Jis THE ELECTIONS.

We have heard with some surprise, several amon he recent converts to our principles, declare that while hey would undoubtedly vote for General Harrison a the fall, they should nevertheless support the fede

Such a determination is totally indefensible, and altost incomprehensible to men who are guided by reaon. What can be the motive that induces these pro clytes to support General Harrison? The wish for REFORM, we presume. But will the election of Gen. Harrison of itself secure this much desired object?— Will a simple change of rulers effect all that is needed to restore the country to prosperity, and wisdom and patriotism to her councils? Undoubtedly not. The executive is but a co-ordinate department of the govrnment, and almost powerless unless aided by the legslative branches. The success of Gen. Hararson will be an unsubstantial triumph, if we cannot sustain nim by majorities in congress. The next house of re-presentatives may, nay, will nullify every sage and lutary suggestion of the executive, if it be compose f a majority of his political adversaries.

The process of reform must not be confined to the

pection of Van Burgn, and the installation of Hampi-on. We must purge both houses of congress, now ingraced and polluted by a majority of political char-tatans and knaves, who toil for the interests of their ster, not for the benefit of the whole country. The house of representatives can only be reformed by the street popular vote. The friends of Haraison must nd yet cast your suffrages for his enomies. By such n act of political insanity, you would render your resident a more cycler; his will, his counsels, his sen-

IMPORTANT NEWS FROM MEXICO. Castractive-The school formal state in the vicinity of Castractive in this port last night, having left Campacely on the all dame. The papers of that city, which we have received up to the Moth May give at full length the details of the more ments of the federalist, in the vicinity of Castractive in the vicin

passely, and the progress they are making in the siege of that place.

Captain Padevani informed us, that the town of Campestry, after a bombardment of five days, surrendered to the Federalists on the 3d June. On the 3d, the victors were to enter the town, and the government troops were to be despatched the same day to Vera Cruz.

The Federalists intend marching upon Tabasco, where a greet part of the population have declared themselves in their favor, A detachment of a mong particioned in Tabas co. had been sent by the commander to reinforce the besieged; but before they had arrived at their declaration the order was countermanded.

Taurico.—By the schooner Wester, arrived in this port last night, from Tampico, we are informed that the news of he capture of Campeachy had reached that place, and that agreat enthusiasm existed in favor of the cause of Faderali-m.

nothing important. We have also received by the same

arrival the following communication from our corres

Messars. Editore of the N.O. Bee.
GENTLEMEN,—A Mexican schooser escaped from the blockade of the Federalists entered this port last night and gave intelligence that, unless Campenchy received assist ance from the government, she would be obliged to capitulate on the 3d June. This news caused a great agitation in our town, as the event will necessarily be productive of serious consequences on the coast. Already numer has an rious consequences on the coast. Already rumor has announced that Tobasco was blockaded by two Foderal ships-From thence, they will naturally proceed to Yera-Cuz, where they will find no opposition, the town and the port being entirely unprovided with troops. It is reported that the Foderals have a great many friends in this town and in Tampico.

This event will probably improve the commercial affair.

TWO DAYS LATER FROM FRANCE.

By the first salling slip Burgundy, Lewis, just arrived, in 30 days from Havre, we have received two days later accounts from Paris and three from Havre, than that received by the British Quoen.

The most important features of this news is the strong probability of a renewal of war in the East.

The Parha of Egypt has concentrated a vast army in Ryria, and from appearance we should not be surprised to see a blow strark soon. The news expected by the way of Boston will be interesting.

There is nothing particular from Paris.

The Chamber of Deputies was very tway discussing the provisions of a new selt bill. The chamber then proceeded to the Harlan indemnity bill, but did not do any thing.

The French campaign in Africa was to be reopened. The troops were marching to Bildah.

England and Naples are still quarrelling about the sulptur trade.

FRANCE.

England and Naples are still quarrelling about the sulpfur trade.

FRANCE.

The day before yesterday, on the 28th April, the Prussian and Austrian ambases-lors held a conference with Count Palhen at the Russian rembasy.

The king, on the recommendation of Marshal Vales, has conferred crosses of the Legion of Honor on Licuts Lepic and the non-commissioned officers of the Sphis, who fought at the battle of Maserghia and also upon Captain Bardon, sub-Lieutemant Pichon, and a private of the batalion of infantry, who contributed to the success of the day. Many promotions in the African army are said to be waiting his majesty's signature.

mignature.

NAPLES.

The Sud of Marseilles confirms the commencement of hostilities between England and Naples. The Bellerophon, Jasseur, and Hydra, it says, were already in the Bay of Naples, giving chase to every resued under the Neapolitan flag. The Maria Christina (and not the Maria Antoinnette) had been chased, but afterwards released. Several Neapolitan ships had been already captured for the Mydra had on board ssany sailors of that nation.

THE EAST.

A correspondent at Constantingole, writes on the

Hodges is stated to have written by the same conveyance to Lord Ponsonby to say that the obstinacy of Mebemet All was extrease, and that it was useless for him in his consplor capacity to give any permits of departure for the officers of the Turkish flect. Advices from Alexandria, brought by the same beat to the Turkish capital, say that Mekemet Ali and Coloniel Hodges had an extremely angry altercation on the subject of vessels from the Ionian Islands interfering with Egyptian vessels sent of the Albanian casat. This refers to an affair which our readers will readily remember.

The Viceroy had threatened to revolutionise all Albanian and Asia Minor; and Hodges, on the other hand, had said that, if he remained so obstinate England would pulverise him before three months about he passed away. Some other consule, who had an interview with the Viceroy immediately after Coloniel Hodges had left, found it very difficult to pacify him.

The "Sud" of Marseilles has the following from

complete his ruin. He did not believe that a single senator would vote for this compulsory law, standing partillery taken at Nesish, have been sent into this fortress."

The Alexandria correspondent of the "Courrier de Lyon estimates the Egyptian forces now in Syria at 80,000 men, and those in Egypt at 40,000. Besides these, it states, there are 29,000 sailors on the coast who have been trained like infantry, and about 20,000. National Guards.

"Our correspondent at Alexandria," says the Smyrna Journal, "bas sent us the following inf-manion:—After the engagement between the naval forces under Com. Elitott and the Chinese junks, and as soon as the emperor was informed of the event, the gave orders to massacre all the English that might be found within these states; and in consequence of this gave orders to massacre all the English that might be found within these states; and in consequence of this gave orders to massacre all the English that might be found within these states; and in consequence of this gave orders to massacre all the English that might be for China, with orders to give no quarter to the natives." We pub ish this news just as we have received up to 28th February, makes no mention of it. According to this journal, the letters from Afghanistan contain nothing of importance. Prince Hyder Khan, second sen of Dost Mahommed Khan, who was made prisoner at Ghuznee, had arrived at Bombay, and was under surveillance of the governor. Besides a house, servants and equipages, he was allowed 1000 rupees a month."

NEW-ORLEANS BEE COMMERCIAL REPORT.--- SATURDAY, JUNE 13.

[COMMUNICATES.]
The Courier, in commenting on the address of the Young
Men's Tippecanno Association, insists that, because a por-tion of the address declares that no confidence is to be pla Men's Tippecanor Association, insists that, because a portion of the address declares that no confidence is to be placed in a man who is willing to sacrifice his own section of
country, in order to obtain a few southern votes, the conclusion is that a president must be considered a traduct to
the land of his birth. If he entertains southern ferlings—
The address says no such thing: it simply sake the community how they can expect Mr. Van Bunrs to be true to
the Bouth, if he be false to the North. How can a man, who
renousces principles which, for years and years, he had
strusuously maintained, at the critical moment when a few
Bouthern votes are needed, be entitled to Bouthers confidence! What trust would the Bouth repose in a man who
all his life a fansite and abolitionist, and proved such by fair
arts in public life, tells us when he wishes to be elected
president, that he is a "Northern man with Bouthern principles." It is at the best but a poor cleam to the South to
say to her, "I have acted hitherto with the North, but as
I lack your support, I have decided in future to go tor you,
and abandon my section of the country." Yet this is the
claim Mr. Yaw Brane puts forth, and the Courier is horrified that the address will not admit its orthodoxy.
