## **THE DIVISION OF THE (ZODIAC) 27 NAKSHATRAS IN 249 SUBS**

### **THE 249 SUBS OF THE 27 NAKSHATRAS OF THE ZODIAC**

**Krishnamurthi Padathi takes into consideration the 27 nakshatras as mentioned in the first article. These nakshatras are divided in unequal divisions of 249 subs, known as the sub lords.**

**In actual fact, there are only 243 subs. In 6 cases, the same star and the same sub is found in the adjoining signs, as given below, to make them 249 subs totally.**

- 1) In the nakshatra of the Sun in the signs of Aries, Leo and Sagittarius, the sub of Rahu is split into 2 parts:**

**From 29° 13' 20" to 30° and this continues to form 3 additional subs in the following signs of Taurus, Virgo and Capricorn from 0° to 1° 13' 20", thereby giving 3 additional subdivisions.**

- 2) Similarly, the nakshatra of the Jupiter in the signs of Gemini, Libra and Aquarius, the sub of Moon is split into 2 parts: From 29° 26' 40" to 30° and this continues to form 3 additional subs in the following signs of Cancer, Scorpio and Pisces from 0° to 1° 23' 20", thereby giving 3 more additional subdivisions.**

**By adding these 6 sub-divisions to 243, we get 249 subdivisions, known as sub lords, in all.**

**The 249 sub divisions are given below in a tabular form which will definitely help all those who are interested in learning this system of padathi.**
