FIND CARVED CLIFFS

GOERS IN ARIZONA DISCOVER ROCK OF ANCIENTS.

Herbert Ewing in Search for Flints 4,000 Years Out.

By Ewing in Search for Flints 4,000 Years Out.

New York.--Walking flints in New York State has been popularized in the West, where people have been “digging for flints” for many years. The stones are so numerous in that section of the state that they are considered to be of geological and historical interest.

The flints are found in the sedimentary rocks of the state, and are often used by the Indians for arrowheads and other implements.
