

Sulyon group

Sulyon group is a contemporary artistic group, in the meaning of working in present art.. And through this path it takes art among people in order to make a communication between their artwork and people.

This group was made through artistic organizations, which works with a nasionalistic system. And working in a traditional way as same as Arabic art, then after a lot of hard work and searching and returning of some artists from foreign countries with knowledge and introduction of new artistic methods, for example (Sherwan can), who brought professional people and organized projects and workshops.. Then artists like (Estrangement team , Nehro shawqi ...etc) helped in the same way, which made this new kind of art work appear. Also some other individual works and attempts, then becoming a group made them develop more, for example those artworks that have been made in the institution of fine arts by (Azar Othman, Ayub raauf, Aryan abubakir) were the main sources of starting up this group. For working more as a group, and making events among people.

Until now Sulyon group made (5) projects, such as:

1. Game project. 2008
2. Border project. 2008
3. Circle project. 2009
4. Media project. 2010
5. Mask and puppet project. 2010

What worth's to talk about is the fact that this group takes the whole responsibilities by itself when it comes to artwork and projects, which some times is hard for them..

For example in their latest project Sulyon group refused to apply for any governmental helps in the financial area of their project, as a protest against the organizations and the ministry of culture for absence of any plans or strategies for cultural developments..
