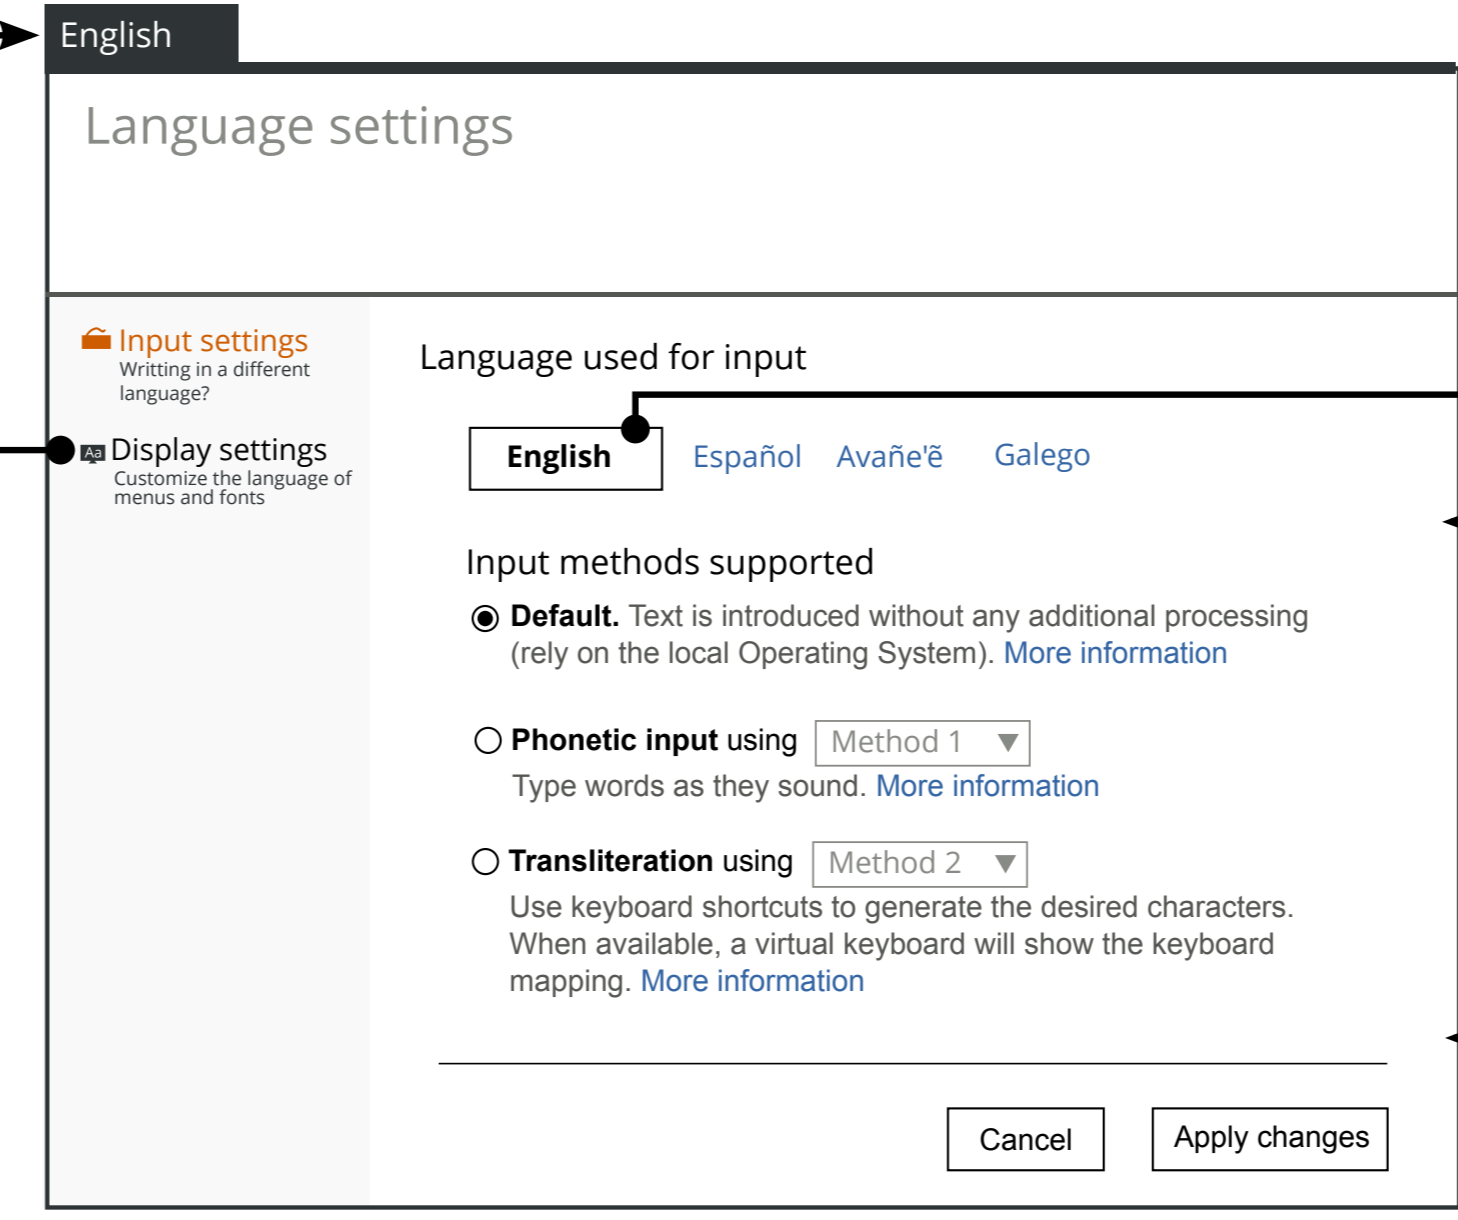

The ULS will replace the language selector form preferences.

The trigger

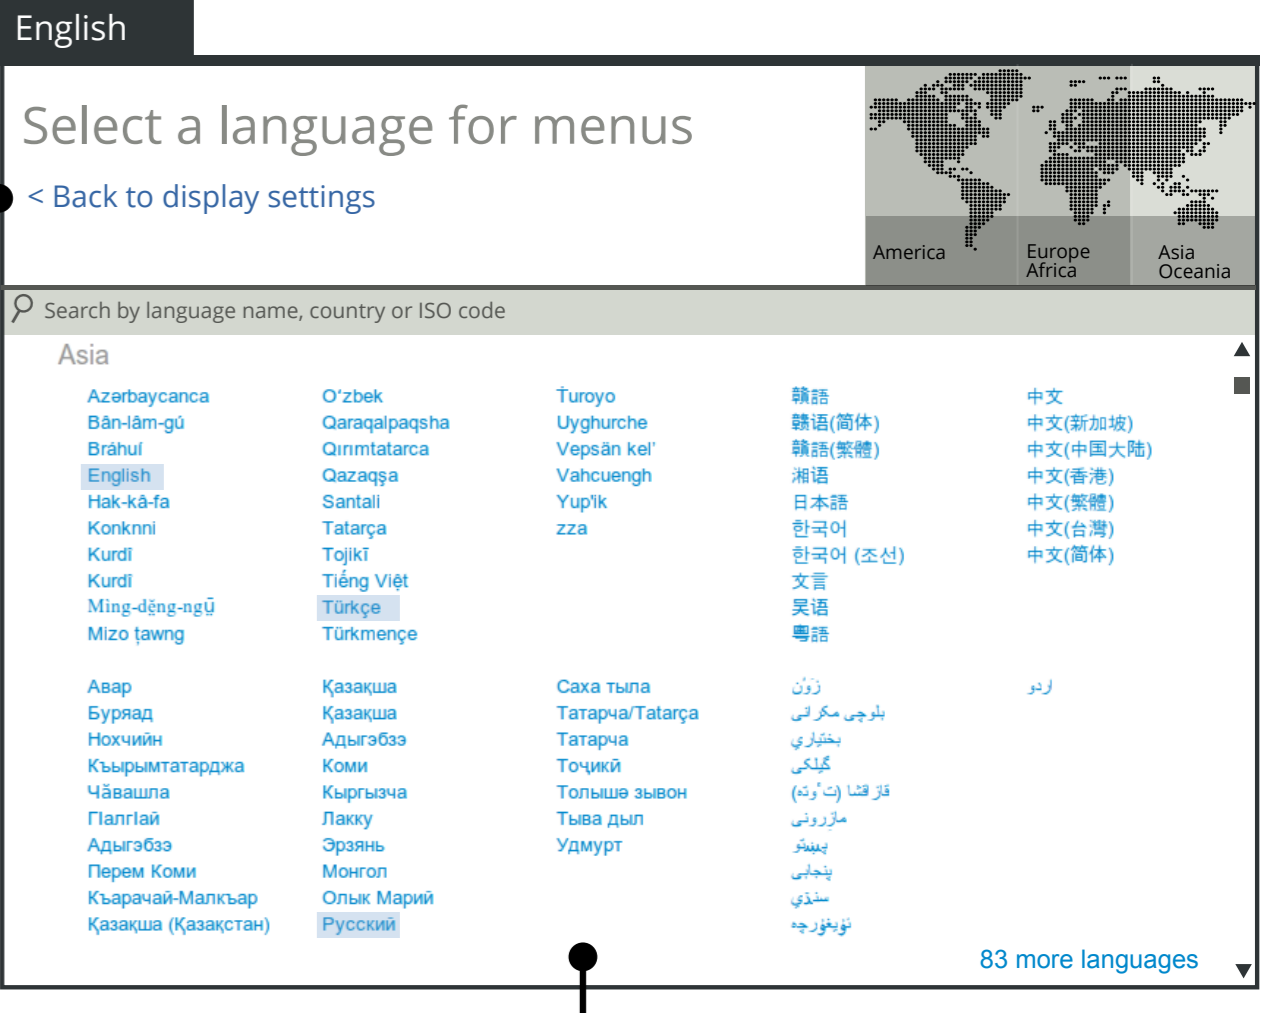

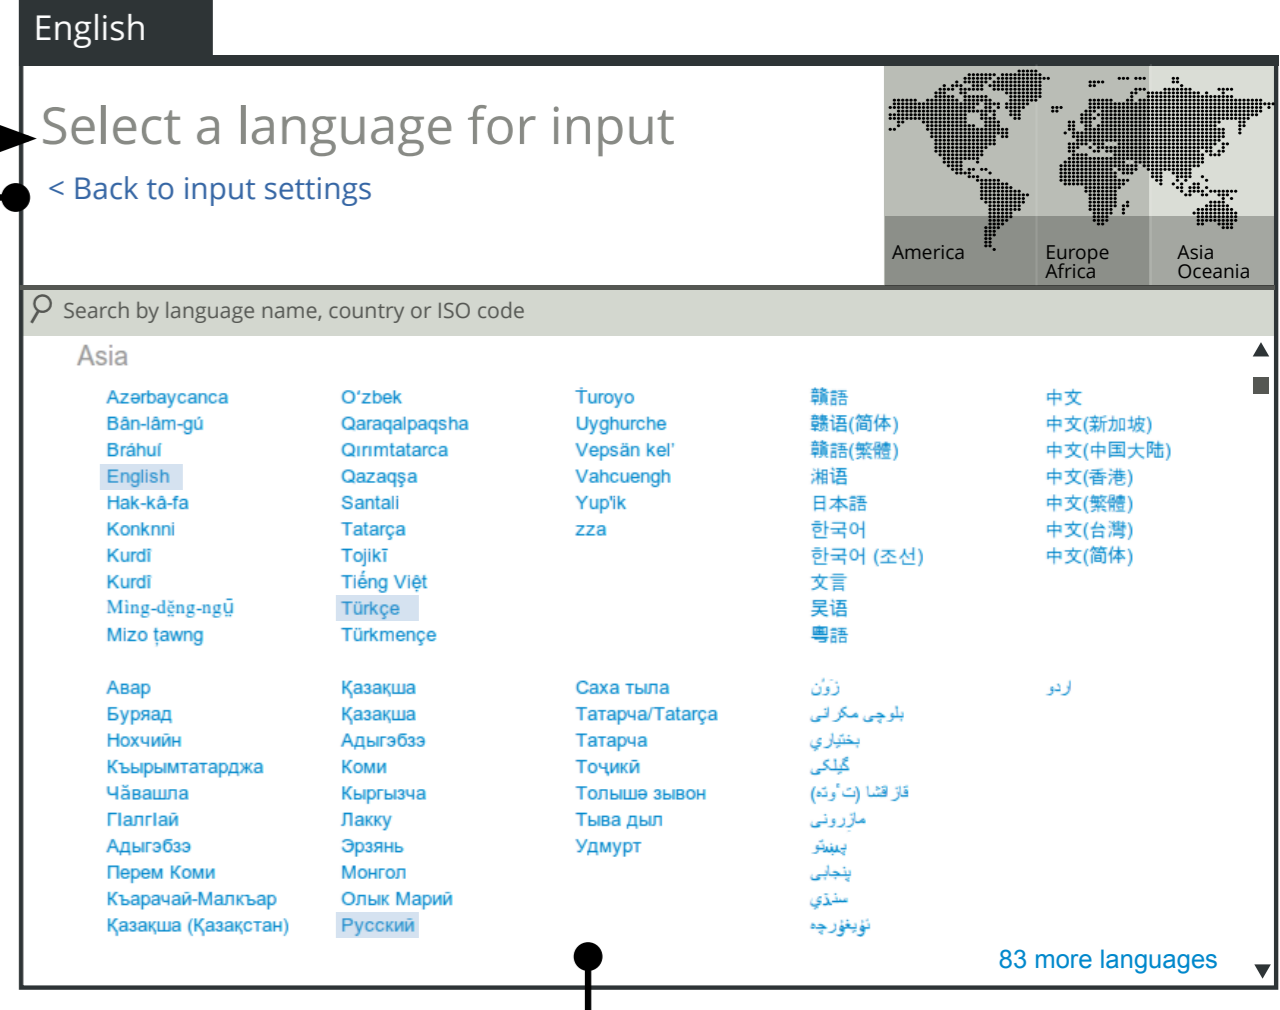

Language settings

Content, menus and input fonts shown only if they are set in different languages for which font selection makes sense.

Language list

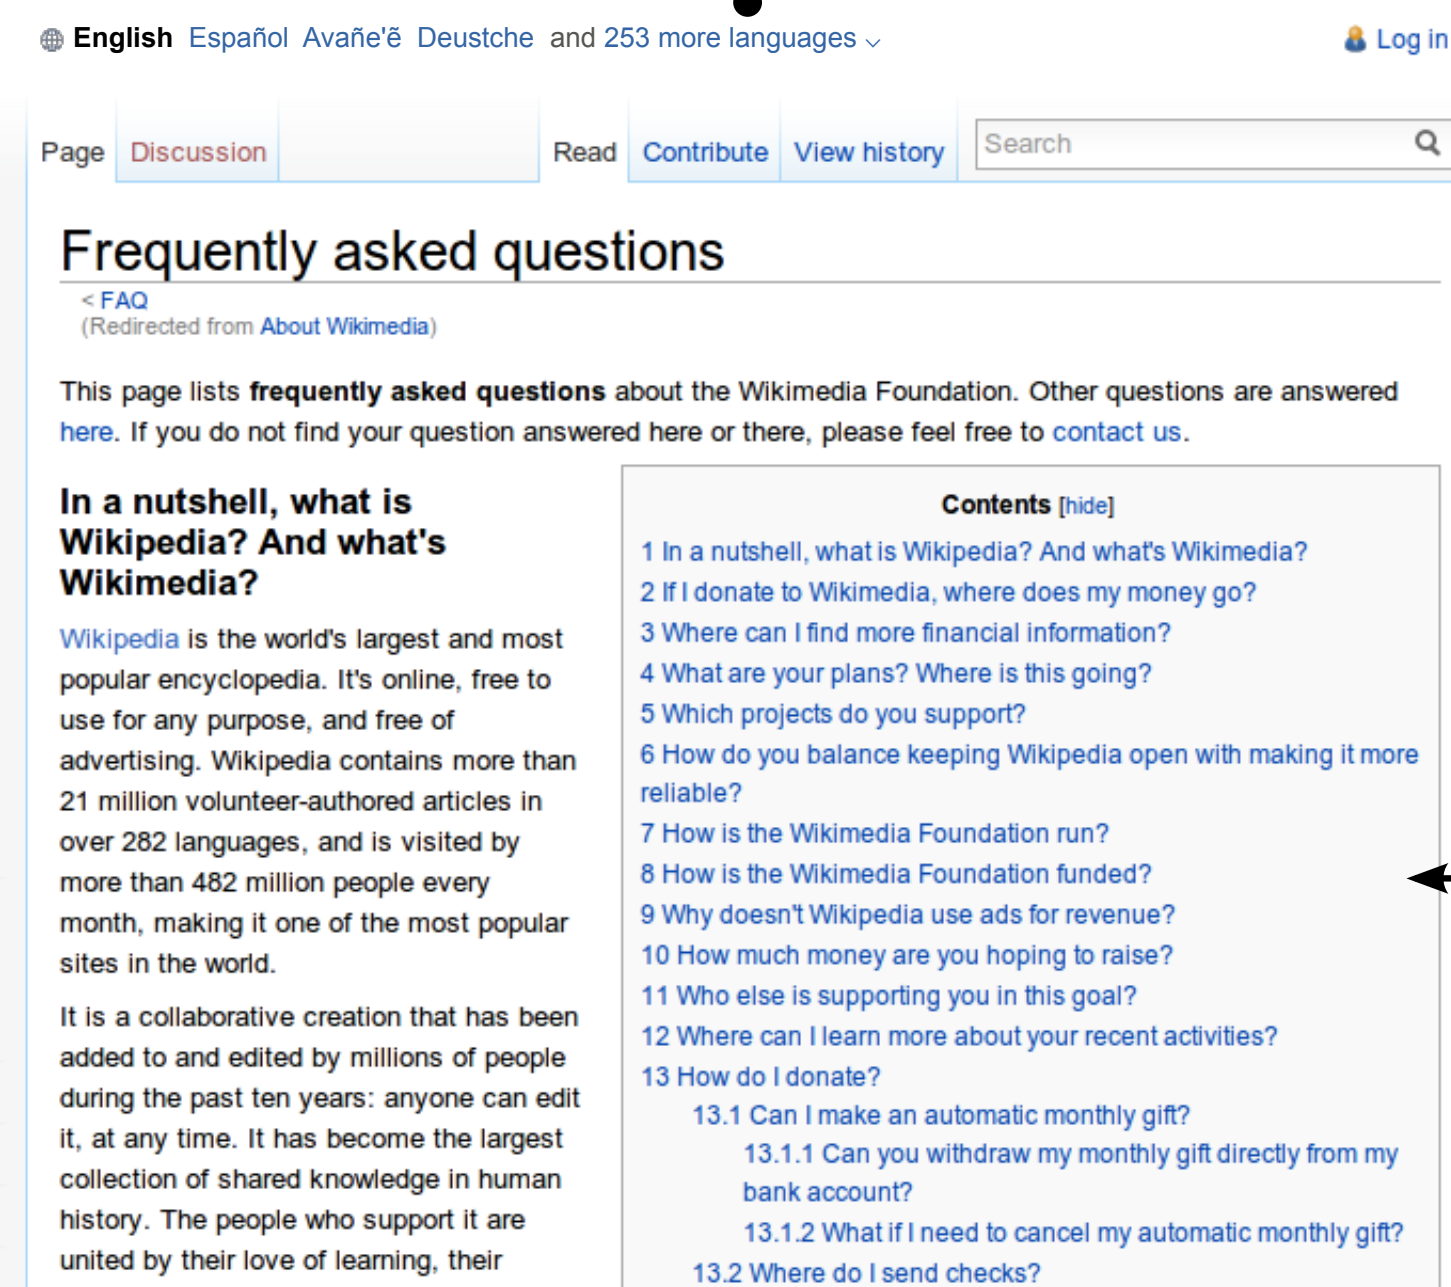

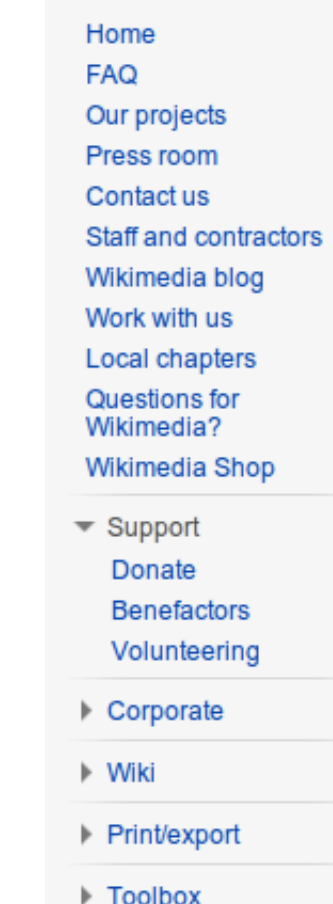

(for cases where smart defaults do not work)

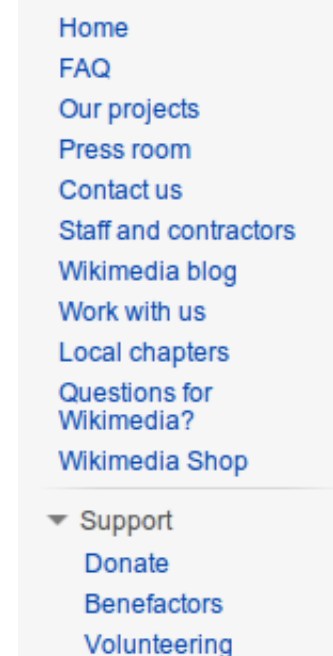

Multilingual Wikis

The trigger

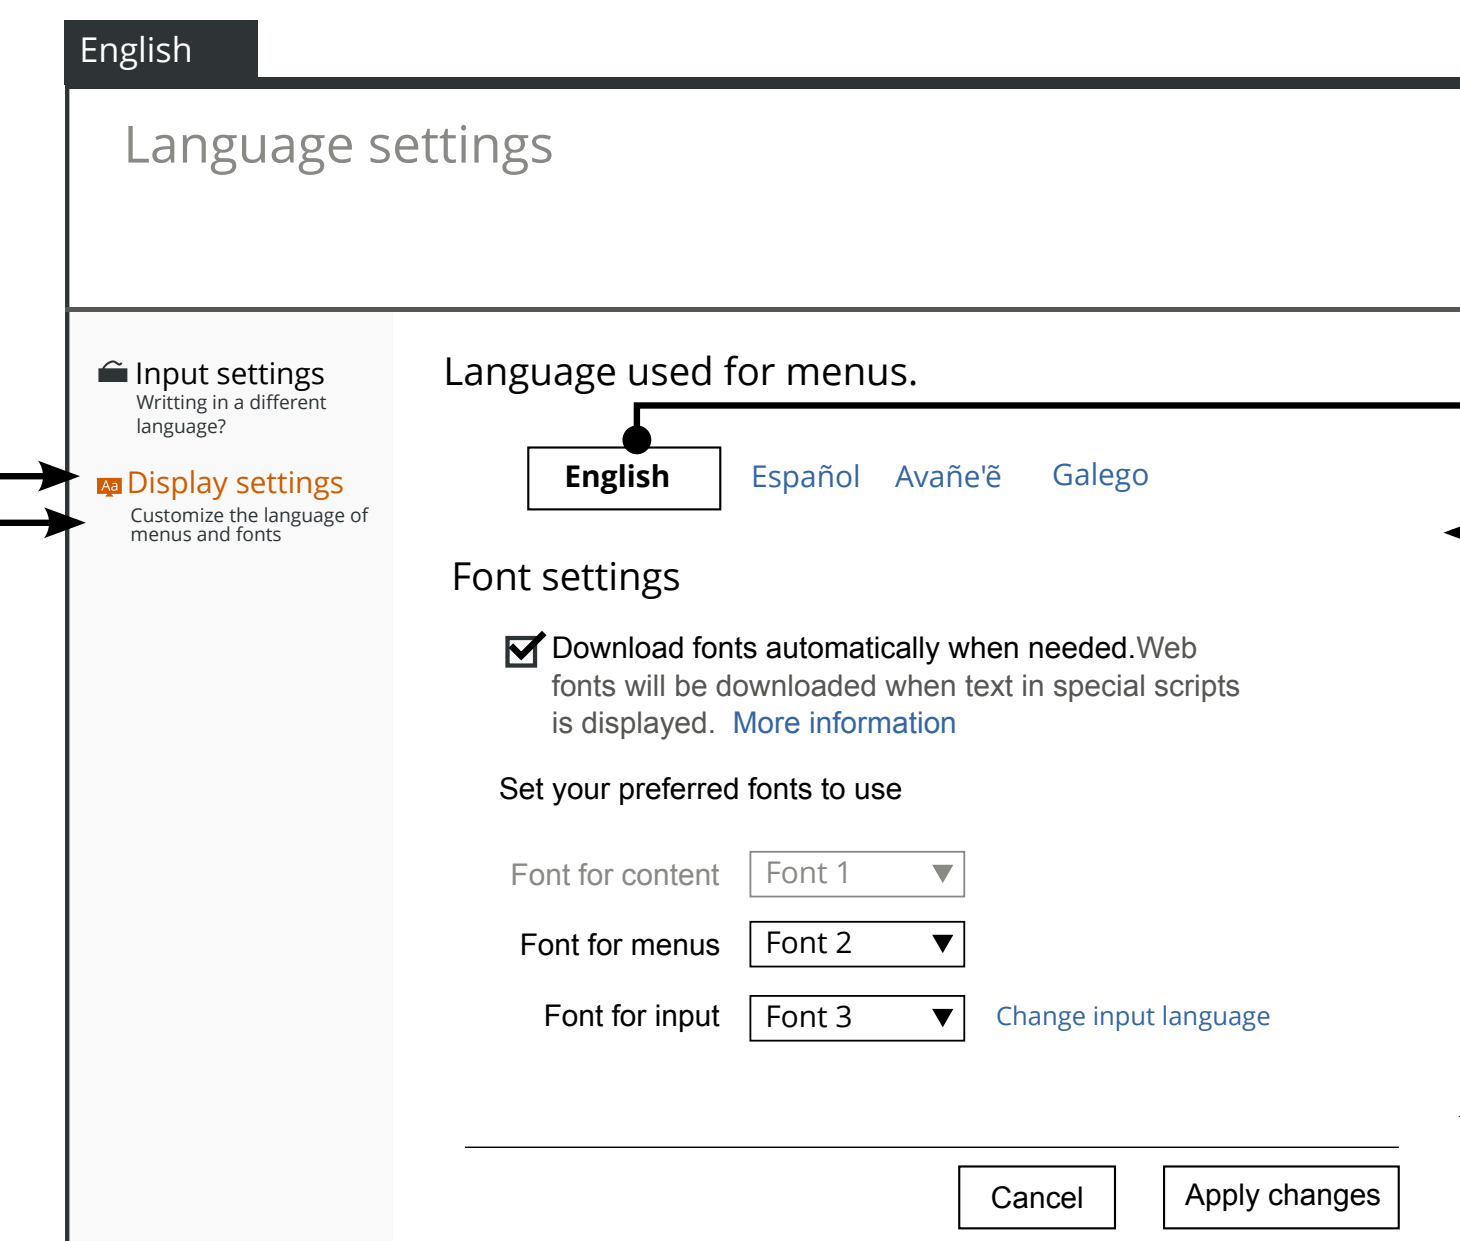

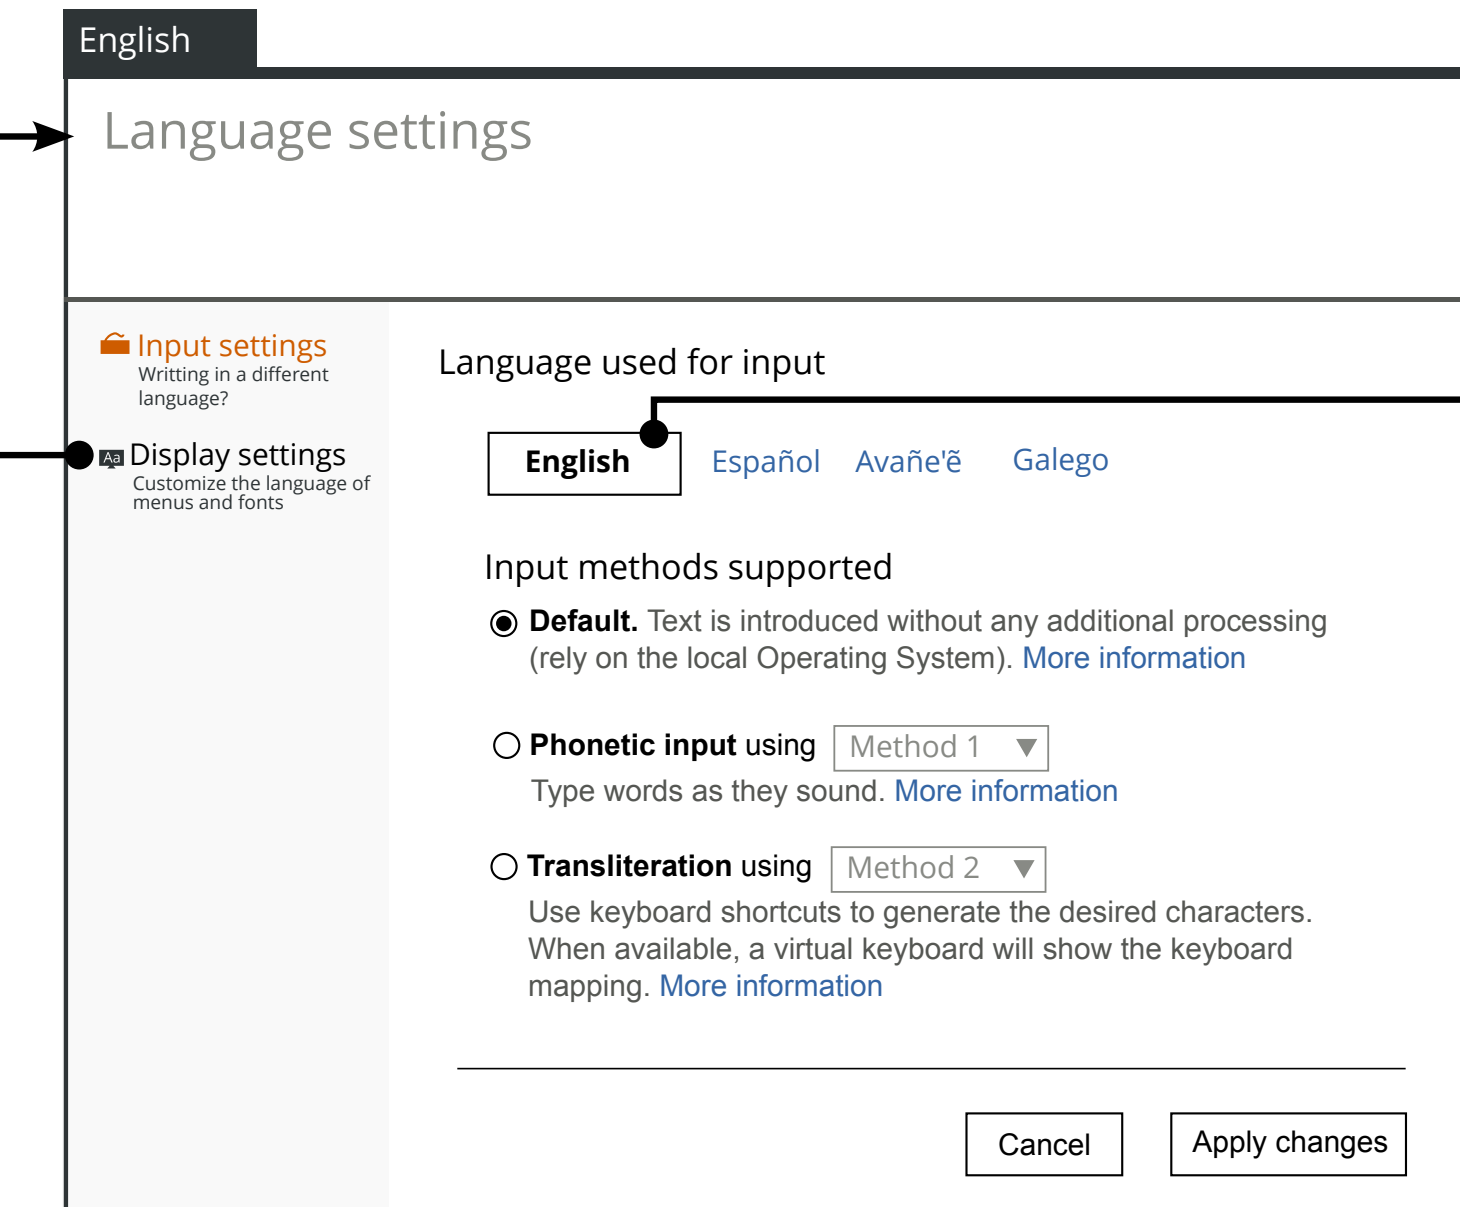

Alternative:

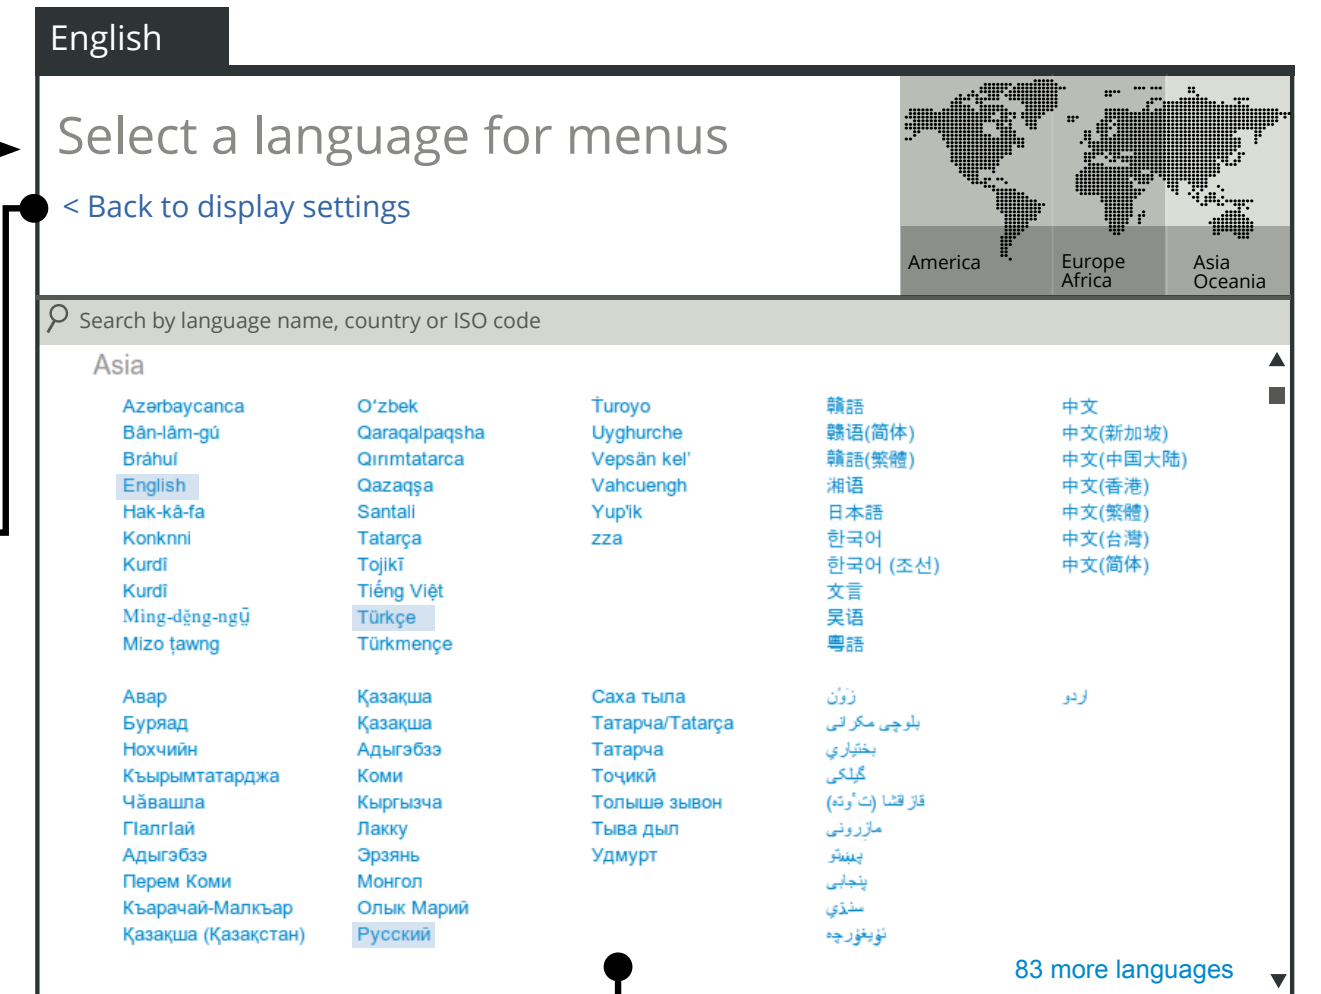

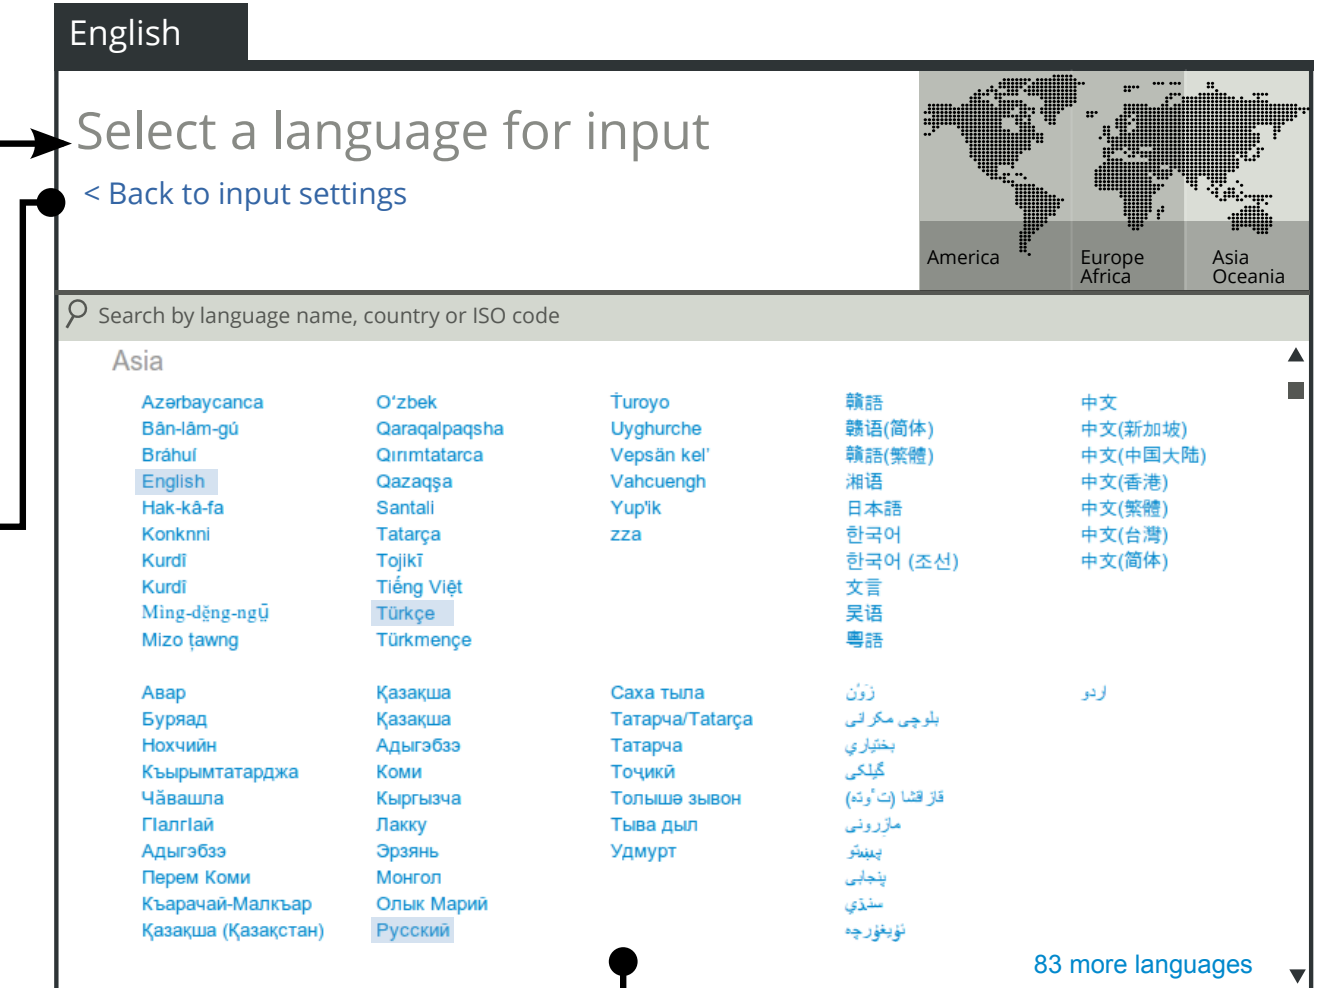

Content language change (common case)

Language settings

Language list (for cases where smart defaults do not work)

Content, menus and input fonts shown only if they are set in different languages for which font selection makes sense.
