D. T. EVENS,
DENTAL SURGEON,
No. 14 Chartres Street,

TAKES this method of informing his friends and the citizens of New Orleans, that he still continues the practice of Dentestry, and is at all times prepared to perform the various operations on the teeth and diseases of the gums; also, the irregularities of children's teeth; natural and artificial teeth inserted from one to a full set, on plate or otherwise as may be required; diseased teeth extracted with the least possible pain, with Mr E.'s late improved key instrument; a diagram of which is shewn above. The advantage of this instrument over any other now in use are these, viz.—1st, the application of the spring attached to the shaft of the instrument and resting on the top of the hook, thereby preventing the possibility of its ever slipping from the tooth when applied, but when the least rotary motion is given, the tooth is loosened and drawn perpendicularly out without the aid of the forceps. From the flattering manner in which such of the faculty as have seen it, have spoken of the same and the decided advantage it has over similar instruments, he deems it useless to degress any further on its merits.

The impossibility of shewing by a draft of the instrument to be understood by all who read, he therefore respectfully invites all those desirous, to come and judge for themselves.

Hours of operation from 8 o'clock A. M. to 6 P.M.

Besides ice creams and sherbets, we have selected a great variety of all sorts of syrups, such as guaves, goos berries, orangeades and all cooling fruit juices.
